Any of the following risks, as well as the other risks and uncertainties discussed in this Draft Prospectus, could have an adverse effect on our business, financial condition, results of operations and prospects and could cause the trading price of our Equity Shares to decline, which could result in the loss of all or a part of your investment. The risks and uncertainties described in this section are not the only risks that we may face. Additional risks and uncertainties not known to us or that we currently believe to be immaterial may also have an adverse effect on our business, results of operations, financial condition and prospects.

This Draft Prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements because of certain factors, including the considerations described below and elsewhere in this Draft Prospectus.

The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are certain risk factors where the effect is not quantifiable and hence has not been disclosed in such risk factors. 2. *Some risks may have material impact qualitatively instead of quantitatively.*
3. *Some risks may not be material at present but may have a material impact in the future.*

INTERNAL RISK FACTORS

1. ***Our business is dependent on a few customers and the loss of, or a significant reduction in orders by such customers could adversely affect our business.***

Revenues from any of our particular customers may vary significantly from reporting period to reporting period depending on the nature of ongoing orders and the implementation schedule for such orders. Our company is supplying its products majorly to customers from Maharashtra, Karnataka and Telangana. The efficiency of the sales and marketing network is critical to success of our Company. Our success lies in the strength of our relationship with the customers who have been associated with our Company. Our team through their experience and good rapport with these customers owing to timely and quality delivery of products plays an instrumental role in creating and expanding a work platform for our Company. To get repeat orders from our customers, our team having adequate experience and competence, regularly interact with them and focus on gaining an insight into the additional needs of customers. Our long-term relationships with the customers are indicative of our quality consciousness and our designing and tooling capabilities. However, such concentration of our business on a few customers may adversely affect us if we do not achieve our expected margins or suffer losses on one or more of these customer contracts. Significant revenue from a few customers increases the potential volatility of our results and exposure to individual contract risks with such customers and suppliers, which may have an adverse effect on our results of operations.

There can be no assurance that our significant customers in the past will continue to place similar orders with us in the future. A significant decrease in business from any such key customer, whether due to circumstances specific to such customer or adverse market conditions affecting the industry or the economic environment generally, such as the COVID-19 pandemic, may materially and adversely affect our business, results of operations and financial condition.

Our reliance on a select group of customers may also constrain our ability to negotiate our arrangements, which may have an impact on our profit margins and financial performance. The deterioration of the financial condition or business prospects of these customers could reduce their requirement of our products and result in a significant decrease in the revenues we derive from these customers. We cannot assure you that we will be able to maintain historic levels of business from our significant customers, or that we will be able to significantly reduce customer concentration in the future. In addition, our revenues may be adversely affected if our customers decide to choose our competitors over us or if there is a significant reduction in the volume of our business with such customers. The loss of one or more of our significant customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition, and cash flows.

Further, to sustain or increase our revenue, we must add new customers and encourage existing customers to allocate a greater portion of their marketing spend to us. As our industry matures and competitors introduce lower cost or differentiated products or services, our ability to sell our goods could be impaired.

The following is the breakup of the top five and top ten customers of our Company for the Fiscal 2023, 2022 and 2021: ₹ in lakhs

Particulars	March 31, 2023		March 31, 2022		March 31, 2021	
	Amount	In %	Amount	In %	Amount	In %
Top 5 Customers	1,285.77	71.37%	631.88	85.17%	294.12	91.56%
Top 10 Customers	1,542.07	85.58%	735.20	99.10%	321.24	100.00%

2. ***We rely significantly on some suppliers for the supply of our raw materials. If these suppliers are unable or unwilling to supply raw materials on time or otherwise fail to meet our requirements, our business will be harmed. An inability to procure the desired quality, quantity of our raw materials and components in a timely manner and at reasonable costs, or at all, may have a material adverse effect on our business, results of operations and financial condition***

We majorly procure raw material i.e. Mild Steel from our Group Entity M/s. Neo Mega Steel LLP (Trader of Mild Steel), which gives us cost advantages. Other Raw Materials are procured from the local suppliers.

We enjoy a very good relationship with our raw material suppliers, which enables a timely manufacturing and delivery of components. We keep an array of suppliers with us, to ensure that there is no delay in manufacturing and delivery of the component to the customer due to the delay or failure to supply a critical raw material by any supplier. Presently, we have not entered into any long-term supply agreements for sourcing any of our raw materials. We procure the raw materials required for our business pursuant to the issue of the purchase orders. While we have in the past undertaken our business pursuant to such arrangements and have not faced any disputes in relation to such purchase orders, we cannot assure you that there will be no disputes with our suppliers in the future, owing to such contractual arrangements. Due to long-standing relationship with our supplier, the purchase orders we issue to some of our suppliers do not contain detailed terms and conditions for eventualities where the supply is not done in accordance with the supply terms agreed with our suppliers or in a timely manner or for circumstances where the quality of materials is not as per our requirements. The purchase orders issued by us fail to adequately cover the liabilities of our Company. The purchase orders do not provide for clauses relating to indemnification, liquidated damages, dispute resolution, and termination. Such purchase orders may in the future have commercial implications on our Company in case of any dispute with our suppliers, for any reason whatsoever. In the absence of a contractual basis for liability, this may lead to delays in supply, a strained relationships with our suppliers, protracted litigation, and delays in our obligations with our customers resulting in an adverse effect on our business, results of operations, financial condition, and cash flows.

The following is the breakup of the top five and top ten Suppliers of our Company for the Fiscal 2023, 2022 and 2021: ₹ in lakhs

Particulars	March 31, 2023		March 31, 2022		March 31, 2021	
	Amount	In %	Amount	In %	Amount	In %
Top 5 Suppliers	1,154.32	82.44%	422.61	57.78%	233.72	78.54%
Top 10 Suppliers	1,289.25	92.09%	524.60	71.74%	271.48	91.22%

3. ***Our ability to anticipate changes in consumer preference, and industry trends and to meet customers' demands is a significant factor to remain competitive, any failure to identify and understand the trends may materially adversely affect our business.***

Changes in consumer preferences, regulatory or industry requirements, or competitive technologies may render certain of our products obsolete or less attractive. Our ability to anticipate changes in technology and regulatory standards and to successfully introduce new and enhanced products on a timely basis is a significant factor to remain competitive. If we are unable to obtain such knowledge in a timely manner, or at all, we may be unable to effectively implement our strategies, and our business and our results of operations may be adversely affected. We are also subject to the risks generally associated with new products and applications, including lack of market acceptance and failure of products to operate properly. Customer preferences in the markets we operate are difficult to predict and changes in those preferences or the introduction of new products by our competitors could put our products at a competitive disadvantage. To compete effectively in the industry, we must be able to produce new products to meet our customers' demands in a timely manner. Our failure to successfully produce new products could materially and adversely affect our results of operations.

4. ***We are affected by the prices, availability, and quality of the raw materials used in our production.***

Mild Steel, Galvanized Steel, HR/CR Sheet is our key raw material, which is mostly made up of steel, which we use for the manufacturing of our products. We majorly procure Mild Steel from our Group Entity M/s. Neo Mega Steel LLP (Trader of Mild Steel) which gives us cost advantages and other raw materials are procured from local suppliers. Typically, we do not enter into long-term contracts with our suppliers, and prices for these raw materials are normally based on the quotes we receive from various suppliers. Any unexpected price fluctuations after the placement of orders, shortage, delay in delivery, quality defects, or any factors beyond our control may result in an interruption in the supply of such materials which is critical to our business. In the event that we fail to secure sufficient quantities of such raw materials from our suppliers at acceptable quality and prices in a timely manner, our business, financial performance, and cash flows may be adversely affected.

In particular, we are vulnerable to the risk of rising/fluctuating steel prices, which are determined by demand and supply conditions in the global and Indian markets as well as government policies.

The quality of raw materials delivered by suppliers engaged by us has a direct impact on the overall quality of our products and the timeliness of our delivery to the customers. Although we generally ensure strict quality and process control measures for suppliers, we may be subject to potential claims against us by our customers in case of any substandard materials provided by our suppliers. In such circumstances, our reputation may suffer and our business may be adversely affected. In addition, our resources could be strained by any claim that proceeds to litigation.

Our orders are negotiated with our customers based on the price at which we purchase our raw materials, possible selling prices of our products/services, and our intended gross margins. Hence, we fix the prices of required materials at approximately the same time as the orders we sign with our customers so as to protect our gross margins. Nevertheless, should there be any significant increases in steel prices, and we are unable to pass on such increases in prices to our customers or find alternative suppliers/sources of direct materials who are able to supply us with the raw materials at competitive prices, our business and financial performance will be adversely affected.

5. ***The dependence on third-party services could have an adverse effect on the business financial condition and results of operations.***

Our Company is dependent on third party for certain processes i.e. Perforation, Powder Coating, installation etc. We may not be able to obtain services from third parties for our requirements, on attractive rates or the third parties may not have adequate available capacity to meet our requirements in a timely manner.

Further, if the company is unable to procure the services of third-party capable of sufficiently scaling up operations in response to increased demand from customers, the company might be compelled to make capital expenditures or seek out costlier or lower quality third-party service to meet the requirements which could have an adverse effect on the business prospects, financial condition and results of operations of the company.

6. *We may face significant competition in our business. An inability to compete effectively may lead to a lower market share or reduced operating margins.*

We operate in the highly competitive industry. There are no entry barriers in our industry which puts us to the threat of competition from new entrants. There are numerous players operating in the industry. We face tough competition in our business from a large number of unorganized and a few organized players. Our aim is to provide the standardized and uniform quality products at competitive prices to our consumers. We compete with our competitors on a regional or product line basis. Many of our competitors have substantially large capital base and resources than we do and offer broader range products. We believe that the principal factors affecting competition in our business include client relationships, reputation, the abilities of employees, market focus and the relative quality and price of the products. We believe that our ability to compete effectively is primarily dependent on ensuring consistent product quality and timely delivery at competitive prices, thereby strengthening our brand over the years. We believe that our cost effective and integrated offerings, our focus on customer satisfaction and our reliability combined with our quality consciousness provides competitive advantage in our business. We believe that our technical capabilities, experience in this business and quality assurance will be key to overcome competition posed by such organized and unorganized players. However, there can be no assurance that we will be able to compete successfully with the competitors and implement our future strategies in a way that will mitigate the effects of increased competition from our competitors.

7. *We have only one manufacturing facility.*

Our manufacturing facility is located at Survey No. 164/1, Plot No. 6, Alkapuram Road, Opp Yashobhumi Society, Wadmukhwadi, Pimpri Chinchwad, Pune – 412105, in the State of Maharashtra. As a result, any local social unrest, natural disaster, or breakdown of services and utilities in that area could have a material adverse effect on the business, financial position, and results of our operations. Our manufacturing facility is subject to operating risks, such as the breakdown or failure of equipment, power supply or processes, performance below expected levels (output, efficiency, obsolescence, labour disputes, strikes, lock-outs, non-availability of services of our external contractors, etc. In the event that we are forced to shut down our manufacturing facility for a significant period of time, it would have a material adverse effect on our earnings, our other results of operations, and our financial condition as a whole.

8. *Delays or defaults in customer payments could adversely affect our financial condition.*

We are exposed to payment delays and/or defaults by our customers and our financial position and financial performance are dependent on the creditworthiness of our customers. Further, we may not receive advance payment from our customers after signing the purchase orders. Delays in customers' payments may require us to make a working capital investment. If a customer defaults in making payments where we have devoted significant resources or where we have invested significant resources is delayed, cancelled, or does not proceed to completion, it could have an adverse effect on our operating results. For the Fiscal ending March 31, 2021, 2022, and 2023, our trade receivables were ₹ 1.20 lakhs, ₹ 80.80 lakhs, and ₹ 239.17 lakhs, respectively. However, in the past, our Company has not faced any such instance of default but there is no guarantee that the timeliness of all or any part of our customers' payments and whether they will be able to fulfil their obligations, which may arise from their financial difficulties, cash flow difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur, our financial performance and our operating cash flows may be adversely affected.

9. *Our success depends on stable and reliable logistics and transportation infrastructure. Disruption of logistics and transportation services could impair the ability of our suppliers to deliver materials or our ability to deliver materials to our customers and/ or increase our transportation costs, which may adversely affect our operations:*

We utilize third party transportation services for procurement and supply of materials and from/ to our suppliers and customers. Transportation by road involves risks, including, collision, grounding, storm, fire, explosion, lightning, political instability, and operating restrictions/ lockdown consequent to outbreak of infectious diseases, such as the COVID-19 pandemic. Any delay or disruption caused to the transportation of materials could adversely impact our ability to procure the materials as well as to meet the delivery schedule of the customers in an economical manner. To ensure timely delivery of materials, we may also be required to maintain relatively high level of inventory of materials and this may also resultantly increase our cost.

10. ***We are required to comply with certain restrictive covenants under our financing agreements. Any noncompliance may lead to, amongst others, an accelerated repayment schedule, enforcement of security, and suspension of further drawdowns, which may adversely affect our business, results of operations, financial condition, and cash flows.***

The financing arrangements entered into by us include conditions that require our Company to obtain respective lenders' consent prior to carrying out certain activities and entering into certain transactions. As of March 31, 2023, we had outstanding indebtedness of ₹ 370.83 lakhs based on Restated Financial Statements. Failure to meet these conditions or obtain these consents could have significant consequences on our business and operations. These covenants vary depending on the requirements of the financial institution extending such a loan and the conditions negotiated under each financing agreement.

We have not defaulted on any covenants in financing agreements in the past, we cannot assure you that this will continue to be the case in the future. A failure to observe the covenants under our financing arrangements or to obtain necessary consents/ waivers, constitutes defaults under the relevant financing agreements and will entitle the respective lenders to declare a default against us and enforce remedies under the terms of the financing agreements, that include, including others, acceleration of amounts due under such facilities, enforcement of any security interest created under the financing agreements and taking possession of the assets given as security in respect of the financing agreements. If the obligations under any of our financing documents are accelerated, we may have to dedicate a portion of our cash flow from operations to make payments under such financing documents, thereby reducing the availability of cash for our working capital requirements and other general corporate purposes. In addition, during any period in which we are in default, we may be unable to raise, or face difficulties raising, further financing. For further information on our borrowings, see "**Financial Indebtedness**" on page 172 of this Draft Prospectus.

11. ***Our Directors are parties to certain legal proceedings. Any adverse decision in such proceedings may have a material adverse effect on our business, results of operations and financial condition.***

For the details of the cases please refer the chapter titled "**Outstanding Litigations and Material Developments**" on page 180 of this Draft Prospectus.

12. ***Our business is subject to seasonal and other fluctuations that may affect our cash flows and business operations.***

Our business and operations may be affected by seasonal factors which may restrict our ability to carry on activities related to our projects and fully utilize our resources. Heavy or sustained rainfalls or other extreme weather conditions such as cyclones could result in delays or disruptions to our operations during the critical periods of our projects and cause severe damages to our premises and equipment. This may result in delays in execution of projects and also reduce our productivity. During periods of curtailed activity due to adverse weather conditions, we may continue to incur operating expenses and our project related activities may be delayed or reduced. Adverse seasonal developments may also require the evacuation of personnel, suspension or curtailment of operations, resulting in damage to construction sites or delays in the delivery of materials.

13. We have a limited operating and financial history, which makes it difficult to accurately assess our future growth prospects.

Our Company was incorporated on September 22, 2020 and commenced operations of Industrial and Institutional Storage Systems in January 2022. For further information, see *“History and Certain Corporate Matters”* beginning on page 114 of this Draft Prospectus. As such, we have a very limited operating history, and our success is dependent on our ability to effectively implement our businesses. Our limited financial and operating history may not provide an accurate basis for investors to understand our business and financial history for comparative analysis and evaluate our future business and financial prospects. Assessing the future prospects of our business is challenging in light of both known and unknown risks and difficulties we may encounter, and could place significant demands on the management team and our other resources. We will be subject to all the business risks and uncertainties associated with setting up any new business venture, which may adversely affect our business, prospects, results of operations and financial condition.

Net increase/(decrease) in cash and cash equivalent	(0.57)	0.42	0.15

There can be no assurance that our net cash flows shall be positive in the future. Any negative cash flows in the future over extended periods, or significant negative cash flows in the short term, could materially impact our ability to operate our business and implement our growth plans. As a result, our cash flows, business, future financial performance and results of operations could be materially and adversely affected. For further details, see *“Financial Statements as Restated”* beginning on page 144 of this Draft Prospectus.

17. Our Company has availed certain unsecured loan which can be recalled at any time.

Our Company has availed certain unsecured loan amounting to ₹ 121.23 lakh as on March 31, 2023. The unsecured loan taken by our Company from Related Parties may be recalled at any time. Though our Company intends to repay the loan amount in near future, sudden recall may disrupt our operations and also may force us to find alternative sources of financing, which may not be available on commercial reasonable terms or at all. opt for funding at higher interest rates, resulting in higher financial burden. We may not have adequate working capital to meet business requirements of our Company, and, as a result, any such demand by the lenders may affect our business, cash flows, financial condition and results of operations. Further, in respect of such unsecured loan, no proper agreement has been executed between the parties. For further details, please refer to the section “*Financial Indebtedness*” beginning on page no. 172 of this Draft Prospectus.

18. Latent defects in our products may increase it's after-sales cost or we may suffer losses on account of replacements/product recalls.

Despite testing of our products prior to dispatch, errors, defects or performance issues, and/or latent defects may occur in existing products or new products. Since we provide a 1 (one) year warranty for manufacturing defects of our products, such defects may also cause us to incur significant support and repair costs under our purchase orders/contracts. We may have to incur additional costs to address these defects. Also, the recurrence of these problems may result in the delay or loss of market acceptance of our products, which may harm our business, market reputation and financial condition.

While we have not faced any instances of a product recall as on the date of this Draft Prospectus, we may suffer losses on account of the replacement or repair of products in case they fail to perform for the duration guaranteed by us or our customers, such manufacturing defects would also result in loss of our goodwill.

If a supplier fails to meet quality standards, it could expose the Company to the risk of product liability claims or delay the production schedule for the Company's products. Any defects in products could also result in customer claims for damages. Furthermore, in defending such claims, substantial costs may be incurred and adverse publicity generated. While the Company obtains quality assurances from the suppliers, there can be no assurance that such assurances or warranties will be successfully obtained or enforced. In such instances, any product recalls would adversely affect the Company's business, results of operations, and financial condition.

19. Expansion into new geographic regions and markets may subject us to various challenges.

We intend to increase the sales and distribution of our products across India. At present, our maximum revenue is generated from Maharashtra State. For the Fiscal 2023, 2022 and 2021 the revenue from major states i.e. Maharashtra constitutes 75.59%, 98.04% and 100.00% respectively of our total revenue from operations. We have limited experience and knowledge of operating in other states and our foray into new geographies or into new products in the existing geographies may be subject to high barriers to entry including existing competition, local laws and market dynamics. Further, we may not be able to effectively assess the level of promotional marketing required in a particular state, and the recognition of our brands and products in such states may not be in the manner or to the extent anticipated by us. Our expansion into new geographies may also be challenging on account of our lack of familiarity with the social, political, economic and cultural conditions of these new regions, language barriers, difficulties in staffing and managing such operations and the lack of brand recognition and reputation in such regions. We may also encounter other additional anticipated risks and significant competition in such markets.

20. Our revenues are highly dependent on clients located in India. Any decline in the economic health of India could adversely affect our business, financial condition and results of operations.

We only supply our products and services to clients located in India. If the economic conditions of India become volatile or uncertain or the conditions in the financial market were to deteriorate, especially in recent times due to the COVID-19 pandemic, or if there are any changes in laws applicable to our services and operations or if any restrictive conditions are imposed on us or our business, the pricing of our services may become less favourable for us. Further, our clients located in these geographies may reduce or postpone their spending significantly which would adversely affect our operations and financial conditions. Any reduction in spending on third party logistic services may lower the demand for our services and negatively affect our revenues and profitability.

21. *We share our registered office with our Group Companies.*

Our Registered Office situated at 405, Pride Icon, Near Columbia Asia Hospital, Kharadi Bypass Road, Pune - 411014, Maharashtra which is owned by our Non-Executive Director Mr. Anshu Goel. However, this office premise is also being shared by our Promoter/Group Company M/s. Alphalogic Techsys Limited. Any dispute with our Group Companies with regard to the Registered Office would materially affect our business operations.

22. *Our continued success is dependent on our senior management and skilled manpower. Our inability to attract and retain key personnel may have an adverse effect on our business prospects.*

Our experienced senior management and Directors have had a significant contribution to the growth of our business, and our future success is dependent on the continued service of our senior management team. An inability to retain any key management personnel may have an adverse effect on our operations. Our ability to execute orders and to obtain new clients also depends on our ability to attract, train, motivate and retain highly skilled professionals, particularly at managerial levels. We continue to face challenges in recruiting suitably skilled personnel, particularly as we continue to grow and diversify our operations. In particular, we may be unable to compete with other larger companies for suitably skilled personnel due to their ability to provide more competitive compensation and benefits. The loss of any of the members of our senior management team, our whole-time directors, or other key personnel or an inability to manage the attrition levels in different employee categories may materially and adversely impact our business, results of operations, financial condition, and growth prospects.

The success of our business is also dependent upon our ability to hire, retain, and utilize qualified personnel, including designers, and corporate management professionals who have the required experience and expertise. We also place extensive reliance on our design and production department which is critical to our business as they design the products which are reviewed by our customers. From time to time, it may be difficult to attract and retain qualified individuals with the expertise and in the timeframe demanded by our clients, and we may not be able to satisfy the demand for our services because of our inability to successfully hire and retain qualified personnel. We may be unable to compete with our competitors for such qualified personnel because of more competitive salaries and benefits provided by them.

For every new product we expand into, we require suitably skilled personnel. Such skilled personnel may not be available in the market or we may not be able to compete with competitors for such qualified personnel because of more competitive salaries and benefits packages provided by them. If we cannot attract and retain qualified personnel or effectively implement appropriate succession plans, it could have a material adverse impact on our business, financial condition, and the results of operations. Moreover, we may be unable to manage knowledge developed internally, which may be lost in the event of our inability to retain employees.

23. *If we are unable to manage/arrange funds to meet our working capital requirements, there may be an adverse effect on our results of operations.*

Our business requires a significant amount of working capital to finance the purchase of raw materials before payments are received from customers. We cannot assure you that the budgeting of our working capital requirements for a particular year will be accurate. There may be situations where we may under budget for our working capital requirements, in which case there may be delays in arranging the additional working capital requirements, which may delay the execution of projects leading to loss of reputation, levy of liquidated damages, and an adverse effect on the cash flows. If we experience insufficient cash flows or are unable to borrow funds on a timely basis or at all to meet the working capital requirements, there may be an adverse effect on our results of operations. We may also be subject to fluctuations of interest rates for our financing. If we are unable to secure financing at favourable rates for this purpose, our ability to secure larger-scale projects will be impeded and our growth and expansion plans will be materially and adversely affected which in turn will materially and adversely affect our future financial performance.

24. *Certain relevant copies of educational qualification and experience certificates of our promoters/Directors are not traceable.*

Relevant copies of education qualification and experience certificates of some of our Directors are not traceable. We can't assure you that back-ups for the relevant copies of educational qualifications and experience certificates will be available in a timely manner or at all. We have relied on personal undertakings provided from them.

25. ***In addition to our existing indebtedness for our operations, we may be required to obtain further loan during the course of business. There can be no assurance that we would be able to service our existing and/or additional indebtedness.***

In addition to our existing indebtedness for our existing operations we may be required to raise further debt in the form of term loans and working capital loans in the course of business. Increased borrowings, if any, would adversely affect our debt-equity ratio and our ability to further borrow at competitive rates. Any failure to service our indebtedness or otherwise perform our obligations under our financing agreements could lead to a termination of one or more of our credit facilities, trigger cross default provisions, penalties and acceleration of amounts due under such facilities which may adversely affect our business, financial condition and results of operations. For further details of our indebtedness, please refer to the chapter titled ***“Financial Indebtedness”*** on page 172 of this Draft Prospectus.

26. ***Some of the KMPs is associated with our company for less than one year.***

Our Key Management Personnel, Company Secretary is associated with the Company for a period of less than one year therefore they may not have been accustomed to the company affairs till date. For details of Key Management Personnel and their appointment, please refer to chapter ***“Our Management”*** beginning on page 120 of this Draft Prospectus.

27. ***Our customers may claim against us and/or terminate our services in whole or in part prematurely should we fail to satisfy their requirements and expectations or for any other reason.***

Our purchase orders with our customers are of standard form and usually, inter-alia contain details relating to price, terms of payment, delivery schedule, and other standard terms and conditions. Any defect or malfunction in our system designs, products, and/or solutions, or failure to satisfy the requirements and expectations of our customers, could lead to claims made against us and/or termination of our services in whole or in part. This may arise from unsatisfactory design or workmanship, staff turnover and, human errors. However, our production doesn't start without manufacturing clearance is given by our Company and the end user and a product design is tested before being taken up for production; likewise, approval is taken from the Company and the end user before packaging of the product and hence it reduces the chances of defects in our product. Further, as our system designs, products, and technology solutions are applied in the process of finalizing the order, if it is established that any damages in and/or loss of property, as well as personal injuries and/or death resulted from defects in or malfunction of our products, we may be required to further compensate our customers and/or victims for such loss, damages, personal injuries and/or death.

In addition, we may also be subject to potential liability from legal suits for any losses suffered by our customers due to delay of the delivery of our products or services. In the event that we are involved in any legal dispute or court proceedings with our customers, our reputation will be adversely affected and we may have to spend a significant amount of resources to defend ourselves, which may adversely affect our business, cash flows and, financial performance.

28. ***We have entered into, and will continue to enter into, related party transactions.***

We have entered into and may in the ordinary course of our business continue to enter into transactions with related parties that include certain of our Promoter, Promoter Group, Directors, Key Managerial Personnel, and Group Companies. For further details in relation to our related party transactions, see ***“Financial Information – Related Party Transactions”*** beginning on page 169 of this Draft Prospectus. While we have entered into such transactions on an arm's length basis, there is no assurance that we could not have achieved more favourable terms had such transactions not been entered into with related parties.

29. ***Shortage or non-availability of essential utilities such as electricity could affect our manufacturing operations and have an adverse effect on our business, results of operations and financial condition.***

Our business operation is heavily dependent on continuous supply of electricity which is critical to our manufacturing operations. While our power requirements are met through local state power supply corporation in our manufacturing facility, we cannot assure you that these will be sufficient and, or, that we will not face a shortage of electricity despite these arrangements. Further, any shortage or non-availability of electricity could result in temporary shut-down of a part, or all, of our operations at the location experiencing such shortage. Such shut-downs could, particularly if they are for prolonged periods, have an adverse effect on our business, results of operations and financial condition.

30. ***Our Corporate Office and Factory Premises are not owned by us and we have only leave and license rights over them. In the event we lose such rights, our business, financial condition and results of operations, and cash flows could be adversely affected.***

Certain premises used by our Company have been obtained on a leave and license basis, which includes our Corporate Office and Factory situated at Pune, Maharashtra. We cannot assure you that we will be able to renew our lease agreement or leave and license agreements or enter into new agreements in the future, on terms favourable to us, or at all. In the event that any lease agreement or leave and license agreement is not renewed, we will be required to expend time and financial resources to locate suitable land or building to set up our operations. Also, we may be unable to relocate to an appropriate location in a timely manner, or at all, and we cannot assure you that a relocated office will be as commercially viable. If a lease agreement or the leave and license agreement are terminated, prior to its tenure or if it is not renewed, or if we are required to cease business operations at a property, for any reason whatsoever, our business, financial condition, and results of operations may be adversely affected. Further, if the vacated property is leased or sold to a competitor, we may also face increased competition in that geographic area, which could adversely affect our market share. For further information on our properties, see “***Our Business – Property***” on page 91 of this Draft Prospectus.

31. ***If we are unable to source business opportunities effectively, we may not achieve our financial objectives.***

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees and to implement systems capable of effectively accommodating our growth. However, we cannot assure you that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It also is possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analyses of market and other data or the strategies we use or plans in future to use will be successful under various market conditions.

32. ***We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.***

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and cause serious harm to our reputation and goodwill of our Company. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

33. ***Major fraud, lapses of internal control or system failures could adversely impact the company’s business.***

Our Company is vulnerable to risk arising from the failure of employees to adhere to approved procedures, system controls, fraud, system failures etc. Failure to protect fraud or breach in security may adversely affect our Company’s operations and financial performance. Our reputation could also be adversely affected by significant fraud committed by our employees, agents, customers or third parties.

34. ***We may not be successful in implementing our business strategies.***

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted clients. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

35. ***Some of the approvals are required to be updated consequent to the change in the name of our Company.***

The name of our Company has been changed from Alphalogic Trademart Limited to Alphalogic Industries Limited vide resolution passed by our Shareholders at their EGM held on January 20, 2022. Due to such change, our Company is required to change its name in all approvals, licenses, registrations and permits in the name of Alphalogic Industries Limited. While we have updated our name in some of the registrations, permits or approvals, we are still required to update our name in some of the remaining registrations, permits or approvals.

36. ***Our business requires us to obtain and renew certain licenses and permits from government, regulatory authorities and other national/ international corporations and the failure to obtain or renew them in a timely manner may adversely affect our business operations.***

Our business requires us to obtain and renew from time to time, certain approvals, licenses, registrations and permits. In addition, we require certain approvals, licenses, registrations and permissions under various regulations, guidelines, circulars and statutes regulated by authorities such as the Government of India, the State Governments and certain other regulatory and government authorities, for operating our business. In particular, we are required to obtain certificate of registrations for carrying on certain of our business activities from the Government of India, the State Governments and other such regulatory authorities that are subject to numerous conditions. If we fail to maintain such registrations and licenses or comply with applicable conditions, our certificate of registration for carrying on a particular activity may be suspended and/or cancelled and we will not then be able to carry on such activity. This could materially and adversely affect our business, financial condition and results of operations.

We and our customers, may require various regulatory approvals, sanctions, licenses, registrations and permissions in connection with our operations and the various development activities involved in such orders. We or our customers may face significant uncertainties due to various factors in obtaining or maintaining such approvals. If such approvals are not obtained in a timely manner or at all, there may be a material adverse effect on various development activities, including our operations, thereby adversely affecting our results of operations and financial condition. Furthermore, our government approvals and licenses are subject to numerous conditions, some of which are onerous and require us to incur substantial expenditures. If we fail to comply or a regulator alleges that we have not complied with these conditions, our business, prospects, financial condition and results of operations may be adversely affected. While we typically apply for the renewal of any existing regulatory approvals prior to their expiry dates, there can be no assurance that we will receive such renewal in time or at all.

37. ***The Logo used by our Company is currently not registered under Trade Marks Act, 1999. Failure to protect our intellectual property rights may adversely affect our competitive business position, financial condition and profitability.***

Presently, our Company is using logo “ ALPHALOGIC®” which is registered trademark of our promoter Alphalogic Techsys Limited and our company has obtained NOC to use the same logo. Further, our company has made an application being numbers 5918786 and 5918788 on 2nd May, 2023 for the registration of the same under the Trade Marks Act, 1999 under relevant category to which our company belongs. Further, we may not be able to detect any unauthorized use or infringement or take appropriate and timely steps to enforce or protect our intellectual property, nor can we provide any assurance that any unauthorized use or infringement will not cause damage to our business prospects. Thus, we cannot guarantee that the application made for registration of our trademark will be allowed. In case we are unable to obtain the registration for the said trademark in our name, our business revenues and profitability may be impacted. For more information about the licenses and registrations obtained and pending applications, see the section titled “***Government Approvals***” beginning on Page 185 of this Draft Prospectus.

38. ***Brand recognition is important to the success of our business, and our inability to build and maintain our brand names will harm our business, financial condition and results of operation.***

Brand recognition is important to the success of our business. Establishing and maintaining our brand name in the industry or for people relying on product and services is critical to the success of the customer acquisition process of our business. Although, we expect to allocate significant number of resources, financial and otherwise, on establishing and maintaining our brands, no assurance can be given that our brand names will be effective in attracting and growing user and client base for our businesses or that such efforts will be cost-effective, which may negatively affect our business, financial condition and results of operations.

39. ***An inability to renew quality accreditations in a timely manner or at all, or any deficiencies in the quality of our products may adversely affect our business prospects and financial performance.***

We obtain and maintain quality certifications and accreditations from independent certification entities and also comply with prescribed specifications and standards of quality approved by the Government in connection with the products we manufacture. Such specifications and standards of quality is an important factor in the success and wide acceptability of our products. If we fail to comply with applicable quality standards or if the relevant accreditation institute or agency declines to certify our products, or if we are otherwise unable to obtain such quality accreditations in the future, in a timely manner or at all, our business prospects and financial performance will be materially and adversely affected.

40. Our inability to effectively manage project execution and milestone schedules may lead to project delays which may adversely affect our business and the result of operations.

Our business is dependent on our ability to effectively manage the execution of our projects. An inability to effectively manage our operations, including ineffective or inefficient project management procedures could increase our costs and expenses, resulting in project delays and thereby materially and adversely affect our profitability. Further, our purchase order / contracts typically provide specified milestones to be achieved within a specific timeframe, and we may be liable to our clients for any failure to meet such project milestones within the stipulated schedule in accordance with the terms of the relevant purchase order / contract. The effectiveness of our project management processes and our ability to execute projects in a timely manner may be affected by various factors, including:

- delays in receipt of work schedules and designing inputs, approvals and decisions required from the client;
- delays in delivery of raw materials, components, or equipment;
- changes to project plans and process requirements;
- delays due to interface issues;
- delays due to environmental considerations;
- onsite accidents and accidents during delivery, and installation of our products;
- unavailability of skilled and unskilled labour;
- local strikes, work stoppages and curfews by political parties;
- adverse weather conditions, and
- adverse changes to the relevant legal, regulatory, or tax regimes.

Such factors would have an adverse effect on our results of operations and financial condition.

41. We may not be able to secure new contracts and/or customers.

A substantial part of our business is order-based and non-recurring. We, therefore, have to continuously and consistently secure new customers and orders. While executing our orders, we need to ensure that our products are the best value-for-money products that is available in the market. For making our products to have the best value-for-money product, while ensuring that we make sufficient margins from the sale of our products, we have to ensure that our designs, the functioning of our teams and the after sales services are most efficient when compared with those of our competitors. For instance, during the execution of our orders, our design and manufacturing team designs the product before its production, and on the basis of such design, the requirement of raw material is determined. With greater access to technology, we expect our design and engineering team to design a product with the least possible raw materials without compromising on the safety and stability of the product. Any increase in the raw material value of our products would increase the amount of steel to be used in such order, consequently increasing the cost of such order. There is no assurance that our competitors will not be able to increase the designing efficiency of the product by using the latest, state of the art technology.

There is no assurance that we will be able to provide our products to the customers in the most efficient manner resulting in securing new customers and projects. Executing projects with lower margins also affects our profitability. As such, our profitability and financial performance will depend on our ability to secure new projects that are profitable on a regular basis. If we are unable to do so for any reason, our profitability and financial performance will be materially and adversely affected.

42. An inability to manage our growth could disrupt our business and reduce our profitability.

We have experienced continuous growth in the preceding years. We expect our business to grow as a result of our plans to expand further. We expect any growth in our business to place additional demands on us and require us to continuously evolve and improve our operational, financial, and internal controls across the organization. In particular, continued expansion increases the challenges involved in:

- (i) maintaining high levels of client satisfaction;
- (ii) recruiting, training, and retaining sufficient skilled management, technical and marketing personnel;
- (iii) adhering to health, safety and environment and quality and process execution standards that meet client expectations;
- (iv) preserving a uniform culture, values, and work environment in operations; and
- (v) developing and improving our internal administrative infrastructure, particularly our financial, operational, communications and other internal systems.

Our ability to implement our business plans depend on, inter alia, global economic conditions, our capital resources, our R&D capabilities for new products and technology solutions, our ability to commercially realise the R&D results, our ability to obtain any necessary government or regulatory approval or licenses, and the availability of management, financial and other resources.

The success of our business will depend greatly on our ability to implement our business and strategies effectively. Even if we have successfully executed our business strategies in the past, there can be no assurance that we will be able to execute our strategies on time and within the estimated budget, or that we will meet the expectations of targeted customers. We expect our strategies to place significant demands on our management and other resources and require us to continue developing and improving our financial, operating, and other internal controls. Our inability to manage our business and strategies could have an adverse effect on our business, financial condition, and profitability.

43. *Our Directors and certain Key Management Personnel hold Equity Shares in our Company and are therefore interested in the Company's performance in addition to their remuneration and reimbursement of expenses.*

Certain of our Directors and Key Management Personnel are interested in our Company, in addition to regular remuneration or benefits and reimbursement of expenses, to the extent of their shareholding in our Company. There can be no assurance that our Key Management Personnel will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Directors and our Key Management Personnel may take or block actions with respect to our business which may conflict with the best interests of the Company or that of minority shareholders. For details, see the section titled “*Capital Structure*” on Page 56 of this Draft Prospectus. There is no assurance that our Directors and/or our key management personnel will not provide competitive services or otherwise compete in business lines in which we are already present or will enter into in the future.

44. *Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.*

The amount of our future dividend payments, if any, will depend upon our future earnings, financial condition, cash flows, working capital requirements and capital expenditures. There can be no assurance that we will be able to pay dividends. Additionally, we may be restricted by the terms of our existing or future debt financing to make dividend payments only after a certain time period as will be agreed with the lenders.

45. *Our management will have broad discretion in how we apply the Net Proceeds of the Issue and there is no assurance that the Objects of the Offer will be achieved within the time frame expected, or at all, or that the deployment of Net Proceeds in the manner intended by us will result in an increase in the value of your investment.*

We intend to use the Net Proceeds for the purposes described under the “*Objects of the Issue*” on page 67 of this Draft Prospectus. The Objects of the Issue comprise (a) funding incremental working capital requirements of our Company, and (b) for general corporate purposes (the amount utilised for general corporate purposes shall not exceed 25% of the Gross Proceeds). Further, our Objects of the Issue have not been appraised by any bank, financial institution or other independent agency. Our management will have broad discretion to revise our business plans, estimates and budgets from time to time. Consequently, our funding requirements and deployment of funds may change, which may result in the rescheduling of the proposed utilization of Net Proceeds and increasing or decreasing expenditure for a particular activity, subject to compliance with applicable law and the investment policies approved by our management. Further, pursuant to Section 27 of the Companies Act, 2013, any variation in the Objects of the Issue would require a special resolution of the shareholders, and the promoter or controlling shareholders will be required to provide an exit opportunity to the shareholders who do not agree to such proposal to vary the Objects of the Issue, in accordance with applicable law.

In case of an increase in actual expenses or shortfall in requisite funds, additional funds for a particular activity will be met by any means available to us, including internal accruals and additional equity and/or debt arrangements. If actual utilization towards the Objects of the Issue is lower than the proposed deployment, such balance will be used for future growth opportunities, including funding other existing objects, if required. If the estimated utilization of the Net Proceeds is not completely met in a fiscal year, it shall be carried forward.

46. *Our Company has no insurance coverage to protect us against certain operational risks or claims by our employees.*

Our Company does maintain any insurance coverage for any operational risks. Our company may be exposed to various risks which includes Fire, Earthquake, Burglary, Housebreaking, Theft, Terrorism damage, Cash in Safe, Cash in Transit etc. In case of an uninsured loss, we could incur liabilities, lose the capital invested in that property or lose the anticipated future income derived from that business or property while remaining obligated for any indebtedness or other financial obligations related to our business. Any such loss could result in an adverse effect to our financial condition. Furthermore, if we are subject to litigation or claims or our operations are interrupted for a sustained period, we cannot assure you that we will be able to cover the losses that may be incurred as a result of such interruption. If we suffer large uninsured losses, it may adversely affect our cash flows, business, results of operations, and financial condition.

47. *The Promoter and Promoter Group will continue to exercise control post completion of the Issue and will have considerable influence over the outcome of matters.*

Upon completion of this Issue, our Promoter and Promoter Group will continue to own a majority of our Equity Shares. As a result, our Promoters will have the ability to exercise significant influence over all matters requiring shareholders' approval. Our Promoters will also be in a position to influence any shareholder action or approval requiring a majority vote, except where they may be required by the applicable law to abstain from voting. This control could also delay, defer or prevent a change in control of our Company, impede a merger, consolidation, takeover or other business combination involving our Company, or discourage a potential acquirer from obtaining control of our Company even if it is in the best interests of our Company. The interests of our Promoters could conflict with the interests of our other equity shareholders, and the Promoters could make decisions that materially and adversely affect your investment in the Equity Shares.

48. *We are subject to risks arising from interest rate fluctuations, which could adversely affect our business, financial condition and results of operations.*

Interest rates for borrowings have been volatile in India in recent periods. Our operations are funded to a significant extent by working capital debt facilities and increases in interest rate (and consequent increase in the cost of servicing such debt) may have an adverse effect on our results of operations and financial condition. Our current debt facilities carry interest at variable rates as well as fixed rates. Although we may in the future engage in interest rate hedging transactions from time to time, there can be no assurance that these agreements will protect us adequately against interest rate risks.

49. *Our Company does not have any listed peer companies for comparison of performance and therefore, investors must rely on their own examination of accounting ratios of our Company for the purposes of investment in the Issue.*

Business models of some of the listed companies which undertake certain business, which may be considered similar to our business are not comparable to our business model based on (i) percentage of contribution made by their business activities to the total revenue of these listed companies; and (ii) nature and extent of activities in diverse sectors undertaken by these listed companies. Therefore, there are no listed companies that may be considered as the peer group of our Company. Therefore, investors must rely on their own examination of accounting ratios of our Company for the purposes of investment in the Issue.

For Details of our financial ratios, please refer chapter titled ***“Financial Information as Restated”*** beginning on Page 144 of this Draft Prospectus.

50. *The future operating results are difficult to predict and may fluctuate or adversely vary from the past performance.*

The company's operating results may fluctuate or adversely vary from past performances in the future due to a number of factors, many of which are beyond the company's control. The results of operations during any financial year or from period to period may differ from one another or from the expected results operation. Its business, results of operations and financial conditions may be adversely affected by, inter alia, a decrease in the growth and demand for the products and services offered by us or any strategic alliances which may subsequently become a liability or non-profitable. Due to various reasons including the above, the future performance may fluctuate or adversely vary from our past performances and may not be predictable. For further details of our operating results, section titled ***“Financial Information as Restated”*** beginning on Page 144 of this Draft Prospectus.

51. ***Portion of our Issue Proceeds are proposed to be utilized for general corporate purposes which constitute [●]% of the Issue Proceed.***

As on date we have not identified the use of such funds. Portion of our Issue Proceeds are proposed to be utilized for general corporate purposes which constitute [●]% of the Issue Proceed. We have not identified the general corporate purposes for which these funds may be utilized. The deployment of such funds is entirely at the discretion of our management in accordance with policies established by our Board of Directors from time to time and subject to compliance with the necessary provisions of the Companies Act. For details, please refer the chapter titled “*Objects of the Issue*” beginning on Page No. 67 of this Draft Prospectus.

52. ***Our Board of Directors and management may change our operating policies and strategies without prior notice or shareholder approval.***

Our Board of Directors and management has the authority to modify certain of our operating policies and strategies without prior notice (except as required by law) and without shareholder approval. We cannot predict the effect that any changes to our current operating policies or strategies would have on our business, operating results and the price of our Equity Shares.

53. ***Industry information included in this draft prospectus has been derived from industry reports. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.***

We have relied on the reports of certain independent third party for purposes of inclusion of such information in this draft prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified data from such industry reports and other sources. Although we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed and their dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this draft prospectus.

RISKS RELATING TO THE ISSUE AND THE EQUITY SHARES

54. ***In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects of this Issue which would in turn affect our revenues and results of operations.***

The funds that we receive would be utilized for the Objects of the Issue as has been stated in the Chapter “*Objects of the Issue*” on page 67 of this Draft Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management’s estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, we may have to revise our business, development and working capital plans resulting in unprecedented financial mismatch and this may adversely affect our revenues and results of operations.

55. ***There is no guarantee that our Equity Shares will be listed on the SME Platform of BSE Limited in a timely manner or at all.***

In accordance with Indian law and practice, permission for listing and trading of our Equity Shares will not be granted until after certain actions have been completed in relation to this Issue and until Allotment of Equity Shares pursuant to this Issue. In accordance with current regulations and circulars issued of SEBI, our Equity Shares are required to be listed on the SME Platform of BSE Limited within such time as mandated under UPI Circulars, subject to any change in the prescribed timeline in this regard. However, we cannot assure you that the trading in our Equity Shares will commence in a timely manner or at all. Any failure or delay in obtaining final listing and trading approvals may restrict your ability to dispose of your Equity Shares.

56. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

We have no experience as a public listed company or with the increased scrutiny of its affairs by shareholders, regulators and the public at large that is associated with being a public listed company. As a public listed company, we will incur significant legal, accounting, corporate governance, and other expenses that we did not incur as a unlisted company. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange which require us to file unaudited financial results on a half-yearly basis. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, our management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner.

57. *The Issue Price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue.*

The Issue price is based on numerous factors and may not be indicative of the market price for our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. There can be no assurance that you will be able to resell your Shares at or above the Issue Price. Among the factors that could affect our Share price are: quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net profit and income; changes in income or earnings estimates or publication of research reports by analysts; speculation in the press or investment community; general market conditions; and domestic and international economic, legal and regulatory factors unrelated to our performance.

58. *After this Issue, the price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not be sustained.*

Prior to this Issue, there has been no public market for our Equity Shares, and an active trading market may not develop or be sustained upon the completion of this Issue. The initial public offering price of the Equity Shares offered hereby was determined through our negotiations with the LM and may not be indicative of the market price of the Equity Shares after this Issue. The market price of our Equity Shares after this Issue will be subject to significant fluctuations in response to, among other factors:

- variations in our operating results and the performance of our business;
- regulatory developments in our target markets affecting us, our customers, or our competitors;
- changes in financial estimates by securities research analysts;
- addition or loss of executive officers or key employees;
- loss of one or more significant customers;
- the performance of the Indian and global economy;
- significant developments in India's economic liberalization and deregulation policies, and the fiscal regime;
- volatility in the Indian and global securities markets;
- performance of our competitors and perception in the Indian market about investment in our industry; and
- adverse media reports, if any, on our Company, or the industry.

Many of these factors are beyond our control. There has been recent volatility in the Indian stock markets and our share price could fluctuate significantly as a result of such volatility in the future. There can be no assurance that an active trading market for our Equity Shares will develop or be sustained after this Issue, or that the price at which our Equity Shares are initially offered will correspond to the prices at which they will trade in the market subsequent to this Issue.

59. *The investors will not be able to sell immediately on an Indian stock exchange any of the Equity Shares they purchase in the Issue.*

We have applied to BSE to use its name as the Stock Exchange in this offer document for listing our shares on the BSE-SME. In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Offer will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a delay in listing the Equity Shares on the BSE-SME. Any delay in obtaining the approval would restrict your ability to

dispose of your Equity Shares.

- 60. *There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.***

Once listed, we would be subject to circuit breakers imposed by stock exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

- 61. *Any future issuance of Equity Shares may dilute the investors' shareholdings or sales of our Equity Shares by our Promoters or Promoter Group may adversely affect the trading price of our Equity Shares.***

Any future equity issuances by us or sales of our Equity Shares by our Promoters or Promoter Group may adversely affect the trading price of our Equity Shares and our Company's ability to raise capital through an issue of securities. In addition, any perception by potential investors that such issuances or sales might occur could also affect the trading price of our Equity Shares. Additionally, the disposal, pledge or encumbrance of our Equity Shares by any of our Company's major shareholders, or the perception that such transactions may occur may affect the trading price of our Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

- 62. *Our Company has not paid any dividends till now and there can be no assurance that we will pay dividends in future.***

Our ability to pay dividends in the future will depend upon a variety of factors such as future earnings, financial condition, cash flows, working capital requirements, and restrictive covenants in our financing arrangements. Our Company has not paid any dividends till now and there can be no assurance that we will pay dividends in future. Our ability to pay dividends in the future will depend on our earnings, financial condition and capital requirements. Dividends distributed by us will attract dividend distribution tax at rates applicable from time to time. There can be no assurance that we will generate sufficient income to cover our operating expenses and pay dividends to our shareholders, or at all. Our ability to pay dividends could also be restricted under the existing or certain financing arrangements that we may enter into.

- 63. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.***

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see "**Dividend Policy**" on page 143 of this draft prospectus.

- 64. *You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.***

Under the current Indian Income Tax provisions, all transactions of purchase and sales of securities on Indian stock exchanges are subject to levy of securities transaction tax (STT) which will be collected by respective stock exchange on which the securities are transacted. Accordingly, the Indian Income Tax Act has special capital gains tax provisions for all transactions of purchase and sale of equity shares carried out on the Indian Stock Exchanges. Under the current Indian Income Tax provisions, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India.

65. *Applicants to this Issue are not allowed to withdraw their Applications after the Issue Closing Date.*

In terms of the SEBI (ICDR) Regulations, Applicants in this Issue are not allowed to withdraw their Applications after the Issue Closing Date. The Allotment in this Issue and the credit of such Equity Shares to the Applicant's demat account with its depository participant shall be completed within such period as prescribed under the applicable laws. There is no assurance, however, that material adverse changes in the international or national monetary, financial, political or economic conditions or other events in the nature of force majeure, material adverse changes in our business, results of operation or financial condition, or other events affecting the Applicant's decision to invest in the Equity Shares, would not arise between the Issue Closing Date and the date of Allotment in this Issue. Occurrence of any such events after the Issue Closing Date could also impact the market price of our Equity Shares. The Applicants shall not have the right to withdraw their applications in the event of any such occurrence. We cannot assure you that the market price of the Equity Shares will not decline below the Issue Price. To the extent the market price for the Equity Shares declines below the Issue Price after the Issue Closing Date, the shareholder will be required to purchase Equity Shares at a price that will be higher than the actual market price of the Equity Shares at that time. Should that occur, the shareholder will suffer an immediate unrealized loss as a result. We may complete the Allotment even if such events may limit the Applicants' ability to sell our Equity Shares after this Issue or cause the trading price of our Equity Shares to decline.

66. *Foreign investors may be restricted in their ability to purchase or sell Equity Shares.*

Under foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing and reporting requirements specified by the RBI or in the alternate, the pricing is in compliance with the extant provisions of SEBI ICDR Regulations. If the transfer of shares is not in compliance with such pricing or reporting requirements and does not fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. We cannot assure that any required approval from the RBI or any other government agency can be obtained on any particular terms or at all.

67. *The investors may be restricted in their ability to exercise pre-emptive rights under Indian law and may be adversely affected by future dilution of their ownership position.*

Under the Companies Act, 2013, a Company incorporated in India must offer its holders of shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages before the issuance of any new shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the shares which are voted on the resolution. However, if the law of the jurisdiction the investors are in does not permit them to exercise their pre-emptive rights without us filing an offering document or registration statement with the applicable authority in the jurisdiction they are in, they will not be able to exercise their pre-emptive rights unless we make such a filing. If we elect not to make such a filing, the new securities may be issued to a custodian, who may sell the securities for the investors' benefit. The value such custodian would receive upon the sale of such securities if any, and the related transaction costs cannot be predicted. To the extent that the investors' are unable to exercise pre-emptive rights granted in respect of the Equity Shares, their proportional interest in us would be reduced.

68. *Rights of shareholders under Indian law may be more limited than under the laws of other jurisdictions.*

The Companies Act and related regulations, the Articles of Association, and the Listing Agreements to be entered into with the Stock Exchange govern the corporate affairs of the Company. The Legal principles relating to these matters and the validity of corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as a shareholder than as a shareholder of a corporation in another jurisdiction.

69. *Our Equity Shares are quoted in Indian Rupees in India, and therefore investors may be subject to potential losses arising out of exchange rate risk on the Indian Rupee and risks associated with the conversion of Indian Rupee proceeds into foreign currency.*

Investors are subject to currency fluctuation risk and convertibility risk since the Equity Shares are quoted in Indian Rupees on the Indian stock exchanges on which they are listed. Dividends on the Equity Shares will also be paid in Indian Rupees. The volatility of the Indian Rupee against the U.S. dollar and other currencies subjects investors who convert funds into Indian Rupees to purchase our Equity Shares to currency fluctuation risks.

EXTERNAL RISK FACTORS

70. *The COVID-19 pandemic, or any future pandemic or widespread public health emergency, could materially and adversely impact our business, financial condition, cash flows and results of operations.*

In late 2019, COVID-19 emerged and by March 11, 2020 was declared a global pandemic by The World Health Organization. Governments and municipalities around the world instituted measures in an effort to control the spread of COVID-19, including quarantines, shelter-in-place orders, school closings, travel restrictions, lock down of cities and closure of non-essential businesses. By the end of March, the macroeconomic impacts became significant, exhibited by, among other things, a rise in unemployment and market volatility. The outbreak of COVID-19 in many countries, including India, the United Kingdom and the United States, has significantly and adversely impacted economic activity and has contributed to significant volatility and negative pressure in financial markets, and it is possible that the outbreak of COVID-19 will cause a prolonged global economic crisis, recession or depression, despite monetary and fiscal interventions by governments and central banks globally. On March 24, 2020, the Government of India ordered a national lockdown in response to the spread of COVID-19. Although some governments are beginning to ease or lift these restrictions, the impacts from the severe disruptions caused by the effective shutdown of large segments of the global economy remain unknown and no prediction can be made of when any of the restrictions currently in place will be relaxed or expire, or whether or when further restrictions will be announced.

The outbreak, or threatened outbreak, of any severe communicable disease (particularly COVID-19) could materially adversely affect overall business sentiment and environment, particularly if such outbreak is inadequately controlled. The spread of any severe communicable disease may also adversely affect the operations of our clients and service providers, which could adversely affect our business, financial condition and results of operations. The outbreak of COVID-19 has resulted in authorities implementing several measures such as travel bans and restrictions, quarantines, shelter in place orders, and shutdowns. These measures have impacted and may further impact our workforce and operations, the operations of our clients, and those of our respective service providers. There is currently substantial medical uncertainty regarding COVID-19. A rapid increase in severe cases and deaths where measures taken by governments fail or are lifted prematurely, may cause significant economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and could be severe. If any of our employees were suspected of contracting COVID-19 or any other epidemic disease, this could require us to quarantine some or all of these employees or disinfect the facilities used for our operations. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general.

The outbreak has significantly increased economic uncertainty. It is likely that the current outbreak or continued spread of COVID-19 will cause an economic slowdown and it is possible that it could cause a global recession. The spread of COVID-19 has caused us to modify our business practices (including employee travel, employee work locations, and cancellation of physical participation in meetings, events and conferences), and we may take further actions as may be required by government authorities or that we determine are in the best interests of our employees, customers, partners, and suppliers. There is no certainty that such measures will be sufficient to mitigate the risks posed by the outbreak, and our ability to perform critical functions could be harmed. The extent to which the COVID-19 further impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including new information which may emerge concerning the severity of the coronavirus and the actions taken globally to contain the coronavirus or treat its impact, among others. Existing insurance coverage may not provide protection for all costs that may arise from all such possible events. The degree to which COVID-19 impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including, but not limited to, the duration and spread of the outbreak, its severity, the actions taken to contain the outbreak or treat its impact, and how quickly and to what extent normal economic and operating conditions can resume. The above risks can threaten the safe operation of our facilities and cause disruption of operational activities, environmental harm, loss of life, injuries and impact the wellbeing of our people.

Further in case the lockdown is extended, it could result in muted economic growth or give rise to a recessionary economic scenario, in India and globally, which could adversely affect the business, prospects, results of operations and financial condition of our Company. The full extent to which the COVID-19 pandemic, or any future pandemic or widespread public health emergency impacts our business, operations and financial results will depend on numerous evolving factors that we may not be able to accurately predict, including: the scope, severity, and duration of the pandemic; actions taken by governments, business and individuals in response to the pandemic; the effect on customer demand for and ability to pay for our products; the impact on our capital expenditure; disruptions or restrictions on our employees' and suppliers' ability to work and travel; any extended period of remote work arrangements; and strain on our or our customers' business continuity plans, and resultant operational risk.

71. A slowdown in economic growth in India could adversely affect our business, results of operations, financial condition and cash flows.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our products may be adversely affected by an economic downturn in domestic, regional and global economies. Economic growth in the country in which we operate is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports of materials, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production. Consequently, any future slowdown in the Indian economy could harm our business, results of operations, financial condition and cash flows. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margin.

72. Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.

Our business and financial performance could be adversely affected by unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations applicable to us and our business. Please refer to "**Key Industry Regulations and Policies**" on page 105 of this Draft Prospectus for details of the laws currently applicable to us.

Our company operates a Factory where less than 20 workers are employed, hence our company is not required to obtain a Factory License as per Factories Act' 1948 [amended by Maharashtra Government under Factories (Maharashtra Amendment) Act, 2015] where the Act defines a "factory" to cover any premises which employs 20 or more workers on any day of the preceding 12 months and in which a manufacturing process is carried on with the aid of power or any premises where at least 40 workers are employed, and where a manufacturing process is carried on without the aid of power.

There can be no assurance that the Government of India may not implement new regulations and policies which will require us to obtain approvals and licenses from the Government of India and other regulatory bodies or impose onerous requirements and conditions on our operations. Our Company will comply with relevant regulations as and when applicable. However, any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment to, or change to governing laws, regulation or policy in the jurisdictions in which we operate may have a material adverse effect on our business, financial condition and results of operations. In addition, we may have to incur expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. Any unfavourable changes to the laws and regulations applicable to us could also subject us to additional liabilities.

GST has been implemented with effect from July 1, 2017 and has replaced the indirect taxes on goods and services such as central excise duty, service tax, central sales tax, state VAT and surcharge being collected by the central and state governments. The GST has led to increase tax incidence and administrative compliance. Any future amendments may affect our overall tax efficiency, and may result in significant additional taxes becoming payable.

Further, the general anti avoidance rules ("GAAR") provisions have been made effective from assessment year 2018-19 onwards, i.e.; financial Year 2017-18 onwards and the same may get triggered once transactions are undertaken to avoid tax. The consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain.

The application of various Indian tax laws, rules and regulations to our business, currently or in the future, is subject to interpretation by the applicable taxation authorities. If such tax laws, rules and regulations are amended, new adverse laws, rules or regulations are adopted or current laws are interpreted adversely to our interests, the results could increase our tax payments (prospectively or retrospectively) and/or subject us to penalties. Further, changes in capital gains tax or tax on capital market transactions or sale of shares could affect investor returns. As a result, any such changes or interpretations could have an adverse effect on our business and financial performance.

73. *Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.*

Inflation is typically impacted by factors such as governmental policies, regulations, commodity prices, liquidity and global economic environment. Any change in the government or a change in the economic and deregulation policies could adversely affect the inflation rates. Continued high rates of inflation may increase our costs such as salaries, travel costs and related allowances, which are typically linked to general price levels. There can be no assurance that we will be able to pass on any additional costs to our clients or that our revenue will increase proportionately corresponding to such inflation. Accordingly, high rates of inflation in India could have an adverse effect on our profitability and, if significant, on our financial condition.

74. *Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our ability to raise additional financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our capital expenditure plans, business and financial performance and the price of our Equity Shares.

75. *We have not prepared, and currently do not intend to prepare, our financial statements in accordance with the International Financial Reporting Standards ("IFRS"). Our transition to IFRS reporting could have a material adverse effect on our reported results of operations or financial condition.*

Public companies in India, including us, may be required to prepare annual and interim financial statements under IFRS in accordance with the roadmap for convergence with IFRS announced by the Ministry of Corporate Affairs, Government of India through a press note dated January 22, 2010 (the "IFRS Convergence Note"). The Ministry of Corporate Affairs by a press release dated February 25, 2011 has notified that 35 Indian Accounting Standards are to be converged with IFRS. The date of implementation of such converged Indian accounting standards has not yet been determined. Our financial condition, results of operations, cash flows or changes in shareholders' equity may appear materially different under IFRS than under Indian GAAP or our adoption of converged Indian Accounting Standards may adversely affect our reported results of operations or financial condition. This may have a material adverse effect on the amount of income recognized during that period and in the corresponding (restated) period in the comparative Fiscal/period.

76. *Financial difficulty and other problems in certain long-term lending institutions and investment institutions in India could have a negative impact on our business.*

We are exposed to the risks of the Indian financial system which may be affected by the financial difficulties faced by certain Indian financial institutions because the commercial soundness of many financial institutions may be closely related as a result of credit, trading, clearing or other relationships. This risk, which is referred to as "systemic risk," may adversely affect financial intermediaries, such as clearing agencies, banks, securities firms and exchanges with whom we interact on a daily basis. Our transactions with these financial institutions expose us to credit risk in the event of default by the counter party, which can be exacerbated during periods of market illiquidity. As the Indian financial system operates within an emerging market, we face risks of a nature and extent not typically faced in more developed economies, including the risk of deposit runs notwithstanding the existence of a national deposit insurance scheme. The problems faced by individual Indian financial institutions and any instability in or difficulties faced by the Indian financial system generally could create adverse market perception about Indian financial institutions and banks. This in turn could adversely affect our business, financial condition, results of operations and cash flows.

77. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance

with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

78. *Political instability or changes in the Government could adversely affect economic conditions in India generally and our business in particular.*

Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Elimination or substantial change of policies or the introduction of policies that negatively affect the Company's business could cause its results of operations to suffer. Any significant change in India's economic policies could disrupt business and economic conditions in India generally and the Company's business in particular.

79. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the Mumbai terrorist attacks and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

INDIAN ECONOMY**INTRODUCTION**

Strong economic growth in the first quarter of FY 2022-23 helped India overcome the UK to become the fifth-largest economy after it recovered from repeated waves of COVID-19 pandemic shock. Real GDP in the first quarter of 2022–23 is currently about 4% higher than its corresponding 2019-20, indicating a strong start for India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022–2023. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-September 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

MARKET SIZE

India's nominal gross domestic product (GDP) at current prices is estimated to be at Rs. 232.15 trillion (US\$ 3.12 trillion) in FY22. With more than 100 unicorns valued at US\$ 332.7 billion, India has the third-largest unicorn base in the world. The government is also focusing on renewable sources to generate energy and is planning to achieve 40% of its energy from non-fossil sources by 2030.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at 2.1% of GDP in the first quarter of FY 2022-23.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown.

According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

RECENT DEVELOPMENTS

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

GOVERNMENT INITIATIVES

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve

their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, are aimed at creating immense opportunities in India. Prime Minister of India Mr. Narendra Modi launched the Make in India initiative with an aim to boost the country's manufacturing sector and increase the purchasing power of an average Indian consumer, which would further drive demand and spur development, thus benefiting investors. The Government of India, under its Make in India initiative, is trying to boost the contribution made by the manufacturing sector with an aim to take it to 25% of the GDP from the current 17%. Besides, the government has also come up with the Digital India initiative, which focuses on three core components: the creation of digital infrastructure, delivering services digitally, and increasing digital literacy.

- The Government of India is expected to increase public health spending to 2.5% of the GDP by 2025.

ROAD AHEAD

In the second quarter of FY 2022-23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2022. India's comparatively strong position in the external sector reflects the

country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in FY 2022–23 (until August 2022), stood 46.8% higher than the same period last year. The ratio of revenue expenditure to capital outlay decreased from 6.4 in the previous year to 4.5 in the current year, signaling a clear change in favour of higher-quality spending. Stronger revenue generation as a result of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Despite the continued global slowdown, India's exports climbed at the second highest rate this quarter. With a reduction in port congestion, supply networks are being restored. The CPI-C and WPI inflation reduction from April 2022 already reflects the impact. In August 2022, CPI-C inflation was 7.0%, down from 7.8% in April 2022. Similarly, WPI inflation has decreased from 15.4% in April 2022 to 12.4% in August 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

INDUSTRIAL STEEL INDUSTRY OVERVIEW

INTRODUCTION

One of the primary forces behind industrialization has been the use of metals. Steel has traditionally occupied a top spot among metals. Steel production and consumption are frequently seen as measures of a country's economic development because it is both a raw material and an intermediary product. Therefore, it would not be an exaggeration to argue that the steel sector has always been at the forefront of industrial progress and that it is the foundation of any economy. The Indian steel industry is classified into three categories - major producers, main producers and secondary producers.

As of December 2022, India was the world's second-largest producer of crude steel. In FY22, the production of crude steel and finished steel stood at 133.596 MT and 120.01 MT, respectively. In April-November 2022, the production of crude steel and finished steel stood at 81.96 MT and 78.09 MT respectively. The growth in the Indian steel sector has been driven by the domestic availability of raw materials such as iron ore and cost-effective labour. Consequently, the steel sector has been a major contributor to India's manufacturing output.

The Indian steel industry is modern, with state-of-the-art steel mills. It has always strived for continuous modernisation of older plants and up-gradation to higher energy efficiency levels.

MARKET SIZE

In the past 10–12 years, India's steel sector has expanded significantly. Production has increased by 75% since 2008, while domestic steel demand has increased by almost 80%. The capacity for producing steel has grown concurrently, and the rise has been largely organic.

In FY22, the production of crude steel and finished steel stood at 133.596 MT and 120.01 MT, respectively. The consumption of finished steel stood at 105.751 MT in FY22. Between April-December 2022, India's finished steel consumption stood at 75.34 MT. In April-July 2022, the production of crude steel and finished steel stood at 40.95 MT and 38.55 MT respectively.

In FY23 (until January 2023), the exports of finished steel stood at 5.33 MT, while the imports stood at 5 MT. In FY22, exports and imports of finished steel stood at 13.49 MT and 4.67 MT, respectively. In FY22, India's export rose by 25.1% YoY, compared with 2021. In FY21, India exported 9.49 MT of finished steel. In December 2022 exports of finished steel stood at 4.42 lakh tonnes.

The annual production of steel is anticipated to exceed 300 million tonnes by 2030–2031. By

2030–31, crude steel production is projected to reach 255 million tonnes at 85% capacity utilisation achieving 230 million tonnes of finished steel production, assuming a 10% yield loss or a 90% conversion ratio for the conversion of raw steel to finished steel. With net exports of 24 million tonnes, consumption is expected to reach 206 million tonnes by the years 2030–2031. As a result, it is anticipated that per-person steel consumption will grow to 160 kg.

INVESTMENTS

The steel industry and its associated mining and metallurgy sectors have seen major investments and developments in the recent past.

According to the data released by the Department for Promotion of Industry and Internal Trade (DPIIT), between April 2000-December 2022, Indian metallurgical industries attracted FDI inflows of US\$ 17.22 billion.

In FY22, demand for steel was expected to increase by 17% to 110 million tonnes, driven by rising construction activities. Some of the major investments in the Indian steel industry are as follows:

- 67 applications from 30 companies have been selected under the Production Linked Incentive (PLI) Scheme for Specialty Steel. This will attract committed investment of Rs. 42,500 crore (US\$ 5.19 billion) with a downstream capacity addition of 26 million tonnes and employment generation potential of 70,000.

ROAD AHEAD

The steel industry has emerged as a major focus area given the dependence of a diverse range of sectors on its output as India works to become a manufacturing powerhouse through policy initiatives like Make in India. With the industry accounting for about 2% of the nation's GDP, India ranks as the world's second-largest producer of steel and is poised to overtake China as the world's second-largest consumer of steel. Both the industry and the nation's export manufacturing capacity have the potential to help India regain its favourable steel trade balance.

The National Steel Policy, 2017 envisage 300 million tonnes of production capacity by 2030-31. The per capita consumption of steel has increased from 57.6 kgs to 74.1 kgs during the last five years. The government has a fixed objective of increasing rural consumption of steel from the current 19.6 kg/per capita to 38 kg/per capita by 2030-31. As per Indian Steel Association (ISA), steel demand will grow by 7.2% in 2019-20 and 2020-21.

Huge scope for growth is offered by India's comparatively low per capita steel consumption and the expected rise in consumption due to increased infrastructure construction and the thriving automobile and railways sectors.

Central Goods and Services Tax Act, 2017 (the "GST Act")

The GST Act levies indirect tax throughout India to replace many taxes levied by the Central and State Governments. The GST Act was applicable from July 1, 2017 and combined the Central Excise Duty, Commercial Tax, Value Added Tax (VAT), Food Tax, Central Sales Tax (CST), Introit, Octroi, Entertainment Tax, Entry Tax, Purchase Tax, Luxury Tax, Advertisement Tax, Service Tax, Customs Duty, Surcharges. GST is levied on all transactions such as sale, transfer, purchase, barter, lease, or import of goods and/or services. India has adopted a dual GST model, meaning that taxation is administered by both the Union and State Governments. Transactions made within a single state is levied with Central GST (CGST) by the Central Government and State GST (SGST) by the government of that state. For inter-state transactions and imported goods or services, an Integrated GST (IGST) is levied by the Central Government. GST is a consumption-based tax; therefore, taxes are paid to the state where the goods or services are consumed and not the state in which they were produced.

Significant Accounting Policies

1. Basis of Preparation and Presentation

These Restated Financial Statements have been prepared in accordance with the Indian Accounting Standards ('Ind AS') as notified by Ministry of Corporate Affairs ('MCA') under Section 133 of the Companies Act, 2013 ('Act') read with the Companies (Indian Accounting Standards) Rules, 2015, as amended and other relevant provisions of the Act. For the FY 2020-21, the company has prepared its financial statement in accordance with Indian Generally Accepted Accounting Principal (GAAP) under the historical cost convention method. In FY 2021-22 onwards, the company has adopted the Indian Accounting Standards ('Ind AS') for the first time and this accounting policies is applied to all the period presented in this Restated Financial Statement.

2. Historical cost convention

The financial statements have been prepared on a historical cost basis, except certain financial assets and liabilities are measured at fair value.

3. Current non-current classification

All assets and liabilities have been classified as current or non-current as per the Company's normal operating cycle (twelve months) and other criteria set out in Schedule III of the Act.

4. Rounding of amounts

All amounts disclosed in the financial statements and notes have been rounded off to the nearest Lakhs as per the requirement of Schedule III, unless otherwise stated.

5. Property, Plant and Equipments

The Company has applied for the one-time transition exemption of considering the carrying cost on the transition date i.e. September 22, 2020, as the deemed cost under IND AS. Hence regarded thereafter as historical cost.

All other items of property, plant and equipment are stated at cost less depreciation and impairment, if any. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably.

The company identifies and determines cost of each component/part of the plant and equipment separately, if the component/part has a cost which is significant to the total cost of the plant and equipment and has useful life that is materially different from that of the remaining plant and equipment.

Gains or losses arising from derecognition of tangible property, plant and equipment are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the Statement of Profit and loss when the asset is derecognized.

Depreciation in respect of Property, Plant and Equipments is provided on straight line basis in accordance with Schedule II of Companies Act 2013.

6. Leases

The Company as a lessee

The Company assesses whether a contract contains a lease, at the inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether:

1. The contract involves the use of an identified asset
2. The Company has substantially all of the economic benefits from use of the asset through the period of the lease and
3. The Company has the right to direct the use of the assets.

At the date of commencement of the lease, the company has assessed the lease to be of low value and for a term of less than 12 months. For these short-term and low value leases, the Company recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease.

7. Financial Instruments

Financial Assets

7.1. Initial recognition and measurement

All financial assets and liabilities are initially recognized at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities, which are not at fair value through profit or loss, are adjusted to the fair value on initial recognition. Purchase and sale of financial assets are recognized using trade date accounting.

7.2. Subsequent measurement

7.2.1. Financial assets carried at amortized cost (AC)

A financial asset is measured at amortized cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

7.2.2. Financial assets at fair value through other comprehensive income (FVTOCI)

A financial asset is measured at FVTOCI if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

7.2.3. Financial assets at fair value through profit or loss (FVTPL)

A financial asset, which is not classified in any of the above categories, is measured through FVTPL.

7.3. Impairment of financial assets

In accordance with Ind AS 109, the Company uses 'Expected Credit Loss' (ECL) model, for evaluating impairment of financial assets other than those measured at fair value through profit and loss (FVTPL).

Expected credit losses are measured through a loss allowance at an amount equal to:

The 12-months expected credit losses (expected credit losses that result from those default events on the financial instrument that are possible within 12 months after the reporting date); or

Full lifetime expected credit losses (expected credit losses that result from all possible default events over the life of the financial instrument)

For Trade Receivables Company applies a 'simplified approach' which requires expected lifetime losses to be recognized from initial recognition of the receivables. The Company uses historical default rates to determine impairment loss on the portfolio of trade receivables. At every reporting date these historical default rates are reviewed and changes in the forward looking estimates are analysed.

For other assets, the Company uses 12 month ECL to provide for impairment loss where there is no significant increase in credit risk. If there is a significant increase in credit risk full lifetime ECL is used.

7.4. Financial Liabilities

7.4.1. Initial recognition and measurement

All financial liabilities are recognized at fair value and in the case of loans, net of directly attributable cost. Fees of recurring nature are directly recognized in the Statement of Profit and Loss as finance cost.

7.4.2. Subsequent measurement

Financial liabilities are carried at amortized cost using the effective interest method. For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

7.5. De-recognition of financial instruments

The Company derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for derecognition under Ind AS 109. A financial liability (or a part of a financial liability) is derecognized from the Company's Balance Sheet when the obligation specified in the contract is discharged or cancelled or expires.

7.6. Impairment of Financial Assets:

The impairment provisions for financial assets are based on assumptions about the risk of defaults and expected cash loss rates. The company uses judgments in making these assumptions and selecting the inputs to the impairment calculation, based on the company's past history, existing market conditions as well as forward looking estimates at the end of each reporting period.

8. Segment Reporting:

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker.

9. Finance costs

Interest and other borrowing costs attributable to qualifying assets are capitalized. Other interest and borrowing costs are charged to the Statement of Profit and Loss.

10. Provisions and contingent liabilities

Provisions are recognized when the Company has a present legal or constructive obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation and the amount can be reliably estimated. Provisions are not recognized for future operating losses.

Provisions are measured at the present value of the management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The discount rate used to determine the present value is a pre tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognized as interest expense.

Contingent Liabilities are disclosed in respect of possible obligations that arise from past events, but their existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or where any present obligation cannot be measured in terms of future outflow of resources or where a reliable estimate of the obligation cannot be made.

11. Income Recognition

Revenue from sale of goods is recognised when control of the products being sold is transferred to our customer and when there are no longer any unfulfilled obligations. The Performance Obligations in our contracts are fulfilled at the time of dispatch, delivery or upon formal customer acceptance depending on customer terms.

Revenue is measured at fair value of the consideration received or receivable, after deduction of any trade discounts, volume rebates and any taxes or duties collected on behalf of the government such as goods and services tax, etc. Revenue is only recognised to the extent that it is highly probable a significant reversal will not occur.

Our customers have the contractual right to return goods only when authorised by the Company. An estimate is made for value of goods that will be returned on best estimate based on accumulated experience, which is insignificant.

Income from services rendered is recognized based on agreements/arrangements with the customers as the service is performed and there are no unfulfilled obligations.

Interest income is recognized on time proportion basis after taking into account the materiality.

Dividend income is recognized when right to receive is established.

12. Employee benefits

Short-term obligations

Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognized in respect of employees' services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled.

13. Income tax

The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

Deferred income tax is provided in full, using the liability method on temporary differences arising between the tax bases of assets and liabilities and their carrying amount in the financial statement. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled. Deferred tax assets are recognized for all deductible temporary differences and unused tax losses, only if, it is probable that future taxable amounts will be available to utilize those temporary differences and losses.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are off set where the Company has a legally enforceable right to offset and intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

14. Earnings Per Share

Basic earnings per share

Basic earnings per share is calculated by dividing:

- The profit attributable to owners of the Company
- By the weighted average number of equity shares outstanding during the financial year, adjusted for bonus elements in equity shares issued during the year and excluding treasury shares.

15. Valuation of Inventory

Items of inventories are measured at lower of cost or net realizable value after providing for obsolescence, if any. Cost of inventories comprises of cost of purchase, cost of conversion and other Cost incurred in bringing them to their respective present location and condition.

Cost of raw material, trading and other products are determined on 'Weighted Average Price' method. The cost of finished stock is determined by absorption costing method.

16. Critical estimates and judgments -

The preparation of financial statements requires the use of accounting estimates which by definition will seldom equal the actual results. Management also needs to exercise judgment in applying the accounting policies.

This note provides an overview of the areas that involved a higher degree of judgment or complexity, and items which are more likely to be materially adjusted due to estimates and assumptions turning out to be different than those originally assessed. Detailed information about each of these estimates and judgments is included in relevant notes together with information about the basis of calculation for each affected line item in the financial statements. The estimates and judgments used in the preparation of the financial statements are continuously evaluated by the Company and are based on historical experience and various other assumptions and factors (including expectations of future events) that the Company believes to be reasonable under the existing circumstances. Differences between actual results and estimates are recognized in the period in which the results are known/materialized.

The said estimates are based on the facts and events that existed as at the reporting date, or that occurred after that date but provide additional evidence about conditions existing as at the reporting date.

17. Cash & Cash Equivalents

Cash and cash equivalents comprise cash and deposit with banks.

18. Cash Flow Statement

Cash flows are reported using the indirect method, whereby profit before tax is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities of the Company are segregated.

Annexure V: Additional Notes to Accounts

1. Segment Reporting

The whole business of the Company is treated as a single segment.

2. Tax provision is governed by using tax laws, rules, notifications, circulars, instructions, etc that are enacted as on the balance sheet date.

3. Financial Risk Management:

A. Credit Risk:

Credit risk arises from the possibility that the counter party may not be able to settle their obligations as agreed. To manage this, the Company periodically assesses financial reliability of customers and other counter parties, taking into account the financial condition, current economic trends, and analysis of historical bad debts and ageing of financial assets. Individual risk limits are set and periodically reviewed on the basis of such information.

The Company considers the probability of default upon initial recognition of asset and whether there has been a significant increase in credit risk on an ongoing basis through each reporting period. To assess whether there is a significant increase in credit risk the Company compares the risk of default occurring on asset as at the reporting date with the risk of default as at the date of initial recognition. It considers reasonable and supportive forwarding-looking information such as:

- i. Actual or expected significant adverse changes in business,
- ii. Actual or expected significant changes in the operating results of the counterparty,
- iii. Financial or economic conditions that are expected to cause a significant change to the counterparty's ability to meet its obligations,
- iv. Significant increase in credit risk on other financial instruments of the same counterparty,
- v. Significant changes in the value of the collateral supporting the obligation or in the quality of the third-party guarantees or credit enhancements.

Financial assets are written off when there are no reasonable expectations of recovery, such as a debtor failing to engage in a repayment plan with the Company.

B. Liquidity Risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due and to close out market positions. Phased implementation of Unified Payments Interface (UPI)

SEBI has issued the various UPI Circulars in relation to streamlining the process of public issue of inter alia, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by Retail Individual Investors through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Investor had the option to submit the ASBA Form with any of the Designated Intermediary and use his/her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by Retail Individual Investors through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six Working Days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three Working Days. RESTRICTIONS OF FOREIGN OWNERSHIP OF INDIAN SECURITIES

There are two routes through which foreign investors may invest in India. One is the “automatic route”, where no government approval is required under Indian foreign exchange laws to make an investment as long as it is within prescribed thresholds for the relevant sector. The other route is the “government route”, where an approval is required under foreign exchange laws from the relevant industry regulator, prior to the investment.

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991, of the Government of India and FEMA. While the Industrial Policy, 1991, of the Government of India, prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The Union Cabinet, as provided in the Cabinet Press Release dated May 24, 2017, has given its approval for phasing out the FIPB. Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment (“FDI”) and approval from the Government of India will now be handled by the concerned ministries or departments, in consultation with the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as the Department of Industrial Policy and Promotion) (“DPIIT”), Ministry of Finance, Department of Economic Affairs, FIPB section, through a memorandum dated June 5, 2017, has notified the specific ministries handling relevant sectors.

The Government has, from time to time, made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated FDI Policy Circular of 2020 (“FDI Policy”) by way of circular bearing number DPIIT file number 5(2)/2020-FDI Policy dated October 15, 2020, which with effect from October 15, 2020, consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020. The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendments to FEMA. In case of any conflict between FEMA and such policy pronouncements, FEMA prevails.

RBI has also issued Master Direction- Foreign Investment in India dated January 4, 2018. In terms of the Master Direction, an Indian company may issue fresh shares to persons resident outside India (who are eligible to make investments in India, for which eligibility criteria are as prescribed). Such fresh issue of shares shall be subject to inter-alia, the pricing guidelines prescribed under the Master Directions.

The RBI, in exercise of its power under the FEMA, has also notified the Foreign Exchange Management (Transfer or Issue of Security by a Person Resident outside India) Regulations, 2017 to prohibit, restrict or regulate, transfer by or issue security to a person resident outside India.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.

The Equity Shares have not been and will not be registered under the U.S. Securities Act of 1933, as amended (the “U.S. Securities Act”), or the securities laws of any state of the United States and may not be offered or sold within the United States, except pursuant to exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. Accordingly, the Equity Shares are being offered and sold only outside the United States in offshore transactions in reliance on Regulation S under the U.S. Securities Act and the applicable laws of the jurisdiction where those offers, and sale occur. The Equity Shares have not been and will not be registered, listed or otherwise qualified in any other jurisdiction outside India and may not be offered or sold, and Applications may not be made by persons in any such jurisdiction, except in compliance with the applicable laws of such jurisdiction.

The above information is given for the benefit of the Applicants. Our Company and the Lead Manager are not liable for any amendments or modifications or changes in applicable laws or regulations, which may occur after the date of this Draft Prospectus. Applicants are advised to consult their legal counsel, to make their independent investigations and ensure that Applications are not in violation of laws or regulations applicable to them and do not exceed the applicable limits under the laws and regulations.
