- Our ability to anticipate changes in consumer preference, and industry trends and to meet customers' demands is a significant factor to remain competitive, any failure to identify and understand the trends may materially adversely affect our business.***

Changes in consumer preferences, regulatory or industry requirements, or competitive technologies may render certain of our products obsolete or less attractive. Our ability to anticipate changes in technology and regulatory standards and to successfully introduce new and enhanced products on a timely basis is a significant factor to remain competitive. If we are unable to obtain such knowledge in a timely manner, or at all, we may be unable to effectively implement our strategies, and our business and our results of operations may be adversely affected. We are also subject to the risks generally associated with new products and applications, including lack of market acceptance and failure of products to operate properly. Customer preferences in the markets we operate are difficult to predict and changes in those preferences or the introduction of new products by our competitors could put our products at a competitive disadvantage. To compete effectively in the industry, we must be able to produce new products to meet our customers' demands in a timely manner. Our failure to successfully produce new products could materially and adversely affect our results of operations.

3. We may face several risks associated with the object of the issue of setting up of new manufacturing unit, which could hamper our growth prospects, cash flows and business and financial condition.

We intend to utilize a portion of the Net Proceeds of this Issue towards setting up a new manufacturing unit at Plot No. Ex/1 & Ex/2, Vapi Industrial Estate, Revenue Survey No. 921/P & 922/P, Vapi Village, Vapi Taluka, Dist: Valsad, Gujarat through carrying out Civil Works and installation of plant & machinery. For further details, please refer to the chapter titled **“Object of the Issue”** at page 69 of this Draft Prospectus.

During the process of carrying out Proposed manufacturing unit, we may face several difficulties such as cost overruns or delays for various reasons, including, but not limited to, our financial condition, changes in business strategy and external factors such as market conditions, competitive environment and interest or exchange rate fluctuations, changes in design and configuration, increase in input costs of construction materials and labour costs, incremental preoperative expenses, taxes and duties, start-up costs, interest and finance charges, working capital margin, environment and ecology costs and other external factors which may not be within the control of our management, which may in turn delay the utilization of the Net Proceeds which in turn delay the commencement of commercial operation of our proposed manufacturing unit.

Any delay in carrying out the proposed manufacturing unit could lead to revenue loss for our Company. Further, our implementation plan may be subject to delays and other risks, which may be caused due to certain other unforeseen events, such as unforeseen engineering or technical problems, disputes with workers, unanticipated cost increases or changes in scope and delays in obtaining certain property rights and government approvals and consents. While we may seek to minimize the risks from any unanticipated events, it cannot be assured that all potential delays could be mitigated and that we will be able to prevent any cost and time over-runs and any loss of profits resulting from such delays, shortfalls and disruptions. Further, the budgeted cost may prove insufficient to meet the requirements of the proposed capital expenditure due to, among other things, cost escalation, which could drain our internal cash flows or compel us to raise additional capital, which may not be available on terms favourable to us or at all. We cannot assure that we will be able to complete the aforementioned manufacturing unit in accordance with the proposed schedule of implementation and any delay in setting up such project in a timely manner, or at all, could have an adverse impact on our growth, prospects, cash flows and business and financial condition. Our financial condition, results of operations and liquidity would be materially and adversely affected if our project or construction costs materially exceed such budgeted amounts. For further details, please refer to chapters titled **“Objects of the Issue”** and **“Our Business”** on pages 69 and 111, respectively of this Draft Prospectus.

4. We cannot assure you that the proposed expansion of our new manufacturing unit will become operational as scheduled, or at all, or operate as efficiently as planned. If we are unable to commission our new facility in a timely manner or without cost overruns, it may adversely affect our business, results of operations and financial condition.

We intend to utilise ₹ 2,650.00 from the proceeds of this Issue for setting up of a new manufacturing unit at Plot No. Ex/1 & Ex/2, Vapi Industrial Estate, Revenue Survey No. 921/P & 922/P, Vapi Village, Vapi Taluka, Dist: Valsad, Gujarat with a total estimated cost of ₹ 2,907.79 lakhs. Our expansion plan may be subject to delays and other risks, among other things, unforeseen engineering or technical problems, disputes with workers, force majeure events, unanticipated cost increases or changes in scope and government approvals and consents. Further, our Company has acquired land and completed land development works in relation to our aforementioned capital expenditure and will apply for all such necessary approvals that it may require at the relevant stages. We cannot assure you that the necessary approvals shall be granted to us or shall be granted to us within the prescribed time period or that there will not be any delay in obtaining such approvals. Additionally, we may face risks in commissioning the proposed facility including but not limited to, delays in the construction or for other unknown reasons, our proposed project does not function as efficiently as intended, or utilisation of the resources is not optimal, we may not be able to take additional orders to produce anticipated or desired revenue as planned any of which could result in delays, cost overruns or the termination of the plan for proposed manufacturing unit.

In the event of any delay in the schedule of implementation or if we are unable to complete the project as per the scheduled time, it could lead to revenue loss. While we may seek to minimize the risks from any unanticipated events, it cannot be assured that all potential delays could be mitigated and that we will be able to prevent any cost over-runs and any loss of profits resulting from such delays, shortfalls and disruptions. As a result, our business, financial condition, results of operations and prospects could be materially and adversely affected. For further details, please refer to the chapter titled **“Objects of the Issue”** on page 69 of this Draft Prospectus.

5. ***The cost estimates for the proposed manufacturing unit at Plot No. Ex/1 & Ex/2, Vapi Industrial Estate, Revenue Survey No. 921/P & 922/P, Vapi Village, Vapi Taluka, Dist: Valsad, Gujarat have been derived from management estimates and quotations received from third parties and may not be accurate.***

The estimated cost of the proposed manufacturing unit at Plot No. Ex/1 & Ex/2, Vapi Industrial Estate, Revenue Survey No. 921/P & 922/P, Vapi Village, Vapi Taluka, Dist: Valsad, Gujarat will be approximately ₹ 2,907.79 lakhs. For ascertaining this cost reliance has been placed on the estimates and budgets decided based on management estimates and third-party quotations received from machinery manufactures, civil work contractors, and the same has not been appraised by any bank or financial institution. The actual costs of expansion of our facilities may exceed such budgeted amounts due to a variety of factors such as construction delays, interest rates, labour costs, foreign exchange rates, regulatory and environmental factors, weather conditions and our financing needs. Our financial condition, results of operations and liquidity would be materially and adversely affected if the cost estimates for the proposed expansion materially exceed the budgeted amounts. As a result, our business, financial condition, results of operations and prospects could be materially and adversely affected. For further details of the scheduled operational dates of our proposed unit, see ***“Objects of the Issue”*** on page 69 of this Draft Prospectus.

6. ***Our Company is yet to place orders for civil work and plant & machineries for the proposed manufacturing unit. Any delay in placing orders or completion of civil works or procurement of such machinery may delay the schedule of implementation and possibly increase the cost of commencing operations.***

Our Company has received third party quotations for the civil works to be constructed and quotations for machinery proposed to be installed at our proposed manufacturing unit. Although, we have identified the type of machinery proposed to be purchased from the Net Proceeds. As on date of Draft Prospectus, we have not placed orders for civil works and plant & machineries and orders for the same are yet to be placed. The cost of the proposed construction of civil works and purchase of machinery is based on the quotations received from third party vendors and such quotations are valid for a certain period of time and may be subject to revisions, and other commercial and technical factors. For details, please refer to the chapter titled ***“Objects of the Issue”*** beginning on page 69 of this Draft Prospectus.

We cannot assure that we will be able to construct the civil works and procure the machinery in a timely manner and at the same price at which the quotations have been received. In the event of any delay in placing the orders, or an escalation in the cost or in the event the vendors are not able to provide the same in a timely manner, or at all, we may encounter time and cost overruns in setting up of the proposed manufacturing unit. Further, if we are unable to construct the civil works and procure machinery from the vendors from whom we have obtained quotations, we cannot assure you that we may be able to identify alternative vendors to provide us with the specifications which satisfy our requirements at acceptable prices. Our inability to construct the civil works and procure the machinery at acceptable prices or in a timely manner, may result in an increase in capital expenditure, the proposed schedule implementation and deployment of the Net Proceeds may be extended or may vary accordingly, thereby resulting in an adverse effect on our business, prospects and results of operations.

7. ***Our Company had negative cash flow in recent fiscals, details of which are given below. Sustained negative cash flow could adversely impact our business, financial condition and results of operations.***

There can be no assurance that our net cash flows shall be positive in the future. Any negative cash flows in the future over extended periods, or significant negative cash flows in the short term, could materially impact our ability to operate our business and implement our growth plans. As a result, our cash flows, business, future financial performance and results of operations could be materially and adversely affected. For further details, see ***“Financial Statements as Restated”*** beginning on page 178 of this Draft Prospectus.

10. We may face significant competition in our business. An inability to compete effectively may lead to a lower market share or reduced operating margins.

We operate in the highly competitive industry. There are no entry barriers in our industry which puts us to the threat of competition from new entrants. There are numerous players operating in the industry. We face tough competition in our business from a large number of unorganized and a few organized players. Our aim is to provide the standardized and uniform quality products at competitive prices to our consumers. We compete with our competitors on a regional or product line basis. Many of our competitors have substantially large capital base and resources than we do and offer broader range products. We believe that the principal factors affecting competition in our business include client relationships, reputation, the abilities of employees, market focus and the relative quality and price of the products. We believe that our ability to compete effectively is primarily dependent on ensuring consistent product quality and timely delivery at competitive prices, thereby strengthening our brand over the years. We believe that our cost effective and integrated offerings, our focus on customer satisfaction and our reliability combined with our quality consciousness provides competitive advantage in our business. We believe that our technical capabilities, experience in this business and quality assurance will be key to overcome competition posed by such organized and unorganized players. However, there can be no assurance that we will be able to compete successfully with the competitors and implement our future strategies in a way that will mitigate the effects of increased competition from our competitors.

11. Our Registered Office is not owned by us and we have only leave and license rights over them. In the event we lose such rights, our business, financial condition and results of operations, and cash flows could be adversely affected.

Our Registered Office used by our Company have been obtained on a leave and license basis from one of our Promoters of the Company. We cannot assure you that we will be able to renew our lease agreement or leave and license agreements or enter into new agreements in the future, on terms favourable to us, or at all. In the event that any lease agreement or leave and license agreement is not renewed, we will be required to expend time and financial resources to locate suitable land or building to set up our operations. Also, we may be unable to relocate to an appropriate location in a timely manner, or at all, and we cannot assure you that a relocated office will be as commercially viable. If a lease agreement or the leave and license agreement are terminated, prior to its tenure or if it is not renewed, or if we are required to cease business operations at a property, for any reason whatsoever, our business, financial condition, and results of operations may be adversely affected. Further, if the vacated property is leased or sold to a competitor, we may also face increased competition in that geographic area, which could adversely affect our market share. For further information on our properties, see **“Our Business – Property”** on page 111 of this Draft Prospectus.

12. *If we are unable to source business opportunities effectively, we may not achieve our financial objectives.*

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees and to implement systems capable of effectively accommodating our growth. However, we cannot assure you that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It also possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analyses of market and other data or the strategies we use or plans in future to use will be successful under various market conditions.

13. *We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.*

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and cause serious harm to our reputation and goodwill of our Company. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

14. *Labour-Intensive Operations and the Potential Risks of Workforce Disruptions.*

As a labour-intensive business, we depend heavily on our workforce to ensure smooth production and manufacturing processes. Any disruptions, such as strikes, lockouts, or industrial action, could have a considerable negative impact on our financial health, operational efficiency, and reputation. While we have not encountered such issues in the past, the risk remains significant. A strike or lockout could halt production, delay deliveries, disrupt supply chains, and hinder our ability to meet customer demands, leading to revenue losses and increased operational costs.

Prolonged workforce disruptions can also harm employee morale, lower productivity, and damage our reputation. Clients may perceive delays or quality issues as a result of labour disputes, which could erode the trust we've built with stakeholders. In a highly competitive market, maintaining strong client relationships and delivering on time is critical, and any labour unrest may weaken our standing in the industry.

To address this potential risk, we prioritize open communication with our employees and work to ensure a positive working environment. We focus on fair and transparent management to prevent disputes, while preparing contingency plans, such as maintaining reserves of key materials and products. Recognizing this risk is crucial to safeguarding our operations and ensuring the continued growth of our company.

15. *Our continued success is dependent on our senior management and skilled manpower. Our inability to attract and retain key personnel may have an adverse effect on our business prospects.*

Our experienced Directors have had a significant contribution to the growth of our business, and our future success is dependent on the continued service of our senior management team. An inability to retain any key management personnel may have an adverse effect on our operations. Our ability to execute orders and to obtain new clients also depends on our ability to attract, train, motivate and retain highly skilled professionals, particularly at managerial levels. We continue to face challenges in recruiting suitably skilled personnel, particularly as we continue to grow and diversify our operations. In particular, we may be unable to compete with other larger companies for suitably skilled personnel due to their ability to provide more competitive compensation and benefits. The loss of any of the members of our senior management team, our whole-time directors, or other key personnel or an inability to manage the attrition levels in different employee categories may materially and adversely impact our business, results of operations, financial condition, and growth prospects.

For every new product we expand into, we require suitably skilled personnel. Such skilled personnel may not be available in the market or we may not be able to compete with competitors for such qualified personnel because of more competitive salaries and benefits packages provided by them. If we cannot attract and retain qualified personnel or effectively implement appropriate succession plans, it could have a material adverse impact on our business, financial condition, and the results of operations. Moreover, we may be unable to manage knowledge developed internally, which may be lost in the event of our inability to retain employees.

16. *Our business operations are majorly concentrated in certain geographical regions and any adverse developments affecting our operations in these regions could have a significant impact on our revenue and results of operations.*

We carry our manufacturing operations from our manufacturing facility located at Gujarat. Due to the geographical concentration of our manufacturing operations in these locations, our operations are susceptible to local, regional and environmental factors, such as social and civil unrest, regional conflicts, civil disturbances, economic and weather conditions, natural disasters, demographic and population changes, and other unforeseen events and circumstances. Such disruptions could result in the damage or destruction of a significant portion of our manufacturing abilities, significant delays in the transport of our products and raw materials, loss of key managerial personnel, and/or otherwise adversely affect our business, financial condition and results of operations.

In addition, for the financial year ended March 31, 2024, we derived major portion of our domestic sales from the state of Maharashtra, Madhya Pradesh, Tamil Nadu, Gujarat, West Bengal, Uttar Pradesh, Andhra Pradesh, Karnataka, Rajasthan, Telangana (top 10 states) which contributes 75.99% of total domestic sales of our company. Such geographical concentration of our business in these regions heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in this region, which may adversely affect our business prospects, financial conditions and results of operations.

Further, as we enter into new markets and geographical areas, we are likely to compete with not only with national and international players, but also with the local players, who might have an established presence, and are more familiar with business practices and have stronger relationships with customers, relevant government authorities, suppliers or are in a stronger financial position than us, all of which may give them a competitive advantage over us. Our inability to expand into other areas may adversely affect our business prospects, financial conditions and results of operations. While our management believes that the Company has requisite expertise and vision to grow and mark its presence in other markets going forward, investors should consider our business and prospects in light of the risks, losses and challenges that we face and should not rely on our results of operations for any prior periods as an indication of our future performance.

17. *As we continue to grow, we may not be able to effectively manage our growth and the increased complexity of our business, which could negatively impact our brand and financial performance.*

Continued growth of our business and user base requires us to expand our product portfolio, strengthen our brand recognition, expand and enhance our sales channels, better manage our supply chain, upgrade our information systems and technologies, secure more space for our expanding workforce, and devote other resources to our business expansions, among others. As we continue to grow, managing our business will become more complicated as we develop a wider product mix, some of which we may have less experience in. In addition, as we increase our product offerings, we will need to work with a larger number of business partners and maintain and expand mutually beneficial relationships with our existing and new business partners. Our inability to manage the expansion of our products range, customer base and manufacturing capacities, and execute our growth strategy in a timely manner or within budget estimates, or our inability to meet the expectations to track the changing preferences of our customers or other stakeholders could have an adverse effect on our business, results of operations and financial condition.

We cannot assure you that we will be able to effectively manage our growth, that our current personnel, infrastructure, systems, procedures and controls or any measures to enhance them will be adequate and successful to support our expanding operations or that our strategies and new business initiatives will be executed successfully. If we are not able to manage our growth or execute our strategies effectively, our expansion may not be successful and our business and prospects may be materially and adversely affected. As we continue to expand, we may experience similar difficulties if we are unable to manage our growth, which may adversely affect our reputation and results of operations.

18. *We may not be successful in implementing our business strategies.*

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted clients. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

19. Any failure on our part to effectively manage our inventory may result in an adverse effect on our business, revenue from manufacturing operations and financial condition.

We are a manufacturing company, and, at all points of time, a certain portion of our assets comprises of an inventory of raw materials, work in progress products and finished products. Maintaining sufficient inventory of raw materials is critical for our operations including as a buffer against any supply disruptions. Any failure on our part to effectively manage our inventory of raw materials and finished products in response to changing market scenario may have an adverse effect on our financial condition and may even lead to loss of business and increase the costs of our operations.

In the event we overestimate our requirements for raw materials as compared to the demand for our products, it may lead to situations that require us to block more capital and increase our operating costs in connection with inventories and further expose us to variations in raw materials risk. Equally, if we underestimate our requirements for raw materials, it may adversely affect our ability to manufacture the required quantity of products for our customers' requirements in a timely and cost-efficient manner which may lead to loss of business and / or the opportunity to service customers which could adversely affect our business, results of operations and financial condition. Further, we may also lose opportunities to acquire raw materials in a cost-effective manner, thereby increasing costs of operations and adversely affecting our working capital requirements.

Additionally, if our inventory of finished products is not dispatched on time or if there is any unanticipated delay in the delivery of our finished products or if the finished products are not properly maintained or are damaged or destroyed, we could lose such inventory which could have an adverse impact on our production cycle, results of operation and financial condition.

20. Orders placed by customers may be delayed, modified, cancelled or not fully paid for by our customers, which may have an adverse effect on our business, financial condition and results of operations.

We may encounter problems in manufacturing our products, or manufacturing it on a timely basis. Moreover, factors beyond our control or the control of our customers may postpone the delivery of such products or cause its cancellation, including delays or failure to obtain necessary permits, authorizations, permissions and other types of difficulties or obstructions. Due to the possibility of cancellations or changes in scope and schedule of delivery of such products, resulting from our customer's discretion or problems we encounter in the delivery of such products or reasons outside our control or the control of our customers, we cannot predict with certainty when, if or to what extent we may be able to deliver the orders placed. Additionally, delays in the delivery of such products can lead to customers delaying or refusing to pay the amount, in part or full, that we expect to be paid in respect of such products. In addition, even where a delivery proceeds as scheduled, it is possible that the contracting parties may default or otherwise fail to pay amounts owed. While we have not yet experienced any material delay, reduction in scope, cancellation, execution difficulty, payment postponement or payment default with regard to the orders placed with us, or disputes with customers in respect of any of the foregoing, any such adverse event in the future could materially harm our cash flow position and income. Further, we operate in highly competitive markets in relation to our products where it is difficult to predict whether and when we will receive such awards. As a result, our results of operations can fluctuate from quarter to quarter and year to year depending on whether and when such orders are awarded to us and the commencement and progress of work under the orders placed. For further details of our business, please refer chapter titled "**Our Business**" beginning on Page 111 of this Draft Prospectus.

21. Delays or defaults in customer payments could adversely affect our financial condition.

We are exposed to payment delays and/or defaults by our customers and our financial position and financial performance are dependent on the creditworthiness of our customers. Further, we may not receive advance payment from our customers after signing the purchase orders. Delays in customers' payments may require us to make a working capital investment. If a customer defaults in making payments where we have devoted significant resources or where we have invested significant resources is delayed, cancelled, or does not proceed to completion, it could have an adverse effect on our operating results. For the six months period ending September 30, 2024 and for the financial year ending March 31, 2024, March 31, 2023 and March 31, 2022, our trade receivables were ₹ 1,874.73 lakhs, ₹ 1,490.72 lakhs, ₹ 1,446.40 lakhs and ₹ 1,043.66 lakhs, respectively. However, in the past, our Company has not faced any such instance of default but there is no guarantee that the timeliness of all or any part of our customers' payments and whether they will be able to fulfil their obligations, which may arise from their financial difficulties, cash flow difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur, our financial performance and our operating cash flows may be adversely affected.

22. *Our business is subject to seasonal and other fluctuations that may affect our cash flows and business operations.*

Our business and operations may be affected by seasonal factors which may restrict our ability to carry on activities related to our projects and fully utilize our resources. Heavy or sustained rainfalls or other extreme weather conditions such as cyclones could result in delays or disruptions to our operations during the critical periods of our projects and cause severe damages to our premises and equipment. This may result in delays in execution of projects and also reduce our productivity. During periods of curtailed activity due to adverse weather conditions, we may continue to incur operating expenses and our project related activities may be delayed or reduced. Adverse seasonal developments may also require the evacuation of personnel, suspension or curtailment of operations, resulting in damage to construction sites or delays in the delivery of materials.

23. *General economic and market conditions in India and globally could have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.*

Our business is highly dependent on economic and market conditions in India and overseas jurisdictions where we operate. General economic and political conditions in India and abroad, such as macroeconomic and monetary policies, industry-specific trends, mergers and acquisitions activity, legislation and regulations relating to the financial and securities industries, household savings rate, investment in alternative financial instruments, upward and downward trends in the market, business and financial sectors, volatility in security prices, perceived lack of attractiveness of the Indian capital markets, inflation, foreign direct investment, consumer confidence, currency and interest rate fluctuations, availability of short-term and long-term market funding sources and cost of funding, could affect our business. Global economic and political conditions may also adversely affect the Indian economic conditions. Market conditions may change rapidly and the Indian capital markets have experienced significant volatility in the past. The Indian economy has had sustained periods of high inflation in the recent past. If inflation or real interest rates were to rise significantly, the trends towards increased financial savings might slow down or reverse, our employee costs may increase and the sales of many of our products and services may decline.

24. *Our business requires us to obtain and renew certain licenses and permits from government, regulatory authorities and other national/ international corporations and the failure to obtain or renew them in a timely manner may adversely affect our business operations.*

Our business requires us to obtain and renew from time to time, certain approvals, licenses, registrations and permits. In addition, we require certain approvals, licenses, registrations and permissions under various regulations, guidelines, circulars and statutes regulated by authorities such as the Government of India, the State Governments and certain other regulatory and government authorities, for operating our business. In particular, we are required to obtain certificate of registrations for carrying on certain of our business activities from the Government of India, the State Governments and other such regulatory authorities that are subject to numerous conditions. If we fail to maintain such registrations and licenses or comply with applicable conditions, our certificate of registration for carrying on a particular activity may be suspended and/or cancelled and we will not then be able to carry on such activity. This could materially and adversely affect our business, financial condition and results of operations.

We and our customers, may require various regulatory approvals, sanctions, licenses, registrations and permissions in connection with our operations and the various development activities involved in such orders. We or our customers may face significant uncertainties due to various factors in obtaining or maintaining such approvals. If such approvals are not obtained in a timely manner or at all, there may be a material adverse effect on various development activities, including our operations, thereby adversely affecting our results of operations and financial condition. Furthermore, our government approvals and licenses are subject to numerous conditions, some of which are onerous and require us to incur substantial expenditures. If we fail to comply or a regulator alleges that we have not complied with these conditions, our business, prospects, financial condition and results of operations may be adversely affected. While we typically apply for the renewal of any existing regulatory approvals prior to their expiry dates, there can be no assurance that we will receive such renewal in time or at all.

25. *Our insurance coverage may not be adequate to protect us against certain operating hazards and this may have a material adverse effect on our business.*

We maintain only one insurance policy i.e. New India Bharat Laghu Udyam Suraksha Policy. While it is believed that the insurance coverage maintained by the company would reasonably be adequate to cover all normal risks associated with the operation of our business, there can be no assurance that any claim under the insurance policies maintained by the company will be honoured fully, in part or on time, nor that we have taken out sufficient insurance to cover all material losses. If we were to suffer loss or damage resulting from not obtaining or maintaining insurance or exceeding our insurance coverage, the loss would have to be borne by us and it could have a material adverse effect on our results of operations and financial condition.

26. *Our Directors and certain Key Management Personnel hold Equity Shares in our Company and are therefore interested in the Company's performance in addition to their remuneration and reimbursement of expenses.*

Certain of our Directors and Key Management Personnel are interested in our Company, in addition to regular remuneration or benefits and reimbursement of expenses, to the extent of their shareholding in our Company. There can be no assurance that our Key Management Personnel will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Directors and our Key Management Personnel may take or block actions with respect to our business which may conflict with the best interests of the Company or that of minority shareholders. For details, see the section titled "*Capital Structure*" on Page 58 of this Draft Prospectus. There is no assurance that our Directors and/or our key management personnel will not provide competitive services or otherwise compete in business lines in which we are already present or will enter into in the future.

27. *An inability to manage our growth could disrupt our business and reduce our profitability.*

We have experienced continuous growth in the preceding years. We expect our business to grow as a result of our plans to expand further. We expect any growth in our business to place additional demands on us and require us to continuously evolve and improve our operational, financial, and internal controls across the organization. In particular, continued expansion increases the challenges involved in:

- (i) maintaining high levels of client satisfaction;
- (ii) recruiting, training, and retaining sufficient skilled management, technical and marketing personnel;
- (iii) adhering to health, safety and environment and quality and process execution standards that meet client expectations;
- (iv) preserving a uniform culture, values, and work environment in operations; and
- (v) developing and improving our internal administrative infrastructure, particularly our financial, operational, communications and other internal systems.

Our ability to implement our business plans depend on, inter alia, global economic conditions, our capital resources, our R&D capabilities for new products and technology solutions, our ability to commercially realise the R&D results, our ability to obtain any necessary government or regulatory approval or licenses, and the availability of management, financial and other resources.

The success of our business will depend greatly on our ability to implement our business and strategies effectively. Even if we have successfully executed our business strategies in the past, there can be no assurance that we will be able to execute our strategies on time and within the estimated budget, or that we will meet the expectations of targeted customers. We expect our strategies to place significant demands on our management and other resources and require us to continue developing and improving our financial, operating, and other internal controls. Our inability to manage our business and strategies could have an adverse effect on our business, financial condition, and profitability.

28. ***We could become liable to customers, suffer adverse publicity and incur substantial costs as a result of defects in our products/services, which in turn could adversely affect the value of our brand, and our sales could be diminished if we are associated with negative publicity.***

Any failure or defect in our products could result in a claim against us for damages, regardless of our responsibility for such a failure or defect. Although we attempt to maintain quality standards, we cannot assure that all our products would be of uniform quality, meet the customer standards which in turn could adversely affect the value of our brand, and our sales could be diminished if we are associated with negative publicity. Also, our business is dependent on the trust our customers have in the quality of our products. Any negative publicity regarding our company, brand, or services or any other unforeseen events could affect our reputation and our results from operations.

29. ***Our management will have broad discretion in how we apply the Net Proceeds of the Issue and there is no assurance that the Objects of the Offer will be achieved within the time frame expected, or at all, or that the deployment of Net Proceeds in the manner intended by us will result in an increase in the value of your investment.***

We intend to use the Net Proceeds for the purposes described under the “***Objects of the Issue***” on page 69 of this Draft Prospectus. The Objects of the Issue comprise (a) Part Funding Capital Expenditure towards setting up new manufacturing facility, and (b) for general corporate purposes (the amount utilised for general corporate purposes shall not exceed 25% of the Gross Proceeds). Further, our Objects of the Issue have not been appraised by any bank, financial institution or other independent agency. Our management will have broad discretion to revise our business plans, estimates and budgets from time to time. Consequently, our funding requirements and deployment of funds may change, which may result in the rescheduling of the proposed utilization of Net Proceeds and increasing or decreasing expenditure for a particular activity, subject to compliance with applicable law and the investment policies approved by our management. Further, pursuant to Section 27 of the Companies Act, 2013, any variation in the Objects of the Issue would require a special resolution of the shareholders, and the promoter or controlling shareholders will be required to provide an exit opportunity to the shareholders who do not agree to such proposal to vary the Objects of the Issue, in accordance with applicable law.

In case of an increase in actual expenses or shortfall in requisite funds, additional funds for a particular activity will be met by any means available to us, including internal accruals and additional equity and/or debt arrangements. If actual utilization towards the Objects of the Issue is lower than the proposed deployment, such balance will be used for future growth opportunities, including funding other existing objects, if required. If the estimated utilization of the Net Proceeds is not completely met in a fiscal year, it shall be carried forward.

30. ***Brand recognition is important to the success of our business, and our inability to build and maintain our brand names will harm our business, financial condition and results of operation.***

Brand recognition is important to the success of our business. Establishing and maintaining our brand name in the industry or for people relying on product and services is critical to the success of the customer acquisition process of our business. Although, we expect to allocate significant number of resources, financial and otherwise, on establishing and maintaining our brands, no assurance can be given that our brand names will be effective in attracting and growing user and client base for our businesses or that such efforts will be cost-effective, which may negatively affect our business, financial condition and results of operations.

31. ***The Promoter and Promoter Group will continue to exercise control post completion of the Issue and will have considerable influence over the outcome of matters.***

Upon completion of this Issue, our Promoter and Promoter Group will continue to own a majority of our Equity Shares. As a result, our Promoters will have the ability to exercise significant influence over all matters requiring shareholders’ approval. Our Promoters will also be in a position to influence any shareholder action or approval requiring a majority vote, except where they may be required by the applicable law to abstain from voting. This control could also delay, defer or prevent a change in control of our Company, impede a merger, consolidation, takeover or other business combination involving our Company, or discourage a potential acquirer from obtaining control of our Company even if it is in the best interests of our Company. The interests of our Promoters could conflict with the interests of our other equity shareholders, and the Promoters could make decisions that materially and adversely affect your investment in the Equity Shares.

32. *The future operating results are difficult to predict and may fluctuate or adversely vary from the past performance.*

The company's operating results may fluctuate or adversely vary from past performances in the future due to a number of factors, many of which are beyond the company's control. The results of operations during any financial year or from period to period may differ from one another or from the expected results operation. Its business, results of operations and financial conditions may be adversely affected by, inter alia, a decrease in the growth and demand for the products and services offered by us or any strategic alliances which may subsequently become a liability or non-profitable. Due to various reasons including the above, the future performance may fluctuate or adversely vary from our past performances and may not be predictable. For further details of our operating results, section titled "**Financial Information as Restated**" beginning on Page 178 of this Draft Prospectus.

33. *Portion of our Issue Proceeds are proposed to be utilized for general corporate purposes amounting to ₹ 66.08 lakhs which constitute 2.19% of the total Issue Proceeds.*

As on date we have not identified the use of such funds. Portion of our Issue Proceeds are proposed to be utilized for general corporate purposes amounting to ₹ 66.08 lakhs which constitute 2.19% of the total Issue Proceeds. As on the date of this Draft Prospectus, we have not identified the general corporate purposes for which these funds may be utilized. The deployment of such funds is entirely at the discretion of our management in accordance with policies established by our Board of Directors from time to time and subject to compliance with the necessary provisions of the Companies Act wherever applicable. For details, please refer the chapter titled "**Objects of the Issue**" beginning on Page No. 69 of this Draft Prospectus.

34. *Our operations are subject to high working capital requirements. If we are unable to generate sufficient cash flows to allow us to make required payments, there may be an adverse effect on our results of operations.*

Our business requires significant amount of working capital and major portion of our working capital is utilized towards debtors and inventories. Our Trade Receivables for the six months period ended September 30, 2024 and for the financial period ended March 31, 2024, March 31, 2023, March 31, 2022 were ₹ 1,874.73 lakhs, ₹ 1,490.72 lakhs, ₹ 1,446.40 lakhs and ₹ 1,043.66 lakhs respectively and our inventories for the six months period ended September 30, 2024 and for the period ended March 31, 2024, March 31, 2023, March 31, 2022 were ₹ 674.42 lakhs, ₹ 644.64 lakhs, ₹ 350.53 lakhs and ₹ 101.09 lakhs respectively.

The results of operations of our business are dependent on our ability to effectively manage our inventory and trade receivables. To effectively manage our trade receivables, we must be able to accurately evaluate the credit worthiness of our customers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. However, if our management fails to accurately evaluate the terms and conditions with our customers, it may lead to write-offs bad debts and/ or delay in recoveries which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. A liquidity crunch may also result in increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability.

Our inability to maintain sufficient cash flow, credit facility and other sourcing of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. In the event we are not able to recover our dues from our trade receivables or sell our inventory, we may not be able to maintain our Sales level and thus adversely affecting our financial health.

For further details of working capital requirements, please refer to the chapter titled "**Objects of the Issue**" on page 69 of the Draft Prospectus.

35. *Some of the approvals are required to be updated consequent to the change in the name of our Company.*

Our company converted into a public limited company, resulting in a name change from "Satol Chemicals Private Limited" to "Satol Chemicals Limited". This alteration was formally recorded in a new Certificate of Incorporation dated July 01, 2024, with the Corporate Identification Number U24290MH2020PLC348489, issued by the Registrar of Companies, Central Processing Centre. Due to such change, our Company is required to change its name in all approvals, licenses, registrations and permits in the name of Satol Chemicals Limited. While we have updated our name in some of the registrations, permits or approvals, we are still required to update our name in some of the remaining registrations, permits or approvals.

36. *Our Company has entered into certain related party transactions and may continue to do so in the future.*

Our Company has entered into related party transactions with our Promoters, Directors and Group Entities. While our Company believes that all such transactions have been conducted on the arm's length basis and are in compliance with the applicable provisions of Companies, 2013 and other applicable law, there can be no assurance that it could not have been achieved on more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that our Company will enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation. For details, please refer to ***"Related Party Transactions"*** under section titled ***"Financial Statements as Restated"*** on page no. 178 of this Draft Prospectus.

37. *We have not entered into any long-term contracts with any of our clients.*

We do not have any long-term contracts with our clients and any change in the business pattern of our existing clients could adversely affect the business of our Company. As a result, our customers can terminate their relationships with us due to a change in preference or any other reason on immediate basis, which could materially and adversely impact our business. Consequently, our revenue may be subject to variability because of fluctuations in demand for our products and services. Our Company's customers have no obligation to work with us and may either cancel, reduce, or delay the business. The business by our Company's customers is dependent on factors such as the customer satisfaction with the level of service that our Company provides, fluctuation in demand for our Company's products, customer's inventory management, amongst others. Although we have satisfactory business relations with our clients and have received continued business from them in the past, there is no certainty that the same will continue in the years to come and may affect our profitability. Although, we have a strong emphasis on quality, timely delivery of our products and raw materials and personal interaction by the senior management with the customers and suppliers, any change in the buying pattern of buyers and preferences of suppliers can adversely affect the business and the profitability of our Company.

38. *In addition to our existing indebtedness for our operations, we may be required to obtain further loan during the course of business. There can be no assurance that we would be able to service our existing and/or additional indebtedness.*

In addition to our existing indebtedness for our existing operations we may be required to raise further debt in the form of term loans and working capital loans in the course of business. Increased borrowings, if any, would adversely affect our debt-equity ratio and our ability to further borrow at competitive rates. Any failure to service our indebtedness or otherwise perform our obligations under our financing agreements could lead to a termination of one or more of our credit facilities, trigger cross default provisions, penalties and acceleration of amounts due under such facilities which may adversely affect our business, financial condition and results of operations. For further details of our indebtedness, please refer to the chapter titled ***"Financial Indebtedness"*** on page 212 of this Draft Prospectus.

39. *Excessive dependence on HDFC Bank in respect of Loan facilities obtained by our Company.*

Our company has been sanctioned significant portion of credit facilities by HDFC Bank. The Company is dependent on such facility for its fund and non-fund based limits and other funding requirement and any default under such arrangement with such lender may create problem for operation of the Company, which may affect the financial stability of the Company. At the same time this may result into difficulty in arranging for funds for re-payment and may also adversely affect the financial position of the Company.

40. *Our lenders have charge over our movable properties, book debts, stocks in respect of finance availed by us.*

We have secured our lenders by creating a charge over our movable properties, book debts, stocks in respect of loans / facilities availed by us from HDFC Bank. The total amounts outstanding and payable by us as secured loans were ₹ 326.48 Lakhs as on September 30, 2024. In the event we default in repayment of the loans / facilities availed by us and any interest thereof, our assets may be forfeited by lenders, which in turn could have significant adverse effect on business, financial condition or results of operations. For further information on the ***"Financial Indebtedness"*** please refer to page 212 of this Draft Prospectus.

41. *Our debt financing agreements contain certain restrictive covenants that may adversely affect our Company's business, credit ratings, prospects, results of operations and financial condition.*

Certain debt financing agreements that our Company has entered into contain restrictive covenants that limit our ability to undertake certain types of transactions. Under our debt financing agreements our Company is required to maintain certain financial covenants. Even though in the past, our company has not faced any instances that adversely affected the Company's business, credit ratings, prospects, results of operations and financial condition, due to restrictive covenants of the debt financing agreements, there can be no assurance that our Company has complied with all such restrictive covenants in a timely manner or at all or that we will be able to observe compliance with all such restrictive covenants in the future. A failure to observe the restrictive covenants under our debt financing agreements may result in termination of our financing agreements, levy of default interest, acceleration of all amounts due under such facilities and the enforcement of any security provided in relation thereto. Any acceleration of amounts due under such debt financing agreements may trigger cross-default or cross-acceleration provisions under other debt financing agreements, which may compel us to dedicate a substantial portion of our cash flow from operations or sell certain assets to make such payments thereby reducing the availability of cash for our working capital requirements and other general corporate purposes. Further, in the event of any of the circumstances coming into effect our business, prospects, results of operations and financial condition may be adversely affected.

42. *We have not made any alternate arrangements for meeting our regular working capital requirements. If we are unable to manage/arrange funds (including at short notice) to meet our working capital requirements, there may be an adverse effect on our results of operations and financial performance.*

As on date, we have not made any alternate arrangements for meeting our working capital requirements, other than the existing sanctioned limits. Our business requires a significant amount of working capital to finance the purchase of raw materials before payments are received from customers. We cannot assure you that the budgeting of our working capital requirements for a particular year will be accurate. There may be situations where we may under budget for our working capital requirements, in which case there may be delays in arranging the additional working capital requirements, which may delay the execution of projects leading to loss of reputation, levy of liquidated damages, and an adverse effect on the cash flows. If we experience insufficient cash flows or are unable to borrow funds on a timely basis or at all to meet the working capital requirements, there may be an adverse effect on our results of operations. We may also be subject to fluctuations of interest rates for our financing. If we are unable to secure financing at favourable rates for this purpose, our ability to secure larger-scale projects will be impeded and our growth and expansion plans will be materially and adversely affected which in turn will materially and adversely affect our future financial performance.

Our indebtedness is secured by charges over Immovable Property, Stocks, Book Debts etc. If we are unable to repay or refinance our outstanding indebtedness, or if we are unable to obtain additional financing on terms acceptable to us, we may be unable to implement our growth strategy, and our business, prospects, financial condition, and results of operations may be adversely affected.

43. *The intellectual Property Rights used by our company are registered in the name of our company, but any infringement of third-party intellectual property rights or failure to protect our intellectual property rights may adversely affect our business*

However, Infringement of third-party intellectual property rights or failure to protect our own intellectual property can have negative consequences. In addition, infringement claims can damage our reputation and discourage potential investors, partners, or customers. Additionally, if we fail to protect our own intellectual property, our competitors or other third parties may copy, steal, or misuse our ideas, products, or services. This can lead to lost revenues, decreased market share, or erosion of our competitive advantage. Moreover, any unauthorized use, reproduction, or distribution of our copyrighted material without our permission will result in legal action and may lead to financial penalties or damage to our brand reputation. It is essential for us to protect our copyrighted material and ensure that it is used only with our permission, to avoid any negative impact on our business operations. Defending our intellectual property rights can be expensive and time-consuming, and we may not be able to prevent others from infringing or challenging our rights.

44. We are subject to risks arising from interest rate fluctuations, which could adversely affect our business, financial condition and results of operations.

Interest rates for borrowings have been volatile in India in recent periods. Our operations are funded to a significant extent by working capital debt facilities and increases in interest rate (and consequent increase in the cost of servicing such debt) may have an adverse effect on our results of operations and financial condition. Our current debt facilities carry interest at variable rates as well as fixed rates. Although we may in the future engage in interest rate hedging transactions from time to time, there can be no assurance that these agreements will protect us adequately against interest rate risks.

45. We are dependent on third party transportation providers for procuring raw material from our suppliers and delivery of products to our clients. Any failure on the part of such service providers to meet their obligations could have a material adverse effect on our business, financial condition and results of operation.

We are dependent on third party transportation for raw material and Products Manufactured by us. As Manufacturing is our main activities, our success depends on the smooth supply and transportation of the Raw Material from our suppliers and transportation of our products to our buyers/clients, both of which are subject to various uncertainties and risks. Though our business has not experienced any disruptions due to transportation strikes in the past, any future transportation strikes may have an adverse effect on our business.

In addition, materials may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be delay in delivery of materials which may also affect our business and our results of operation negatively. A failure to maintain a continuous supply of materials to us as well as to our clients in an efficient and reliable manner could have a material and adverse effect on our business, financial condition and results of operations.

46. There are certain instances of delays in the past with ROC/Statutory Authorities.

Our Company also in the past have made delay in filings of some RoC forms as per the stipulated timelines prescribed under the Companies Act, 2013. Further, if any such action is initiated by the regulatory authority, then the Company will have to abide by the order of such regulatory authority or pay any penalty that may be imposed by any regulatory authorities in future for non-compliance with provisions of corporate and other law which could impact the financial position of the Company to that extent. To streamline our compliance processes and prevent delays, our company has taken several corrective measures i.e. enhancement of internal monitoring systems, dedicated compliance personnel and engagement of compliance professionals.

47. ***Our Promoters have provided personal guarantees for loans availed by our Company. Our business, financial condition, results of operations, cash flows and prospects may be adversely affected by the invocation of all or any personal guarantees provided by our Promoter.***

Our Promoters and Directors have provided personal guarantees to secure a significant portion of our existing borrowings, and may post listing continue to provide such guarantees and other security. In case of a default under our loan agreements, any of the personal guarantees provided by our Promoter and Directors may be invoked, which could negatively impact the reputation of our Company. Also, we may face certain impediments in taking decisions in relation to our Company, which in turn would result in a material adverse effect on our financial condition, business, results of operations and prospects and would negatively impact our reputation. In addition, our Promoters and Directors may be required to liquidate their shareholding in our Company to settle the claims of the lenders, thereby diluting their shareholding in our Company. Also, if our Promoters and Directors revoke their personal guarantees and we may not be successful in procuring alternate guarantees and property satisfactory to the lenders, as a result we may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows. For further details regarding loans availed by our Company, please refer “***Financial Indebtedness***” on page no. 212 of this Draft Prospectus.

Our Company is vulnerable to risk arising from the failure of employees to adhere to approved procedures, system controls, fraud, system failures, information system disruptions, communication systems failure and interception during transmission through external communication channels or networks. Failure to protect fraud or breach in security may adversely affect our Company’s operations and financial performance. Our reputation could also be adversely affected by significant fraud committed by our employees, agents, customers or third parties.

49. ***There have been some instances of delayed filing of returns and depositing of statutory dues with regulatory authorities”***

In the past, our company has at several instances, delayed in filing GST returns, EPF returns and deposit of statutory dues, as a result of which, we have been required to pay the late filing fees along with interest on delayed deposit of due taxes and statutory dues. Although the late filing fees levied are not significant but if we continue this practice, the accumulated amounts of each delay may adversely affect our cash flows. In the event of any cognizance being taken by the concerned authorities in respect of above, actions may be taken against our Company and our directors, in which event the financials of our Company and our directors may be affected. For further details of certain material legal proceedings involving our Company, our Promoters, our directors, see “***Outstanding Litigation and Material Developments***” beginning on page 225 of this Draft Prospectus.

50. ***Information in relation to our installed capacity and capacity utilization of our manufacturing facility included in this Draft Prospectus is based on various assumptions and estimates, and future production and capacity utilization may vary.***

Information relating to our installed capacities and the capacity utilization of our manufacturing facility included in this Draft Prospectus is based on various assumptions and estimates of our management, including proposed operations, assumptions relating to availability and quality of raw materials, actual product mix vis-à-vis the products mix envisaged for computation of our installed capacity and assumptions relating to potential utilization levels and operational efficiencies. While we have obtained a certificate dated January 24, 2025 from M/s. For details of Key Management Personnel and their appointment, please refer to chapter “***Our Management***” beginning on page 146 of this Draft Prospectus.

52. *Any reduction in the demand for our products could lead to underutilisation of our manufacturing capacity.*

We face the risk that our customers might not place any order or might even cancel existing orders. Cancellations, of orders by our customers could adversely affect our results of operations by reducing our sales volume leading to a reduced utilization of our existing manufacturing capacity. Further, we make significant decisions, including determining the levels of business that we will seek and accept, production schedules, personnel requirements and other resource requirements, based on our estimates of customer orders. The changes in demand of our products could reduce our ability to estimate accurately future customer requirements, make it difficult to schedule production and lead to over production and utilization of our manufacturing capacity for a particular product. The requirements of our customers are not restricted to one type of product and therefore variations in demand for certain types of products also requires us to make customizations. This may lead to over production of certain products and under production of some other products resulting in a complete mismatch of capacity and capacity utilization. Any such mismatch leading to over or under utilization of our manufacturing facilities could adversely affect our business, results of operations, financial condition and cash flows.

53. *An inability to renew quality accreditations in a timely manner or at all, or any deficiencies in the quality of our products may adversely affect our business prospects and financial performance.*

We obtain and maintain quality certifications and accreditations from independent certification entities and also comply with prescribed specifications and standards of quality approved by the Government in connection with the products we manufacture. Such specifications and standards of quality is an important factor in the success and wide acceptability of our products. If we fail to comply with applicable quality standards or if the relevant accreditation institute or agency declines to certify our products, or if we are otherwise unable to obtain such quality accreditations in the future, in a timely manner or at all, our business prospects and financial performance will be materially and adversely affected.

These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this draft prospectus.

55. *Certain relevant copies of educational qualification and experience certificates of our Promoters/Directors/KMP/SMP are not traceable.*

The deployment of these funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

B. Issue Related Risks

57. ***In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects of this Issue which would in turn affect our revenues and results of operations.***

The funds that we receive would be utilized for the Objects of the Issue as has been stated in the Chapter “*Objects of the Issue*” on page 69 of this Draft Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management’s estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, we may have to revise our business, development and working capital plans resulting in unprecedented financial mismatch and this may adversely affect our revenues and results of operations.

58. ***The Issue Price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue.***

The Issue price is based on numerous factors and may not be indicative of the market price for our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. There can be no assurance that you will be able to resell your Shares at or above the Issue Price. Among the factors that could affect our Share price are: variations in the rate of growth of our financial indicators, such as earnings per share, net profit and income; changes in income or earnings estimates or publication of research reports by analysts; speculation in the press or investment community; general market conditions; and domestic and international economic, legal and regulatory factors unrelated to our performance.

59. ***After this Issue, the price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not be sustained.***

Prior to this Issue, there has been no public market for our Equity Shares, and an active trading market may not develop or be sustained upon the completion of this Issue. The initial public offering price of the Equity Shares offered hereby was determined through our negotiations with the LM and may not be indicative of the market price of the Equity Shares after this Issue. The market price of our Equity Shares after this Issue will be subject to significant fluctuations in response to, among other factors:

- variations in our operating results and the performance of our business;
- regulatory developments in our target markets affecting us, our customers, or our competitors;
- changes in financial estimates by securities research analysts;
- addition or loss of executive officers or key employees;
- loss of one or more significant customers;
- the performance of the Indian and global economy;
- significant developments in India’s economic liberalization and deregulation policies, and the fiscal regime;
- volatility in the Indian and global securities markets;
- performance of our competitors and perception in the Indian market about investment in our industry; and
- adverse media reports, if any, on our Company, or the industry.

Many of these factors are beyond our control. There has been recent volatility in the Indian stock markets and our share price could fluctuate significantly as a result of such volatility in the future. There can be no assurance that an active trading market for our Equity Shares will develop or be sustained after this Issue, or that the price at which our Equity Shares are initially offered will correspond to the prices at which they will trade in the market subsequent to this Issue.

- 60. *There is no guarantee that our Equity Shares will be listed on the SME Platform of BSE Limited in a timely manner or at all.***

In accordance with Indian law and practice, permission for listing and trading of our Equity Shares will not be granted until after certain actions have been completed in relation to this Issue and until Allotment of Equity Shares pursuant to this Issue. In accordance with current regulations and circulars issued of SEBI, our Equity Shares are required to be listed on the SME Platform of BSE Limited within such time as mandated under UPI Circulars, subject to any change in the prescribed timeline in this regard. However, we cannot assure you that the trading in our Equity Shares will commence in a timely manner or at all. Any failure or delay in obtaining final listing and trading approvals may restrict your ability to dispose of your Equity Shares.

- 61. *The investors will not be able to sell immediately on an Indian stock exchange any of the Equity Shares they purchase in the Issue.***

We have applied to BSE Limited to use its name as the Stock Exchange in this offer document for listing our shares on the SME Platform of BSE Limited. In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Offer will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a delay in listing the Equity Shares on the SME Platform of BSE Limited. Any delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

- 62. *There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.***

Once listed, we would be subject to circuit breakers imposed by stock exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

- 63. *You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.***

Under the current Indian Income Tax provisions, all transactions of purchase and sales of securities on Indian stock exchanges are subject to levy of securities transaction tax (STT) which will be collected by respective stock exchange on which the securities are transacted. Accordingly, the Indian Income Tax Act has special capital gains tax provisions for all transactions of purchase and sale of equity shares carried out on the Indian Stock Exchanges. Under the current Indian Income Tax provisions, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India.

- 64. *Applicants to this Issue are not allowed to withdraw their Applications after the Issue Closing Date.***

In terms of the SEBI (ICDR) Regulations, Applicants in this Issue are not allowed to withdraw their Applications after the Issue Closing Date. The Allotment in this Issue and the credit of such Equity Shares to the Applicant's demat account with its depository participant shall be completed within such period as prescribed under the applicable laws. There is no assurance, however, that material adverse changes in the international or national monetary, financial, political or economic conditions or other events in the nature of force majeure, material adverse changes in our business, results of operation or financial condition, or other events affecting the Applicant's decision to invest in the Equity Shares, would not arise between the Issue Closing Date and the date of Allotment in this Issue. Occurrence of any such events after the Issue Closing Date could also impact the market price of our Equity Shares. The Applicants shall not have the right to withdraw their applications in the event of any such occurrence. We cannot assure you that the market price of the Equity Shares will not decline below the Issue Price. To the extent the market price for the Equity Shares declines below the Issue Price after the Issue Closing Date, the shareholder will be required to purchase Equity Shares at a price that will be higher than the actual market price of the Equity Shares at that time. Should that occur, the shareholder will suffer an immediate unrealized loss as a result. We may complete the Allotment even if such events may limit the Applicants' ability to sell our Equity Shares after this Issue or cause the trading price of our Equity Shares to decline.

65. ***Any future issuance of Equity Shares may dilute the investors' shareholdings or sales of our Equity Shares by our Promoters or Promoter Group may adversely affect the trading price of our Equity Shares.***

Any future equity issuances by us or sales of our Equity Shares by our Promoters or Promoter Group may adversely affect the trading price of our Equity Shares and our Company's ability to raise capital through an issue of securities. In addition, any perception by potential investors that such issuances or sales might occur could also affect the trading price of our Equity Shares. Additionally, the disposal, pledge or encumbrance of our Equity Shares by any of our Company's major shareholders, or the perception that such transactions may occur may affect the trading price of our Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

66. ***Our ability to pay dividends in the future will depend on our earnings, financial condition, working capital requirements, capital expenditures and restrictive covenants of our financing arrangements.***

We have never declared or paid any cash dividends in the past three years. Our ability to pay dividends in the future will depend on our earnings, financial condition, cash flow, working capital requirements, capital expenditure and restrictive covenants of our financing arrangements. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board and in accordance with the dividend distribution policy adopted by our Board and will depend on factors that our Board deems relevant, including among others, our future earnings, financial condition, cash requirements, business prospects and any other financing arrangements. We cannot assure you that we will be able to pay dividends in the future. Please refer to the chapter titled "***Dividend Policy***" beginning on page 192 of this Draft Prospectus.

67. ***Certain key performance indicators for certain listed industry peers included in this Draft Prospectus have been sourced from public sources and there is no assurance that such financial and other industry information is complete.***

We have included certain key performance indicators, comprising financial and operational information, for certain listed industry peers, in the "***Basis for Issue Price***" beginning on page 79 of the Draft Prospectus. While our business comprises of the healthcare industry, these listed industry peers are related to associate industry. Although this information is sourced from and relied upon on the standalone/consolidated audited financial statements of the relevant listed industry peers for Fiscals 2024 as available on the websites of the Stock Exchanges, including the annual reports of the respective companies for the years ended March 31, 2024 submitted to Stock Exchanges, there is no assurance that this information with respect to industry peers is either complete. There are different methodologies and formulas used to compute the various ratios.

68. ***The investors may be restricted in their ability to exercise pre-emptive rights under Indian law and may be adversely affected by future dilution of their ownership position.***

Under the Companies Act, 2013, a Company incorporated in India must offer its holders of shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages before the issuance of any new shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the shares which are voted on the resolution. However, if the law of the jurisdiction the investors are in does not permit them to exercise their pre-emptive rights without us filing an offering document or registration statement with the applicable authority in the jurisdiction they are in, they will not be able to exercise their pre-emptive rights unless we make such a filing. If we elect not to make such a filing, the new securities may be issued to a custodian, who may sell the securities for the investors' benefit. The value such custodian would receive upon the sale of such securities if any, and the related transaction costs cannot be predicted. To the extent that the investors' are unable to exercise pre-emptive rights granted in respect of the Equity Shares, their proportional interest in us would be reduced.

69. ***Rights of shareholders under Indian law may be more limited than under the laws of other jurisdictions.***

The Companies Act and related regulations, the Articles of Association, and the Listing Agreements to be entered into with the Stock Exchange govern the corporate affairs of the Company. The Legal principles relating to these matters and the validity of corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as a shareholder than as a shareholder of a corporation in another jurisdiction.

70. ***Our Equity Shares are quoted in Indian Rupees in India, and therefore investors may be subject to potential losses arising out of exchange rate risk on the Indian Rupee and risks associated with the conversion of Indian Rupee proceeds into foreign currency.***

Investors are subject to currency fluctuation risk and convertibility risk since the Equity Shares are quoted in Indian Rupees on the Indian stock exchanges on which they are listed. Dividends on the Equity Shares will also be paid in Indian Rupees. The volatility of the Indian Rupee against the U.S. dollar and other currencies subjects investors who convert funds into Indian Rupees to purchase our Equity Shares to currency fluctuation risks.

EXTERNAL RISK FACTORS

71. ***The COVID-19 pandemic, or any future pandemic or widespread public health emergency, could materially and adversely impact our business, financial condition, cash flows and results of operations.***

In late 2019, COVID-19 emerged and by March 11, 2020 was declared a global pandemic by The World Health Organization. Governments and municipalities around the world instituted measures in an effort to control the spread of COVID-19, including quarantines, shelter-in-place orders, school closings, travel restrictions, lock down of cities and closure of non-essential businesses. By the end of March, the macroeconomic impacts became significant, exhibited by, among other things, a rise in unemployment and market volatility. The outbreak of COVID-19 in many countries, including India, the United Kingdom and the United States, has significantly and adversely impacted economic activity and has contributed to significant volatility and negative pressure in financial markets, and it is possible that the outbreak of COVID-19 will cause a prolonged global economic crisis, recession or depression, despite monetary and fiscal interventions by governments and central banks globally. On March 24, 2020, the Government of India ordered a national lockdown in response to the spread of COVID-19. Although some governments are beginning to ease or lift these restrictions, the impacts from the severe disruptions caused by the effective shutdown of large segments of the global economy remain unknown and no prediction can be made of when any of the restrictions currently in place will be relaxed or expire, or whether or when further restrictions will be announced.

The outbreak, or threatened outbreak, of any severe communicable disease (particularly COVID-19) could materially adversely affect overall business sentiment and environment, particularly if such outbreak is inadequately controlled. The spread of any severe communicable disease may also adversely affect the operations of our clients and service providers, which could adversely affect our business, financial condition and results of operations. The outbreak of COVID-19 has resulted in authorities implementing several measures such as travel bans and restrictions, quarantines, shelter in place orders, and shutdowns. These measures have impacted and may further impact our workforce and operations, the operations of our clients, and those of our respective service providers. There is currently substantial medical uncertainty regarding COVID-19. A rapid increase in severe cases and deaths where measures taken by governments fail or are lifted prematurely, may cause significant economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and could be severe. If any of our employees were suspected of contracting COVID-19 or any other epidemic disease, this could require us to quarantine some or all of these employees or disinfect the facilities used for our operations. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general.

The outbreak has significantly increased economic uncertainty. It is likely that the current outbreak or continued spread of COVID-19 will cause an economic slowdown and it is possible that it could cause a global recession. The spread of COVID-19 has caused us to modify our business practices (including employee travel, employee work locations, and cancellation of physical participation in meetings, events and conferences), and we may take further actions as may be required by government authorities or that we determine are in the best interests of our employees, customers, partners, and suppliers. There is no certainty that such measures will be sufficient to mitigate the risks posed by the outbreak, and our ability to perform critical functions could be harmed. The extent to which the COVID-19 further impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including new information which may SME concerning the severity of the coronavirus and the actions taken globally to contain the coronavirus or treat its impact, among others. Existing insurance coverage may not provide protection for all costs that may arise from all such possible events. The degree to which COVID-19 impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including, but not limited to, the duration and spread of the outbreak, its severity, the actions taken to contain the outbreak or treat its impact, and how quickly and to what extent normal economic and operating conditions can resume. The above risks can threaten the safe operation of our facilities and cause disruption of operational activities, environmental harm, loss of life, injuries and impact the wellbeing of our people.

Further in case the lockdown is extended, it could result in muted economic growth or give rise to a recessionary economic scenario, in India and globally, which could adversely affect the business, prospects, results of operations and financial condition of our Company. The full extent to which the COVID-19 pandemic, or any future pandemic or widespread public health emergency impacts our business, operations and financial results will depend on numerous evolving factors that we may not be able to accurately predict, including: the scope, severity, and duration of the pandemic; actions taken by governments, business and individuals in response to the pandemic; the effect on customer demand for and ability to pay for our products; the impact on our capital expenditure; disruptions or restrictions on our employees' and suppliers' ability to work and travel; any extended period of remote work arrangements; and strain on our or our customers' business continuity plans, and resultant operational risk.

72. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.*

Our business and financial performance could be adversely affected by unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations applicable to us and our business. Please refer to "**Key Industry Regulations and Policies**" on page 138 of this Draft Prospectus for details of the laws currently applicable to us.

There can be no assurance that the Government of India may not implement new regulations and policies which will require us to obtain approvals and licenses from the Government of India and other regulatory bodies or impose onerous requirements and conditions on our operations. Our Company will comply with relevant regulations as and when applicable. However, any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment to, or change to governing laws, regulation or policy in the jurisdictions in which we operate may have a material adverse effect on our business, financial condition and results of operations. In addition, we may have to incur expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. Any unfavourable changes to the laws and regulations applicable to us could also subject us to additional liabilities.

GST has been implemented with effect from July 1, 2017 and has replaced the indirect taxes on goods and services such as central excise duty, service tax, central sales tax, state VAT and surcharge being collected by the central and state governments. The GST has led to increase tax incidence and administrative compliance. Any future amendments may affect our overall tax efficiency, and may result in significant additional taxes becoming payable.

Further, the general anti avoidance rules ("GAAR") provisions have been made effective from assessment year 2018-19 onwards, i.e.; financial Year 2017-18 onwards and the same may get triggered once transactions are undertaken to avoid tax. The consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain.

The application of various Indian tax laws, rules and regulations to our business, currently or in the future, is subject to interpretation by the applicable taxation authorities. If such tax laws, rules and regulations are amended, new adverse laws, rules or regulations are adopted or current laws are interpreted adversely to our interests, the results could increase our tax payments (prospectively or retrospectively) and/or subject us to penalties. Further, changes in capital gains tax or tax on capital market transactions or sale of shares could affect investor returns. As a result, any such changes or interpretations could have an adverse effect on our business and financial performance.

73. *Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.*

Inflation is typically impacted by factors such as governmental policies, regulations, commodity prices, liquidity and global economic environment. Any change in the government or a change in the economic and deregulation policies could adversely affect the inflation rates. Continued high rates of inflation may increase our costs such as salaries, travel costs and related allowances, which are typically linked to general price levels. There can be no assurance that we will be able to pass on any additional costs to our clients or that our revenue will increase proportionately corresponding to such inflation. Accordingly, high rates of inflation in India could have an adverse effect on our profitability and, if significant, on our financial condition.

74. *A slowdown in economic growth in India could adversely affect our business, results of operations, financial condition and cash flows.*

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our products may be adversely affected by an economic downturn in domestic, regional and global economies. Economic growth in the country in which we operate is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports of materials, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production. Consequently, any future slowdown in the Indian economy could harm our business, results of operations, financial condition and cash flows. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margin.

75. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the Mumbai terrorist attacks and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

76. *Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our ability to raise additional financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our capital expenditure plans, business and financial performance and the price of our Equity Shares.

77. *We have not prepared, and currently do not intend to prepare, our financial statements in accordance with the International Financial Reporting Standards ("IFRS"). Our transition to IFRS reporting could have a material adverse effect on our reported results of operations or financial condition.*

Public companies in India, including us, may be required to prepare annual and interim financial statements under IFRS in accordance with the roadmap for convergence with IFRS announced by the Ministry of Corporate Affairs, Government of India through a press note dated January 22, 2010 (the "IFRS Convergence Note"). The Ministry of Corporate Affairs by a press release dated February 25, 2011 has notified that 35 Indian Accounting Standards are to be converged with IFRS. The date of implementation of such converged Indian accounting standards has not yet been determined. Our financial condition, results of operations, cash flows or changes in shareholders' equity may appear materially different under IFRS than under Indian GAAP or our adoption of converged Indian Accounting Standards may adversely affect our reported results of operations or financial condition. This may have a material adverse effect on the amount of income recognized during that period and in the corresponding (restated) period in the comparative Fiscal/period.

78. *Political instability or changes in the Government could adversely affect economic conditions in India generally and our business in particular.*

Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Elimination or substantial change of policies or the introduction of policies that negatively affect the Company's business could cause its results of operations to suffer. Any significant change in India's economic policies could disrupt business and economic conditions in India generally and the Company's business in particular.

79. *Financial difficulty and other problems in certain long-term lending institutions and investment institutions in India could have a negative impact on our business.*

We are exposed to the risks of the Indian financial system which may be affected by the financial difficulties faced by certain Indian financial institutions because the commercial soundness of many financial institutions may be closely related as a result of credit, trading, clearing or other relationships. This risk, which is referred to as “systemic risk,” may adversely affect financial intermediaries, such as clearing agencies, banks, securities firms and exchanges with whom we interact on a daily basis. Our transactions with these financial institutions expose us to credit risk in the event of default by the counter party, which can be exacerbated during periods of market illiquidity. As the Indian financial system operates within an emerging market, we face risks of a nature and extent not typically faced in more developed economies, including the risk of deposit runs notwithstanding the existence of a national deposit insurance scheme. The problems faced by individual Indian financial institutions and any instability in or difficulties faced by the Indian financial system generally could create adverse market perception about Indian financial institutions and banks. This in turn could adversely affect our business, financial condition, results of operations and cash flows.

80. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

INDIAN ECONOMY

INTRODUCTION

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP or GDP at Current Prices for Q1 2024-25 is estimated at Rs. 77.31 lakh crores (US\$ 928.9 billion) with growth rate of 9.7%, compared to the growth of 8.5% for Q1 2023-24. The growth in nominal GDP during 2023-24 is estimated at 9.6% as compared to 14.2% in 2022-23. Strong domestic demand for consumption and investment, along with Government’s continued emphasis on capital expenditure are seen as among the key driver of the GDP in the second half of FY24. During the period April-September 2025, India’s exports stood at US\$ 211.46 billion, with Engineering Goods (26.57%), Petroleum Products (16.51%) and electronic goods (7.39%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has demonstrated promise to boost growth by unleashing the pent-up demand. The sector’s success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable because of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

MARKET SIZE

Real GDP or GDP at Constant (2011-12) Prices in the year 2023-24 is estimated at Rs. 172.90 lakh crores (US\$ 2.07 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 160.71 lakh crores (US\$ 1.92 trillion). The growth in real GDP during 2023-24 is estimated at 7.6% as compared to 7.0% in 2022-23. There are 113 unicorn startups in India, with a combined valuation of over US\$ 350 billion. As many as 14 tech startups are expected to list in 2024 Fintech sector poised to generate the largest number of future unicorns in India. With India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil

sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time period. India's current account deficit (CAD) narrowed to 1.2% of GDP in the October-December quarter. The CAD stood at US\$ 10.5 billion for the third quarter of 2023-24 compared to US\$ 11.4 billion or 1.3% of GDP in the preceding quarter. This was largely due to higher service exports.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

- The Government of India is expected to increase public health spending to 2.5% of the GDP by 2025.

ROAD AHEAD

In the second quarter of FY24, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2023. India's comparatively strong position in the external sector reflects the country's positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in 2023-24, stood 37.4% higher than the same period last year. In the budget of 2024-25, capital expenditure took lead by steeply increasing the capital expenditure outlay by 17.1 % to Rs.11 lakh crore (US\$ 133.51 billion) over Rs. 9.48 lakh crore (US\$ 113.91 billion) in 2023-24. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In September 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

MANUFACTURING SECTOR IN INDIA

INTRODUCTION

Manufacturing is emerging as an integral pillar in the country's economic growth, thanks to the performance of key sectors like automotive, engineering, chemicals, pharmaceuticals, and consumer durables. The Indian manufacturing industry generated 16-17% of India's GDP pre-pandemic and is projected to be one of the fastest growing sectors.

The machine tool industry was literally the nuts and bolts of the manufacturing industry in India. Today, technology has stimulated innovation with digital transformation a key aspect in gaining an edge in this highly competitive market.

Technology has today encouraged creativity, with digital transformation being a critical element in gaining an advantage in this increasingly competitive industry. The Indian manufacturing sector is steadily moving toward more automated and process-driven manufacturing, which is projected to improve efficiency and enhance productivity.

India's manufacturing sector reached a 16-year high in March, with the HSBC Manufacturing Purchasing Managers' Index (PMI) rising to 59.1, driven by strong increases in output, new orders, and job creation across various goods sectors.

India has the capacity to export goods worth US\$ 1 trillion by 2030 and is on the road to becoming a major global manufacturing hub.

With 17% of the nation's GDP and over 27.3 million workers, the manufacturing sector plays a significant role in the Indian economy. Through the implementation of different programmes and policies, the Indian government hopes to have 25% of the economy's output come from manufacturing by 2025.

India now has the physical and digital infrastructure to raise the share of the manufacturing sector in the economy and make a realistic bid to be an important player in global supply chains.

A globally competitive manufacturing sector is India's greatest potential to drive economic growth and job creation this decade. Due to factors like power growth, long-term employment prospects, and skill routes for millions of people, India has a significant potential to engage in international markets. Several factors contribute to their potential. First off, these value chains are well positioned to benefit from India's advantages in terms of raw materials, industrial expertise, and entrepreneurship.

Second, they can take advantage of four market opportunities: expanding exports, localising imports, internal demand, and contract manufacturing. With digital transformation being a crucial component in achieving an advantage in this fiercely competitive industry, technology has today sparked creativity. Manufacturing sector in India is gradually shifting to a more automated and process driven manufacturing which is expected to increase the efficiency and boost production of the manufacturing industry.

India is gradually progressing on the road to Industry 4.0 through the Government of India's initiatives like the National Manufacturing Policy which aims to increase the share of manufacturing in GDP to 25 percent by 2025 and the PLI scheme for manufacturing which was launched in 2022 to develop the core manufacturing sector at par with global manufacturing standards.

FDI in India's manufacturing sector has reached US\$ 165.1 billion, a 69% increase over the past decade, driven by production-linked incentive (PLI) schemes. In the last five years, total FDI inflows amounted to US\$ 383.5 billion.

India is planning to offer incentives of up to Rs. 18,000 crore (US\$ 2.2 billion) to spur local manufacturing in six new sectors including chemicals, shipping containers, and inputs for vaccines.

India's mobile phone manufacturing industry anticipates creating 150,000 to 250,000 direct and indirect jobs within the next 12-16 months, driven by government incentives, and increased global demand. Major players like Apple and its contract manufacturers, along with Dixon Technologies, are expanding their workforce to meet growing production needs.

CHEMICAL INDUSTRY IN INDIA

INTRODUCTION

Covering more than 80,000 commercial products, India's chemical industry is extremely diversified and can be broadly classified into bulk chemicals, specialty chemicals, agrochemicals, petrochemicals, polymers, and fertilisers. India is the 6th largest producer of chemicals in the world and 3rd in Asia, contributing 7% to India's GDP. The Indian chemical industry is currently valued at US\$ 220 billion and is expected to reach US\$ 300 billion by 2030 and US\$ 1 trillion by 2040. This industry remains an active hub of opportunities, even in an environment of global uncertainty.

Globally, India is the fourth-largest producer of agrochemicals after the United States, Japan and China. India accounts for 16-18% of the world's production of dyestuffs and dye intermediates. From April-May 2024, the export of agrochemicals was US\$ 661.18 million, dyes were US\$ 379.61 million and the other dye intermediates were US\$ 27.87 million. Indian colourants industry has emerged as a key player with a global market share of ~15%. The country's chemicals industry is de-licensed, except for a few hazardous chemicals. India has traditionally been a world leader in generics and biosimilars and a major Indian vaccine manufacturer, contributing more than 50% of the global vaccine supply. India holds a strong position in exports and imports of chemicals at a global level and ranks 14th in exports and 8th in imports at the global level (excluding pharmaceuticals).

From April 2023 to December 2023, India's dye exports (Dyes and Dye Intermediates) totalled US\$ 1.69 billion.

India's proximity to the Middle East, the world's source of petrochemicals feedstock, enables it to benefit on economies of scale.

MARKET SIZE

India's chemical sector, which is worth US\$ 220 billion currently, is anticipated to grow to US\$ 300 billion by 2030 and US\$ 1 trillion by 2040. The demand for chemicals is expected to expand by 9% per annum by 2025.

India has traditionally been a world leader in generics and biosimilars and major Indian vaccine manufacturers, contributing more than 50% of the global vaccine supply. Chemicals and petrochemicals demand in India is expected to nearly triple and reach US\$ 1 trillion by 2040.

An investment of Rs. 8 lakh crore (US\$ 107.38 billion) is estimated in the Indian chemicals and petrochemicals sector by 2025. Specialty chemicals account for 20% of the global chemicals industry's US\$ 4 trillion, with India's market expected to increase at a CAGR of 12% to US\$ 64 billion by 2025. This gain would be driven by a healthy demand growth (CAGR of 10-20%) in the export/end-user industries.

The Department of Chemicals & Petrochemicals intends to bring PLI in the chemical & petrochemical sector and will redraft the Petroleum, Chemicals and Petrochemicals Investment Region (PCPIR) guidelines.

The Indian chemical industry is expected to further grow with a CAGR of 11-12% by 2027, increasing India's share in the global specialty chemicals market to 4% from 3%.

A shift in the global supply chain brought on by the China+1 strategy and a resurgence in domestic end-user demand was expected to fuel significant revenue growth of 18-20% in 2022 and 14-15% in 2023.

ROAD AHEAD

Despite the pandemic situation, the Indian chemical industry has numerous opportunities considering the supply chain disruption in China and the trade conflict between the US, Europe and China. Anti-pollution measures in China will also create opportunities for the Indian chemical industry in specific segments.

Additional support, in terms of fiscal incentives, such as tax breaks and special incentives through PCPIRs or SEZs to encourage downstream units will enhance production and development of the industry. The dedicated integrated manufacturing hubs under the Petroleum, Chemicals and Petrochemicals Investment Regions (PCPIR) policy to attract an investment of Rs. 20 lakh crore (US\$ 276.46 billion) by 2035.

To bring about structural changes in the working of the domestic chemical industry, future investments should not only focus on the transportation of fuels such as petrol and diesel but also on crude-to-chemicals complexes or refineries set up to cater to the production of chemicals.

INDIAN MARKET OUTLOOK FOR SPECIALITY CHEMICALS

The **India specialty & fine chemicals market size** was valued at **USD 46.66 billion in 2022** and is projected to grow at a compound annual growth rate (CAGR) of 9.3% from 2023 to 2030. The easy availability of raw materials required to produce various specialty & fine chemicals, along with the low cost of production and huge availability of workforce, is driving the market growth in the country.

The market witnesses fierce competition due to the presence of numerous international manufacturers such as Evonik Industries AG, Clariant AG, LANXESS, Solvay, The Lubrizol Corporation, BASF SE, and DuPont, along with a few domestic manufacturers such as Aarti Industries Ltd., Jeevan Chemicals Private Limited, Organo Fine Chemicals, Paragon Fine and Specialty Chemicals Pvt. Ltd., and Atul Ltd.

Specialty chemicals consist of products that are of high value but are produced in small volumes. Such products are sold globally based on their functionalities. Fine chemicals are generally used as starting materials for specialty chemicals, especially biopharmaceutical and pharmaceutical products. They are produced and used according to required special applications. Moreover, these products are pressure and temperature sensitive. As such, the production process and the storage conditions of fine chemicals are to be adhered to accordingly.

Specialty chemicals play an important role as raw materials in the production of final products such as paints & coatings, personal care & cosmetics, flavors & fragrances, paper & pulp, and home & industrial surfactants, among others. In other words, these are majorly intermediate products. Some of the most used products in the market are adhesives, food & feed additives, rubber processing additives, and fuel additives, to name a few.

These products are also known as effect chemicals as they are majorly employed based on their functionalities. Moreover, these products come in diverse formulations that make it easy to distinguish their different functions. The interaction between the chemical and physical characteristics of constituents that are used in production has an impact on the effectiveness of these products in different working conditions.

Fine chemicals, on the other hand, are pure, single but complex chemical substances. They are produced in limited volumes in various multifunctional manufacturing facilities. These production facilities use multi-step batch processing methods to get the desired products. These products are used in a variety of end-use applications such as biotechnology and drug development. They are used in the development of products that increase the healthy life expectancy of the masses.

The market is expected to grow significantly in the coming years, owing to the rising population in the country, rapid ongoing industrialization, increasing chemical demand, and flourishing end-use industries in regions such as Europe, Asia Pacific, and North America. The leading manufacturers in India are BASF SE, Dow, Evonik Industries AG, Solvay, Tosoh Corporation, and Atul, among others.

The Asia Pacific region accounts for the largest market share globally for these products. The growth is attributed to the extensive presence of companies manufacturing them on a large scale, especially in countries such as India and China. AJ Chemicals, Atul, Finornic Chemicals, Karnataka Aromas, Para Fine Chem Industries, and Sami-Sabinsa Group are some of the leading manufacturers in the country.

Moreover, the penetration of these products in India is high, owing to the presence of several mature end-use industries in the country. For instance, India is among the major automotive manufacturing countries in the Asia Pacific. The growing utilization of fibers, sealants, paints, and adhesives in the automotive industry of the country is expected to fuel market growth in India in the coming years.

Moreover, the specialty chemical market size in the U.S. is projected to grow significantly, reaching an estimated value of USD 152.36 billion by 2032, driven by expanding demand for construction chemicals on account of an increase in investments in infrastructure projects.

Specialty chemicals are used by a plethora of manufacturing industries such as textiles, oil and gas, ink additives, construction, food, and cosmetics. The chemical composition and effectiveness of these compounds determine their use. With the world becoming increasingly concerned about health and safety, the growth in sales of industrial and institutional cleaners (I&I), disinfectants, and sanitizers have expanded at a swifter rate than usual. According to a report by The Gulf Petrochemicals and Chemicals Association (GPCA), the demand for hand sanitizers and disinfectants in January 2020 increased by 1,400% compared to December 2019. This demand growth has made specialty chemicals manufacturers to ramp up their production.

OUR BUSINESS STRATEGIES**1. Strengthening Working Capital for Optimal Capacity Utilization**

Our business of manufacturing specialty chemicals is inherently working capital intensive. This is primarily due to the need to maintain sufficient inventory levels throughout the production process to ensure smooth operations and meet customer demands promptly. Additionally, effective management of the debtors and creditors cycle is crucial to maintaining liquidity and operational efficiency.

Increasing capacity utilization is a key driver for scaling operations, improving cost-efficiency, and boosting profitability. Moreover, as we continue to grow, we aim to add new production capacities to further capitalize on market demand.

This planned expansion, however, will necessitate access to a larger pool of liquid funds and adequate working capital. We propose to fund these growth initiatives through a combination of proceeds from our upcoming IPO and banking facilities. These financial resources will enable us to not only optimize current operations but also invest in future growth, ensuring long-term sustainability and competitiveness in the specialty chemicals market.

2. Expand manufacturing capacity and increase production efficiency

Our company is in the process of acquiring an additional 5,139 sq. mt. (approx.) of land within the GIDC (Gujarat Industrial Development Corporation), where we will establish our second manufacturing facility. This strategic move is aimed at significantly boosting our production capacity, which will have a direct and positive impact on sales. With the increased production, we will be able to meet growing customer demand more efficiently, penetrate new markets, and expand our product portfolio. This expansion will also enhance operational flexibility, allowing us to optimize manufacturing processes and introduce new innovations.

Beyond the increase in production, the new manufacturing facility will bring several other key advantages. Additionally, it will support our plans for diversification, as the new facility will provide the space and resources to introduce more advanced machinery and develop new product lines, further strengthening our market position.

3. Strengthening Innovation through New R&D Centre in Mumbai and Expanding Product Offerings

As part of our future strategy, we are placing greater emphasis on research and development (R&D) to drive innovation and expand our product portfolio. To achieve this, we are planning to establish a new state-of-the-art R&D Centre in Mumbai by renting a dedicated premise. This strategic move will not only centralize our R&D efforts but also enhance operational efficiency, as our registered office is also located in Mumbai, making the management of R&D activities more streamlined. The new facility will be equipped with advanced technology and resources, enabling our R&D team to focus on developing cutting-edge products and refining existing formulations to meet the evolving needs of our customers.

The new R&D facility will be equipped with advanced technologies and resources, allowing our team to develop cutting-edge products and refine existing formulations in response to evolving customer needs. The Centre will play a critical role in expanding our product portfolio, with a particular focus on specialty chemicals.

By fostering a culture of continuous research, we aim to introduce high-performance, industry-specific products to cater to a broader client base. This approach will strengthen our ability to anticipate and respond to market trends, enhance customer satisfaction, and bolster our competitive position in both domestic and international markets.

4. Expanding Global Reach and Strengthening Domestic Presence

Our strategic vision is to significantly grow our global customer base while enhancing our footprint within India's diverse states. While we already have a strong presence across multiple regions in the country, there is ample opportunity to increase our customer base in most states. By leveraging the long-standing relationships we have built through strategic endeavours, we aim to enter into long-term marketing arrangements that will solidify our presence domestically. We plan to capitalize on our existing sales and marketing network, which, combined with our diversified product portfolio and solid industry reputation, will help us forge new relationships with multinational, regional, and local customers. These efforts will not only reinforce our market position but also open doors for further growth in untapped regions.

In addition to growing our domestic operations, we have recently initiated export activities, although in minimal quantities and primarily within a few countries. We recognize the vast potential in global markets and are focused on extending our reach to numerous other countries across various continents. By scaling up our export strategy, we intend to strengthen our international presence, tapping into markets that align with our product offerings and industry expertise. Expanding internationally will also diversify our revenue streams and reduce dependency on local markets. Through these efforts, we aim to establish a robust global footprint, positioning our company as a leading player in both the domestic and international markets.

5. Commitment to Quality and Global Standards

We remain steadfast in our commitment to maintaining the highest standards of quality, which we believe is essential for our brand's integrity and long-term growth. In our manufacturing facilities, we have implemented comprehensive quality management systems that span every aspect of our business processes, from production to supply chain management and final product delivery. These systems ensure that every product we manufacture consistently meets stringent quality, efficacy, and safety standards. By adhering to global quality benchmarks, we provide our customers with products that are both reliable and superior in performance. Our quality assurance framework includes various checks at multiple stages, including random sampling inspections and rigorous evaluations by both internal teams and third-party agencies. This multi-tiered approach ensures that every product delivered to our customers upholds our promise of excellence.

6. Focus on Sustainability, Health, and Safety

Sustainability is at the core of our operations, and we emphasize quality, environmental responsibility, health, and safety in every aspect of our business. We recognize that maintaining environmentally friendly practices and safeguarding the health and safety of our employees and communities are not just obligations but integral to our growth and sustainability goals. Our manufacturing processes are designed to minimize environmental impact while ensuring the safety of workers through stringent safety protocols. Additionally, many of our key customers have conducted inspections of our facilities and manufacturing processes, approving them based on their strict standards. These audits reflect our commitment to transparency and continuous improvement. We anticipate that future audits will not only reinforce our adherence to these standards but also provide opportunities for us to further enhance our processes, ensuring we remain leaders in quality, sustainability, and safety in the industry.

PRODUCTION PLANNING

At Satol Chemicals, our production strategy is designed to ensure the efficient manufacturing of specialty chemicals while delivering products to our customers in a timely and reliable manner. We employ a process-driven approach rooted in advanced manufacturing techniques, where raw materials, ingredients, and components are combined through precise, standardized formulations. This methodology guarantees product consistency, superior quality, and optimized output across all production lines.

Our commitment to innovation and operational excellence enables us to swiftly respond to evolving customer demands while maintaining the highest standards of quality and sustainability. As we move towards the future, we continuously invest in cutting-edge technology and process enhancements to meet the growing global needs for specialty chemicals, ensuring long-term value for both our clients and stakeholders.

Following is the step wise breakup of the production planning process:

1. Forecasting Product Demand:

Estimate how much of each product needs to be manufactured over a specific period based on market demand, past trends, and sales forecasts.

2. Mapping Out Production Steps and Options:

Define the specific steps in the production process and identify any alternatives or adjustments that could be made to optimize efficiency and flexibility.

3. Resource Management:

Allocate the necessary resources, including raw materials, labour, and equipment, to ensure smooth and uninterrupted production.

4. Choosing a Production Plan and Scheduling:

Select a production plan that aligns with the demand forecast and schedule production activities to ensure timely delivery while optimizing resource use.

5. Monitoring and Control:

Continuously monitor production progress to track performance and identify any deviations from the plan. Make real-time adjustments to ensure everything stays on schedule.

6. Planning Accordingly:

Based on the monitoring results and any updates to the forecast, adjust the production plan as needed to optimize efficiency and ensure customer needs are met without delays.

BIDDING PROCESS FLOWCHART

We frequently secure business opportunities and projects through the online bidding process or e-procurement from companies across various industries. Below is a structured flowchart outlining the key steps involved in our bidding procedure:

1. Tender Sourcing (E-procurement Portal):

The process begins by sourcing available tenders from various e-procurement portals relevant to our industry.

2. Segregation of Tender Documents:

Once tenders are identified, the documents are reviewed and segregated based on eligibility criteria, scope, and alignment with the company's capabilities.

3. Participation in Qualified Tenders:

After the segregation process, we proceed by participating in tenders for which we meet the qualifications.

- **Registration on E-procurement Portals for Eligible Tenders:** If not already registered, we complete the registration process on relevant portals to participate in the selected tenders.
- **Preparation of Documents Required in Eligibility Criteria:** We prepare all the necessary documentation required to meet the eligibility criteria set by the tender, ensuring compliance with the requirements.
- **Submission on E-Procurement Portals:** Once all documents are prepared, the bid is submitted through the e-procurement portal.

4. Technical Bid Evaluation Process:

After submission, the technical bid is evaluated by the client or the concerned authority.

- **Accepted in Technical Bid:** If the technical bid meets the requirements, it is accepted, and the bid moves to the next phase, which is the financial bid evaluation.
- **Rejected in Technical Bid:** If the technical bid is rejected, the tender process is closed for that bid.

5. Financial Bid Evaluation:

For bids accepted in the technical evaluation, the financial bid is then opened and reviewed.

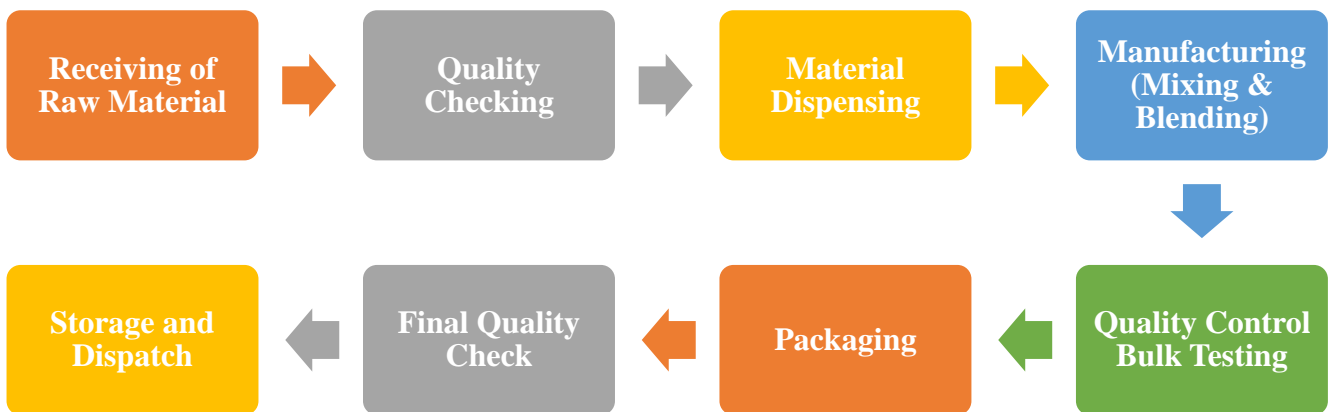

6. Accepted in Financial Bid:

If the financial bid is accepted, the evaluation moves forward to determine if we are the L1 Bidder (the lowest bidder).

- **L1 Bidder:** If we are the L1 bidder, we are awarded the tender and receive the Letter of Intent (LOI).
- **Not L1 Bidder:** If we are not the L1 bidder, the tender process is closed for this bid.

In summary, the tender bidding process involves multiple stages, from sourcing and document preparation to technical and financial evaluations, with the goal of securing tenders by meeting eligibility and offering competitive financial bids.

EFFLUENT TREATMENT PROCESS (ETP)

The Effluent Treatment Process (ETP) is a cornerstone of our commitment to environmental stewardship and sustainable manufacturing. Given our involvement in the production of specialty chemicals, we recognize the critical importance of minimizing environmental impact by effectively treating wastewater generated during our processes. Our robust ETP ensures that all effluents are carefully treated to remove contaminants, reduce toxicity, and meet regulatory standards before they are safely discharged or repurposed. Through meticulous monitoring, advanced treatment technologies, and adherence to stringent safety and quality protocols, we strive to protect local ecosystems, conserve water resources, and contribute positively to environmental preservation. Our proactive approach to effluent treatment reflects our dedication not only to regulatory compliance but also to our responsibility as an eco-conscious industry leader.

Below is the detailed process flow diagram of the effluent treatment process at Satol Chemicals Limited:

Influent Characteristics (Pre-Treatment):

pH: Ranges between 2–12
 Chemical Oxygen Demand (COD): 2,000–15,000 mg/L
 Biochemical Oxygen Demand (BOD): 300–5,000 mg/L
 Total Suspended Solids (TSS): 200–1,000 mg/L
 Oil and Grease (O&G): <10 mg/L

1. Effluent Collection Tank

Purpose: Collects effluent generated from various processes, stabilizing inflow rates and equalizing initial load characteristics.

Function: Provides initial storage to prevent sudden surges and balances the feed to the downstream process.

2. Equalization Tank

Purpose: Equalizes fluctuations in the effluent's flow and characteristics, stabilizing pH and temperature.

Operation: Continuous mixing using air blowers or mixers, ensuring a consistent and homogeneous effluent flow to the next treatment stage.

3. Flocculation Tank

Purpose: Aggregates suspended particles in the effluent by dosing coagulants and flocculants.

Chemicals Used: Lime, alum, and polyelectrolytes to assist in coagulating and flocculating suspended solids.

Process: Chemical dosing initiates the flocculation process, forming large, settleable flocs for easy separation.

4. Settling Tank

Purpose: Separates solids from the effluent by allowing flocs to settle by gravity, forming a sludge layer at the bottom.
Operation: Clarified effluent flows to the next treatment stage while sludge is removed periodically and transferred for dewatering.

5. Sand Filter

Purpose: Provides secondary treatment by filtering fine particulates, reducing remaining suspended solids and organic load.
Operation: The effluent flows through the sand filter, achieving a reduction in COD, BOD, and TSS to meet CETP requirements. Regular backwashing of the filter maintains filtration efficiency.

Final Effluent Characteristics (Post-Treatment):

pH: 5.5–9
 COD: < 1,000 mg/L
 BOD: < 250 mg/L
 TSS: < 100 mg/L
 O&G: <10 mg/L

Discharge to CETP

The treated effluent, with reduced COD, BOD, and TSS, is discharged to the Common Effluent Treatment Plant (CETP) for final treatment and disposal, ensuring compliance with environmental regulations.

A.Y.	Section Code	Date of Demand	Amount	Particular
2015-16	271(1)(c)	08-Dec-2021	1,04,92,172	The appellant contends that the imposition of a penalty of ₹35,13,980 by the Assessing Officer (AO) is unjustified, arguing that there were no inaccurate particulars of income provided. The penalty arises from a difference of opinion rather than wilful misconduct, as the AO did not demonstrate any intent to evade taxes or question the bona fide nature of the appellant's actions. Furthermore, the AO incorrectly stated the penalty amount as ₹1,04,92,172 in the notice of demand instead of the correct figure. The appellant asserts that since the tax effect from the addition made under section 143(3) was only ₹6,45,715, the penalty should not exceed this amount. Aggrieved by the same the appellant filed an appeal before the Joint Commissioner Appeals on 8 th March, 2022. The matter is pending.

A.Y.	Section Code	Date of Demand	Amount	Particular
2020-21	143(1)(a)	15-Dec-2021	11,51,830	The assessee contends that the addition of ₹1,500,728 made by the Assessing Officer for late deposit of employees' contributions to ESI and PF under Section 36(1) (a) is erroneous. They argue that since the contributions were deposited before the due date for filing the income tax return, these expenses should be considered allowable deductions. The assessee references the Supreme Court's ruling in Pr. CIT vs. Rajasthan State Beverages Corporation Ltd. and the Himachal Pradesh High Court's decision in CIT vs. Nipso Polyfabriks Ltd., which support the position that contributions paid after the statutory due date but before the income tax return due date are deductible. Thus, the assessee requests that these expenses be recognized as allowable based on binding legal precedents. Aggrieved by the same the appellant filed an appeal before the Joint Commissioner Appeals on 10 th December, 2022. The matter is pending.

Phased implementation of Unified Payments Interface (UPI)

SEBI has issued the various UPI Circulars in relation to streamlining the process of public issue of inter alia, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by Retail Individual Investors through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Investor had the option to submit the ASBA Form with any of the Designated Intermediary and use his/her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by Retail Individual Investors through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six Working Days during this phase.

Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("T+3 Notification"). In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

This Issue is mandatorily being made under Phase III of the UPI Mechanism.

The processing fees for applications made by UPI Bidders using the UPI Mechanism may be released to the SCSBs only after such banks provide a written confirmation, in compliance with the SEBI RTA Master Circular in a format as prescribed by SEBI, from time to time, and such payment of processing fees to the SCSBs shall be made in compliance with circulars prescribed by SEBI and applicable law.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using UPI. Our Company will be required to appoint one of the SCSBs as the Sponsor Bank(s) to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the UPI Bidders.

Individual investors bidding under the Non-Institutional Portion bidding for more than ₹ 200,000 and up to ₹ 500,000, using the UPI Mechanism, shall provide their UPI ID in the Bid-cum-Application Form for Bidding through Syndicate, sub-syndicate members, Registered Brokers, RTAs or CDPs, or online using the facility of linked online trading, demat and bank account (3 in 1 type accounts), provided by certain brokers.

Pursuant to the SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021 as amended pursuant to SEBI circular no. SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021, SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022 and SEBI circular no. SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 (“UPI Streamlining Circular”), SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Streamlining Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one Working Day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Further, in terms of the UPI Circulars, the payment of processing fees to the SCSBs shall be undertaken pursuant to an application made by the SCSBs to the Lead Manager, and such application shall be made only after (i) unblocking of application amounts for each application received by the SCSB has been fully completed, and (ii) applicable compensation relating to investor complaints has been paid by the SCSB.

For further details, refer to the General Information Document available on the websites of the Stock Exchanges and the Lead Manager. RESTRICTIONS OF FOREIGN OWNERSHIP OF INDIAN SECURITIES

There are two routes through which foreign investors may invest in India. One is the “automatic route”, where no government approval is required under Indian foreign exchange laws to make an investment as long as it is within prescribed thresholds for the relevant sector. The other route is the “government route”, where an approval is required under foreign exchange laws from the relevant industry regulator, prior to the investment.

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991, of the Government of India and FEMA. While the Industrial Policy, 1991, of the Government of India, prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The Union Cabinet, as provided in the Cabinet Press Release dated May 24, 2017, has given its approval for phasing out the FIPB. Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment (“FDI”) and approval from the Government of India will now be handled by the concerned ministries or departments, in consultation with the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as the Department of Industrial Policy and Promotion) (“DPIIT”), Ministry of Finance, Department of Economic Affairs, FIPB section, through a memorandum dated June 5, 2017, has notified the specific ministries handling relevant sectors.

The Government has, from time to time, made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated FDI Policy Circular of 2020 (“FDI Policy”) by way of circular bearing number DPIIT file number 5(2)/2020-FDI Policy dated October 15, 2020, which with effect from October 15, 2020, consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020. The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendments to FEMA. In case of any conflict between FEMA and such policy pronouncements, FEMA prevails.

RBI has also issued Master Direction- Foreign Investment in India dated January 4, 2018. In terms of the Master Direction, an Indian company may issue fresh shares to persons resident outside India (who are eligible to make investments in India, for which eligibility criteria are as prescribed). Such fresh issue of shares shall be subject to inter-alia, the pricing guidelines prescribed under the Master Directions.

The RBI, in exercise of its power under the FEMA, has also notified the Foreign Exchange Management (Transfer or Issue of Security by a Person Resident outside India) Regulations, 2017 to prohibit, restrict or regulate, transfer by or issue security to a person resident outside India.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.

The Equity Shares have not been and will not be registered under the U.S. Securities Act of 1933, as amended (the “U.S. Securities Act”), or the securities laws of any state of the United States and may not be offered or sold within the United States, except pursuant to exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. Accordingly, the Equity Shares are being offered and sold only outside the United States in offshore transactions in reliance on Regulation S under the U.S. Securities Act and the applicable laws of the jurisdiction where those offers, and sale occur. The Equity Shares have not been and will not be registered, listed or otherwise qualified in any other jurisdiction outside India and may not be offered or sold, and Applications may not be made by persons in any such jurisdiction, except in compliance with the applicable laws of such jurisdiction.

The above information is given for the benefit of the Applicants. Our Company and the Lead Manager are not liable for any amendments or modifications or changes in applicable laws or regulations, which may occur after the date of this Draft Prospectus. Applicants are advised to consult their legal counsel, to make their independent investigations and ensure that Applications are not in violation of laws or regulations applicable to them and do not exceed the applicable limits under the laws and regulations.
