Any of the following risks, as well as the other risks and uncertainties discussed in this draft prospectus, could have an adverse effect on our business, financial condition, results of operations and prospects and could cause the trading price of our Equity Shares to decline, which could result in the loss of all or a part of your investment. The risks and uncertainties described in this section are not the only risks that we may face. Additional risks and uncertainties not known to us or that we currently believe to be immaterial may also have an adverse effect on our business, results of operations, financial condition and prospects.

This draft prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements because of certain factors, including the considerations described below and elsewhere in this draft prospectus.

The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are certain risk factors where the effect is not quantifiable and hence has not been disclosed in such risk factors. You should not invest in this Issuing unless you are prepared to accept the risk of losing all or part of your investment, and you should consult your tax, financial and legal advisors about the consequences to you of an investment in the Equity Shares.

The financial information in this section is, unless otherwise stated, derived from our Restated Financial Statements prepared in accordance with Indian GAAP, as per the requirements of the Companies Act, 2013, and SEBI (ICDR) Regulations.

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

- 1. Some risks may not be material individually but may be material when considered collectively.*
- 2. Some risks may have material impact qualitatively instead of quantitatively.*
- 3. Some risks may not be material at present but may have a material impact in the future.*

INTERNAL RISK FACTOR:

- 1. Our Company is dependent on external suppliers/distributors for its component’s requirements. Any delay or failure on the part of the external suppliers/distributors to deliver products, may materially and adversely affect our business, profitability and reputation.**

We are into manufacturing of Speed Limiting Device, Vehicle Tracking Device and CTPL E-SIMs. We procure various components which are required in our product manufacturing, from various external suppliers both from foreign and domestic. Any delay or failure on the part of our suppliers/distributors to deliver components in a timely manner may materially and adversely affect our business, profitability and reputation. Further, any deterioration in the financial condition or business prospects of these suppliers could reduce their ability to meet our requirements and accordingly result in a significant decrease in our revenues. Certain factors affecting supplies and thereby impeding our access to products are political and economic instability in India or political instability in certain parts of the world in which our suppliers/distributors are located, the financial instability of the suppliers, labour problems experienced by our suppliers, transport availability and cost, transport security, inflation, and other factors. The operations of our suppliers are further subject to various operating risks. For instance, the COVID-19 pandemic impacted our suppliers’ business as a result of the nationwide lockdown imposed by the Government of India. These factors may result in delay of supply of the components we require for our manufacturing and could also have an adverse effect on our business.

2. ***Our technology infrastructure is critical to our business operations and growth prospects, and failure to improve or effectively utilise our technology infrastructure or prevent disruptions to our technology infrastructure could harm our business operations, reputation and growth prospects.***

Revenue stream of the Company is technology driven. In the world of rapid change/upgrade in technology, obsolescence of technology is a risk that might impact future revenue.

We have implemented various IT solutions and enterprise resource planning solutions to cover key areas of our operations. We extensively use technology for our products, real time monitoring, vehicle tracking, product life cycle management, customer order management and dispatches, production planning and reporting, manufacturing processes, financial accounting and scheduling raw material purchase.

We intend to continue to focus on and make investments in our IT systems and processes, including our backup systems, to improve our operational efficiency, customer service and decision-making process and to reduce manual intervention and the risk of system failures and the negative impacts these failures may have on our business thereby improving reliability and efficiency of our business and operations.

Our proprietary technology infrastructure powered by our self-developed software, applications and data-science capabilities orchestrate our Products. We also depend on our technology systems to control our product's operations, manage inventory, process and bill shipments, process payments and record cash payments by customers, amongst other processes. Accordingly, reliability, availability and consistent performance of our technology-based products is critical to our ability to operate our business and deliver high-quality customer service. Any errors, bugs or malfunctioning of our technology systems can adversely affect our financials and results of operations. Furthermore, any error in the system could disrupt our operations and impact our ability to provide support services, retain customers, attract new customers, or negatively impact overall customer experience.

3. ***Our failure to adapt to technological developments or industry trends could affect the performance and features of our products and services, and reduce our attractiveness to our customers.***

As our operations grow in scope and size, whether through offering of new products/services or expansion into new markets, we must continuously improve, upgrade, adapt and expand our systems and infrastructure to offer our customers enhanced services, features and functionality ahead of rapidly evolving customer demands, while maintaining the reliability and integrity of our systems and infrastructure in a cost-efficient and competitive manner. The systems, infrastructure and technologies we currently employ may become obsolete or be unable to support our increased size and scale. Even if we are able to maintain, upgrade or replace our existing systems or innovate or customize and develop new technologies and systems, we may not be as quick or efficient as our competitors in upgrading or replacing our systems. We may be unable to devote adequate financial resources or obtain sufficient financing on commercially acceptable terms in time, or at all, which may have a material adverse effect on our business, prospects, results of operation and financial condition.

Further, we may also not be able to attract talent to continue with the required upgrades and improvements to our systems. Our new systems, infrastructure and technologies may not perform satisfactorily, or be used effectively and we may also fail to adapt our products and services to our increased size and scale, customer requirements or emerging trends and industry standards. Further, there is no assurance that we will be able to downsize and scale back our systems and platforms quickly and efficiently enough to reduce unnecessary costs and expenses in the event that user demand falls below our expectations. In addition, to effectively manage our growth, we will also need to continue to improve our operational, financial and management controls, and our reporting systems and procedures.

Continued growth increases the challenges involved in, amongst others, continuous training and development of skilled and competent personnel and employees and developing and improving internal administrative infrastructure. These systems, enhancements and improvements will require significant capital expenditures and management resources. Failure to implement these improvements could adversely affect our ability to manage our growth. If we do not effectively manage our growth or appropriately expand and upgrade or downsize and scale back our systems and platforms, as the case may be, in a timely manner or at a reasonable cost, or both, or at all, we may lose market opportunities or damage our attractiveness and reputation with our customers, which may adversely affect our business, financial condition and results of operations.

4. *Our business is depending on various government interventions, permissions, and compliances and regular check-ups and verifications.*

Our business is subject to various laws and regulations. If we are deemed to be not in compliance with any of these laws and regulations, our business, reputation, financial condition, cash flows and results of operations may be materially and adversely impacted. Our business is subject to regulation by the relevant governmental authorities, including pre-inspection and approval of our products from ICAT (International Centre for Automatic Technology) and ARAI (Automotive Research Association of India). The governmental authorities promulgate and enforce regulations that cover many aspects of our day-to-day operations, such as the Motor Vehicles Act, 1988, Central Motor Vehicles Rules, 1989, Carriage by Road Act, 2007, and various state-wise shops and establishments legislations and Contract Labour (Regulation and Abolition) Act, 1970.

The laws and regulations governing our businesses are evolving and may be amended, supplemented or changed at any time. The GoI may implement new laws or other regulations and policies that could affect our industry in general, including requiring additional approvals or licenses, imposing additional restrictions on our operations or tightening the enforcement of existing or new laws or regulations. We may be required to seek and follow additional procedures, modify or adjust certain activities, restructure our ownership structure, obtain new or additional licenses or incur additional expenses to comply with such laws and regulations, which could adversely affect our future development and business. In order to comply with evolving laws and regulations, we may need to devote significant management time and other resources, including restructuring affected businesses, changing our business practices and adjusting our processes and systems, which may materially and adversely affect our business, growth prospects and reputation. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy in the jurisdictions in which we operate, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time-consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future.

We are required to obtain and maintain a number of statutory and regulatory licenses and approvals. While we have obtained the necessary licenses and approvals required for our operations, in addition, we may apply for additional licenses and approvals in the ordinary course of our business, including renewing certain approvals which may expire from time to time. If we are unable to obtain, maintain or renew all necessary licenses and approvals required for our continued operations, we could be penalised, either in the form of fines, or in some cases, through the suspension of our approvals, licenses or registrations. Such events may affect our ability to continue operating our business and thereby, our results of operations. Our failure to obtain or renew licenses and approvals could also affect our ability to claim under our insurance policies. Furthermore, our current business activities and any future development and expansion into new areas could also raise new regulatory issues and licensing requirements. Some of the licenses and approvals that have been issued to us contain certain conditions and restrictions and we cannot assure you that we will be able to continuously meet such conditions. Failure to comply with such terms and conditions may result in the cancellation, revocation or suspension of the relevant licenses or approvals. We may also become subject to regulatory enforcement, fines, penalties or additional costs. Any of the foregoing could result in the interruption of all or some of our operations and may have a material adverse effect on our business, financial condition, cash flows and results of operations. Failure to comply with the laws and regulations applicable to our business could subject us to inspection, regulatory audit and enforcement actions by the relevant authority, suspension and revocation of the relevant license or approval, fines, confiscation of income, civil penalties including payment of damages to the aggrieved party, criminal penalties including payment of fines and imprisonment of concerned directors or employees, and mandatory conciliation and mediation with the aggrieved party. We could also be required to discontinue our business. Such events could adversely affect our business, results of operations, financial condition, cash flows or reputation. Any non-compliance on our part that results in a customer's non-compliance with applicable laws and regulations could also adversely affect our customer relationships. In addition, responding to any action or litigation may result in a diversion of our management's attention and resources and an increase in professional fees and compliance costs.

5. *Our Company has grown consistently over the past few years utilizing the expertise of its experienced management team and its effectiveness in strategy implementation. A high turnover of its skilled staff will negatively impact the aggressive growth plans of the company to become a national player.*

Effective implementation of Artificial Intelligence and Predictive Analytics solutions requires qualified engineers and programmers experienced in Information Technology and statistical programming. A lack of skilled resources in the local market can negatively impact the growth plans of the Company.

Structured resource planning and succession planning strategy has been implemented by the Company to ensure knowledge transfer and employee retention in the company.

6. *Our Company is party to certain litigation and claims. Any adverse decision may make us liable to liabilities/penalties and may adversely affect our reputation, business and financial status. A classification of these legal and other proceedings is given below:*

Sr No.	Outstanding Litigation	Number of Matter	Financial Implications to the Extent Quantifiable In INR

Classification of Contingent liabilities (as at 31.03.2022)

Particulars	FY 2021-22	FY 2020-21	FY 2019-20

For more information, regarding our contingent liabilities, please refer Notes on Contingent Liability in the chapter titled “Financial Statement as Restated” beginning on page 128 of this Draft Prospectus.

8. *Our business is dependent on developing and maintaining continuing relationships with our customers. The loss of any significant customer could have a material adverse effect on our business, financial condition and results of operations.*

Our customers are majorly the distributors and dealers operating in the segment of automobile parts for two-wheelers, three-wheelers, four-wheeler passenger vehicles, light commercial vehicles, heavy commercial vehicles, and tractors. We believe our competitive pricing policy coupled with our ability to offer customized solutions to our customers has enabled us to grow our presence in India.

Our revenue generated from customers within India in Fiscal 2022, Fiscal 2021 and Fiscal 2020, was ₹ 205.12 lakh, ₹ 58.71 lakh and ₹ 291.63 lakh, whereas the revenue generated from our customers outside India was ₹ 1.83 lakh, ₹ 0.20 lakh and ₹ 0.02 lakh, in the same period.

The purchase orders specify prices and quantities for the products. However, the delivery of the products ordered is based on delivery schedules that are independently negotiated with customers. These purchase orders are typically subject to conditions including such as ensuring that all products delivered to the customers have been inspected and are built to customers’ specifications and that orders are fulfilled according to predetermined delivery schedules. Our business is dependent on developing and maintaining a continuing relationship with our key customers. In the event of a significant decline in the demand for our products or services by our key clients, our business, results of operations and financial condition may be materially and adversely affected. There can be no assurance that we will be able to maintain the historic levels of business from these customers or that we will be able to replace these customers in case we lose any of them.

9. *We have not entered into long-term contracts with our suppliers. An increase in material costs or other costs or loss of any of our suppliers due to delayed payments or otherwise, resulting in shortfall in the supply of the materials may adversely impact the pricing and supply of our Products and have an adverse effect on our business.*

One of the critical factors to develop and grow in our business is to possess the ability to source good quality materials at competitive prices. The essential materials used by our facilities for manufacturing our products are enclosures, solenoid valve, hose pipe, electronic components, Quectel GPS/IRNSS module etc. In addition, we also source bought out parts/components that we require for assembling our products.

We source our materials/components from both domestic and overseas sources. For the sourcing of material/parts, while we enter into supply agreements with our suppliers, we do not enter into any firm commitment for long-term contracts. In addition, for certain of our materials, we typically agree a fixed per-unit price for materials/components for each purchase

order and for that purchase order, we bear the material price risk. Depending on how material prices fluctuate, we may then be able to adjust the material prices for future purchase orders.

As we generally require components that are specifically designed and developed to meet our needs, we employ a component sourcing strategy that is targeted at developing relationships with long – term suppliers who can meet our component needs. Eventually, we have to develop a long – term supplier base with an established supply chain.

While we do not have any long – term contracts with any of our material suppliers. Any interruption in supply of materials from our regular suppliers may hamper our business. Due to the absence of any formal long-term contract with our suppliers, we are exposed to the risks of irregular supplies or no supplies at all or delayed supplies or volatility in the prices of materials that we normally procure. Our suppliers may be unable to provide us with a sufficient quantity of material at a suitable price for us to meet the demands. Additionally, there is a risk that one or more of these existing suppliers could discontinue their operations, which could adversely impact our ability to source quality materials at a suitable price and meet our order requirements. Identifying a suitable supplier or any delay, interruption or increased cost in the supply of materials arising from a lack of long-term contracts could have an adverse effect on our ability to meet customer demands and result in lower revenue from operations.

Further, any delay in payment to our creditors may impact our long-standing relations with our suppliers and may result in stoppage of timely or at all delivery of material. Any such disruption would impact the business and overall financial position of our Company.

10. *Product development is a long, expensive and uncertain process and our current expenditure in product development may not provide a sufficient or timely return.*

The development of our products is a costly, complex and time-consuming process, and the investment in their development often involves a long wait until a return is achieved on such an investment. We have made, and will continue to make, significant investments in product development and related product opportunities. Investments in new technology and processes are inherently speculative. Commercial success depends on many factors, including the degree of innovation of the software products and services developed and effective distribution and marketing. Such expenditure may adversely affect our operating results if they are not offset by corresponding and timely revenue increases. We must continue to dedicate a significant amount of resources to our research and development efforts in order to maintain our competitive position. However, significant revenues from new product and service investments may not be achieved for a number of years, or at all. Moreover, software products and services may not be profitable, and even if they are profitable, operating margins for new products and services may not be in line with the margins we have experienced for our existing or historical products and services.

Moreover, we may determine that certain products or services do not have sufficient potential to warrant the continued allocation of resources and accordingly, we may elect to terminate the development of such products. If we terminate a product in development in which we have invested significant resources, our prospects may suffer, as we will have expended resources on a project that will not provide any return on our investment and also may have missed the opportunity to have allocated those resources to potentially more productive uses. In turn, this may adversely impact our business, operating results and financial condition.

Such events may also give rise to complaints and actions against us. All these factors could adversely affect our business and results of operation.

Presently, we have been empanelled with Telangana State Transportation Department and receiving regular orders through our distributors. In some instances, we may not be able to identify the cause or causes of these performance problems within an acceptable period of time. Any disruptions in our services, including as a result of actions outside of our control, would significantly impact the continued performance of our products. To the extent that we do not effectively address capacity constraints, upgrade our systems as needed, and continually develop our technology to accommodate actual and anticipated changes in technology, our business, results of operations and financial condition could be harmed.

15. Our business is substantially dependent on certain key customers from whom we derive a significant portion of our revenues. The loss of any significant customer may have a material and adverse effect on our business and results of operations.

While we are constantly striving to increase our customer base and reduce dependence on any particular customer, there is no assurance that we will be able to broaden our customer base in any future periods or that our business or results of operations will not be adversely affected by a reduction in demand or cessation of our relationship with any of our major

In addition to our existing available funds, we may need additional sources of funding to meet our future requirements, which may include entering into new debt facilities with lending institutions or raising additional debt in the capital markets. 24. *The extent to which the Coronavirus pandemic (COVID-19) may affect our business and operations in the future is uncertain and cannot be predicted.*

During the first half of calendar year 2020, COVID-19 spread to a majority of countries across the world, including India. The COVID-19 pandemic has had, and may continue to have, significant repercussions across local, national and global economies and financial markets. In particular, a number of governments and organizations have revised GDP growth forecasts for calendar year 2020 downward in response to the economic slowdown caused by the spread of COVID-19. The global impact of the COVID-19 pandemic has been rapidly evolving and public health officials and governmental authorities have responded by taking measures, such as prohibiting people from assembling in large numbers, instituting quarantines, restricting travel, issuing “stay-at-home” orders and restricting the types of businesses that may continue to operate, among many others. On March 14, 2020, India declared COVID-19 as a “notified disaster” and imposed a nationwide lockdown beginning on March 25, 2020. The lockdown has been extended periodically by varying degrees by state governments and local administrations. The lifting of the lockdown across various regions has been regulated with limited and progressive relaxations being granted for movement of goods and people in other places and calibrated re-opening of businesses and offices. Despite the lifting of the lockdown, there is significant uncertainty regarding the duration and long-term impact of the COVID-19 pandemic, as well as possible future responses by the Government, which makes it impossible for us to predict with certainty the impact that COVID-19 will have on our business and operations in the future.

COVID -19 affected our business by the extension of the validity of documents related to Motor Vehicles Act, 1988 and Central Motor Vehicle Rules, 1989 and further to consider relaxation in permits, fees and taxes etc. Please refer to the order by Ministry of Home Affairs, vide No.40-3/2020-DMI(A), dated 24th March 2020, and the guidelines issued subsequently, pursuant to a decision to impose a complete lockdown, in view of the threat imposed by the spread of COVID-19 since 1st of February, 2020 or would expire by 30th September, 2021, the same may be treated to be valid till 30th September, 2021. Enforcement authorities are advised to treat such documents valid till 30th September, 2021.

We are closely monitoring the impact of COVID-19 on our financial condition, liquidity, operations, suppliers and workforce. Any intensification of the COVID-19 pandemic or any future outbreak of another highly infectious or contagious disease may adversely affect our business, results of operations and financial condition.

25. *Changes in Technology may render our current technologies obsolete or require us to make substantial capital investments.*

Modernisation and technology Upgradation is essential in our industry to reduce costs and increase productivity. With latest technology and advancement of methods and machineries, our existing technology and machineries may become

obsolete or may not be upgraded timely, hampering our operations and financial conditions and we may lose our competitive edge. Although we strive to keep our technology, machinery in line with the latest technological standards, we may be required to implement new technology or upgrade the machineries and other equipment's employed by us. Further, the costs in upgrading our technology and modernizing the machineries are significant which could substantially affect our finances and operations.

26. *Our success depends heavily upon our Promoters and Directors for their continuing services, strategic guidance and financial support.*

Our success depends heavily upon the continuing services of Promoter & Directors who are the natural person in control of our Company. Our Promoters has a vast experience in the field of automotive component industry. They have established cordial relations with various customers and suppliers over the past several years, which have immensely benefitted our Company's current customer and supplier relations. We believe that our relation with our Promoters, who have rich experience the industry, managing customers and handling overall businesses, has enabled us to experience growth and profitability. We benefit from our relationship with our Promoters and our success depends upon the continuing services of our Promoters who have been responsible for the growth of our business and are closely involved in the overall strategy, direction and management of our business. Further, our Promoters are also part of certain other ventures and may continue to do so. If they divert their attention to such other concerns, we may not be able to function as efficiently and profitably as before. We may have to incur additional costs to replace the services of our Promoters or we may not be able to do so at all, which could adversely affect our business operations and affect our ability to continue to manage and expand our business.

Further, we also depend significantly on our directors for executing their day-to-day activities. If our Promoters / Directors or any member of the senior management team is unable or unwilling to continue in his present position, we may not be able to replace him easily or at all, and our business, financial condition, results of operations and prospects may be materially and adversely affected.

27. *Our Company has entered into certain related party transactions and may continue to do so in the future.*

Our Company has entered into related party transactions with our Promoters, Directors, Group Entities and their relatives. While our Company believes that all such transactions have been conducted on the arm's length basis, there can be no assurance that it could not have been achieved on more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that our Company will enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation. For details, please refer to "**Related Party Transactions**" under section titled "**Financial Statements**" on page no. 146 of this Draft Prospectus.

28. *If we are unable to manage our growth effectively or if our estimates or assumptions used in developing our strategic plan are inaccurate or we are unable to execute our strategic plan effectively, our business and prospects may be materially and adversely affected.*

Our revenue and our business operations have grown in recent years. Although we plan to continue to expand our scale of operations, we may not be able to sustain these rates of growth in future periods due to a number of factors, including, among others, our execution capability, our ability to retain, maintain & enter into new supplier and customer MOUs / agreements, our ability to maintain customer satisfaction, our ability to mobilise sufficient working capital, macroeconomic factors beyond our control such as decline in global economic conditions, competition with other players in the organized and unorganized segments, the greater difficulty of growing at sustained rates from a larger revenue base, our inability to control our expenses and the availability of resources for our growth. There can be no assurance that we will not suffer from capital constraints, operational difficulties or difficulties in expanding existing business operations.

Our development and expansion strategies will require substantial managerial efforts and skills and the incurrence of additional expenditures may subject us to new or increased risks. We may not be able to efficiently or effectively implement our growth strategies or manage the growth of our operations, and any failure to do so may limit future growth and have an adverse effect on our business. Further, our strategy to improve our debt – equity ratio may not materialise in the manner we intend to, and we may be required to obtain additional debt to meet immediate capital requirements, resulting in unfavourable ratios.

Also, the fund requirement and deployment for our strategies are based purely on management estimates and assumptions considering the current market scenario and are subject to revision in the light of changes in external circumstances or costs. If we are unsuccessful in executing our strategic plan, or if the underlying estimates or assumptions used to develop our strategic plan are materially inaccurate, our business and financial condition would have an adverse impact.

29. *Our Company's insurance coverage may not be adequate to protect us against all material hazards which may result in disruptions of operations/monetary loss on account of stoppage of work.*

We procure insurance for our operations against third-party liability, manufacturing risks, stock insurance, building and plant & machinery. Our existing insurance coverage may be insufficient to cover all the risks associated with our business and operations and generally do not cover losses from business interruption. We also cannot assure you that we will renew our existing insurance policies in a timely manner or at all. In the case of an uninsured loss, a loss in excess of insured limits or a loss for which we do not have coverage or coverage is prohibitively expensive, including those caused by natural disasters and other events beyond our control, we may be required to pay for losses, damages and liabilities out of our own funds, which could materially and adversely affect our business, financial condition and results of operations. Even if our insurance coverage is adequate to cover our direct losses, we may not be able to take remedial actions or other appropriate measures. Furthermore, our claim records may affect the premiums which insurance companies may charge us in the future.

30. *We are dependent on a number of key managerial personnel, including our senior management, and the loss of or our inability to attract or retain such persons with specialized technical know-how could adversely affect our business, results of operations, cash flows and financial condition.*

Our performance depends largely on the efforts and abilities of our senior management and other key managerial personnel, including our present officers who have specialized technical know-how. The inputs and experience of our senior management and key managerial personnel are valuable for the development of our business and operations strategy. We cannot assure you that we will be able to retain these employees or find adequate replacements in a timely manner, or at all. Our Company does not maintain any director's and officer's insurance policy or any keyman insurance policy. The loss of the services of such persons could have an adverse effect on our business, results of operations, cash flows and financial condition.

31. *Upon completion of the Issue, our Promoters / Promoter Group may continue to retain significant control, which will allow them to influence the outcome of matters submitted to the shareholders for approval.*

After completion of the Issue, our Promoters and Promoter Group will collectively own 72.07% of the total post issue Equity Shares. As a result, our Promoters together with the members of the Promoter Group will be able to exercise a significant degree of influence over us and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring any strategic decision favourable to the Company or effecting a change in control of our Company for the betterment of the stakeholders.

In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or minority shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

32. *Employee misconduct, errors or fraud could expose us to business risks or losses that could adversely affect our business prospects, results of operations and financial condition.*

Employee misconduct, errors or frauds could expose us to business risks or losses, including regulatory sanctions, penalties and serious harm to our reputation. Such employee misconduct includes breach in security requirements, misappropriation of funds, hiding unauthorized activities, failure to observe our operational standards and processes, and improper use of confidential information. It is not always possible to detect or deter such misconduct, and the precautions we take to prevent and detect such misconduct may not be effective. In addition, losses caused on account of employee misconduct or misappropriation of petty cash expenses and advances may not be recoverable, which we may result in write-off of such amounts and thereby adversely affecting our results of operations. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions in which case, our reputation, business prospects, results of operations and financial condition could be adversely affected.

33. *We may not be successful in implementing our business strategies.*

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted clients. Changes in regulations applicable to us may also make it difficult to implement our business strategies.

Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

34. *Industry information included in this draft prospectus has been derived from industry reports. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.*

35. *Within the parameters as mentioned in the chapter titled “Objects of this Issue” beginning on page 57 of this draft prospectus, our Company’s management will have flexibility in applying the proceeds of this Issue. The fund requirement and deployment mentioned in the Objects of this Issue have not been appraised by any bank or financial institution.*

We intend to use entire Issue Proceeds towards meeting the working capital requirement and general corporate purpose. We intend to deploy the Net Issue Proceeds in financial year 2022-23 and such deployment is based on certain assumptions and strategy which our Company believes to implement in future. The funds raised from the Issue may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc., For further details on the use of the Issue Proceeds, please refer chapter titled “*Objects of the Issue*” beginning on page 57 of this draft prospectus.

The deployment of funds for the purposes described above is at the discretion of our Company’s Board of Directors. The fund requirement and deployment are based on internal management estimates and has not been appraised by any bank or financial institution. Accordingly, within the parameters as mentioned in the chapter titled “*Objects of the Issue*” beginning on page 57 of this draft prospectus, the Management will have significant flexibility in applying the proceeds received by our Company from the Issue. Our Board of Directors and the Audit Committee will monitor the proceeds of this Issue.

36. *The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.*

Since the Issue size is less than Rs.10,000 Lakhs, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of these funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our finances.

37. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “*Dividend Policy*” on page 127 of this draft prospectus.

38. Any future issuance of Equity Shares may dilute your shareholdings, and sale of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.

Any future equity issuance by our Company may lead to the dilution of investors' shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

39. The Issue Price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price and you may not be able to sell your Equity Shares at or above the Issue Price.

The Issue price is based on numerous factors. For further information, see the chapter titled **"Basis for Issue Price"** beginning on page no. 61 of this draft prospectus and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price are:

- Quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

40. Managing employee benefit pressures in India may prevent us from sustaining our competitive advantage which could adversely affect our business prospects and future financial performance.

Employee benefits represent a major expense for us and our ability to maintain or reduce such costs is critical for our business operations. We may be required to increase employee compensation levels to remain competitive and manage attrition, and consequently we may need to increase the prices of our products and services. An increase in wages/ salaries paid to our employees may result in a material adverse effect on our profits in the event that we are unable to pass on such increased expenditure to our users or customers without losing their business to our competitors. Likewise, if we are unable to sustain or increase the number of employees as necessary to meet growing demand, our business, financial condition and results of operations could be adversely affected.

41. The requirements of being a public listed company may strain our resources and impose additional requirements.

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange(s) which require us to file unaudited financial results on a half yearly basis. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner.

EXTERNAL RISK FACTORS

1. A slowdown in economic growth in India could cause our business to suffer.

The Indian economy could be adversely affected by various factors such as political or regulatory action, including adverse changes in liberalization policies, business corruption, social disturbances, terrorist attacks and other acts of violence or war, natural calamities, interest rates, inflation, commodity and energy prices and various other factor Any slowdown in the Indian economy may adversely affect our business, financial condition, results of operations and the price of our Equity Shares.

3. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short-term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and is taxable at 10%, in excess of Rs. 1,00,000. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

4. Public companies in India, including our Company, shall be required to prepare financial statements under Indian Accounting Standards.

Our Company currently prepares its annual financial statements under Indian GAAP. The MCA, Government of India, has, through a notification dated February 16, 2015, set out the Indian Accounting Standards (Ind AS) and the timelines for their implementation. In accordance with such notification, our Company is required to prepare its financial statements in accordance with Ind AS. Ind AS is different in many aspects from Indian GAAP under which our financial statements are currently prepared. Accordingly, the degree to which the restated financial statements included in the draft prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in the draft prospectus should accordingly be limited.

5. Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.

Taxes and other levies imposed by the Central or State Governments in India that affect our industry include:

- Custom duties on imports of raw materials and components;
- Goods and Service Tax

These taxes and levies affect the cost and prices of our products and therefore demand for our product. An increase in any of these taxes or levies, or the imposition of new taxes or levies in the future, may have a material adverse effect on our business, profitability and financial condition.

6. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

7. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and industry in which we operate contained in the draft prospectus.*

While facts and other statistics in the draft prospectus relating to India, the Indian economy and the industry in which we operate has been based on various web site data and IBEF that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled “*Industry Overview*” beginning on page 66 of this draft prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

8. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

9. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

10. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.*

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

11. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

12. Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

13. Terrorist attacks, civil unrest and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks in India, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

Our Product Portfolio:

We have a diversified product portfolio, which is spread across four major verticals. These include:

Speed Limitation Device

Electronic Fuel Regulator (EFRT) – AIS 018

A Speed Limitation Device, is a safety device that prevents a vehicle from running over a certain speed that is pre-specified by the Government. It controls the speed of the vehicle by regulating fuel flow to the engine based on the vehicle speed.

Stick to the speed limit without having to check your speedometer repeatedly with the dependable “MOTOREYE” Speed Limitation Device. This speed limiter will relieve people from the need to check speed again and again while driving. It is a preventive device that will improve road safety and nullify risk penalty points due to exceeded speed limit.

This smooth operating device reduces the strain on the engine of the car. Thus, the engine power is intact. Additionally, the device increases fuel efficiency thus reducing the overall maintenance cost of the vehicle.

The Speed Limitation Device is not a cruise control device i.e., this device will not maintain a pre-set speed. It will only restrict your ability to exceed the speed limit.

The “MOTOREYE” Speed Limitation Device is approved and certified by ICAT (International Centre for Automotive Technology) for its excellent quality and proven durability.

Advantages:

- Designed for a very easy and simple fitment
- Increased safety by avoiding over-speeding
- Increased engine life
- Increased Fuel Efficiency
- Improved Operational Efficiency
- Reduced fuel consumption

Electronic Pedal Interface (EPI) – AIS 018

The electronic pedal interface type device is a complete electronic device. The signal from the electronic accelerator pedal is read by the system and supplied back to the vehicle ECM, till vehicle speed exceeds the speed limit. The system will control & adjust the voltage level given into the vehicle ECM, in order to keep the vehicle speed under the set limit.

Speed of the vehicle can be controlled by adjusting the fuel flow towards the engine. This can be achieved through various techniques. The most effective and straight forward method is the accelerator control. It works exactly like the driver controls the speed. In new generation vehicles, the pedal position can be controlled by adjusting the voltage signals towards the ECM. Our system doing this type of control is termed as Electronic Pedal Interface. In old type vehicles, the stroke length of the cable/linkage needs to be controlled mechanically. A motorized/pneumatic system is used for that. Now a days, this type is rarely used.

Our product “LIMITS” Electronic Pedal Interface Version is suitable for BS-III & BS-IV vehicles. It works on Fuel controlling mechanism with Electronics. This device is installed between the Fuel Filter and FIP. The Unique feature is the Device Fitment is Socket to Socket & No Cutting of Wires.

The “LIMITS” Speed Limitation Device is approved and certified by ICAT (International Centre for Automotive Technology) for its excellent quality and proven durability.

Advantages:

- Designed for a very easy and simple fitment
- Increased safety by avoiding over-speeding
- Increased engine life
- Increased Fuel Efficiency
- Improved Operational Efficiency
- Reduced fuel consumption

Vehicle Location Tracking Device (VLTD) – AIS 140 (IRNSS)

With its simplest definition, a vehicle tracking system is the system that allows tracking and controlling of vehicles via an online computer, smart phone, tablet, etc. on a 24/7 basis thanks to GPS satellites. Vehicle tracking systems make it possible to have an instantaneous and history tracking of vehicle speeds, the routes they followed, stopping points, idling times on maps providing a registry and check point with past and present reports.

The Product has been Tested as per Automotive Industry Standard AIS-004. This product is approved by ARAI Vide certificate no: ARAI/AED/DT/OC-1415-1106/176. This GPS/VTS (vehicle tracking system) is designed with Quad band GSM / GPRS Module, equipped with GPS receiver to provide accurate navigation data, this can be remotely configured (OTA Configuration).

We have Tested AIS-140 (IRNSS) Vehicle Location Tracking Device in the Brand Name of TRANOPRO (TRPRO140) with SOS PANIC Switch (TRPROSOS) from ICAT -IMT - Manesar, Gurugram, Haryana State, vide: TAC NO.CK8073 (Certificate No. CT0GP8538) Dated: 27.06.2019, and Completed TWO COP’s.

Ministry of Road Transport & Highways, Government of India has mandated installation of Vehicle Location Tracking Device and Emergency Button in all public service vehicles (all four wheeled or higher, passenger carrying vehicles) w.e.f. April 01, 2018.

Advantages:

- Intelligent Vehicle Tracking
- Live Alerts
- Absolute Vehicle Safety
- GPS Lock for Vehicle
- Vehicle Health
- Control Fuel Cost

Embedded Sim Cards (eSIM)

The term “eSIM” stands for embedded SIM card or electronic SIM card. To describe an eSIM, it’s primarily a little chip inserted within the GPS Tracker Device or any other device. An eSIM works within the same manner the normal chip works. In eSIM, there’s no physical SIM cards concerned and needs no physical swapping over. eSIM must be supported by the carrier or mobile network and it ought to be enabled by them. Being tiny, and not requiring extra room for a slot, eSIMs can be built into devices like drones, wearables, sensors, and location trackers, where size is of the essence. They can also be soldered into industrial equipment where a SIM card may not be easily accessible.

GPS tracking Device, having an embedded eSIM enables to remotely switch carriers on demand. Not only does this save time and money from physically swapping SIM cards, but it also enables IoT project managers to seamlessly sync up each device with each carrier based on device location at any given time. eSIM technology even supports dual-SIM functionality, which can be especially convenient for IoT and M2M projects. This development provides IoT and M2M markets with countless benefits, including operational efficiency, design flexibility, device security, seamless scalability and more. Another benefit of having eSIM cards embedded within the device is that it limits any access to external threats that could compromise the device’s security.

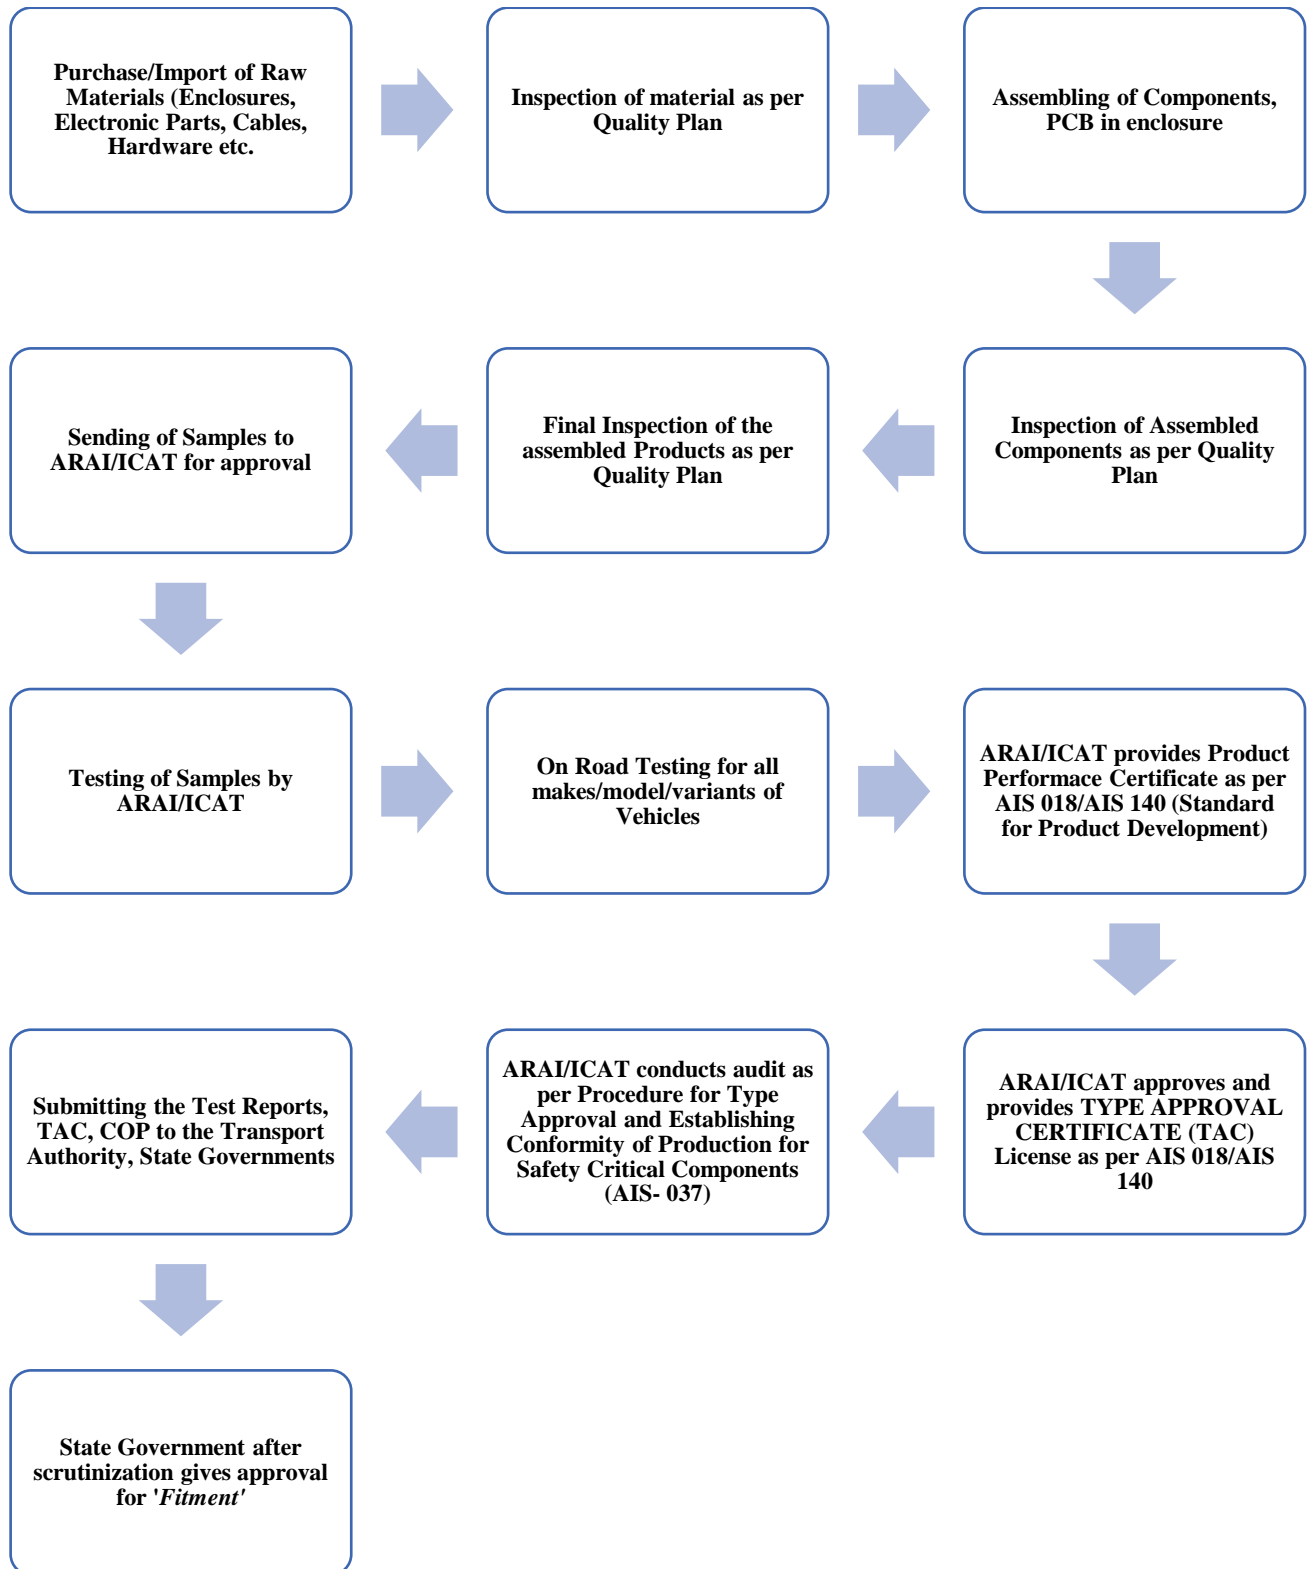

The connected vehicles movement is another prime IoT and M2M use case for eSIM technology. As a mobile IoT asset, automobiles are a natural fit for cellular connectivity but also for eSIM cards in the frequent cases where the vehicles travel outside of single-carrier network coverage. Continuous connection to the internet allows IoT-connected vehicles to transmit performance data in real time where it can be analysed. Plus, since it’s an embedded part of the vehicle, the eSIM can provide pinpoint accurate location data in the case of an emergency.

Our Company has registered APN for PAN India “ctplm2m.in” and manufactures its owned Dual Profile e-SIMS in collaboration GSMA Approved Manufacturing facility and has MOU with Service Providers Like BSNL, Vodafone Idea for eSIM Profiles and has M2M Service Providers License from Department of Telecommunications is an Edge over the Competition, to stay ahead to provide best in class Service and Price, which adds more profit margins to the product.

The company offers a wide range of products to customers under different brand names.

Raw material / bought out parts and suppliers

One of the critical factors to develop and grow in our business is to possess the ability to source good quality raw materials at competitive prices. The essential raw materials used by our facilities for manufacturing our products are enclosures, solenoid valve, hose pipe, electronic components, Quectel GPS/IRNSS module etc. In addition, we also source bought out parts that we require for assembly. Our cost of materials consumed in Fiscal 2022, Fiscal 2021 and Fiscal 2020, was ₹ 129.66 lakh, ₹ 29.05 lakh and ₹ 226.95 lakh, which represented 62.65%, 49.31% and 77.82%, of our revenue from operations, respectively.

We source our raw material from both domestic and overseas sources. For the sourcing of raw material, while we enter into supply agreements with our suppliers, we do not enter into any firm commitment for long-term contracts. In addition, for certain of our raw materials, we typically agree a fixed per-unit price for raw materials for each purchase order and for that purchase order, we bear the raw material price risk. Depending on how raw material prices fluctuate, we may then be able to adjust the raw material prices for future purchase orders.

As we generally require components that are specifically designed and developed to meet our needs, we employ a component sourcing strategy that is targeted at developing relationships with long – term suppliers who can meet our component needs. Consequently, we have developed a long – term supplier base with an established supply chain. This ensures the timely availability of components of desirable quality and quantity.

We have a diversified supplier base and we believe that this helps us in minimising supplier risk due to low supplier concentration. While we do not have any long – term contracts with any of our raw material suppliers, we have maintained a long-term relationship with each of the major suppliers.

Customers

Our customers are majorly the distributors and dealers operating in the segment of automobile parts for two-wheelers, three-wheelers, four-wheeler passenger vehicles, light commercial vehicles, heavy commercial vehicles, and tractors. We believe our competitive pricing policy coupled with our ability to offer customized solutions to our customers has enabled us to grow our presence in India. We also supply Speed Limiting Devices (AIS-018) to Telangana State Road Transport Corporation for TSRTC Buses. The details of Government and Private Customers are as follows:

Our revenue generated from customers within India in Fiscal 2022, Fiscal 2021 and Fiscal 2020, was ₹ 205.12 lakh, ₹ 58.71 lakh and ₹ 291.63 lakh, whereas the revenue generated from our customers outside India was ₹ 1.83 lakh, ₹ 0.20 lakh and ₹ 0.02 lakh, in the same period.

We typically have purchase orders and do not ordinarily enter into supply agreements with our customers. The purchase orders specify prices and quantities for the products. However, the delivery of the products ordered is based on delivery schedules that are independently negotiated with customers. These purchase orders are typically subject to conditions including such as ensuring that all products delivered to the customers have been inspected and are built to customers' specifications and that orders are fulfilled according to predetermined delivery schedules.

Cost of assets not ready for intended use, as on the balance sheet date, is shown as capital work-in-progress.

ii. **Subsequent expenditure**

Subsequent expenditure related to an item of tangible fixed asset is capitalized only if it increases the future benefits from the existing assets beyond its previously assessed standards of performance.

iii. **Depreciation**

Depreciation is calculated on cost of items of property, plant and equipment less their estimated residual values over their estimated useful lives using the straight line method.

Depreciation is provided based on useful life of the assets as prescribed in Schedule II of companies Act, 2013.

Depreciation Method, Useful lives and residual values are reviewed at each financial year-end and adjusted if appropriate.

Otherwise, it is recognized in statement of profit and loss as incurred. Subsequent to initial recognition, the asset is measured at cost less accumulated amortization and any accumulated impairment losses.

If any such indication exists, the recoverable amount (i.e, higher of the fair value less cost to sell and the value in use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the Cash Generating unit (CGU) to which the asset belongs.

If the recoverable amount of an asset (or CGU) is estimated to be less than its carrying amount, the carrying amount of the asset (or CGU) is reduced to its recoverable amount. An impairment loss is recognized in the statement of profit and loss.

e. Provisions & Contingent liabilities and contingent Assets

A provision is recognized when the Company has a present obligation as a result of past events and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation. A disclosure for a contingent liability is made when there is possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

Contingent assets are not recognized in the financial statements. A contingent asset is disclosed where an inflow of economic benefits is probable. Contingent assets are assessed continually and, if it is virtually certain that an inflow of economic benefits will arise, the assets and related income are recognized in the period in which the change occurs.

Onerous contracts

A contract is considered to be onerous when the expected economic benefits to be derived by the company from the contract are lower than the unavoidable cost of meeting its obligations under the contract. The provision for an onerous contract is measured at the present value of the lower of the expected cost of terminating the contract and the expected net cost of continuing with the contract. Phased implementation of Unified Payments Interface (UPI)

SEBI has issued the various UPI Circulars in relation to streamlining the process of public issue of inter alia, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by Retail Individual Investors through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Investor had the option to submit the ASBA Form with any of the Designated Intermediary and use his/her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by Retail Individual Investors through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will

be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six Working Days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three Working Days. RESTRICTIONS OF FOREIGN OWNERSHIP OF INDIAN SECURITIES

There are two routes through which foreign investors may invest in India. One is the “automatic route”, where no government approval is required under Indian foreign exchange laws to make an investment as long as it is within prescribed thresholds for the relevant sector. The other route is the “government route”, where an approval is required under foreign exchange laws from the relevant industry regulator, prior to the investment.

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991, of the Government of India and FEMA. While the Industrial Policy, 1991, of the Government of India, prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The Union Cabinet, as provided in the Cabinet Press Release dated May 24, 2017, has given its approval for phasing out the FIPB. Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment (“FDI”) and approval from the Government of India will now be handled by the concerned ministries or departments, in consultation with the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as the Department of Industrial Policy and Promotion) (“DPIIT”), Ministry of Finance, Department of Economic Affairs, FIPB section, through a memorandum dated June 5, 2017, has notified the specific ministries handling relevant sectors.

The Government has, from time to time, made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated FDI Policy Circular of 2020 (“FDI Policy”) by way of circular bearing number DPIIT file number 5(2)/2020-FDI Policy dated October 15, 2020, which with effect from October 15, 2020, consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020. The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendments to FEMA. In case of any conflict between FEMA and such policy pronouncements, FEMA prevails.

RBI has also issued Master Direction- Foreign Investment in India dated January 4, 2018. In terms of the Master Direction, an Indian company may issue fresh shares to persons resident outside India (who are eligible to make investments in India, for which eligibility criteria are as prescribed). Such fresh issue of shares shall be subject to inter-alia, the pricing guidelines prescribed under the Master Directions.

The RBI, in exercise of its power under the FEMA, has also notified the Foreign Exchange Management (Transfer or Issue of Security by a Person Resident outside India) Regulations, 2017 to prohibit, restrict or regulate, transfer by or issue security to a person resident outside India.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.

The Equity Shares have not been and will not be registered under the U.S. Securities Act of 1933, as amended (the “U.S. Securities Act”), or the securities laws of any state of the United States and may not be offered or sold within the United States, except pursuant to exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. Accordingly, the Equity Shares are being offered and sold only outside the United States in offshore transactions in reliance on Regulation S under the U.S. Securities Act and the applicable laws of the jurisdiction where those offers, and sale occur. Our Company and the Lead Manager are not liable for any amendments or modifications or changes in applicable laws or regulations, which may occur after the date of this Prospectus. Applicants are advised to consult their legal counsel, to make their independent investigations and ensure that Applications are not in violation of laws or regulations applicable to them and do not exceed the applicable limits under the laws and regulations.
