3. ***We may face competition from a number of international and domestic third-party logistics companies, which may adversely affect our market position and business.***

While the logistics industry in India is generally fragmented, we may face competition from a number of international and domestic third-party logistics service providers, especially as the trend toward larger-scale logistics providers in India continues. Some of our competitors may have significantly greater financial and marketing resources and operate larger networks than we do. In the regions of India in which we may operate, we may face competition from certain regional logistics services providers and the unorganized sector, some of which have market presence in their respective areas of operation. We may also face competition from new entrants into the logistics service industry. If we cannot maintain, or gain, sufficient market presence or are unable to differentiate ourselves from our competitors, we may not be able to compete effectively. Further, if we cannot maintain cost competitiveness within the third-party logistics industry, including, in the event we choose to expand and incur excessive fixed costs or if we experience a disproportionate increase in costs in comparison to our competitors, our customers could choose to service their third-party logistics needs with our competitors rather than us. Our ability to compete effectively may be constrained by the following factors:

- loss of key members of our management and experienced employees (in particular those from our sales force who have established relationships with our key customers and those who have deep sector expertise that we leverage to provide effective solutions for our customers) to our competitors;
- deployment of more advanced technology platforms by our competitors;
- alliances entered into by our competitors with other logistics services providers, increasing their distribution network or resources and technologies that may not be available to us;
- lower cost base of domestic and regional competitors than ours, increasing their cost competitiveness;
- the deployment by our competitors of a more robust fleet of transportation vehicles;
- difficulties entering new sectors that may be dominated by competitors;
- our competitors having a wider domestic and global network of warehouses and delivery centres; and
- existing or new competitors pricing their services with significant discounts.

In addition, increased competition may reduce the growth of our customer base and result in higher selling and promotional expenses. If we are unable to compete effectively with our competitors, we may experience a decline in our revenues and profitability and our business, financial condition and results of operations could be materially and adversely affected.

4. ***We are heavily dependent on trucks, trailers and other transportation vehicles for our operations. Any breakdown of our trucks, trailers etc. will have a significant adverse effect on our business, reputation, financial results and growth prospects.***

Our Multimodal Transportation system works as a vital connecting link in our wide arena of Logistics Management System. We have a wide array of Trucks, Trailers and other inland transportation vehicles which carry the Cargo from the Place of Origin till the Port of dispatch and from the port of landing to the place of delivery in an economical and Time bound manner. We work relentlessly to ensure that any problems that may arise are dealt with in a logical manner and in line with our customer's requirements, and any failure or breakdown of such trucks, trailers etc. could significantly affect our operations in that business. Any significant malfunction or breakdown of our vehicles may entail significant repair and maintenance costs and cause delays in our operations. Further, if we are unable to repair the malfunctioning or breakdown, our operations may need to be suspended until we procure new vehicles to replace the same. Consequently, we may be liable for breach of our contractual obligations with our customers and this could result in significant losses due to damage to our customers' products. Any breach of our obligations may result in termination of our contracts with our customers, which could have an adverse effect on our business, reputation and financial results. Further, we may also be open to public liability from the end consumer for defects in the quality of perishable products we store and transport. Accordingly, any breakdown as such may have a significant effect on our business, reputation, financial results and growth.

5. *Delays or defaults in payment by our customers could affect our cash flows and may adversely affect our financial condition and operations.*

We extend credit to certain of our customers for long periods of time and there is no assurance that we will be able to recover outstanding amounts in part, full or at all. We have and may continue to have high levels of outstanding receivables. We have trade receivable of more than 20.00 crores since March 2021. Any delays or defaults in client payments continue or increase in proportion to our total revenues, it could negatively affect our cash flows and consequently affect our financial condition and operations. Further, while we may take appropriate action in the event of a non-payment of receivables, there can be no assurance that we will be able to successfully recover outstanding amounts owed to us in part or full, which in turn could affect our cash flows and may adversely affect our financial condition and operations.

6. *Our Registered Office from where we operate are not owned by us.*

Our registered office at Chennai, Branch Office at Delhi has been taken on rent and the Warehouse has been taken Sub-lease. We cannot assure you that we will be able to continue the above arrangement on commercially acceptable / favourable terms in future. For further details, see section “**Our Business**” on page 70 of this draft prospectus. If we are required to vacate the current premises, we would be required to make alternative arrangements for new offices and other infrastructure, and we cannot assure that the new arrangements will be on commercially acceptable/favourable terms. If we are required to relocate our business operations during this period, we may suffer a disruption in our operations or have to pay higher charges, which could have an adverse effect on our business, prospects, results of operations and financial condition.

7. *The trend toward outsourcing of supply chain management activities, throughout India or within specific sectors, may change, thereby reducing demand for our services.*

Our growth strategy is based on the assumption that the trend of outsourcing of supply chain management and other logistics services will continue, or rise, in the future to a certain extent. Third-party logistics service providers, such as us, are generally able to conduct supply chain management and other logistics services more efficiently than comparable in-house operations run by customers primarily as a result of expertise, implementation and adoption of technology, efficient management of operations and lower and more flexible employee cost structures. However, many factors could cause a reversal of this trend. For example, our customers may consider the risks in relying on third-party service providers, or they may begin to define these activities as within their own core competencies and decide to perform supply chain and other logistics operations themselves or they may select transport providers who have their own fleet which could have a material and adverse effect on our business. Furthermore, when a customer ceases to outsource portions of its logistics operations to us, the customer may find it less compelling or unattractive to engage us for remaining logistics services, as a result of which some or all of our business with such customer may be adversely affected.

8. *Dependence on third-party vendors could have an adverse effect on our business financial condition and results of operations.*

Often Break-Bulk cargo is shipped using special equipment which can prove extremely expensive. With tenacious stevedoring partners located in key transport hubs around the world, we are often able to negotiate space on conventional vessels for break bulk, dramatically reducing costs whilst providing reliable cargo transportation. We offer specialized break bulk cargo handling services. We book vessels for break bulk cargo from third parties. Our ability to service our customers depends on the availability and costs of vessels used for transport, equipment and adequate work force of independent contractors for operations. We use vessels owned by third parties on per trip basis. Further, we often engage independent contractors for our skilled and unskilled labour needs and, in the event that such contractors are not available, this may have a material and adverse effect on our operations. We cannot assure you that we will be able to obtain access to preferred third-party vendors for our vessels or independent contractors, or at attractive rates or that these vendors will have adequate available capacity to meet our needs or be able to meet our requirements in a timely manner. Further, if we are unable to procure the services of third-party vendors capable of sufficiently scaling up operations in response to increased demand from our customers, we may be compelled to make capital expenditures or seek out costlier or lower quality third-party vendors to meet our needs. Any inability to secure vessels or independent contractors or on attractive terms could have an adverse effect on our business, financial condition and results of operations.

9. *Our business is dependent on the road network in India and our ability to utilise the owned as well as hired vehicles in an uninterrupted manner. Any disruptions or delays in this regard could adversely affect us and lead to a loss of reputation and/ or profitability.*

The transportation and delivery services we provide are dependent on the road network in India. There are various factors which affect road transport such as political unrest, bad weather conditions, natural calamities, road construction, road quality, regional disturbances, fatigue or exhaustion of drivers, improper conduct of the drivers, accidents or mishaps and third-party negligence. Even though we undertake various measures to avoid or mitigate such factors to the extent possible, some of these could cause extensive damage and affect our operations. Also, any such interruption or disruptions could cause delays in the delivery of goods to their destination and/or also cause damage to transported cargo. We may be held liable to pay compensation for losses incurred by our customers in this regard, and/or losses or injuries sustained by other

third parties. Further, such delays and/or damage may cause a loss of reputation, which, over a period of time could lead to a decline in business. In the event that goods to be delivered have a short shelf life, such as perishable goods, any delay in the delivery of such cargo could also expose us to additional losses and claims. Although, some of these risks are beyond our control, we may still be liable for the condition of such cargo and their timely delivery and any disruptions or delays could adversely affect us and lead to a loss of reputation and profitability. In addition, any prolonged or significant downtime of the transportation vehicles or related equipment caused by unforeseen circumstances may cause major disruptions to our operations. In the event we are affected by such prolonged and significant downtime of the vehicles or equipment, our operations and financial performance may be materially and adversely affected.

10. *We are susceptible to risks relating to interruptions and disruptions at our logistics and warehousing facility.*

The operations at our logistics and warehousing facility are also subject to various operating risks such as the breakdown or failure of equipment, power supply or processes, natural disasters and accidents. Any interruption of our operations at our logistics and warehousing facility could significantly reduce our ability to manage and carry out our business operations. If prolonged, such interruption could impact our ability to service our clients and our business, financial condition and results of operations may be materially and adversely affected.

11. *If we are not able to sell container space that we purchase from sea shipping lines, capacity that we charter from our air carriers and utilize our truck capacity, we will not be able to recover our costs and our profitability may suffer.*

We also offer our customers, freight related services. We provide complete range of services of Freight Forwarding (Sea freight & Air freight). As a less than container load (“LCL”) consolidator, we contract with shipping lines to obtain transportation for a fixed number of containers between various points during a specified time period at variable rates. As an air freight forwarder, we also charter aircraft capacity to meet peak season volume increases for our clients. We then solicit freight from our clients to fill the containers and air charter capacity. When we contract with shipping lines and air carriers, we become obligated to pay for the container space or charter aircraft capacity that we had purchased. If we are not able to sell all of our purchased container space or charter aircraft capacity, we will not be able to recover our costs for such purchase of container space or charter aircraft capacity and our business, financial condition and results of operations could be adversely affected. We also lease or own a number of specialized carriers which are utilized in our automotive outbound logistics business. If we are unable to efficiently utilize capacity within these specialized carriers, we will not be able to recover all of our expenses associated with operating these specialized carriers and our business, financial condition and results of operations could be adversely affected.

12. *The extent to which the Coronavirus pandemic (COVID-19) may affect our business and operations in the future is uncertain and cannot be predicted.*

During the first half of calendar year 2020, COVID-19 spread to a majority of countries across the world, including India. The COVID-19 pandemic has had, and may continue to have, significant repercussions across local, national and global economies and financial markets. In particular, a number of governments and organizations have revised GDP growth forecasts for calendar year 2020 downward in response to the economic slowdown caused by the spread of COVID-19. The global impact of the COVID-19 pandemic has been rapidly evolving and public health officials and governmental authorities have responded by taking measures, such as prohibiting people from assembling in large numbers, instituting quarantines, restricting travel, issuing “stay-at-home” orders and restricting the types of businesses that may continue to operate, among many others. On March 14, 2020, India declared COVID-19 as a “notified disaster” and imposed a nationwide lockdown beginning on March 25, 2020. The lockdown has been extended periodically by varying degrees by state governments and local administrations. The lifting of the lockdown across various regions has been regulated with limited and progressive relaxations being granted for movement of goods and people in other places and calibrated re-opening of businesses and offices. Despite the lifting of the lockdown, there is significant uncertainty regarding the duration and long-term impact of the COVID-19 pandemic, as well as possible future responses by the Government, which makes it impossible for us to predict with certainty the impact that COVID-19 will have on our business and operations in the future.

We are closely monitoring the impact of COVID-19 on our financial condition, liquidity, operations, suppliers and workforce. Any intensification of the COVID-19 pandemic or any future outbreak of another highly infectious or contagious disease may adversely affect our business, results of operations and financial condition.

On basis of assessments of the impact of the outbreak of COVID-19 on business operation of the entity, the entity’s management may conclude that our business is not much impacted. However, the situation with COVID-19 is still evolving, also some of the various preventive measures taken are still in force, leading to highly uncertain economic environment. Due to these circumstances, the management’s assessment of the impact on the subsequent period is dependent upon the circumstances as they evolve.

13. *Our success depends heavily upon our Promoters and Directors for their continuing services, strategic guidance and financial support.*

Our success depends heavily upon the continuing services of Promoters & Directors who are the natural person in control of our Company. Our Promoters & Directors have a vast experience in the field of logistics and infrastructure through their erstwhile organisations engaged in similar business. They have established cordial relations with various customers over the past several decades, which have immensely benefitted our Company's current customer and supplier relations. We believe that our relation with our Promoters & Directors, who have rich experience in the industry, managing customers and handling overall businesses, has enabled us to experience growth and profitability. We benefit from our relationship with our Promoters & Directors and our success depends upon the continuing services of our Promoters & Directors who have been responsible for the growth of our business and are closely involved in the overall strategy, direction and management of our business. Further, our Promoters & Directors are also part of certain other firms / ventures which are in the similar line of business and may continue to do so. If they divert their attention to such other concerns, we may not be able to function as efficiently and profitably as before. We may have to incur additional costs to replace the services of our Promoters & Directors or we may not be able to do so at all, which could adversely affect our business operations and affect our ability to continue to manage and expand our business. Further, we also depend significantly on our directors for executing their day-to-day activities. If our Promoters / Directors or any member of the senior management team is unable or unwilling to continue in his present position, we may not be able to replace him easily or at all, and our business, financial condition, results of operations and prospects may be materially and adversely affected.

14. *Our Company has entered into certain related party transactions and may continue to do so in the future.*

Our Company has entered into related party transactions with our Promoters, Directors, Group Entities and their relatives. While our Company believes that all such transactions have been conducted on the arm's length basis, there can be no assurance that it could not have been achieved on more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that our Company will enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation. For details, please refer to "*Related Party Transactions*" under section titled "*Financial Statements*" on page no. 136 of this Draft Prospectus.

15. *Our Company has availed unsecured loan from parties other than bankers & financial institutions which is repayable on demand. Any demand from the lender for repayment of such unsecured loan may affect our cash flow and financial condition.*

Our Company has availed certain unsecured loan and are repayable on demand. Though our Company intends to repay the loan amount in near future, sudden recall may disrupt our operations and also may force us to opt for funding at higher interest rates, resulting in higher financial burden. Further, we will not be able to raise funds at short notice and thus result in shortage of working capital fund. For further details, please refer to the section "*Unsecured Loans*" under "*Financial Statements as restated*" beginning on page no. 115 of this Draft Prospectus. Any demand for the repayment of such unsecured loan, may adversely affect our cash flow and financial condition.

16. *We require certain approvals and licenses in the ordinary course of business and are required to comply with certain rules and regulations to operate our business, and the failure to obtain, retain and renew such approvals and licenses in timely manner or comply with such rules and regulations or at all may adversely affect our operations.*

We require several statutory and regulatory permits, licenses and approvals to operate our business. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Non-renewal of the said permits and licenses would adversely affect our Company's operations, thereby having a material adverse effect on our business, results of operations and financial condition. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. Further, some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. For further details, please see chapters titled "*Key Regulations and Policies*" and "*Government and Other Key Approvals*" at beginning on pages 82 and 147 respectively of this Draft Prospectus.

17. *Failure in maintaining the requisite standard for storage of perishable products stored in our warehouse or transported by us could have a negative effect on our business.*

In our temperature-controlled logistics operations, we are required to maintain the requisite standard for storage of perishable products that we store and transport. We achieve this through various means, including by ensuring that our temperature-controlled facilities adhere to specific storage requirements as required by our customers in terms of the agreements entered into with them. However, if we consistently, or frequently, fail to maintain the prescribed or requisite standards at our temperature-controlled facilities, we may be unable to retain our temperature-controlled logistics customers which will have an adverse effect on our business, growth prospects and our financial results. Our business requires us to obtain certain licences to operate. Any failure on our part to obtain such licence, or comply with the standards

prescribed therein, may result in various sanctions, including fine and imprisonment. Further, under the terms of the agreements entered into with our temperature-controlled logistics customers, if the products delivered by us do not meet the requirements specified by our customers, then our customers may dispose of the products in a manner convenient to them, and the cost of such disposal may be adjusted from payments due to us. Some of the products stored and/or transported by us are perishable in nature. In the event that we fail to maintain the prescribed and/or requisite standards of storage or if the integrity of products that are stored or distributed is compromised, we could be in breach of our contractual obligations to our customers which could lead, among other things, to monetary damages. Furthermore, obtaining insurance coverage with respect to losses incurred in connection with perishable products is often cost prohibitive, such that the cost of insurance can often be greater than the cost of the underlying products. Hence, we may not have adequate insurance coverage or any coverage to mitigate risks associated with losses related to perishable products stored and transported in our temperature-controlled logistics operations. For further details, please see the section entitled “*Our Business– Insurance*” beginning on page 70 of this draft prospectus.

18. *If we are unable to manage our growth effectively or if our estimates or assumptions used in developing our strategic plan are inaccurate or we are unable to execute our strategic plan effectively, our business and prospects may be materially and adversely affected.*

Our revenue and our business operations have grown in recent years. Although we plan to continue to expand our scale of operations, we may not be able to sustain these rates of growth in future periods due to a number of factors, including, among others, our execution capability, our ability to retain, maintain & enter into new supplier MOUs / agreements, our ability to maintain customer satisfaction, our ability to mobilise sufficient working capital, macroeconomic factors beyond our control such as decline in global economic conditions, competition with other players in the organized and unorganized segments, the greater difficulty of growing at sustained rates from a larger revenue base, our inability to control our expenses and the availability of resources for our growth. There can be no assurance that we will not suffer from capital constraints, operational difficulties or difficulties in expanding existing business operations.

Our development and expansion strategies will require substantial managerial efforts and skills and the incurrence of additional expenditures may subject us to new or increased risks. We may not be able to efficiently or effectively implement our growth strategies or manage the growth of our operations, and any failure to do so may limit future growth and have an adverse effect on our business. Further, our strategy to improve our debt – equity ratio may not materialise in the manner we intend to, and we may be required to obtain additional debt to meet immediate capital requirements, resulting in unfavourable ratios.

Also, the fund requirement and deployment for our strategies are based purely on management estimates and assumptions considering the current market scenario and are subject to revision in the light of changes in external circumstances or costs. If we are unsuccessful in executing our strategic plan, or if the underlying estimates or assumptions used to develop our strategic plan are materially inaccurate, our business and financial condition would have an adverse impact.

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted clients. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

19. *In addition to normal remuneration, other benefits and reimbursement of expenses of our Directors (including our Promoter) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.*

Some of our Directors (including our Promoters) and Key Management Personnel may be interested in our Company to the extent of their shareholding and dividend entitlement in our Company, in addition to normal remuneration, incentives or benefits and reimbursement of expenses. We cannot assure you that our Directors or our Key Management Personnel would always exercise their rights as Shareholders to the benefit and best interest of our Company. As a result, our Promoters & our Directors will continue to exercise significant control over our Company, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting. Our Promoters and Directors may take or block actions with respect to our business, which may conflict with our best interests or the interests of other minority Shareholders, such as actions with respect to future capital raising or acquisitions. We cannot assure you that our Promoters and Directors will always act to resolve any conflicts of interest in our favour, thereby adversely affecting our business and results of operations and prospects. For further details of our transactions or interests of our promoters / promoter group, please refer the chapters titled “*Our Promoters and Promoter Group*” and “*Our Group Companies*”, “*Related Party Transactions*” and “*Financial Statement as Restated*” beginning on page nos. 107, 110, 136 and 115 respectively, of this Prospectus.

20. ***The Qualification and Experience Proof of some of our Promoters & Directors may not be available.***
Our Promoters and Directors are qualified and are highly experienced to run the day-to-day affairs of the Company. However, the Qualification and Experience Proof (as mentioned in this Draft Prospectus) of some of our Promoters & Directors are not available.
21. ***Our Company's insurance coverage may not be adequate to protect us against all material hazards which may result in disruptions of operations/monetary loss on account of stoppage of work.***
We procure insurance for our operations against third-party liability, transportation risks, stock insurance at warehouse, and employees' health. Our existing insurance coverage may be insufficient to cover all the risks associated with our business and operations and generally do not cover losses from business interruption. Further, if we are unable to secure vehicular insurance on attractive terms for our trailers/trucks, our transportation operations logistics services could be negatively affected. We also cannot assure you that we will renew our existing insurance policies in a timely manner or at all. In the case of an uninsured loss, a loss in excess of insured limits or a loss for which we do not have coverage or coverage is prohibitively expensive, including those caused by natural disasters and other events beyond our control, we may be required to pay for losses, damages and liabilities out of our own funds, which could materially and adversely affect our business, financial condition and results of operations. Even if our insurance coverage is adequate to cover our direct losses, we may not be able to take remedial actions or other appropriate measures. Furthermore, our claim records may affect the premiums which insurance companies may charge us in the future.
22. ***We require high working capital for our smooth day to day operations of business and any discontinuance or our inability to acquire adequate working capital timely and on favourable terms may have an adverse effect on our operations, profitability and growth prospects.***
Our business demands substantial funds towards working capital requirements. In case there are insufficient cash flows to meet our working capital requirement or we are unable to arrange the same from other sources or there are delays in disbursement of arranged funds, or we are unable to procure funds on favourable terms, it may result into our inability to finance our working capital needs on a timely basis which may have an adverse effect on our operations, profitability and growth prospects.
23. ***We are dependent on a number of key managerial personnel, including our senior management, and the loss of or our inability to attract or retain such persons with specialized technical know-how could adversely affect our business, results of operations, cash flows and financial condition.***
Our performance depends largely on the efforts and abilities of our senior management and other key managerial personnel, including our present officers who have specialized technical know-how. The inputs and experience of our senior management and key managerial personnel are valuable for the development of our business and operations strategy. We cannot assure you that we will be able to retain these employees or find adequate replacements in a timely manner, or at all. Our Company does not maintain any director's and officer's insurance policy or any keyman insurance policy. The loss of the services of such persons could have an adverse effect on our business, results of operations, cash flows and financial condition.
24. ***Upon completion of the Issue, our Promoters / Promoter Group may continue to retain significant control, which will allow them to influence the outcome of matters submitted to the shareholders for approval.***
After completion of the Issue, our Promoters and Promoter Group will collectively own 72.94% of the total post issue Equity Shares. As a result, our Promoters together with the members of the Promoter Group will be able to exercise a significant degree of influence over us and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring any strategic decision favourable to our Company or effecting a change in control of our Company for the betterment of the stakeholders.

In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or minority shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

25. The average cost of acquisition of Equity Shares by our Promoters is lower than the Issue Price.

Sl. No.	Name of the Promoter	No. of Equity Shares Held	Avg. Cost of Acquisition (In ₹ per Equity Share)
1	Moulana Tafeek Islam	15,30,000	0.04
2	Ayisha Beevi	10,16,940	0.03

The average cost of acquisition of Equity Shares by our Promoters has been calculated by taking into account the amount paid by them to acquire, by way of fresh issuance, bonus issue or face value split and the Equity Shares less amount received by them for the sale of Equity Shares through transfer, if any and the net cost of acquisition has been divided by total number of shares held as on date of the draft prospectus

26. Employee misconduct, errors or fraud could expose us to business risks or losses that could adversely affect our business prospects, results of operations and financial condition.

Employee misconduct, errors or frauds could expose us to business risks or losses, including regulatory sanctions, penalties and serious harm to our reputation. Such employee misconduct includes breach in security requirements, misappropriation of funds, hiding unauthorized activities, failure to observe our operational standards and processes, and improper use of confidential information. It is not always possible to detect or deter such misconduct, and the precautions we take to prevent and detect such misconduct may not be effective. In addition, losses caused on account of employee misconduct or misappropriation of petty cash expenses and advances may not be recoverable, which we may end in writing-off of such amounts and thereby adversely affecting our results of operations. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions in which case, our reputation, business prospects, results of operations and financial condition could be adversely affected.

27. Past Disqualification of Our Directors by Ministry of Corporate Affairs.

Our Promoter Director, Mr. Moulana Tafeek Islam was disqualified from his directorship for the period of 5 years for not filing annual report/financial statement for a continuous period of 3 years by Precision Packaging Private Limited (CIN: U25207TN2010PTC075003 (Struck-Off)) and Midsea Maritime Services Private Limited (CIN: U74900TN2009PTC071574 (Struck-Off)) in which Mr. Moulana Tafeek Islam was Director. However, vide an order dated 12.02.2020 of the Hon'ble Madras High Court pursuant to a Writ Petition no. 3343/2020 filed by Mr. Moulana Tafeek Islam, his DIN was restored and the Ministry of Corporate Affairs has reinstated his directorship.

Also, one of our promoters Ms. Ayisha Beevi and one of our directors Mrs. Munira Begam was disqualified from directorships for a period of 5 years i.e. from 01/11/2016 to 31/10/2021 for not filing annual report/financial statement for a continuous period of 3 years in Aaryan Yarn Sales Pvt. Ltd. (Struck-Off) and Yasin Construction Pvt. Ltd. (Struck-Off) respectively. Presently their DIN status on the MCA site is approved.

28. Within the parameters as mentioned in the chapter titled "Objects of this Issue" beginning on page 51 of this draft prospectus, our Company's management will have flexibility in applying the proceeds of this Issue. The fund requirement and deployment mentioned in the Objects of this Issue have not been appraised by any bank or financial institution.

We intend to use entire Issue Proceeds towards meeting the working capital requirement and general corporate purpose. We intend to deploy the Net Issue Proceeds in financial year 2021-22 and such deployment is based on certain assumptions and strategy which our Company believes to implement in future. The funds raised from the Issue may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc., For further details on the use of the Issue Proceeds, please refer chapter titled "Objects of the Issue" beginning on page 51 of this draft prospectus.

The deployment of funds for the purposes described above is at the discretion of our Company's Board of Directors. The fund requirement and deployment are based on internal management estimates and has not been appraised by any bank or financial institution. Accordingly, within the parameters as mentioned in the chapter titled "Objects of the Issue" beginning on page 51 of this draft prospectus, the Management will have significant flexibility in applying the proceeds received by our Company from the Issue. Our Board of Directors and the Audit Committee will monitor the proceeds of this Issue.

29. The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.

Since the Issue size is less than Rs.10,000 Lakhs, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of these funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our finances.

30. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, working capital requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “*Dividend Policy*” on page 114 of this draft prospectus.

31. *Any future issuance of Equity Shares may dilute your shareholdings, and sale of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.*

Any future equity issuance by our Company may lead to the dilution of investors’ shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

32. *The Issue Price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price and you may not be able to sell your Equity Shares at or above the Issue Price.*

The Issue price is based on numerous factors. For further information, see the chapter titled “*Basis for Issue Price*” beginning on page no. 55 of this draft prospectus and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. The factors that could affect our share price are:

- Quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

33. *Our diverse and complex multi-location operations subject us to various statutory, legal and regulatory risks.*

Our future revenue growth depends upon the successful operation of our operating locations and warehouses, the efficiency of our delivery systems and the successful management of our sales, marketing, and support and service teams through direct and indirect channels in various states across India where our existing or potential clients are located. The expansion of our business may require that we establish new offices and warehouses and manage businesses in widely disparate states with different statutory, legal and regulatory framework. In addition, we may be affected by various factors inherent in carrying out business operations in several states in India and abroad, such as:

- coordinating and managing operations in several locations, including different political, economic and business conditions and labour laws and associated uncertainties;
- exposure to different legal standards and enforcement mechanisms and compliance with regulations; and
- difficulties in staffing and managing operations, including coordinating and interacting with our local representatives and business partners to fully understand local business and regulatory requirements.

Any of these factors, alone or in combination, could materially and adversely affect our business, results of operations and financial condition and prospects.

34. *We are susceptible to risks relating to fluctuations in currency exchange rates.*

We provide international freight forwarding services and derives a portion of our revenue from international operations. Therefore, our exposure to foreign currency risk arises in respect of our non-Indian Rupee-denominated trade and other receivables, trade payables, and cash and cash equivalents. While our presentation and functional currency is the Indian Rupee, we undertake transactions in various currencies. Any fluctuation in the value of the Indian Rupee against any currency in the Currency Group will affect our results of operations.

Further, we currently do not use any foreign exchange hedging contracts to manage our exchange rate risk. Although we may, in the future, enter into such foreign exchange hedging contracts, we cannot assure you that such hedges will be available or commercially viable or effective to hedge our exposure to foreign currency risks. In addition, the policies of the RBI may also change from time to time, which may limit our ability to effectively hedge our foreign currency

exposures and may adversely affect our reported revenues and financial results. We cannot guarantee that we will not experience foreign exchange losses going forward and that such losses will not adversely affect our business, financial condition or results of operations.

35. *Managing employee benefit pressures in India may prevent us from sustaining our competitive advantage which could adversely affect our business prospects and future financial performance.*

Employee benefits represent a major expense for us and our ability to maintain or reduce such costs is critical for our business operations. We may be required to increase employee compensation levels to remain competitive and manage attrition, and consequently we may need to increase the prices of our products and services. An increase in wages/ salaries paid to our employees may result in a material adverse effect on our profits in the event that we are unable to pass on such increased expenditure to our users or customers without losing their business to our competitors. Likewise, if we are unable to sustain or increase the number of employees as necessary to meet growing demand, our business, financial condition and results of operations could be adversely affected.

36. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange which require us to file unaudited financial results on a half yearly basis. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner.

EXTERNAL RISK FACTORS

1. *Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.*

Our business and industry is regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

2. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short-term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and is taxable at 10%, in excess of Rs. 1,00,000. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

3. *Public companies in India, including our Company, shall be required to prepare financial statements under Indian Accounting Standards.*

Our Company currently prepares its annual financial statements under Indian GAAP. The MCA, Government of India, has, through a notification dated February 16, 2015, set out the Indian Accounting Standards (Ind AS) and the timelines for their implementation. In accordance with such notification, our Company is required to prepare its financial statements in accordance with Ind AS. Ind AS is different in many aspects from Indian GAAP under which our financial statements are currently prepared. Accordingly, the degree to which the restated financial statements included in the draft prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in the draft prospectus should accordingly be limited.

4. ***Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.***

Taxes and other levies imposed by the Central or State Governments in India that affect our industry include:

- custom duties on imports of raw materials and components;
- Goods and Service

These taxes and levies affect the cost and prices of our products and therefore demand for our product. An increase in any of these taxes or levies, or the imposition of new taxes or levies in the future, may have a material adverse effect on our business, profitability and financial condition.

5. ***Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.***

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

6. ***We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and industry in which we operate contained in the draft prospectus.***

While facts and other statistics in the draft prospectus relating to India, the Indian economy and the industry in which we operate has been based on various web site data and IBEF that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled “***Industry Overview***” beginning on page 59 of this draft prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

7. ***Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.***

Global economic and political factors that are beyond our control, influence forecasts directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

8. ***Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.***

Under the foreign exchange regulations currently in force in India, transfer of shares between non- residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

9. ***The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.***

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

- 10. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.**
Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.
- 11. Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.**
India has experienced natural calamities such as earthquakes, tsunami, floods etc. in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.
- 12. Terrorist attacks, civil unrest and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.**
Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks in India, other incidents such as those in US, and other countries and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

- An early, intense lockdown provided a win-win strategy to save lives and preserve livelihoods via economic recovery in the medium to long-term.
- Strategy also motivated by the Nobel-Prize winning research by Hansen & Sargent (2001): a policy focused on minimizing losses in a worst-case scenario when uncertainty is very high.
- India was the only country to announce structural reforms to expand supply in the medium-long term and avoid long-term damage to productive capacities.
- Calibrated demand side policies to ensure that the accelerator is slowly pushed down only when the brakes on economic activities are being removed.
- A public investment programme centred around the National Infrastructure Pipeline to accelerate the demand push and further the recovery.
- Upturn in the economy, avoiding a second wave of infections - a sui generis case in strategic policymaking amidst a once-in-a-century pandemic.

Healthcare takes centre stage

- COVID-19 pandemic emphasized the importance of healthcare sector and its inter-linkages with other sectors - showcased how a health crisis transformed into an economic and social crisis.

- India became the fastest country to roll-out 10 lakh vaccines in 6 days and also emerged as a leading supplier of the vaccine to neighbouring countries and Brazil.
- India adopted a four-pillar strategy of containment, fiscal, financial, and long-term structural reforms:

 - A favourable monetary policy ensured abundant liquidity and immediate relief to debtors while unclogging monetary policy transmission.
- Innovation
 - India entered the top-50 innovating countries for the first time in 2020 since the inception of the Global Innovation Index in 2007, ranking first in Central and South Asia, and third amongst lower middle-income group economies.

OVERVIEW OF INDIAN PORTS INDUSTRY

Introduction

According to the Ministry of Shipping, around 95% of India's trading by volume and 70% by value is done through maritime transport. In November 2020, the Prime Minister, Mr. Narendra Modi renamed the Ministry of Shipping as the Ministry of Ports, Shipping and Waterways.

India has 12 major and 205 notified minor and intermediate ports. Under the National Perspective Plan for Sagarmala, six new mega ports will be developed in the country. The Indian ports and shipping industry play a vital role in sustaining growth in the country's trade and commerce. India is the sixteenth-largest maritime country in the world with a coastline of about 7,517 kms. The Indian Government plays an important role in supporting the ports sector. It has allowed Foreign Direct Investment (FDI) of up to 100% under the automatic route for port and harbour construction and maintenance projects. It has also facilitated a 10-year tax holiday to enterprises that develop, maintain and operate ports, inland waterways and inland ports.

Market Size

India's key ports had a capacity of 1,534.91 million tonnes per annum (MTPA) in FY20. In FY21, all key ports in India handled 672.60 million tonnes (MT) of cargo traffic. INDIAN LOGISTICS INDUSTRY

The Logistics Sector was granted Infrastructure status in the 14th Institutional Mechanism (IM) Meeting held on 10th November, 2017 to meet the need for integrated Logistics sector development in view of the fact that the logistics cost in India is very high compared to developed countries. The Indian logistic sector is primarily categorized into four segments comprising Transportation (rail, road, air, water-ways), warehousing (Container freight stations and Inland Container Depots), freight forwarding and value-added logistics. Key Challenges in the Logistics Industry

India, despite being a low-cost country, has higher logistics cost due to various issues and challenges faced by the industry. Apart from being entangled in complex tax structure the industry is also affected by poor rate of customs efficiency of clearance processes and procedures thus affecting the international export logistics stratum. Furthermore, sub-optimal comfort provided by the existing Indian infrastructure combined with lack of implementation of efficient IT-enabled tracking and tracing mechanisms has affected the performance of logistics. A country's competitiveness is measured by the ease of doing business. India stands at 35th position in the logistics performance index (LPI) amongst 160 countries around the world, with Germany on top, Singapore, China and United States of America in 5th, 9th, and 10th positions, respectively, as per the World Bank report 2016.

Governmental Initiatives in Logistics Sector

- In November 2017, logistics sector was given the status of infrastructure, to boost investments in the sector.
- Budget allocation for road sector increased to US\$ 10.07 billion in 2017-18 from US\$ 8.99 billion in 2016-17.
- Road projects worth Rs 6.92 trillion (US\$ 107.64 billion) approved in October 2017.
- The Government is making an attempt to revive and give boost to Public Private Partnerships.

Warehousing Facility

Warehousing forms a crucial link in the overall logistics value chain. It accounts for ~5% of the Indian logistics market (excluding inventory carrying costs, which amount to another ~30%). Warehousing in India has been evolving rapidly from being traditional —godowns -a mere four-wall-and-shed with sub optimal size, inadequate ventilation and lighting, lack of racking systems, poor hygiene conditions and lack of inventory management or evolved solutions such as warehouse management systems into modern setups with storage and handling points where raw material, intermediate and manufactured goods are collected, assorted, stored and distributed to the point of consumption/sale. As key end users are increasingly outsourcing their warehousing services, warehousing players are recognizing the need to be a part of the customer’s logistics chain, as against being a landlord leasing out space. The size of the Indian warehousing industry (across commodities and modes) is pegged at about INR560 billion (excluding inventory carrying costs, which amount to another ~INR4,340 billion). The industry is growing at over 10% annually.

Warehousing Capacity in India

Almost ¾ of the organised warehousing sector is being controlled by Government PSUs such as the Food Corporation of India (FCI), Central Warehousing Corporation (CWC) and State Warehousing Corporations (SWCs). The current capacity of the organised warehouse, controlled by PSUs, cooperatives and private sector is 126.97 million metric tons, of which the private sector has only 18.97 million metric tons, the details are as follows:-

Sr. No.	Name of the organisation/Sector	Storage capacity in million tons
1.	Food Corporation of India	35.92
2.	Central Warehousing Corporation	11.72
3.	State Warehousing Corporations and state agencies	45.28
4.	Cooperative Sector	15.07
5.	Private Sector	18.97
6.	Total	126.96

➤ Impact of Covid-19 on our business operations

The unprecedented COVID-19 pandemic is leaving its footprint on most industries in the world. The impact on the transport and logistics sector is big. It had a tremendous impact not just on health and safety but also on global business, trade and economy. In 2020, the lockdowns implemented because of Covid-19 disrupted most sectors and especially accelerated change across the global logistics market. It led many global firms to diversify the supply chain to de-risk their business model. During the early phases of the pandemic, the Business-to-Business (B2B) logistics market nearly came to a halt. In contrast, the last-mile delivery services witnessed a boost owing to online retail, partially offsetting the decline in other logistics segments. In the second half of 2020, as overall demand returned, the air and sea freight volumes improved.

The Company has tried to do everything it takes to manage customers' cargo and the health and safety of their frontline Covid Warriors. To take care of employees, we regularly monitor the situation and support employees as needed. Oxygen and temperature checks are mandatory for all staff members and visitors. Operations have been modified and optimized to adhere to social distancing requirements and work with minimal staff on-site.

On basis of assessments of the impact of the outbreak of COVID-19 on business operation of the entity, the entity's management may conclude that our business is not much impacted. However, the situation with COVID-19 is still evolving, also some of the various preventive measures taken are still in force, leading to highly uncertain economic environment. Due to these circumstances, the management's assessment of the impact on the subsequent period is dependent upon the circumstances as they evolve.

The Warehousing Act prescribes, among other things, the form and manner of registration, development and regulation of warehouses. The Warehousing Act also provides for setting up of a Warehousing Development and Regulatory Authority (the “WDRA”) which comprises a chairman and not more than two other members. The powers and functions of the WRDA include, amongst others, (i) to regulate the process of pledge, creation of charges and enforcement thereof in respect of goods deposited with the warehouses; (ii) to promote efficiency while conducting the warehouse business; (iii) to promote professional organizations connected with the warehousing business; (iv) to maintain a panel of arbitrators and to nominate arbitrators from such a panel in disputes between warehouses and warehouse receipt holders; and (v) to determine the rate of, and levy, the fee and other charges for carrying out the provisions of the Warehousing Act.

International Commercial Terms ("Incoterms")

Incoterms are standard trade definitions most commonly used in international sales contracts. Devised and published by the International Chamber of Commerce ("ICC"), they are at the heart of world trade. ICC introduced the first version of Incoterms in 1936. Most contracts made after January 01, 2000 will refer to the latest edition of Incoterms, which came into force on that date. The correct reference is "Incoterms 2000". Unless the parties decide otherwise, earlier versions of Incoterms - like Incoterms 1990 - are still binding if incorporated in contracts that are unfulfilled and are dated before January 01, 2000. The latest version of Incoterms is designed to bring Incoterms in line with the latest developments in commercial practice. Correct use of Incoterms goes a long way to providing the legal certainty upon which mutual confidence between business partners must be based. Among the best-known Incoterms are EXW (Ex works), FOB (Free on Board), CIF (Cost, Insurance and Freight), DDU (Delivered Duty Unpaid), and CPT (Carriage Paid To).

The Code of Criminal Procedure Code, 1973

It is the main legislation on procedure for administration of substantive criminal law in India. It was enacted in 1973 and came into force on 1st April, 1974. It provides the machinery for the investigation of crime, apprehension of suspected criminals, collection of evidence, determination of guilt or innocence of the accused person and the determination of punishment of the guilty.

Criminal law occupies a pre-dominant place among the agencies of social control and is regarded as a formidable weapon that society has forged to protect itself against anti-social behaviour. The law of criminal procedure is meant to be complimentary to criminal law. It is intended to provide a mechanism for the enforcement of criminal law. The Code of Criminal Procedure creates the necessary machinery for

apprehending the criminals, investigating the criminal cases, their trials before the criminal courts and imposition of proper punishment on the guilty person. The Code enumerates the hierarchy of criminal courts in which different offences can be tried and then it spells out the limits of sentences which such Courts are authorized to pass.

The law of criminal procedure is intended to provide a mechanism for the enforcement of criminal law. Without the proper procedural law the substantive criminal law which defines offences and provides punishment for them would be almost worthless.

The Code is the general law so that in case of conflict between the Code and the special law the latter prevails over the former. Prevention of Money Laundering Act, 2002

Money laundering is the processing of criminal proceeds to disguise its illegal origin. Terrorism, illegal arms sales, financial crimes, smuggling, and the activities of organised crime, including drug trafficking and prostitution rings, generate huge sums. Embezzlement, insider trading, bribery and computer fraud also produce large profits and create an incentive to legitimise the ill-gotten gains through money laundering. When a criminal activity generates substantial profits, the individual or group involved in such activities route the funds to safe heavens by disguising the sources, changing the form, or moving the funds to a place where they are less likely to attract attention.

Most fundamentally, money laundering is inextricably linked to the underlying criminal activity that generates it. In essence, the laundering enables criminal activity to continue.

Phased implementation of Unified Payments Interface (UPI)

SEBI has issued the various UPI Circulars in relation to streamlining the process of public issue of inter alia, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by Retail Individual Investors through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Investor had the option to submit the ASBA Form with any of the Designated Intermediary and use his/her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by Retail Individual Investors through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six Working Days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three Working Days. For further details, refer to the General Information Document available on the websites of the Stock Exchanges and the Managers.
