SECTION III: RISK FACTORS

An investment in Equity Shares involves a high degree of risk. You should carefully consider all the information in this Draft prospectus, including the risks and uncertainties described below, before making an investment in our Equity Shares. In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of this Issue including the merits and risks involved. Any potential investor in, and subscriber of, the Equity Shares should also pay particular attention to the fact that we are governed in India by a legal and regulatory environment in which some material respects may be different from that which prevails in other countries. The risks and uncertainties described in this section are not the only risks and uncertainties we currently face. Additional risks and uncertainties not known to us or that we currently deem immaterial may also have an adverse effect on our business. If any of the following risks, or other risks that are not currently known or are now deemed immaterial, actually occur, our business, results of operations and financial condition could suffer, the price of our Equity Shares could decline, and you may lose all or part of your investment.

Unless otherwise stated in the relevant risk factors set forth below, we are not in a position to specify or quantify the financial or other implications of any of the risks mentioned herein. Unless otherwise stated, the financial information of our Company used in this section is derived from our financial statements prepared in accordance with Indian GAAP and the Companies Act and restated in accordance with the SEBI ICDR Regulations. To obtain a better understanding, you should read this section in conjunction with the chapters titled “*Our Business*” beginning on page 71, “*Industry Overview*” beginning on page 66 and “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” beginning on page 146, of this Draft prospectus as well as other financial information contained herein.

The following factors have been considered for determining the materiality of Risk Factors:

- Some events may not be material individually but may be found material collectively;
- Some events may have material impact qualitatively instead of quantitatively;
- Some events may not be material at present but may have material impact in future.

The numbering of the risk factors has been done to facilitate ease of reading and reference and does not in any manner indicate the importance of one risk factor over another.

The risk factors are classified as under for the sake of better clarity and increased understanding:

INTERNAL RISKS

A. BUSINESS RELATED RISKS

1. *Our business is substantially dependent on certain major customers and loss of any one or more of them would have a material adverse effect on our business.*

Our top ten customers contributed 99.89%, 99.86 %, 99.74 % and 99.92 % of our total revenue from operations for the five months period ended August 31, 2021 and for the year ended March 31, 2021, March 31, 2020, March 31, 2019 respectively. However, the composition and revenue generated from these clients might change as we continue to add new customers in normal course of business. Any decline in our quality standards, growing competition and any change in the demand for our products by these customers may adversely affect our ability to retain them. We are dependent on our relationship and orders from major customers for our revenue as well as cash flows. Any impact on the financial health of any of these customers will have a direct bearing on our revenue and cash. If the working capital cycle increases due to delay in payments from them, then it will have direct bearing on our working capital and hence costs. Further, the loss of such clients may be caused because of competition. There may be factors other than our performance, which may not be predictable, which could cause loss of clients. While we are constantly striving to increase our customer base and reduce dependence on any particular customer, there is no assurance that we will be able to broaden our customer base in any future periods, or that our business or results of operations will not be adversely affected by a reduction in demand or cessation of our relationship with any of our major customers.

2. *Our reliance on third parties for certain aspects of our business, including contract labour/ job work, transportation and logistics exposes us to certain risks.*

We rely on third parties for job work/ contract labour and manpower required for the manufacture of our products, as well as for performance of certain functions and services carried out at our manufacturing and office premises. Job work charges constituted 0.06%, 0.82%, 1.02% and 1.39% of our total expenses for the period ended August 31, 2021 and year ended March 31, 2021, 2020 and 2019 respectively. We also rely on transporters for transport and logistics support. Our reliance on third parties for certain critical outsourced job works and on transporters for transport and logistics may affect our timelines for making delivery to our customers.

As we rely on transport and logistics service providers for transporting a portion of our product supplies, any failure on their part to perform their services in the expected manner could result in us breaching our committed delivery timelines. Factors such as the financial instability of contractors, suppliers, vendors' non-compliance with applicable laws, labour disputes, currency fluctuations, changes in tariff or import policies, severe weather, political uncertainty, terrorist attacks and transport capacity and cost may disrupt our supply chains, which may result in increased costs or delivery delays. Therefore, there is no assurance that third party contractors will be able to meet their contractual commitments to us, or that we will not be required to incur additional costs to remedy any deficiencies in their services. A significant disruption in the availability of contract labour or other third-party services may, in turn, disrupt our operations and adversely affect our inventory management, business and financial condition, at least until alternative sources are arranged.

3. ***The COVID-19 pandemic and resulting deterioration of general economic conditions has impacted our business and results of operations in the past and the extent to which it will impact our future business and results of operations will depend on future developments, which are difficult to predict.***

Since first case being reported in December 2019, the outbreak of COVID-19 has spread globally. The World Health Organization declared the novel coronavirus disease (“COVID-19”) outbreak a Public Health Emergency of International Concern on January 30, 2020, and a pandemic on March 11, 2020. The rapid and diffused spread of COVID-19 and global health concerns relating to this pandemic have had a severe negative impact on, among other things, financial markets, liquidity, economic conditions and trade and could continue to do so or could worsen for an unknown period of time, that could in turn have a material adverse impact on our business, cash flows, results of operations and financial condition, including liquidity and growth. The extent to which the COVID-19 outbreak impacts our business, cash flows, results of operations and financial condition will depend on future developments, including on the duration and severity of the pandemic, the nature and scope of government actions to contain it, and the potential impact on global and national economic conditions, including inflation, interest rates, availability of capital markets, consumer spending rates, energy availability and costs (including fuel surcharges), which are highly uncertain and cannot be predicted. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and are likely to be severe. In addition, while the Government of India in coordination with the state governments have started the bulk immunization process or vaccination drive since January 16, 2021, achieving a complete vaccination scale may take significant amount of time. There is also no assurance that the vaccines that are developed will be fully effective and/ or may not have side effects.

Further, our manufacturing unit is currently operating subject to certain social distancing and additional safety measures, such as, regular temperature checks, regular sanitization, and compulsory use of masks and hand sanitization. While we have not been able to determine any material impact on our operations and results on account of COVID-19 in the previous Fiscal, our Company has witnessed a lower quantum of sales in previous years. In addition, recently, throughout March and April 2021, due to an increase in the number of daily COVID-19 cases, several state governments in India re-imposed lockdowns, curfews and other restrictions to curb the spread of the virus. As a result of the detection of new strains and subsequent waves of COVID-19 infections in several states in India as well as throughout various parts of the world, we may be subject to further reinstatements of lockdown protocols or other restrictions, which may adversely affect our business operations. We continue to closely monitor the impact that COVID-19 may have on our business operations.

4. ***The premises used by our Company i.e., the registered office and manufacturing unit & corporate Office are not owned by our Company and in case of unavailability of these properties, it would impact our operations, results and financial condition adversely.***

Our registered office i.e., at Shyam Kunj, 183A, Sainik Farms, Western Avenue, New Delhi Delhi-110062 and our manufacturing unit & corporate Office i.e., at Hall No. 2, 3, 6, 7 & 8 situated at Ground floor and First floor, Shyam Udyog Parisar, Khasra No. 25/1, 15/3/2 Alier Bhangrola Road, IMT Manesar, Gurgaon - 122505, Haryana is not owned by our Company.

Presently, our Promoter, who owns the premises where our registered office is situated, has given his consent for it to be used for the said purpose without any rent. In the event such arrangements are ceased or terminated, it could adversely affect our operation unless we arrange for similar premises. Any termination of such arrangement or our Promoter's inability to continue the arrangement, could adversely affect our operations. We may not be able to find suitable locations in time or at all in the location required which may cease the various benefits that were reaped earlier. Also, we may have to rent or acquire registered office/manufacturing unit/corporate office location at a rent or price which may be much higher than the prevailing market rates, which would require an immediate cash outflow. This may result in additional cost, disruption of day-to-day activities and increased rent burden which would adversely affect our financial condition. For details regarding properties taken on lease and license refer the section titled “***Our Business***” on page no. 71 of this Draft prospectus.

5. ***An inability to compete effectively in the competitive automotive components industry could result in the loss of customers, which could have an adverse effect on our business, results of operations, financial condition, and future prospects.***

We compete globally with a number of other automotive component manufacturers and distributors that produce and sell products similar to ours. The automotive industry is highly competitive, and we face global competition in our business, which is based on many factors, including product quality and reliability, product range, product design and innovation, manufacturing capabilities, distribution channels, scope and quality, price, customer loyalty and brand recognition. We as business have very little pricing power. As with any other auto component manufacturer our sales and pricing are tightly monitored and controlled by OEMs. We have very less say in pricing and many times we have to accept the margins and aggressive timelines in terms of bringing costs down. We compete with various competitors to retain our existing business as well as winning new business for the new and redesigned existing components of our automotive. Our failure to obtain new business or to retain or increase our existing business could adversely affect our financial results. In addition, we may incur significant expense in preparing to meet anticipated customer requirements which may not be recovered.

We also encounter competition from similar and alternative products. Additionally, as we further expand our presence in emerging markets we face competitive price pressures from low-cost producers in these markets, and we expect such price pressures to increase as our customers continue to expand their manufacturing footprints in these markets, thereby providing opportunities for local manufacturers to compete.

If our competitors outperform our business and develop superior products at a lesser cost in a timely manner, our growth and financial results could be adversely affected. In addition, manufacturers that do not currently compete with us could expand their product portfolios to include products that would compete directly with ours. Changes in the product focus of larger manufacturers could also result in such manufacturers establishing relationships with our customers that reduce or replace entirely our business with those customers. Larger manufacturers could also encourage price competition or acquire small manufacturers in an effort to displace smaller manufacturers. In addition, certain large customers to whom we currently sell certain products could decide to compete with us as manufacturers of these products. Any of these developments, alone or in combination, could have a material adverse effect on our business, financial condition and results of operations. ***Pricing pressure from customers may affect our gross margin, profitability and ability to increase our prices, which in turn may materially adversely affect our business, results of operations and financial condition.***

Pursuing cost-cutting measures while maintaining rigorous quality standards may lead to an erosion of our margins, which may have a material adverse effect on our business, results of operations and financial condition. In addition, estimating amounts of such price reductions is subject to risk and uncertainties, as any price reduction is the result of negotiations and other factors. Accordingly, suppliers must be able to reduce their operating costs in order to maintain profitability. Such price reductions may affect our sales and profit margins. If we are unable to offset customer price reductions in the future through improved operating efficiencies, new manufacturing processes, sourcing alternatives and other cost reduction initiatives, our business, results of operations and financial condition may be materially adversely affected. Our customers also negotiate for larger discounts in price as the volume of their orders increase. In addition, substantially all of our systems and components are customized to specific customer requirements, which requires us to incur significant costs in setting up our capabilities to manufacture these products, which may or may not be fully recovered from the customers. To maintain our profit margins, we focus on developing new systems and components, the benefits of which support stable or increased prices. In addition, we seek price reductions from our suppliers, improved production processes to increase manufacturing efficiency and streamlined product designs to reduce costs.

There can be no assurance that we will be able to avoid future customer price reductions or offset the impact of any such price reductions through continued technology improvements, improved operational efficiencies, cost-effective sourcing alternatives, new manufacturing processes, cost reductions or other productivity initiatives, which may adversely affect our business, financial condition and results of operations.

6. ***Our insurance coverage may not adequately protect us against all material hazards and the policies do not cover all risks.***

Our business could suffer damage from fire, natural calamities, misappropriation or other causes, resulting in losses, which may not be fully compensated by insurance. We maintain a standard fire and special perils insurance policy for certain movable and immovable assets, and for stock and tools and an insurance for Marine transport insurance. Our insurance policies, however, may not provide adequate coverage in certain circumstances and are subject to certain deductibles, exclusions and limits on coverage. Further, with respect to the insurances maintained by us, we cannot assure you that the terms of our insurance policies will be adequate to cover any damage or loss suffered by us or that such coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. Further, there can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time. To the extent that we suffer loss or damage, or successful assertion of one or more large claims against us for events for which we are not insured, or for

which we did not obtain or maintain insurance, or which is not covered by insurance, exceeds our insurance coverage or where our insurance claims are rejected, the loss would have to be borne by us and our results of operations, financial performance and cash flows could be adversely affected.

7. *Our operations have significant raw material requirements, and we may not be able to ensure the availability of the raw materials at competitive prices, which may adversely affect results of our operations.*

The success of our operations depends on our ability to source raw materials at competitive prices. Principal raw materials that we use in our production are aluminium components, brass components, steel components, plastic granules & plastic components, bare PCB, semi-conductor components & pressure die casting components etc. among others. We also purchase products which we use directly as input materials, including materials which do not require any processing. We procure these raw materials from various suppliers in the industry. Our ability to identify and build relationships with reliable vendors contributes to our growth and our successful management of our inventory as well as other aspects of our operations. Our raw material and component suppliers may fail to consistently deliver products of acceptable quality and within stipulated schedules, which may adversely affect our operations. We may be required to replace a vendor if its products or services do not meet our quality or performance standards or if a vendor should unexpectedly discontinue operations due to reasons beyond its or our control (including financing constraints caused by credit market conditions). Change in cost and availability of such raw materials for any reason, including change in the approved suppliers would adversely affect our business, financial condition, results of operations and prospects.

Further, increase in competition and/ or our competitors having established operations and long-term relationships with suppliers may see us facing challenges to secure adequate supply of raw materials or may increase our overall cost of raw materials. However, there is no assurance that third party suppliers will be able to meet their commitments to us, or that we will not be required to incur additional costs to remedy any deficiencies in their services or to obtain alternative sources of supply in the event that our suppliers should default or be delayed in their performance. A significant disruption in supply of raw material may, in turn, disrupt our operations and adversely affect our inventory management, business and financial condition, at least until alternative sources of supply of goods and services are arranged.

8. *Our Company has not placed orders for machinery worth Rs. 895.00 Lakhs for our proposed objects, as specified in the chapter “Objects of the Issue”. Any delay in placing orders, procurement of machinery may delay our implementation schedule and may also lead to increase in price of the machinery, further affecting our revenue and profitability.*

As on date of the Draft prospectus, we have not placed orders for machinery required and have only identified the machinery required to be bought towards proposed objects. However, we are yet to place orders for the machinery worth Rs. 895.00 lakhs as detailed in the “*Objects of the Issue*” on page 57 of this Draft prospectus. These are based on our estimates and on third-party quotations, which are subject to a number of variables, including possible cost overruns, changes in management’s views of the desirability of current plans, change in supplier of machinery, among others, which may have an adverse effect on our business and results of operations. Further, we cannot assure that we would be able to procure the machinery or procure the same within budgeted costs and timelines. Delays in acquisition of the same could result in the cost and time overrun which in turn would have a material adverse effect on our business, results of operations and financial condition. For further details, please refer to the chapter titled “*Objects of the Issue*” on page 57 of this Draft prospectus.

9. *We face foreign exchange risks as we export certain products manufactured by our Company to outside India and import certain raw materials from outside India which could adversely affect our results of operations.*

We import certain raw-materials from overseas market and also export certain products manufactured by our Company to overseas market as such we are exposed to fluctuations in foreign exchange rates between foreign and Indian currencies. We are exposed to the risk of incurring potential losses if currency rates fluctuate significantly. Any such losses on account of foreign exchange fluctuations may adversely affect our results of operations.

10. *We have significant power, water and fuel requirements and any disruption to power or water sources could increase our production costs and adversely affect our results of operations.*

We require substantial power, water and fuel for our manufacturing facilities, and energy costs represent a significant portion of the production costs for our operations. Our Manufacturing Unit is taken on lease from one of our Group Companies i.e., CLH Gaseous Fuel Application Private Limited and the power, fuel and water charges incurred by our Company are included in the rent paid to CLH Gaseous Fuel Application Private Limited. If energy or water costs were to rise, or if electricity or water supplies or supply arrangements were disrupted, our profitability could decline. The cost of electricity from state electricity boards could be significantly higher, thereby adversely affecting our cost of production and profitability. Interruptions of electricity supply can result in production shutdowns, increased costs

associated with restarting production and the loss of production in progress. If energy or water costs were to rise, or if electricity or water supplies or supply arrangements were disrupted, our profitability could decline.

11. ***Our operations are subject to high working capital requirements. If we are unable to generate sufficient cash flows to allow us to make required payments, there may be an adverse effect on our results of operations.***

Our business requires significant amount of working capital and major portion of our working capital is utilized towards debtors, creditors, inventories, security deposits and cash and cash equivalents. As on October 12, 2021, we have been sanctioned financing facilities of Rs. 1368.25 from ICICI Bank and Rs. 1400.00 lakhs (including Fund and Non-Fund based limits) from HDFC Bank Limited. Our inability to maintain sufficient cash flow, credit facility and other sources of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. For further details, please refer to chapter titled “**Statement of Financial Indebtedness**” beginning on page 144 of this Draft prospectus.

12. ***Our Company has reported certain negative cash flows on the basis of Restated Financial Statements, details of which are given below. Sustained negative cash flow could impact our growth and business in the future.***

Our Company has reported certain negative cash flows from its operating, investing and financing activities as per the Restated financial statements and the same are summarized as under:

(Rs. in Lakhs)

Particulars	August 31, 2021	March 31, 2021	March 31, 2020	March 31, 2019
Net Cash Flow from Operating Activities	748.90	298.38	346.68	138.62
Net Cash Flow from Investing Activities	(19.02)	(161.80)	(451.33)	(28.75)
Net Cash Flow from Financing Activities	(762.81)	58.39	112.09	(102.57)

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans, and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows in future, it may adversely affect our business and financial operations.

13. ***We require a number of approvals, NOCs, licenses, registrations and permits in the ordinary course of our business. Some of the approvals are required to be transferred in the name of Shigan Quantum Technologies Limited from Shigan Quantum Technologies Private Limited pursuant to name change of our Company and any failure or delay in obtaining the same in a timely manner may adversely affect our operations.***

We require several statutory and regulatory permits, licenses and approvals to operate our business. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Inability to obtain or non-renewal of the said permits and licenses would adversely affect our Company’s operations, thereby having a material adverse effect on our business, results of operations and financial condition. Further, we are required to keep already obtained valid key approvals such as Tax Registrations, IEC Code, for running our operations in a smooth manner. We have to ensure that we register and renew our intellectual property or trademarks which are currently not registered. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. Further, some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business.

Further, our Company has not applied for registration under Shops and Establishments Act, 1954 for our Registered Office. For further details, please see chapters titled “**Key Industry Regulations and Policies**” and “**Government and Other Approvals**” at pages 79 and 155 respectively of this Draft prospectus.

14. ***Our Promoters play key role in our functioning and we heavily rely on their knowledge and experience in operating our business and therefore, it is critical for our business that our Promoters remain associated with us. Also, our success depends on our key managerial personnel and our ability to attract and retain them. Any loss of our key person could adversely affect our business, operations and financial condition.***

We are highly dependent on few key people in managing operations and if for any reason they were to leave the organisation, it will have an adverse impact on the operations of our Company. The success of our business operations is attributable to our Promoters, Directors and the Key Managerial Personnel. We believe that our relationship with our Promoters, who have rich experience in markets, managing customers and handling overall businesses, has enabled us to experience growth and profitability. Our Promoters have been actively involved in the day-to-day operations and

management since the incorporation of our Company. Further, our Promoters have also promoted other companies/ firms/ ventures and may continue to do so. If they divert their attention to the other companies, we may not be able to function as efficiently and profitably as before. We may have to incur additional costs to replace the services of our Promoters or we may not be able to do so at all, which could adversely affect our business operations and affect our ability to continue to manage and expand our business.

We also depend significantly on the expertise, experience and continued efforts of our technical and servicing team, hence, our performance and success substantially depend on the ability to attract and retain our key employees, including our management team and experienced personnel. There can be no assurance that any member of our senior management or other experienced personnel will not leave us in the future. The lack of or loss of the services of such key persons in the organization could seriously impair our ability to continue to manage and expand our business. Our success is also dependent on our continuous ability to identify, hire, train retain and motivate technical team, servicing team and sales and marketing personnel. Competition for personnel in our industry is intense, and the availability of suitable and qualified candidates is limited. If we fail to hire and retain our employees, the loss of their services could harm our business operations and financial condition could be adversely affected.

15. ***Our Promoters/Directors/Group Companies have provided personal / corporate guarantees for loan facilities obtained by our Company, and any failure or default by our Company to repay such loans in accordance with the terms and conditions of the financing documents could trigger repayment obligations on them, which may impact their ability to effectively service their obligations as our Promoters/Directors and thereby, impact our business and operations.***

Our Promoters/Directors and our Corporate Promoter & Group Companies have provided Personal/ Corporate guarantees towards loan facilities taken by our Company from ICICI Bank Limited and may continue to provide such guarantees and other securities post listing. Any default or failure by us to repay the loans in a timely manner, or at all could trigger repayment obligations of our guarantors in respect of such loans, which in turn, could have an impact on their ability to effectively service their obligations as Promoters/Directors of our Company, thereby having an effect on our business, results of operation and financial condition. Furthermore, in the event that these individuals or companies withdraw or terminate their guarantees, our lenders for such facilities may ask for alternate guarantees, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantees satisfactory to the lender, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows. For further details, please refer to chapter titled “**Statement of Financial Indebtedness**” beginning on page 144 of this Draft prospectus.

16. ***There are outstanding legal proceedings involving our Company, Promoters and Directors. Any adverse decision in such proceedings may have a material adverse effect on our business, results of operations and financial condition.***

We are involved in certain legal proceedings which are pending at different levels of adjudication before various courts, tribunals, enquiry officers, and appellate authorities. We cannot provide assurance that these legal proceedings will be decided in our favour. Any adverse decisions in any of the proceedings may have a significant adverse effect on our business, results of operations, cash flows and financial condition. A summary of the pending civil and other proceedings involving our Company is provided below:

A classification of legal proceedings is mentioned below:

17. Our failure to keep our technical knowledge confidential could erode our competitive advantage.

We possess certain technical knowledge about our products. Our technical knowledge is a significant independent asset, which may not be adequately protected by intellectual property rights such as patent registration. Our technical knowledge is protected only by secrecy. As a result, we cannot be certain that our technical knowledge will remain confidential in the long run. Even if all reasonable precautions, whether contractual or otherwise, are taken to protect our confidential technical knowledge of our products and business, there is still a danger that certain proprietary knowledge may be leaked, either inadvertently or wilfully, at various stages of the production process. A significant number of our employees have access to confidential design and product information and there can be no assurance that this information will remain confidential. Moreover, certain of our employees may leave us and join our various competitors. Although we may seek to enforce non-disclosure agreements in respect of research and development and certain other key employees, we cannot guarantee that we will be able to successfully enforce such agreements. We also have non-disclosure arrangements with a number of our customers and suppliers, as part of the general supply or purchase agreements, but we cannot assure you that such agreements will be successful in protecting our technical knowledge. In the event that the confidential technical information in respect of our products or business becomes available to third parties or to the general public, any competitive advantage that we may have over other companies in the automotive components sector could be harmed. If a competitor is able to reproduce or otherwise capitalise on our technology, it may be difficult, expensive or impossible for us to obtain necessary legal protection. Consequently, any leakage of confidential technical information could have an adverse effect on our business, results of operations, financial condition and future prospects.

18. If we are unable to accurately forecast demand for our products and plan production schedules in advance, our business, cash flows, financial condition, results of operations, and prospects may be adversely affected.

The volume and timing of sales to our customers may vary due to variation in demand for our customers’ products, our customers’ attempts to manage their inventory, design changes, changes in their product mix, manufacturing strategy and growth strategy, and macroeconomic factors affecting the economy in general, and our customers in particular. Our inability to forecast the level of customer demand for our products, process innovation, and value engineering costs as well as our inability to accurately schedule our raw material purchases and production and manage our inventory may adversely affect our business and cash flows from operations. In particular, our inability to accurately forecast demand for products in our emerging product verticals may hinder our planned growth in these verticals.

19. Our Company is dependent on the continuing operation of our manufacturing facilities.

Any significant interruption in manufacturing at our facilities could have a material adverse effect on our business, results of operations and financial condition. Our Company manufactures substantially all of the products at our manufacturing facility located at Gurgaon, which are subject to the normal risks of industrial production, including equipment breakdowns, labour stoppages, natural disasters, industrial accidents, power interruptions etc. In case of any disruption at such facilities, it may adversely affect the manufacturing cycle, and may lead to time over-run in the execution of the project. The manufacturing facility requires a significant amount and continuous supply of electricity and any shortage or non-availability of electricity may adversely affect our operations. For further information, please refer to the chapter “**Our Business**” on page no. 71 of this Draft prospectus.

20. Major fraud, lapses of internal control or system failures could adversely impact our Company’s business.

Our Company is vulnerable to risk arising from the failure of employees to adhere to approved procedures, system controls, fraud, system failures, information system disruptions, communication systems failure and interception during transmission through external communication channels or networks. Failure to protect fraud or breach in security may adversely affect our Company’s operations and financial performance. Our reputation could also be adversely affected by significant fraud committed by our employees, agents, customers or third parties.

21. Product liability and other civil claims and costs incurred as a result of product recalls could harm our business, results of operations and financial condition.

We face an inherent business risk of exposure to product liability or recall claims, in the event that our products fail to perform as expected or such failure results, we may be subject to claims resulting from our manufacturing defects or failure to satisfy the requirements of our customers. These claims may include payment for the replacement of a product.

Even unsuccessful product liability claims would likely require us to incur substantial expenses on litigation, divert management's time, adversely affect our goodwill and impair the marketability of our products. Although, we undergo complete testing in-house we are liable for the quality of the products manufactured by us.

We do not carry insurance for product liability or recall. We cannot assure you that such claims will not be brought against us in the future, and any adverse determination may have an adverse effect on our business, results of operations and financial condition. Further, our business is dependent on the trust our customers have in the quality of our products. Any negative publicity regarding our Company, brand, or products or mishaps resulting from the use of our products, or any other unforeseen events could affect our reputation and our results from operations.

22. *Industrial accidents at our manufacturing facility may adversely affect our operation.*

Our manufacturing facilities are subject to operating risks resulting in fatal accidents which can cause injury to the labour and employees of our Company and this could also cause damage to the property and plant and machinery situated at the factory which could have an adverse effect on our operations. Though, we have taken adequate safety measures in order to avoid such mishaps, but in case of any such happening of the event out of our control, we cannot assure you whether it will be sufficient or not. Further occurrence of such accidents could impact our production schedules, costs, revenue and ability to meet customer demand.

23. *We are subject to stringent labour laws.*

Labour disputes could lead to lost production and increased costs. India has stringent labour legislation that protects the interests of workers, including legislation that sets forth detailed procedures for discharge of employees and dispute resolution and imposes financial obligations on employers upon employee layoffs. As a result of such stringent labour regulations, it is difficult for us to maintain flexible human resource policies, discharge employees or downsize, which may adversely affect our business, financial condition and results of operations. Additional labour unrest could result due to the operative labour union within our workforce. We cannot assure you that there will not be any strikes or work stoppages in the future, which could have an adverse impact on our operations, particularly given our dependence on a large workforce. For further details, please see "*Key Industrial Regulations and Policies*" on page no. 79 of this Draft prospectus.

24. *Any delay or defaults in receipt of payments or dues from our customers could result in a reduction of our profits.*

We regularly commit resources prior to receiving payments from our customers. We may be subject to working capital shortages due to delays or defaults in receipt of payments or dues from such customers. If our customers default in their payments or if any order/ assignment in which we have invested significant resources is delayed, cancelled or curtailed, it could have a material adverse effect on our business, financial condition and results of operations.

25. *Our inability to manage our growth may disrupt our business and reduce our profitability.*

A principal component of our strategy is to broaden the product mix and increase penetration in markets, also expand our global sales. This growth strategy will place significant demands on our management, financial and other resources. It will require us to continuously develop and improve our operational, financial and internal controls. Continuous upgradation increases the challenges involved in retaining high quality human resources, technology upgradation for manufacturing automotive components, financial management, and developing and improving our internal administrative infrastructure. Any inability on our part to manage such growth could disrupt our business prospects, impact our financial condition and adversely affect our results of operations.

26. *Technology failures could disrupt our operations and adversely affect our business operations and financial performance.*

IT systems are critical to our ability to manage our operations. Our IT systems enable us to coordinate our operations, from planning, production scheduling and raw material ordering, invoicing, customer relationship management and decision support. If we do not allocate and effectively manage the resources necessary to build and sustain the proper IT infrastructure, we could be subject to transaction errors, processing inefficiencies, customer service disruptions and, in some instances, loss of customers. In addition, technological advances from time to time may result in our systems, methods or processing facilities becoming obsolete. Any significant upgrade to or replacement of our systems could require considerable capital expenditure, which could affect our results of operations and financial condition.

27. *The present production capacity installed at our manufacturing unit is not fully utilized.*

The installed capacity at our manufacturing unit is not fully utilized. The underutilization of the available capacity can affect our capacity to fully absorb fixed cost and thus may impact our manufacturing efficiency. The underutilization of

installed capacity in future may affect profitability due to increase in per unit fixed cost of production. For further details of installed capacity and utilization, please refer to chapter titled “***Our Business***” beginning on page 71 of the Draft prospectus.

28. *Our business is seasonal in nature.*

Demand for our products is seasonal in nature. As a result, we usually experience relatively weaker sales volume from April to September and somewhat stronger sales in other months. We expect our results of operations will continue to be affected by seasonality in the future.

29. *Our lenders have charge over immovable and movable properties in respect of finance availed by us.*

We have secured our lenders by creating a charge over immovable and movable properties in respect of Working Capital facilities availed by us from ICICI Bank and HDFC Bank Limited as on October 12, 2021. We have been extended such loans against hypothecation of property owned by one of our Group Company i.e., CLH Gaseous Fuel Applications Private Limited.

For further information on the financing and loan agreements along with the total amounts outstanding and the other details, please refer to chapter “***Statement of Financial Indebtedness***” beginning on page 144 of this Draft prospectus.

30. *There is no guarantee that our Equity Shares will be listed on the Stock Exchanges in a timely manner or at all.*

In accordance with Indian law and practice, permission to list the Equity Shares will not be granted until after the Equity Shares have been issued and allotted. Approval will require all other relevant documents authorizing the issuing of our Equity Shares to be submitted. There could be a failure or delay in listing our Equity Shares on the Stock Exchanges. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

31. *Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures and there can be no assurance that we will be able to pay dividends in the future.*

We currently intend to invest our future earnings, if any, to fund our growth. The amount of our future dividend payments, if any, will depend upon our future earnings, financial condition, cash flows, working capital requirements and capital expenditures. Hence, there can be no assurance that we will be able to pay dividends in the future.

32. *The requirements of being a listed company may strain our resources.*

We are not a listed Company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing agreements with the Stock Exchange and compliances of SEBI Listing Regulations which will require us to file audited annual and unaudited half yearly and limited review reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies which may adversely affect the financial position of our Company.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures, internal control over financial reporting and additional compliance requirements under the Companies Act, 2013. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. As a result, management’s attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition and results of operations. In addition, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner.

33. *Our Company shares its registered office with our Group Companies.*

The registered office of our Company located at Shyam Kunj, 183A, Sainik Farms, Western Avenue, New Delhi – 110062, India is shared with our Group Companies i.e., CLH Gaseous Fuel Applications Private Limited and Arion Technology Private Limited. Under Section 12 of Companies Act, 2013, every company is required to maintain a registered office which can receive and acknowledge all communications and notices as may be addressed to the company. As a result of

having the same registered, there may be confusion related to the receipt of documents and notices, which may further lead to miscommunications, loss of documents and conflicts of interests.

For details regarding Group Companies, please refer to Chapter titled “*Our Group Companies*” on page 113.

34. ***Information relating to our production capacities and the historical capacity utilization of our production facilities included in this Draft prospectus is based on certain assumptions and has been subjected to rounding off and future production and capacity utilization may vary.***

Information relating to our production capacities and the historical capacity utilization of our production facilities included in this Draft prospectus is based on various assumptions and estimates of our management, including proposed operations, assumptions relating to availability and quality of raw materials, assumptions relating to operational efficiencies, as well as assumptions in relation to the average density of products manufactured by us. Actual production levels and utilization rates may differ significantly from the estimated production capacities or historical estimated capacity utilization information of our facilities. Undue reliance should therefore not be placed on our production capacity or historical estimated capacity utilization information for our existing facilities included in this Draft prospectus. For further information, see the section titled “*Our Business*” on page 71 of this Draft prospectus.

35. ***The Objects of the Offer for which funds are being raised, are based on our management estimates and have not been appraised by any bank or financial institution or any independent agency. The deployment of funds will be entirely at our discretion, based on the parameters as mentioned in the chapter titled “Objects of the Offer”.***

The fund requirement and deployment, as mentioned in the “*Objects of the Issue*” on page 57 of this Draft prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter “*Objects of the Issue*” is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter “*Objects of the Issue*” will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control. Occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

36. ***The availability of counterfeit products, such as products passed off as our systems and components by others, could adversely affect our goodwill and results of operations.***

Entities in India and abroad could pass off their own products as ours, including counterfeit or pirated products. Certain entities could imitate our brand name, packaging materials or attempt to create look alike products. As a result, our market share could be reduced due to replacement of demand for our systems and components and deficiency in the quality of the counterfeit products will adversely affect our goodwill. We have also invested in our systems and components to distinguish it and to prevent counterfeit versions of our products from being distributed in the markets. The proliferation of counterfeit and pirated products, and the time and attention lost to defending claims and complaints about counterfeit products could have an adverse effect on our goodwill and our business, prospects, results of operations and financial condition could suffer.

37. ***Our Promoters and the Promoter Group will jointly continue to retain majority shareholding in our Company after the Issue, which will allow them to determine the outcome of the matters requiring the approval of shareholders.***

Our Promoters along with the promoter group will continue to hold collectively almost 73.63% of the Post issue Equity Share Capital of our Company. As a result of the same, they will be able to exercise significant influence over the control of the outcome of the matter that requires approval of the majority shareholders’ vote. Such a concentration of the ownership may also have the effect of delaying, preventing or deterring any change in the control of our Company. In addition to the above, our Promoters will continue to have the ability to take actions that are not in or may conflict with our interest or the interest of some or all of our minority shareholders, and there is no assurance that such action will not have any adverse effect on our future financials or results of operations.

38. ***We are subject to certain restrictive covenants in debt facilities provided to us by our lenders.***

We have entered into agreements for availing debt facilities from lenders. Certain covenants in these agreements require us to obtain approval/permission from our lenders in certain conditions. In the event of default or the breach of certain

covenants, our lender has the option to make the entire outstanding amount payable immediately. There can be no assurance that we will be able to comply with these financial or other covenants or that we will be able to obtain consents necessary to take the actions that we believe are required to operate and grow our business.

For further details in this regard, please refer to chapter titled “*Statement of Financial Indebtedness*” beginning on page 144 of this Draft prospectus.

39. *Our Company has in the past entered into related party transactions and may continue to do so in the future*

We have entered into and may in the course of our business continue to enter into transactions specified in the Restated Financial Information contained in this Draft prospectus with related parties that include our Promoters, Directors, Promoter Group and Group Companies. For further details in relation to our related party transactions, please see annexure XXXIII for “*Related Party Transactions*” on page 139 of this Draft prospectus. While we believe that all such transactions have been conducted on an arm’s length basis and in the ordinary course of business, there can be no assurance that we could not have achieved more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that we may enter into related party transactions in future too. The Companies Act, 2013 has brought into effect significant changes to the Indian company law framework, including specific compliance requirements such as obtaining prior approval from audit committee, the board of directors and shareholders for certain related party transactions. There can be no assurance that such transactions, individually or in the aggregate, will not have a material effect on our financial condition and results of operations.

40. *We appoint contract labour for carrying out certain of our operations and we may be held responsible for paying the wages of such workers, if the independent contractors through whom such workers are hired default on their obligations, and such obligations could have an adverse effect on our results of operations and financial condition*

In order to retain flexibility and control costs, our Company appoints independent contractors who in turn engage on-site contract labour for performance of certain of our operations. Although our Company does not engage these labourers directly, we may be held responsible for any wage payments to be made to such labourers in the event of default by such independent contractors. Any requirement to fund their wage requirements may have an adverse impact on our results of operations and financial condition. Any order from a regulatory body or court may have an adverse effect on our business, results of operations and financial condition.

41. *In addition to normal remuneration, other benefits and reimbursement of expenses some of our Directors are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.*

Some of our Directors are interested in our Company to the extent of their shareholding and dividend entitlement in our Company, in addition to normal remuneration or benefits or reimbursement of expenses taken by the Directors of our Company. We cannot assure you that our Directors would always exercise their rights as Shareholders to the benefit and best interest of our Company. As a result, our Directors will continue to exercise significant control over our Company, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting. Our Directors may take or block actions with respect to our business, which may conflict with our best interests or the interests of other minority Shareholders, such as actions with respect to future capital raising or acquisitions. We cannot assure you that our Directors will always act to resolve any conflicts of interest in our favour, thereby affecting our business and results of operations and prospects.

42. *The average cost of acquisition of Equity Shares by our Promoters could be lower than the Issue Price.*

Our Promoters’ average cost of acquisition of Equity Shares in our Company may be lower than the Issue Price as may be decided by our Company, in consultation with the Lead Manager. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer to the chapter titled “*Capital Structure*” beginning on page 47 of this Draft prospectus.

43. *We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the issue proceeds may delay the implementation schedule.*

The proposed fund requirement for our business, as detailed in the section titled “Objects of the Issue” is to be funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the operations. We, therefore, cannot assure that we would be able to execute our future plans/strategy within the given timeframe. For details, please refer to the Chapter titled “*Objects of the Issue*” beginning on page 57 of this Draft prospectus.

44. *There is no monitoring agency appointed by Our Company to monitor the utilization of the Issue proceeds.*

As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only for Offer size above ₹10,000 Lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

ISSUE RELATED RISKS

1. ***There are restrictions on daily/weekly/monthly movements in the price of the Equity Shares, which may adversely affect a shareholders' ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.***

Once listed, we would be subject to circuit breakers imposed by all stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

2. ***After this Issue, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.***

The price of the Equity Shares on the Stock Exchange may fluctuate as a result of the factors, including:

1. Volatility in the Indian and global capital market;
2. Company's results of operations and financial performance;
3. Performance of Company's competitors,
4. Adverse media reports on Company or pertaining to the automobile Industry;
5. Changes in our estimates of performance or recommendations by financial analysts;
6. Significant developments in India's economic and fiscal policies; and
7. Significant developments in India's environmental regulations.

Current valuations may not be sustainable in the future and may also not be reflective of future valuations for our industry and our Company. There has been no public market for the Equity Shares and the prices of the Equity Shares may fluctuate after this Issue. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Issue or that the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market subsequent to this Issue.

3. ***You will not be able to sell immediately on Stock Exchange any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.***

The Equity Shares will be listed on the Stock Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. We cannot assure you that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in the Draft prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance with Section 40 of the Companies Act, 2013, in the event that the permission of listing the Equity Shares is denied by the stock exchanges, we are required to refund all monies collected to investors.

4. ***The Issue price of our Equity Shares may not be indicative of the market price of our Equity shares after the issue.***

The Issue price of our Equity Shares has been determined by fixed price method. This price is based on numerous factors and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuation after the issue and may decline below the issue price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue price. For further details you may refer chapter titled "**Basis for Issue Price**" beginning on the page 70 of this draft prospectus.

Some of the factors which may affect our share price without limitations are as follows:

- Reports on research by analysts.
- Changes in revenue
- Variations in growth rate of our financial indicators such as earning per share, income, profit etc.
- General Market Condition

- Domestic and International Economy.
 - Fuel price movement like Brent prices for crude, LNG, etc.
5. *Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the Trading price of the Equity Shares.*

Any instance of disinvestments of equity shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

EXTERNAL RISKS

A. INDUSTRY RELATED RISKS

1. *Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.*

Our business and industry are regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

2. *Malpractices by some players in the industry affect overall performance of emerging companies.*

The industry in which our Company operates is subject to risk associated with unethical business practices such as unethical marketing, dishonest advertising, questionable pricing practices, inaccurate claims with regards to safety and efficacy of the product etc. Consumers' attitude toward the industry today is dominated by a sense of mistrust, paving a way for regulators for stricter entry barriers and introduction of code of conducts; making the entire industry environment regulated and controlled. Malpractices by some players in the industry affects the overall performance of the emerging Companies like ours as the industry norms are applicable to all at parity. Any unethical business practices by any industry player or intermediary may impact our business and results of operations.

B. OTHER RISKS

1. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Previously, any gain realized on the sale of listed equity shares on or before March 31, 2018 on a stock exchange held for more than 12 months was not subject to long term capital gains tax in India if Securities Transaction Tax ("STT") was paid on the sale transaction and additionally, as stipulated by the Finance Act, 2017, STT had been paid at the time of acquisition of such equity shares on or after October 1, 2004, except in the case of such acquisitions of Equity Shares which are not subject to STT, as notified by the Central Government under notification no. 43/2017/F. No. 370142/09/2017-TPL on June 5, 2017. However, the Finance Act, 2018, now seeks to tax on such long-term capital gains exceeding ` 100,000 arising from sale of equity shares on or after April 1, 2018, while continuing to exempt the unrealized capital gains earned up to January 31, 2018 on such Equity Shares. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares.

2. *Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the financial statements, prepared and presented in accordance with SEBI ICDR Regulations contained in this Draft prospectus.*

As stated in the reports of the Auditor included in this Draft prospectus under chapter "**Restated Financial Statements**" beginning on page 128 the financial statements included in this Draft prospectus are based on financial information that is based on the audited financial statements that are prepared and presented in conformity with Indian GAAP and restated in accordance with the SEBI ICDR Regulations, and no attempt has been made to reconcile any of the information given

in this Draft prospectus to any other principles or to base it on any other standards. Indian GAAP differs from accounting principles and auditing standards with which prospective investors may be familiar in other countries, such as U.S. GAAP and IFRS. Significant differences exist between Indian GAAP and U.S. GAAP and IFRS, which may be material to the financial information prepared and presented in accordance with Indian GAAP contained in this Draft prospectus. Accordingly, the degree to which the financial information included in this Draft prospectus will provide meaningful information is dependent on familiarity with Indian GAAP, the Companies Act and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian GAAP on the financial disclosures presented in this Draft prospectus should accordingly be limited.

3. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

4. *Financial instability in Indian Financial Markets could adversely affect our Company's results of operation and financial condition.*

In this globalized world, the Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, say in the United States of America, Europe, China or other emerging economies, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil. Any prolonged financial crisis may have an adverse impact on the Indian economy, thereby resulting in a material and adverse effect on our Company's business, operations, financial condition, profitability and price of its Shares.

5. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and our industry contained in the Draft prospectus.*

While facts and other statistics in this Draft prospectus relating to India, the Indian economy and our industry has been based on various government publications and reports from government agencies and other agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled "**Industry Overview**" beginning on page 74 of this Draft prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

6. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency a magnitude, which may negatively affect our stock prices.

7. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

8. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of Operations and financial condition.*

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy; disrupt the transportation of goods and supplies, and costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

9. *Natural calamities could have a negative impact on the Indian economy and cause Our Company's business to suffer.*

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

10. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, London, China, Taiwan, Japan, Australia, Sweden, Italy, etc. and other acts of violence may adversely affect the Indian stock markets as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

11. *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

SECTION V: ABOUT THE COMPANY

INDUSTRY OVERVIEW

The information in this section has been extracted from various websites and publicly available documents from various industry sources. The data may have been re-classified by us for the purpose of presentation. Neither we nor any other person connected with the issue has independently verified the information provided in this section. Industry sources and publications, referred to in this section, generally state that the information contained therein has been obtained from sources generally believed to be reliable but their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured, and, accordingly, investment decisions should not be based on such information.

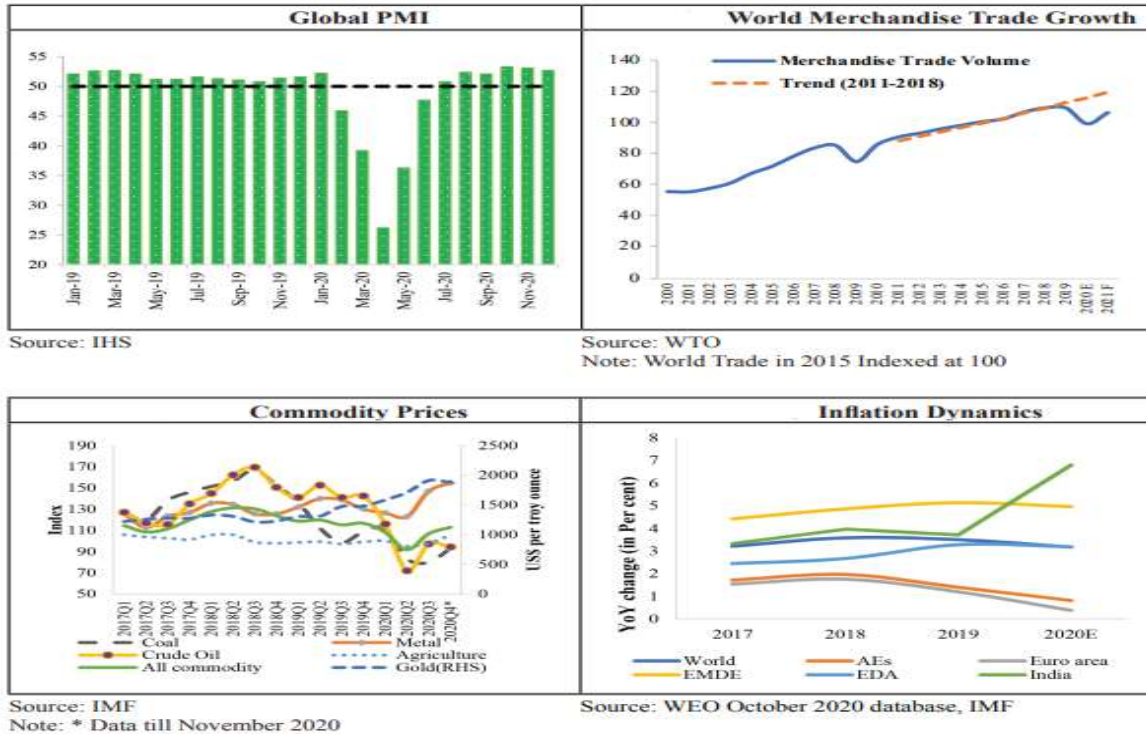

Global Scenario

the pandemic raised unprecedented health challenges on a global scale and posed unique policy dilemmas. Since 2018, the growth momentum in global output was on a weakened footing owing to various factors like trade tensions, political instability, slowed demand and reduction in industrial activity. COVID-19 pandemic accentuated the deceleration by causing severe demand and supply disruptions. Economic activity has been belaboured by reduced mobility, owing both to official restrictions and private decisions; uncertainty regarding the post-pandemic economic prospects and policies has impacted investment; disruptions in education have decelerated human capital accumulation; concerns about the viability of global value chains; and the adverse impact on international trade and tourism.

Global output is expected to witness the sharpest contraction in a century, contracting in the range of 3.5 - 4.3 per cent in 2020 as per the estimates provided by IMF and World Bank. The cumulative loss to global GDP over 2020 and 2021 is estimated at around USD 9 trillion – greater than the economies of Japan and Germany combined. Loss of output is anticipated to be more severe in AEs at 5.4 per cent compared to EMDEs, excluding China, which stood at 5.0 per cent for the year 2020. This is aligned with the more severe impact of the pandemic spread in AEs than EMDEs as was seen above. The estimates for global growth were revised upward through the year with easing of lockdowns and resurgence in economic activity in July-September quarter of the year. The rebound in global activity has, however, been uneven and subdued since the beginning of second half of the year due to resurgence in COVID-19 infection rates in AEs.

Global financial conditions have remained accommodative on the back of continued policy support via unprecedented swift interventions by Central banks. Despite subdued activity and a highly uncertain outlook, global equity markets have rebounded at a faster pace from the March lows, though with notable differentiation across countries, depending on the spread of the virus, the scope of policy support, and sectoral composition. Behind the broad rebound of risky assets, there are clear signs of differentiation across sectors. Some sectors (such as airlines, hotels, energy, and financials) have been more affected by the lockdown and social distancing, whereas those that are less contact-intensive (information technology, communications) have fared better. US dollar index has weakened by 7.4 per cent on year-to-date basis in comparison to most G-10 currencies with countries adopting various policies to alleviate downward pressure on their exchange rates.

Most commodity prices rebounded from their mid-2020 lows as strict lockdowns were gradually lifted and demand firmed, especially from China. The recovery in oil prices was more modest amid concerns over the pandemic's lasting impact on oil demand. Gold emerged as a safe-haven investment in the backdrop of the pandemic prices with prices increasing by 26.2 per cent in November, 2020 as compared to December, 2019. Food prices also surged during the year reflecting supply chain disruptions. As a result of weak demand and subdued energy prices, inflation moderated in most part of the world, deflationary pressure emerged in major AEs. Fall in inflation in EMDEs was less broad based than in AEs, reflecting the effects of sharp currency depreciations as well as rising domestic food prices in some countries.

Indian Economy Overview

The year 2020 was predominated by the COVID-19 pandemic, posing the most formidable economic challenge to India and to the world, since the Global Financial Crisis. Global economic output is estimated to fall by 4.4 per cent in 2020, the sharpest contraction in a century. COVID-19 put emergency brake on an economy that was gaining momentum at the start of the year 2020. India’s GDP is estimated to grow by (-)7.7 per cent in FY2021, composed of a sharp 15.7 per cent decline in H1 and a modest (-)0.1 per cent fall in the second half. Inflation, mainly driven by food prices, remained above 6 per cent for much of the year, given supply disruptions. The softening of CPI inflation recently reflects easing of supply side constraints that affected food inflation.

The weak demand led to a sharper contraction in imports than exports, with Forex reserves rising to cover 18 months of imports. Sharp rise in commercial paper issuances, easing yields, and sturdy credit growth to MSMEs, portend a revamped credit flow mechanism for enterprises to survive and grow. As part of India’s four-pillar strategy, calibrated fiscal and monetary support was provided attuned to the evolving economic situation, cushioning the vulnerable in the lockdown and boosting consumption and investment while unlocking. Long-pending structural reforms in agriculture, mining, labour, etc. were concurrently undertaken for the economy to return to the potential growth path, keeping super-hysteresis at bay. The estimated real GDP growth for FY 2022 at 11 per cent is the highest since independence.

AUTO AND NATURAL GAS SCENARIO IN INDIA

Increased concern on the environmental pollution caused by conventional auto fuels such as diesel/petrol, Compressed Natural Gas (CNG), an environmentally friendly and clean fuel is opted as an alternate fuel. Auto fuel Policy introduced during 2003 by MoPNG aims at to address the issues of vehicle emission, vehicle technology and auto fuel quality. And also, it aims at optimal utilization of oil & gas infrastructure. The use of CNG and LPG would be increased in pollution effected cities.

CNG Vehicles are in use in major states in Maharashtra, Gujarat, Delhi, Andhra Pradesh, Bengal, UP, MP etc. In recent future, it is likely that most Southern cities will also go on CNG. CNG is dispensed using specialized dispensing equipment to the vehicle. In the Automobile sector, there is a continuous growth of CNG stations.

CNG PROGRAMMES IN INDIA

The use of natural gas in the transportation sector is primarily driven by the environmental and public health imperatives. The CNG programme targeted diesel vehicles in India mainly because diesel-related pollutants are either already very high or rapidly increasing in Indian cities.

Air quality gains of the CNG programme have not been investigated adequately in Delhi. However, collage of small and fragmented studies brings out the gains of this programme. The Central Pollution Control Board the apex air quality monitoring agency in Delhi based on the air quality trends has stated that after the implementation of the CNG programme the particulate levels dropped.

BENEFIT OF USING CNG IN VEHICLES

Compressed Natural Gas (CNG), commonly known as "methane", is a natural gas that compresses at a pressure of 220 to 250 bar and is used as an energy source in industry or motor fuel in vehicles. Natural gas is of Russian origin, it is not mixed with domestic gas and is of exceptional quality. The quality of natural gas is excellent due to a high and uniform percentage of methane of 97%. Sources: <http://www.bedemes.com/en/advantages>.

Environmental benefits

CNG burns cleaner when compared to traditional petrol and diesel. Carbon monoxide emissions are reduced by roughly 80 percent, and 44 percent fewer hydrocarbons are produced in comparison to gasoline-powered vehicles. CNG cars also run quieter than gasoline and diesel vehicles, which results in less noise pollution.

Economic Benefits

CNG is cheaper fuel than petrol and diesel. If a vehicle's average consumption is 8l/100 km of petrol, if converted to LPG it's consumption would be around 10l/100 km of gas. But, if we convert it to CNG, it's consumption would be 5,5kg/100 km of methane. It is more than obvious what are the cost savings by switching to CNG.

Safety

In the event of a collision, CNG cylinders are less dangerous than gasoline and diesel tanks because of its size, structure, and location within the vehicle. These cylinders have safety devices which are designed to release the gas if there is a higher-than-normal pressure or temperature. The ignition temperature of CNG is 600°C, which is higher than gasoline (320°C) and diesel (285°C). This means that CNG vehicles are less likely to catch fire under any circumstances. In the event of a leak, CNG is lighter than air, meaning that it will dissipate into the atmosphere, unlike gasoline or diesel which pools on the ground and serves as a fire hazard.

Cleaner Fuel

CNG does not have sulphur, particulate matter, traces of heavy metals or toxic additives in it, which may contaminate your motor oil.

Lower maintenance costs

The maintenance cost of your vehicle will be cut down since there can be longer periods between tune-ups and oil changes.

Less damage to your car

CNG combusting leaves little to no residue when compared to traditional gasoline and diesel. This means that damages to pipes and tubes in the vehicle's engines are reduced.

Better performance

Dedicated natural gas engines are superior in performance to gasoline engines because natural gas has an octane rating of approximately 130, whereas super and unleaded have octane levels of 95 and 98 respectively. One can agree that the benefits that come from using CNG are very appealing. In the future, it can be predicted that many more citizens will be keen on either converting to CNG or purchasing CNG vehicles.

ROAD AHEAD

Energy demand of India is anticipated to grow faster than energy demand of all major economies on the back of continuous robust economic growth. India's energy demand is expected to double to 1,516 Mtoe by 2035 from 753.7 Mtoe in 2017. Moreover, the country's share in global primary energy consumption is projected to increase by two-fold by 2035.

Crude oil consumption is expected to grow at a CAGR of 3.60% to 500 million tonnes by 2040 from 221.56 million tonnes in 2017.

India's oil demand is projected to rise at the fastest pace in the world to reach 10 million barrels per day by 2030, from 5.05 million barrel per day in 2020.

Natural Gas consumption is forecast to increase at a CAGR of 4.18% to 143.08 million tonnes by 2040 from 58.10 million tonnes in 2018.

Diesel demand in India is expected to double to 163 million tonnes (MT) by 2029-30.

As per preliminary data of gasoline sales, fuel consumption in India registered growth in June 2021 and is expected to further recover by end-2021. Gasoline sales by state refiners stood at 2.12 million tonnes in June 2021, registering an increase of 5.7% YoY.

India is set to expand India's natural gas grid to 34,500 kms by adding another 17,000 km gas pipeline. The regasification capacity of the existing 42 MMT per annum will be expanded to 61 MMT per year by the year 2022.

Brief Details Of Technology and Business Process

We have entered into long terms contracts with our OEM customers for existing products and to develop new products for the OEMs. The long-term contracts with OEMs include product specifications, tentative demand and tentative product pricing. OEMs engages us for developing new products for their new vehicle launches or modifications of their existing product portfolio and based on these agreements and discussions with the OEMs, we develop the required products. We have entered into Technology Assistance Agreement (TAA) or licensing for design & technical know-how support with Global technology companies, for manufacturing products viz. Injectors, Electronic controller Units (ECUs), High pressure filters, CNG Pressure Regulator, Filling Valves, Fire Detection and Automatic Fire Suppression Systems, etc. to also bring down the manufacturing cost of products and improve and increase our profit margins.

Manufacturing of product

The first step in our product development is finalization of technical features and drawings of the System with our customers. Then the second step is Advance Product Quality Planning (APQP), which is followed up for development of complete system or any new component/product in the existing system. We manufacture majority of our components / products in-house and few of the components are imported or sourced locally. We conduct an in-house testing of the products under various stress conditions before delivering it to the customers. Our entire production and assembly line are driven by actual customer demand. The process of manufacturing of our products starts only once an order is received from the customer, and the number of units produced are as per the customer schedule. Based on the Despatch schedules received from the Customers, (this is normally received at the beginning of each month), marketing department issues internal indents to Production Department which is based on their existing inventory and the Production Department carries out the manufacturing and kit integration activities post assembly and testing of the components and sub-assemblies.

In order to ensure that all the components manufactured by us meet all the quality parameters laid down by customers, we have a defined Quality Check process for all the materials received in our Plant (including raw material and finished goods) from our suppliers, and all the material undergoes Quality Inspection by the Quality Team. We have invested substantially in buying Quality inspection tools and training of our Quality Check Team to ensure that the Quality standards specified by our customers are met. Also, wherever there is a requirement for statutory test as per automotive standard, we carry out the certification of the components at Government accredited labs like ICAT. We constantly analyze the alternate fuel market in India and upcoming government policies/ regulations which may impact our industry. Based on this analysis, we sometimes develop new products ahead of the demand order from our customers for a particular product/system. We develop the initial prototype of the new product and keep it ready for testing at the customer's end. We believe in keeping abreast of technology trends and upgrade our technology/design accordingly to reduce our import dependence and improve our profit margins.

Phased implementation of Unified Payments Interface

SEBI has issued circular bearing number SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 1, 2018, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/50 dated April 3, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/76 dated June 28, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/85 dated July 26, 2019, circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 and circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 (collectively the “UPI Circulars”) in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circular proposes to introduce and implement the UPI payment mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual had the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six working days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six working days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three working days.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI payment mechanism.

For further details, refer to the General Information Document available on the websites of the Stock Exchange and the Lead Manager.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The responsibility of granting approval for foreign investment under the Consolidated FDI Policy and FEMA has been entrusted to the concerned ministries/departments.

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry (formerly Department of Industrial Policy and Promotion), Government of India (“DPIIT”) issued the Consolidated FDI Policy, which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. Up to 100% foreign investment under the automatic route is currently permitted in the sector of “Manufacturing”, which includes manufacture of cement and concrete products.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of RBI, provided that: (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI Takeover Regulations, (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI policy, and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“Restricted Investors”), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future FDI in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Each Applicant should seek independent legal advice about its ability to participate in the Issue. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Applicant shall intimate our Company and the Registrar to the Issue in writing about such approval along with a copy thereof within the Issue Period.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.

The Equity Shares offered in the Issue have not been and will not be registered under the U.S. Securities Act or any state securities laws in the United States, and unless so registered may not be offered or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. Accordingly, such Equity Shares are being offered and sold (i) outside of the United States in offshore transactions in reliance on Regulation S under the U.S. Securities Act and the applicable laws of the jurisdiction where those offers and sales occur; and (ii) to “qualified institutional buyers” (as defined in Rule 144A under the U.S. Securities Act), pursuant to the private placement exemption set out in Section 4(a) of the U.S. Securities Act.
