The risk factors are classified as under for the sake of better clarity and increased understanding:

A. INTERNAL RISK FACTORS

I. Business Risks/ Company specific Risk

- 1. We are a company with limited operating history, and therefore investors may not be able to assess our prospects on the basis of historical results.***

We were incorporated as a Private limited company in February 26, 2015. As we do not have significant operating and financial history, it may be difficult to evaluate our current or future prospects on the basis of historical results. For Financial Year 2017-18, our Company achieved a capacity utilisation of 62.27% for LED TVs & monitors and 30.20% for Power Banks. Hence, the capacity remains unutilised and scalable operations are yet to be achieved. Our past performance should not be construed as an indication of our future performance. For details regarding to business and financial Information, please refer to Chapter titled “Our Business” and “Financial Statements” on page 102 and 158 respectively of this Prospectus. However, we have been constantly increasing our production and sales and adding new customers and products. Further, our promoters have experience in the domain industry for more than 15 years. Also, we have operating experience of our group company Pioneer Computronix Private Limited, in the fold, which has been in the field of trading and assembling of consumer electronics & mobile accessories products since year 2011.

- 2. We sell majority of our products under the brand name of “Kodak”, “Polaroid”, “Powereye” and “Lappymaster”, which are not owned by us, except “Powereye”. Any deterioration in the reputation and market perception of these brands, may have an adverse effect on our sales, profitability and the implementation of our growth strategy.***

We believe that the recognition and reputation of the brands “Kodak”, “Polaroid”, “Powereye” and “Lappymaster” among customers has contributed significantly to the growth and success of our business. However, we do not own these brands except “Powereye”. The ability to differentiate our products from our competitors through our branding is an important factor in attracting customers. If we fail to maintain our reputation, follow the conditions of license/marketing agreements, enhance our owned/licensed brand recognition or increase positive awareness of our products, it may be difficult to maintain and grow our customer base, which could have a material adverse effect on our business and prospects. However, we have understood that our owned/licensed brand functions as a multiplier for us. It generates desire and differentiation and motivates customers to pay more for our products than they might otherwise. So, we try and maintain brand consistency and standards, which we understand are vital formula for success.

- 3. Any delay or default in payment from our customers could result in the reduction of our profits and affect our cash flows.***

Our operations involve extending credit, ranging typically from 60 to 90 days, to our customers in respect of our products. Consequently, we face the risk of the uncertainty regarding the receipt of these outstanding amounts. Accordingly, we had and may continue to have high levels of outstanding receivables. For the financial year ended 2017-18, 2016-17 and 2015-16, our trade receivables were Rs. 1189.09 Lakhs, Rs. 1417.71 Lakhs and Rs. 558.90 Lakhs respectively, which constituted 19.06%, 39.81% and 22.38% respectively of our gross revenues from operations for the same periods respectively as per restated financial statements. However, in the past there has been no instance of non-receipt of payment from our customers.

4. We may be subject to risks associated with product warranty for our products.

We are subject to risks and costs associated with product warranties on account of supply of defective or inferior quality products within the warranty periods. Any defects in the finished products may result in invocation of such warranties and may require repair resulting in additional costs for our Company. Though these expenses have not gone beyond 0.20% of sales in the past, any increase is not ruled out. The defects in our products or any product liability claim against us could generate adverse publicity, leading to a loss of reputation, customers and/or increase our costs, thereby adversely affecting our reputation, business, results of operations, financial condition and cash flows. However, we manage our risks by adhering to stringent quality norms as prescribed by our license brands.

5. Increase in the cost of, or a shortfall in the availability of our materials and components could have an adverse effect on our business, results of operations and financial condition.

The principal materials and components used by us for manufacturing are power bank casing, Nickel sheet, PCB, Cell, micro USB Cable, TV panel, TV SKD etc. The price and availability of these materials depend on several factors beyond our control, including overall economic conditions, production levels, market demand and competition for such materials, production and transportation cost, duties and taxes and trade restrictions.

Any increase in material prices may affect our procurement of materials and will result in corresponding increases in our product costs, while the increase in the selling price of the finished products may not be proportionate to the increase in material price. Such change in pricing may adversely affect our sales, cash flow and our overall profitability. If we are unable to compensate for or pass on our increased costs to end-customer, such price increases could have an adverse impact on our result of operations, financial condition and cash flows. We also face a risk that one or more of our existing suppliers may discontinue their supplies to us. Any inability on our part to procure materials from alternate suppliers in a timely fashion, or on terms acceptable us, may adversely affect our operations. However, we have been able to source material at cheaper prices as is evident from material consumed to revenue ratio of 83.37%, 89.03% and 92.58% for the Fiscal Years 2017-18, 2016-17 and 2015-16 respectively.

6. We are subject to risks arising from exchange rate fluctuations.

Our Company has been importing various materials and components predominantly from China. The exchange rate between the Rupee and other currencies is variable and may continue to fluctuate in future. Any adverse fluctuations with respect to the exchange rate of any foreign currency for Indian Rupees may affect the Company's profitability. Most of our material is imported on cash basis, hence our foreign currency exposure is limited. Generally, we do not hedge our positions and closely monitor our foreign currency exposure. Our Company has made below imports during the March 31, 2017-18, 2016-17 and 2015-16:

(Rs. in Lakhs)

Sr. No.	Particulars	March 31,		
		2018	2017	2016
1.	Value of Import on CIF Basis	1,269.95	1,289.29	605.85
2.	Royalty Paid	57.89	40.56	-
3.	Tour & Travelling	2.97	0.68	-

7. *Changes in technology may render our current technologies obsolete or require us to make substantial capital investments.*

Modernization and technology up gradation is essential in our product line. Although we strive to keep our technology in line with the latest standards, we may be required to implement new technology or upgrade the existing technology employed by us. Further, the costs in upgrading our technology could be significant which could substantially affect our finances and operations. However, we keep on innovating new products with better technology.

8. *Our top 10 customers contribute approximately 61.91%, 94.88% and 99.64% of our revenues for the financial year ended on March 31, 2018, 2017 and 2016 respectively. Any loss of business from one or more of them may adversely affect our revenues and profitability.*

Our top 10 customers contribute approximately 61.91%, 94.88% and 99.64% of our revenues for the financial year ended on March 31, 2018, 2017 and 2016 respectively. Any decline in our quality standards, growing competition and any change in the demand for our products by these customers may adversely affect our ability to retain them. We cannot assure that we shall generate the same quantum of business, or any business at all, from these customers and loss of business from one or more of them may adversely affect our revenues and profitability. However, the composition and revenue generation from these customers might change as we continue to add new customers in normal course of business and expand our reach through e-commerce portals. However, we intend to retain our customers by offering solutions to address specific needs in a proactive, cost effective and time efficient manner thereby providing better value to each customer.

9. *Our operations are significantly dependent on our ability to successfully identify customer requirement and preferences and gain customer acceptance for our products. If we fail to do so, our business may suffer.*

Our future success depends on our ability to ensure continued demand for our products in existing and proposed markets, which requires us to continuously anticipate and respond in a timely manner to customer requirements and preferences. Further, our success is dependent on our ability to gain customer acceptance for our current and future products. If we are unable to successfully anticipate customer requirements or are unable to modify our current portfolio of products or develop new products, in a timely manner, we may lose customers or become subject to greater pricing pressures. However, with continuous market survey, marketing tools, updates from the industry in which we operate, we try to maintain and reach expectations of customers to meet market trends.

21. *Our Company had negative cash flows from our operating as well as investing activities in some of the previous year(s) as per the Restated Financial Statements and the same are summarized as under:*

Our Company had negative cash flows from our operating as well as investing activities in some of the previous year(s) as per the Restated Financial Statements and the same are summarized as under:

(Rs. in Lakhs)

Particulars	As on March 31,			
	2018	2017	2016	2015
Cash Flow from/ (used in) Operating Activities	(659.21)	(48.12)	(451.79)	0.05
Cash Flow from/ (used in) Investing Activities	(23.57)	(15.39)	(25.22)	-

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet

capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flow in future, it may adversely affect our business and financial operations.

22. *Our Company's failure to maintain the quality standards of the products could adversely impact our business, results of operations and financial condition.*

We have put in place strict quality control procedures as required by our licensed brands but we cannot assure that our products will always be able to satisfy our customers/customer's quality standards. Any negative publicity regarding our Company, or products, including those arising from any deterioration in quality of our products from our vendors, or any other unforeseen events could adversely affect our reputation and our operations. Introduction of new products or for any other reason, any failure on our part to meet their expectation could adversely affect our business, result of operations and financial condition.

23. *Failure to manage our inventory could have an adverse effect on our sales, profitability, cash flow and liquidity.*

The results of operations of our business are dependent on our ability to effectively manage our inventories and stocks. For the Fiscal Years ended 2017-18, 2016-17 & 2015-16, our inventories were Rs. 1,735.84 Lakhs, Rs. 835.20 Lakhs & Rs. 215.75 Lakhs, respectively, which constituted 27.83%, 23.45% & 8.64% respectively of our total revenues for the same periods respectively, as per restated financial statements. This indicates that our inventory levels have increased due to increase in operations. Hence to effectively manage our inventory, we must be able to accurately estimate customer demand and our supply requirements and manufacture/import inventory accordingly. If we misjudge expected customer demand it could adversely impact the results by causing either a shortage of products or an accumulation of excess inventory. Further, if we fail to sell the inventory we manufacture, we may be required to write-down our inventory or create additional vendor financing, which could have an adverse impact on our income and cash flows. However, we closely monitor our inventories and any product which becomes slow moving, we try to sell at discounted prices so as to liquidate inventory.

24. *We have not made any alternate arrangements for meeting our working capital requirements for the Objects of the Issue. Further we have not identified any alternate source of financing the "Objects of the Issue". Any shortfall in raising/meeting the same could adversely affect our growth plans, operations and financial performance.*

As on date, we have not made any alternate arrangements for meeting our working capital requirements for the Objects of the Issue. Further, we have not identified any alternate source of working capital funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds could adversely affect our growth plans. We meet our working capital requirements through our owned funds, internal accruals and debt. Any shortfall in our net owned funds, internal accruals and our inability to raise debt would result in us being unable to meet our working capital requirements, which in turn will negatively affect our financial condition and results of operations. For further details please refer to the chapter titled "Objects of the Issue" beginning on page 84 of this Prospectus.

25. *We face competition in our business from domestic & international competitors. Such competition may have an adverse impact on our business and financial performance.*

We face competition in our product categories and markets in which we operate. We compete with other international and national brands which own and operate well-known brands of good quality goods and may have greater financial resources and negotiation power with suppliers, vendors and other intermediaries than we do. Our Competitors may succeed in developing products that are more effective, more popular or cheaper than any we may develop, which may render our products obsolete or uncompetitive and adversely affect our business and financial results. Some of our competitors may have greater financial resources, better distribution network, technical and marketing resources and generate greater revenues, and therefore may be able to respond better to market changes than we can. Competition

may result in pricing pressures, reduced profit margins or lost market share or a failure to grow our market share. There can be no assurance that we can effectively compete with our competitors in the future, and any such failure to compete effectively may have a material adverse effect on our business, financial condition and results of operations. However, we believe that we compete primarily on the basis of our brand image, price, innovative design, product assortment and reputation for quality.

26. *A shortage or non-availability of electricity may adversely affect our manufacturing operations and have an adverse effect on our business, results of operations and financial condition*

Our manufacturing operations require a sustained supply of electricity which is met by Paschimanchal Vidut Vitran Nigam Limited. In the event there is any disruption of power supply for long from them, the same could result in disruption of our manufacturing process which may adversely affect our results of operations and financial condition of the company. However there have been no such instances of long outages in the past few years and as precautionary measures we have installed generators to support our manufacturing activities in case of shortage of power supply.

27. *Within the parameters as mentioned in the chapter titled ‘Objects of this Issue’ beginning on page 84 of this Prospectus, the fund requirement and deployment mentioned in the Objects of this Issue have not been appraised by any bank or financial institution.*

The fund requirement and deployment, as mentioned in the “Objects of the Issue” on page 84 of the Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan and order position. We cannot assure that the current business plan will be implemented or order shall be executed in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter “Objects of the Issue” is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency.

28. *Any variation in the utilization of the Net Proceeds or in the terms of any contract as disclosed in this Prospectus would be subject to certain compliance requirements, including prior shareholders’ approval.*

We propose to utilize the Net Proceeds as stated under section titled "Objects of the Issue". For further details of the proposed objects of the Issue, please refer to section titled "Objects of the Issue" beginning on page 84 of this Prospectus. At this stage, we cannot determine with any certainty if we would require the Net Proceeds to meet any other expenditure or fund any exigencies arising out of competitive environment, business conditions, economic conditions or other factors beyond our control. In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilization of the Net Proceeds or in the terms of any contract as disclosed in this Prospectus without obtaining the shareholders’ approval, through a special resolution. In the event of any such circumstances that require us to undertake variation in the disclosed utilization of the Net Proceeds, we may not be able to obtain the shareholders’ approval in a timely manner, or at all. Any delay or inability in obtaining such shareholders’ approval may adversely affect our business or operations.

Further, our Promoters or controlling shareholders would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to change the objects of the Issue or vary the terms of such contracts, at a price and manner as prescribed by SEBI. Additionally, the requirement on Promoters or controlling shareholders to provide an exit opportunity to such dissenting shareholders may deter the Promoters or controlling shareholders from agreeing to the variation of the proposed utilization of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoters or the controlling shareholders of our Company will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price prescribed by SEBI.

In light of these factors, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Fresh Issue, if any, or vary the terms of any contract referred to in this Prospectus, even if such variation is in the interest of our Company. This may restrict our Company's ability to respond to any change in our business or financial condition by re-deploying the unutilized portion of Net Proceeds, if any, or varying the terms of contract, which may adversely affect our business and results of operations.

29. *Orders placed by customers may be delayed, modified, cancelled or not fully paid by our customers, which may have an adverse effect on our business, financial condition and results of operations.*

We may encounter problems in executing the orders in relation to our products or executing it on a timely basis. Moreover, factors beyond our control or the control of our customers may result in the postponement of the delivery of products or cause its cancellation. Accordingly, it is difficult to predict with certainty that, when, and to what extent we may be able to deliver the orders placed. Further, we may be bound to certain terms in the contracts entered with the customers any non-adherence to the same may lead to breach of the contract, which may subject us to penalties and liquidated damages. Any failure to adhere to the conditions which may be beyond our control may subject us to liquidated damages which could have an effect on the result of operation and cash flow. However, we have always followed policy of timely delivery of goods, execution of orders and ensuring customer satisfaction.

Improper usage of machinery, handling of materials by labour during production process or otherwise, lifting of materials by humans etc. may result in accidents which could cause injury to our labour, employees, other persons on the site and could also damage our properties there by affecting our operations. 33. *We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.*

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

34. *We have to update the name of our company in some of the statutory approvals and certificates due to the conversion of our Company.*

Some of our statutory approvals and certificates are in the name of Powerful Technologies Private Limited. Since our company was converted into a public limited company pursuant to shareholder's resolution dated February 12, 2018 and fresh certificate of incorporation dated February 28, 2018 we have to update the name Powerful Technologies Limited on the statutory approvals and certificates. We cannot ensure that we will be able to update the said documents in a timely manner.

35. *In case of our inability to obtain, renew or maintain the statutory and regulatory licenses, permits and approvals required to operate our business it may have a material adverse effect on our business.*

We require certain statutory and regulatory permits, licenses and approvals to operate our business. Though we believe that we have obtained those permits and licenses which are adequate to run our business, there is no assurance that there are no other statutory/regulatory requirements which we are required to comply with. Some of the approvals are granted for a fixed period of time and need renewal from time to time. We are required to renew such permits, licenses and approvals. Further, certain licenses and registrations obtained by our Company contain certain terms and conditions, which are required to be complied with. Any default by our Company in complying with the same, may result in inter alia the cancellation of such licenses, consents, authorizations and/or registrations, which may adversely affect our operations. There can be no assurance that the relevant authorities will issue or renew any of such permits or approvals in time or at all. Failure to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business. For further details, please refer to section titled "Government and Other Statutory Approvals" beginning on page 208 of this Prospectus.

36. *If we are unable to raise additional capital, our business prospects could be adversely affected.*

We intend to fund our development plans through our internal accruals, borrowings and capital. We will continue to incur significant expenditure in maintaining and growing our existing manufacturing infrastructure. We cannot assure you that we will have sufficient capital resources for our current operations or any future expansion plans that we may have. While we expect our internal accruals and cash flow from operations to be adequate to fund our existing commitments, our ability to incur any future borrowings is dependent upon the success of our operations. Additionally, the inability to obtain sufficient financing could adversely affect our ability to complete expansion plans. Our ability to arrange financing and the costs of capital of such financing are dependent on numerous factors, including general economic and capital market conditions, credit availability from banks, investor confidence, the continued success of our operations and other laws that are conducive to our raising capital in this manner. If we decide to meet our capital requirements through debt financing, we may be subject to certain restrictive covenants. If we are unable to raise adequate capital in a timely manner and on favorable terms, or at all, our business, results of operations, cash flows and financial condition could be adversely affected.

37. *Our indebtedness and the restrictive covenants imposed upon us in certain debt facilities could restrict*

our ability to conduct our business and grow our operations, which would adversely affect our financial condition and results of operations.

Any failure to comply with the financial or other covenants or obtain the consents necessary to take the actions may affect our business and operations. Further, any failure to service our Company's indebtedness and/or to comply with all of the terms of the said financing documents could have an adverse effect on the operations and/or profitability of our Company. However, we have always maintained financial discipline with Banks and there is no instance of not meeting financial obligations or non-compliance with the terms and condition as on the date of this Prospectus. - 38. Loans availed by our Company have been secured on personal guarantees of our Promoter and Promoter Group members. In case of a default under our loan agreements, any of the personal guarantees provided by our Promoters/Promoter Group/ Third Party may be invoked and/ or the security may also be enforced, which could negatively impact the reputation and net worth of the Promoters. Also, we may face certain impediments in taking decisions in relation to our Company, which in turn would result in a material adverse effect on our financial condition, business, results of operations and prospects and would negatively impact our reputation. In addition, our Promoters and Promoter Group may be required to liquidate their shareholding in our Company to settle the claims of the lenders, thereby diluting their shareholding in our Company. We may also not be successful in procuring alternate guarantees/ alternate security satisfactory to the lenders, as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows. - 43. *Our success depends largely upon the services of our Management and other Key Managerial Personnel and our ability to retain them. Our inability to attract and retain key managerial personnel may adversely affect the operations of our Company.***

Our Promoters and the members of our Promoters Group will continue to retain significant control in the Company after the Issue, which will enable them to influence the outcome of matters submitted to shareholders for approval. Our Promoters and the members of our Promoter Group may have interests that are adverse to the interests of our other shareholders and may take positions with which our other shareholders do not agree.***

After completion of the Issue, our Promoters and the members of our Promoter Group will hold 58.53% of the equity shares capital of the Company and continue to retain a significant control of our Company. As a result, our Promoters and our Promoter Group will have the ability to control our business, including matters relating to any sale of all or substantially all of our assets, the timing and distribution of dividends and the election or termination of appointment of our officers and directors. This control could delay, defer or prevent a change in control of the Company, impede a merger, consolidation, takeover or other business combination involving the Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of the Company even if it is in the Company's best interest. In addition, for so long as our Promoters and the members of our Promoter Group continue to exercise significant control over the Company they may influence the material policies of the Company in a manner that could conflict with the interests of our other shareholders. II. Risk related to this Issue and our Equity Shares

- 48. Any future issue of Equity Shares may dilute your shareholding and sales of our Equity Shares by our Promoters or other major shareholders may adversely affect the trading price of the Equity Shares.***

Any future equity issues by us, including in a primary offering, may lead to the dilution of investors' shareholdings in us. Any future equity issuances by us or sales of its Equity Shares by the Promoters may adversely affect the trading price of the Equity Shares. B. EXTERNAL RISK FACTORS

- 50. Natural calamities and force majeure events may have an adverse impact on our business.***

Natural disasters may cause significant interruption to our operations, and damage to the environment that could have a material adverse impact on us. The extent and severity of these natural disasters determines their impact on the Indian economy. Prolonged spells of deficient or abnormal rainfall and other natural calamities could have an adverse impact on the Indian economy, which could adversely affect our business and results of operations.

51. *The Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Issue.*

The Issue Price of the Equity Shares will be determined by our Company in consultation with the LM and will be based on numerous factors. For further information, see the section titled “*Basis for Issue Price*” on page 89 of this Prospectus. The Issue Price may not be indicative of the market price for the Equity Shares after the Issue. The market price of the Equity Shares could be subject to significant fluctuations after the Issue and may decline below the Issue Price. There can be no assurances that applicants who are allotted Equity Shares through the Issue will be able to resell their Equity Shares at or above the Issue Price.

52. *You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.*

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short-term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and is taxable at 10%, in excess of Rs. 1,00,000. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

53. *We have not prepared, and currently do not intend to prepare, our financial statements in accordance with the International Financial Reporting Standards (“IFRS”). Our transition to IFRS reporting could have a material adverse effect on our reported results of operations or financial condition.*

Public companies in India, including us, may be required to prepare annual and interim financial statements under IFRS in accordance with the roadmap for convergence with IFRS announced by the Ministry of Corporate Affairs, Government of India through a press note dated January 22, 2010 (the “IFRS Convergence Note”). The Ministry of Corporate Affairs by a press release dated February 25, 2011 has notified that 35 Indian Accounting Standards are to be converged with IFRS. The date of implementation of such converged Indian accounting standards has not yet been determined. Our financial condition, results of operations, cash flows or changes in shareholders’ equity may appear materially different under IFRS than under Indian GAAP or our adoption of converged Indian Accounting Standards may adversely affect our reported results of operations or financial condition. This may have a material adverse effect on the amount of income recognized during that period and in the corresponding (restated) period in the comparative Fiscal/period.

54. *Political instability or changes in the Government could adversely affect economic conditions in India generally and our business in particular.*

Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Elimination or substantial change of policies or the introduction of policies that negatively affect the Company’s business could cause its results of operations to suffer. Any significant change in India’s economic policies could disrupt business and economic conditions in India generally and the Company’s business in particular.

- 55. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.***

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

- 56. *Economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.***

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

- 57. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.***

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the Mumbai terrorist attacks and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

- 58. *Investors may be adversely affected due to retrospective tax law changes made by the GoI affecting us.***

Certain recent changes to the Income Tax Act provide that income arising directly or indirectly through the sale of a capital asset of an offshore company, including shares, will be subject to tax in India, if such shares derive indirectly or directly their value substantially from assets located in India. The term "substantially" has not been defined under the Income Tax Act and therefore, the applicability and implications of these changes are largely unclear. Due to these recent changes, investors may be subject to Indian income taxes on the income arising directly or indirectly through the sale of the Equity Shares. In the past, there have been instances where changes in the Income Tax Act have been made retrospectively and to that extent, there cannot be an assurance that such retrospective changes will not happen again.

SECTION III – INTRODUCTION

SUMMARY OF OUR INDUSTRY

OVERVIEW OF INDIAN ECONOMY

India's diverse economy encompasses traditional village farming, modern agriculture, handicrafts, a wide range of modern industries, and a multitude of services. Slightly less than half of the work force is in agriculture, but services are the major source of economic growth, accounting for nearly two-thirds of India's output but employing less than one-third of its labour force. India has capitalized on its large educated English-speaking population to become a major exporter of information technology services, business outsourcing services, and software workers.

Thus, the country is attracting many global majors for strategic investments owing to the presence of vast range of industries, investment avenues and a supportive government. Huge population, mostly comprising the youth, is a strong driver for demand and an ample source of manpower.

With 1.33 billion people and the world's fourth-largest economy, India's recent growth and development has been one of the most significant achievements of our times. Over the six and half decades since independence, the country has brought about a landmark agricultural revolution that has transformed the nation from chronic dependence on grain imports into a global agricultural powerhouse that is now a net exporter of food. Life expectancy has more than doubled, literacy rates have quadrupled, health conditions have improved, and a sizeable middle class has emerged. India is now home to globally recognized companies in pharmaceuticals and steel and information and space technologies, and a growing voice on the international stage that is more in keeping with its enormous size and potential.

GDP and Other Indicators

India's gross domestic product (GDP) at constant prices grew by 7.2 per cent in September-December 2017 quarter as per the Central Statistics Organisation (CSO). Corporate earnings in India are expected to grow by 15-20 per cent in FY 2018-19 supported by recovery in capital expenditure, according to JMFInancial.

The tax collection figures between April 2017- February 2018 show an increase in net direct taxes by 19.5 per cent year-on-year and an increase in net indirect taxes by 22.2 per cent year-on-year.

India has retained its position as the third largest startup base in the world with over 4,750 technology startups, with about 1,400 new start-ups being founded in 2016, according to a report by NASSCOM.

India's labour force is expected to touch 160-170 million by 2020, based on rate of population growth, increased labour force participation, and higher education enrolment, among other factors, according to a study by ASSOCHAM and Thought Arbitrage Research Institute.

India's foreign exchange reserves were US\$ 422.53 billion in the week up to March 23, 2018, according to data from the RBI.

INDUSTRY OVERVIEW

Consumer Durables / Electronics

India is becoming home to a growing middle-class population. Increasing disposable income has led to increased consumer demand for electronics products especially advanced TVs, mobile phones, and computers. This surge is huge which shows a positive outlook for the industry.

Consumer durables/light electricals market in India increased at 11% CAGR between FY12-17 to reach Rs 1.4 trillion (US\$ 21.70 billion). The industry is expected to grow at 13% CAGR and reach Rs 3 trillion (US\$ 46.54 billion) by 2020. Urban markets account for the major share (65%) of total revenues in the consumer durables sector in India. There is a lot of scope for growth from rural markets with consumption expected to grow in these areas as penetration of brands increases. Consumer electronics exports from India reached US\$ 270.08 million during April-December 2017. Also demand for durables like refrigerators as well as consumer electronic goods are likely to witness growing demand in the coming years in the rural markets as the government plans to invest significantly in rural electrification.

Growing awareness, easier access, and changing lifestyles have been the key growth drivers for the consumer market. The Government of India's policies and regulatory frameworks such as relaxation of license rules and approval of 51% foreign direct investment (FDI) in multi-brand and 100% in single-brand retail are some of the major growth drivers for the consumer market.

Power Bank Market

The power bank market is expected to grow at a CAGR of 21.22% between 2017 and 2022 and is likely to be valued at USD 25.16 billion by 2022. The key driving factors for the growth of the market include the increasing usage of electronic devices such as smartphones and tablets, technological advancements, and electric outage in certain countries. However, the major restraining factors for the growth of this market are improvement in the battery capacity of electronic devices and increasing adoption of wireless charging technology in consumer electronic devices.

The market for power banks with a capacity range of 12500-15499mAh is expected to grow at a high rate between 2017 and 2022. The increased battery capacity of mobile devices and laptops require high capacity power banks to recharge these devices; this is expected to drive the growth of the market.

Smartphones hold the largest size of the power bank market; the market for smartphones is expected to grow at a high rate between 2017 and 2022. The increasing penetration of smartphones, along with the extensive use of Internet services, is draining the battery power of smartphones rapidly. Hence, the demand for power banks to run smartphones for a longer duration is increasing in the market.

The market for power banks in Europe is expected to grow at a high rate between 2017 and 2022. The manufacturers in Europe are continuously seeking for new growth opportunities by focusing on new technological developments in the power bank market. In addition, the presence of a large number of techno savvy consumers with high disposable income contributes to the growth of the power bank market in Europe.

The key players operating in the power bank market include Beijing Xiaomi Technology Co., Ltd. (China), Lenovo Group Ltd. (China), Microsoft Corp. (US), Panasonic Corp. (Japan), Sony Corp. (Japan), ADATA Technology Co., Ltd. (Taiwan), AsusTek Computer Inc. (Taiwan), Ambrane India Pvt. Ltd. (India), Anker Technology Co. Ltd. (US), Intex Technologies (India), OnePlus Technology (Shenzhen) Co., Ltd. (China), and uNu Electronics Inc. (US) Ltd. (India).

Consumer Electronics (TV Segment)

India's electronics market stood at Rs 6500 billion in FY17. The consumer electronics market is estimated to be between Rs 750-800 billion. The television market forms about 25% the major component of the consumer electronics market, it is estimated that the TV market is between Rs 650-700 billion. India has the world's third largest TV industry. It has grown at 12% CAGR over FY09-16 period, it is expected that the TV industry will grow at 15% CAGR over the next 3 years and stand at Rs 1000 billion. Penetration of TVs per 1000 population in India stands at 179, this is in comparison to 856 and 772 per 1000 in USA and China. The average penetration of TV sets per 1000 in the world is 538. There is immense scope of increase in TV penetration levels in India. Technological developments in the TV industry have led to the replacement of cathode ray tube display TVs (CRT) to flat panel displays like plasma, LCD and recently LED TVs. Major TV players like LG, Samsung, Sony are introducing new technologies like curved panel display, OLEDs and 3D televisions in the market. The Indian TV market is 12 Mn units and is growing by 17%. Majority of the sales are in flat panel display category with CRTs having a negligible share. It is expected going forward that CRT display TVs will be totally replaced by flat panel display TVs. Major tilt is also seen towards LED TVs as price differential between LCD and LED TVs is narrowing. Some of the major players have stopped production of LCDs and are concentrating on LED and smart TVs. 60% of sales in the flat panel segment are in the 32+ inch category. This is the fastest growing category in the TV market. TVs in the less than 32inch category are losing market share. Major sales of TVs come from north and west India. Samsung, LG and Sony are the market leaders in the TV market with combined market share of 70%. Samsung is the leader with 27% followed by LG and Sony which have market shares of 25% and 18% respectively. Global giants are facing competition from home grown Indian companies like VU technologies, Intex and Micromax. These companies target tier 2 & 3 towns, sell their products at 30-35% discount to international brands, and have tie ups with e-commerce players to sell their products. The three players combined have a market share of 20% of the flat panel display market.

SECTION V – ABOUT THE COMPANY AND THE INDUSTRY

OVERVIEW OF INDIAN ECONOMY

India's diverse economy encompasses traditional village farming, modern agriculture, handicrafts, a wide range of modern industries, and a multitude of services. Slightly less than half of the work force is in agriculture, but services are the major source of economic growth, accounting for nearly two-thirds of India's output but employing less than one-third of its labour force. India has capitalized on its large educated English-speaking population to become a major exporter of information technology services, business outsourcing services, and software workers.

Thus, the country is attracting many global majors for strategic investments owing to the presence of vast range of industries, investment avenues and a supportive government. Huge population, mostly comprising the youth, is a strong driver for demand and an ample source of manpower.

With 1.33 billion people and the world's fourth-largest economy, India's recent growth and development has been one of the most significant achievements of our times. Over the six and half decades since independence, the country has brought about a landmark agricultural revolution that has transformed the nation from chronic dependence on grain imports into a global agricultural powerhouse that is now a net exporter of food. Life expectancy has more than doubled, literacy rates have quadrupled, health conditions have improved, and a sizeable middle class has emerged. India is now home to globally recognized companies in pharmaceuticals and steel and information and space technologies, and a growing voice on the international stage that is more in keeping with its enormous size and potential.

GDP and Other Indicators

India's gross domestic product (GDP) at constant prices grew by 7.2 per cent in September-December 2017 quarter as per the Central Statistics Organisation (CSO). Corporate earnings in India are expected to grow by 15-20 per cent in FY 2018-19 supported by recovery in capital expenditure, according to JMFInancial.

The tax collection figures between April 2017- February 2018 show an increase in net direct taxes by 19.5 per cent year-on-year and an increase in net indirect taxes by 22.2 per cent year-on-year.

India has retained its position as the third largest startup base in the world with over 4,750 technology startups, with about 1,400 new start-ups being founded in 2016, according to a report by NASSCOM.

India's labour force is expected to touch 160-170 million by 2020, based on rate of population growth, increased labour force participation, and higher education enrolment, among other factors, according to a study by ASSOCHAM and Thought Arbitrage Research Institute.

India's foreign exchange reserves were US\$ 422.53 billion in the week up to March 23, 2018, according to data from the RBI.

FDI in India

FDI equity inflows to the services sector grew by 15.0% during 2017-18 (April-October). It has been possible because the Government has undertaken a number of reforms to ensure that India remains an increasingly attractive investment destination, which includes announcement of National Intellectual Property Rights (IPR) policy, implementation of GST, reforms for ease of doing business.

A series of major reforms undertaken over the past year will allow real GDP growth to reach 6.75 percent this fiscal and will rise to 7.0 to 7.5 percent in 2018-19, thereby re-instating India as the world's fastest growing major economy. This was stated in the Economic Survey 2017-18 tabled in Parliament today by the Union Minister for Finance and Corporate Affairs, Shri Arun Jaitley. It said that the reform measures undertaken in 2017-18 can be strengthened further in 2018-19.

The survey underlines that due to the launch of transformational Goods and Services Tax (GST) reform on July 1, 2017, resolution of the long-festering Twin Balance Sheet (TBS) problem by sending the major stressed companies for resolution under the new Indian Bankruptcy Code, implementing a major recapitalization package to strengthen the public sector banks, further liberalization of FDI and the export uplift from the global recovery, the economy began to accelerate in the second half of the year and can clock 6.75 percent growth this year. The survey points out that as per the quarterly estimates; there was a reversal of the declining trend of GDP growth in the second quarter of 2017-18, led by the industry sector. The Gross Value Added (GVA) at constant basic prices is expected to grow at the rate of 6.1 per cent in 2017-18 as compared to 6.6 per cent in 2016-17. Similarly, Agriculture, industry and services sectors are expected to grow at the rate of 2.1 per cent, 4.4 per cent, and 8.3 per cent respectively in 2017-18. The survey adds that after remaining in negative territory for a couple of years, growth of exports rebounded into positive one during 2016-17 and expected to grow faster in 2017-18. However, due to higher expected increase in imports, net exports of goods and services are slated to decline in 2017-18. Similarly, despite the robust economic growth, the savings and investment as a ratio of GDP generally declined. The major reduction in investment rate occurred in 2013-14, although it declined in 2015-16 too. Within this the share of household sector declined, while that of private corporate sector increased.

Global Economy

Global growth is expected to tick up to 3.9 percent this year and next, supported by strong momentum, favorable market sentiment, accommodative financial conditions, and the domestic and international repercussions of expansionary fiscal policy in the United States. The partial recovery in commodity prices should allow conditions in commodity exporters to gradually improve.

Over the medium term, global growth is projected to decline to about 3.7 percent. Once the cyclical upswing and US fiscal stimulus have run their course, prospects for advanced economies remain subdued, given their slow potential growth. In emerging market and developing economies, in contrast, growth will remain close to its 2018–19 level as the gradual recovery in commodity exporters and a projected increase in India’s growth provide some offset to China’s gradual slowdown and emerging Europe’s return to its lower-trend growth rate. Nevertheless, 40 emerging market and developing economies are projected to grow more slowly in per capita terms than advanced economies, failing to narrow income gaps vis-à-vis the group of more prosperous countries.

Key Indicators

Global growth surprised on the upside in the second half of 2017 amid strengthening industrial production and trade.

INDUSTRY OVERVIEW

Consumer Durables / Electronics

India is becoming home to a growing middle-class population. Increasing disposable income has led to increased consumer demand for electronics products especially advanced TVs, mobile phones, and computers. This surge is huge which shows a positive outlook for the industry.

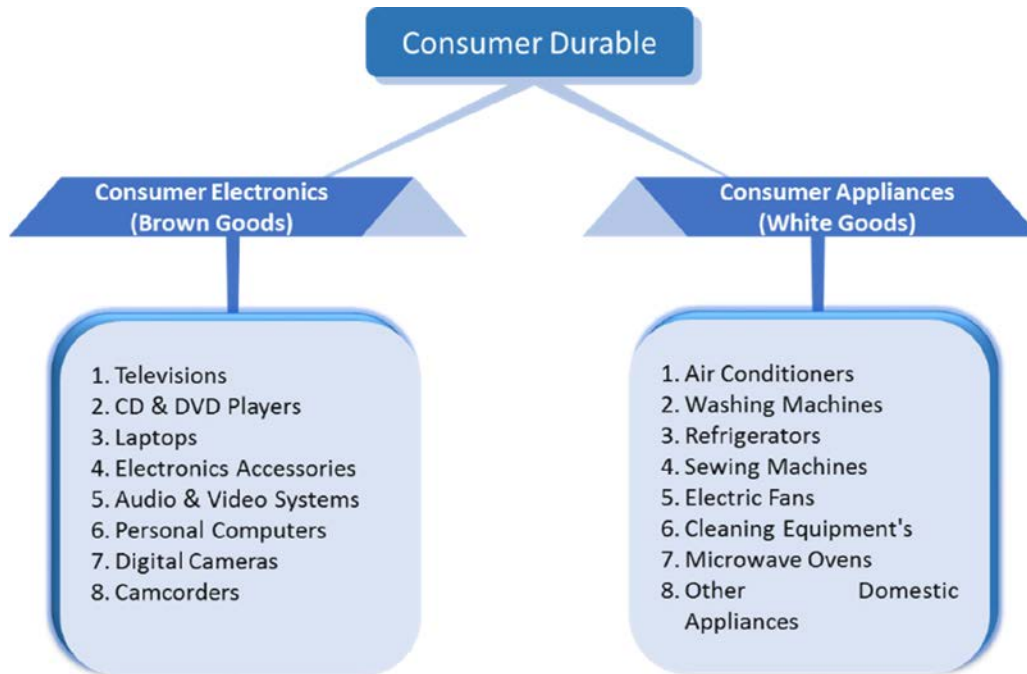

Consumer durables/light electricals market in India increased at 11% CAGR between FY12-17 to reach Rs 1.4 trillion (US\$ 21.70 billion). The industry is expected to grow at 13% CAGR and reach Rs 3 trillion (US\$ 46.54 billion) by 2020. Urban markets account for the major share (65%) of total revenues in the consumer durables sector in India. There is a lot of scope for growth from rural markets with consumption expected to grow in these areas as penetration of brands increases. Consumer electronics exports from India reached US\$ 270.08 million during April-December 2017. Also demand for durables like refrigerators as well as consumer electronic goods

are likely to witness growing demand in the coming years in the rural markets as the government plans to invest significantly in rural electrification.

Growing awareness, easier access, and changing lifestyles have been the key growth drivers for the consumer market. The Government of India's policies and regulatory frameworks such as relaxation of license rules and approval of 51% foreign direct investment (FDI) in multi-brand and 100% in single-brand retail are some of the major growth drivers for the consumer market.

Technological developments in the TV industry have led to the replacement of cathode ray tube display TVs (CRT) to flat panel displays like plasma, LCD and recently LED TVs. Major TV players like LG, Samsung, Sony are introducing new technologies like curved panel display, OLEDs and 3D televisions in the market. The Indian TV market is 12 Mn units and is growing by 17%. Majority of the sales are in flat panel display category with CRTs having a negligible share. It is expected going forward that CRT display TVs will be totally replaced by flat panel display TVs. Major tilt is also seen towards LED TVs as price differential between LCD and LED TVs is narrowing. Some of the major players have stopped production of LCDs and are concentrating on LED and smart TVs. 60% of sales in the flat panel segment are in the 32+ inch category. 3) Significant Accounting Policies

1. Operating Cycle

Operating cycle is the time between the acquisition of assets for processing and their realization in cash or cash equivalent.

2. Revenue Recognition

Revenue (Income) is recognized on accrual basis when no significant uncertainty as to measurability or collect ability exists.

Revenue has been recognized on sales excluding of any taxes and including of any other receipts or income on account of exchange fluctuations and claims receivables.

3. Use of estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities on the date of the financial statements and the results of operations during the reporting periods. Although these estimates are based upon management's best knowledge of current events and actions, actual results could differ from those estimates and revisions, if any, are recognized in the current and future periods.

4. Inventory

Raw Material is valued at Cost. Work-in-Progress is valued at cost. Finished Goods are valued at cost or net realizable value whichever is lower. Cost is determined by the FIFO method.

5. Fixed Assets

Fixed Assets are stated at cost less accumulated depreciation and impairments, if any. The cost includes cost of acquisition/construction, installation.

6. Depreciation

Depreciable amount for assets is the cost of an asset, or other amount substituted for cost, less its estimated residual value. Depreciation on tangible fixed assets have been provided on Written Down Value method as per the useful life prescribed in Schedule II to the Companies Act, 2013 effective from 1st April 2014 and depreciation on tangible fixed assets upto 31st March 2014 was provided at the rates and manner prescribed in schedule in Schedule XIV of the Companies Act, 1956.

7. Taxation

Current income tax expense comprises taxes on income from operations in India and in foreign jurisdictions. Income tax payable in India is determined in accordance with the provisions of the Income Tax Act, 1961. Tax expense relating to foreign operations is determined in accordance with tax laws applicable in countries where such operations are domiciled.

Minimum Alternative Tax (MAT) paid in accordance with the tax laws in India, which gives rise to future economic benefits in the form of adjustment of future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal income tax after the tax holiday period. Accordingly, MAT is recognized as an asset in the balance sheet when the asset can be measured reliably and it is probable that the future economic benefit associated with the asset will fructify. Deferred tax expenses or benefit is recognized on timing differences beings the difference between taxable income and accounting income tax originate in one period and is likely to reverse in one or more subsequent periods. Deferred tax assets and liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date.

In the event of unabsorbed depreciation and carry forward of losses, deferred tax assets are recognized only to the extent that there is virtual certainty that sufficient future taxable income will be available to release such assets. In other situations, deferred tax assets are recognized only to the extent that there is reasonable certainty that sufficient future taxable income will be available to realize these assets.

Advance taxes and provisions for current income taxes are presented in the balance sheet after off-setting advance taxes paid and income tax provisions arising in the same tax jurisdiction for relevant taxpaying units and where the Company is able to and intends to settle the asset and liability on a net basis.

The Company offsets deferred tax assets and deferred tax liabilities if it has a legally enforceable right and these relate to taxes on income levied by the same governing taxation laws.

8. Borrowing Cost

As per Accounting Standard -16, borrowing cost attributable to the acquisition of fixed assets is capitalized as part of the cost of fixed assets till the date it is put to use. Other borrowing cost is recognized as expenditure in the period in which they are accrued.

9. Impairment of Assets

At each balance sheet date, the management reviews the carrying amounts of its assets included in each case generating unit to determine whether there is any indication that those assets were impaired. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of impairment loss. Recoverable amount is the higher of an asset's net selling price and value in use. In assessing value in use, the estimated future cash flows expected from the continuing use of the asset and from its disposal are discounted to their present value using a pre-tax discount rate that reflects the current market assessments of time value of money and the risks specific to the asset.

Reversal of impairment loss is recognized immediately as income in the statement of profit and loss.

10. Earnings per share

The company reports basic and diluted earnings per share (EPS) in accordance with the Accounting Standard 20(AS-20) issued by the Institute of Chartered Accountants of India. The basic EPS is computed by dividing the net profit or loss for the year by weighted average number of equity shares outstanding, during the accounting period. Diluted earnings per equity share are computed by using the weighted average number of equity shares and dilutive potential equity shares outstanding during the period.

11. Foreign currency transactions

Transactions denominated in foreign currency are recorded at the exchange rate prevailing on the date of the transaction.

Assets and liabilities denominated in foreign currency are converted at the exchange rates prevailing as at the balance sheet date. Exchange differences other than those relating to acquisition of fixed assets are recognized in the statement of profit and loss. Exchange differences relating to purchase of fixed assets are adjusted to the carrying cost of fixed assets

12. Provisions, Contingent liabilities and Contingent assets

A provision is recognized when the Company has a present obligation as a result of past event and it is probable that an outflow of resources will be required to settle the obligation, in respect of which reliable estimate can be made. Provisions (excluding retirement benefits) are not discounted to its present value and are determined based on best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet and adjusted to reflect the current best estimates. Contingent liabilities are not recognized in the financial statements. A contingent asset is neither recognized nor disclosed in the financial statements.

13. Related Party Transactions

Disclosure is being made separately for all the transactions with related parties as specified under Accounting Standard 18, issued by the Institute Chartered Accountants of India.

14. Micro, Small & Medium Enterprises Development Act, 2006

The Company has not received any memorandum (as required to be filed by the suppliers with the notified authority under the Micro, Small and Medium Enterprises Development Act, 2006) claiming their status as Micro, Small and Medium Enterprises. Consequently, the amount paid/ payable to these parties during the year is not ascertainable. Consequently, as of now, it is neither possible for the Company to ascertain whether payment to such enterprises has been made within 45 days from the date of acceptance of supply of goods or services rendered by a supplier nor to give the relevant disclosures as required under the Act. This has been relied upon by the auditors.
