❖ Summary of the industry in which our Company operates:

ALCOHOLIC DRINKS IN INDIA

EXECUTIVE SUMMARY

Sales Growth in the Indian alcoholic drinks industry slowed in 2017, primarily due to the effects of demonetisation and a ban on roadside sales of alcoholic drinks. The market was further affected by the Goods and Services Tax (GST). Even though alcoholic drinks remained outside the GST, manufacturers have to pay the tax when purchasing raw materials and packaging. Recovering this tax has particularly affected the working capital of smaller companies.

The market is nevertheless expected to recover over the forecast period as demonetisation is unlikely to have any long-term effect.

- Premiumization being seen across alcoholic drinks;
- Diageo and UB Group continue to lead alcoholic drinks;
- Distribution disrupted due to the roadside ban and gradual emergence of the online channel;
- Slower but still solid total volume growth expected over the forecast period.

Outlook:

Apart from rising consumer demand for premium brands, manufacturers are also pushing higher-end products to drive value growth. This premiumisation trend is expected to intensify as more companies introduce new products in categories such as rum, vodka, whiskies and beer. Indeed, premium products are expected to drive sales over the forecast period.

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

- 1. Some risks may not be material individually but may be material when considered collectively.*
- 2. Some risks may have material impact qualitatively instead of quantitatively.*
- 3. Some risks may not be material at present but may have a material impact in the future.*

INTERNAL RISK FACTOR:

- 1. We require a number of approvals, licenses, registration and permits for our business and failure to obtain or renew them in a timely manner may adversely affect our operations.***

We may require several statutory and regulatory permits, licenses and approvals in the ordinary course of our business, some of which our Company has either received, applied for or is in the process of application. Many of these approvals are granted for fixed periods of time and need renewal from time to time. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time frame anticipated by us or at all. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension, delay in issuance or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. *For further details, please see chapters titled "Key Industry Regulations and Policies in India" and "Government and Other Approvals" at pages 86 and 151 respectively of this Draft Prospectus.*

- 2. We are dependent on third party transportation providers for delivery of products to us from our suppliers and delivery of products to our clients. Any failure on part of such service providers to meet their obligations could have a material adverse effect on our business, financial condition and results of operation.***

Our success depends on the smooth supply and transportation of the products and transportation of our products from our warehouse to our clients, both of which are subject to various uncertainties and risks. In addition, the products may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be delay in delivery of products which may also affect our business and our results of

operation negatively. A failure to maintain a continuous supply of products or to deliver the products to our clients in an efficient and reliable manner could have an adverse effect on our business, financial condition and results of operations.

3. *If we are unable to raise additional capital, our business prospects could be adversely affected.*

We operate in a capital-intensive industry, which requires substantial levels of funding. We will continue to incur significant expenditure in maintaining and growing our existing infrastructure. We expect our long-term capital requirements to increase significantly to fund our intended growth. We cannot assure you that we will have sufficient capital resources for any future expansion plans that we may have. While we expect our cash on hand, cash flow from operations to be adequate to fund our existing commitments, our ability to pay these amounts is dependent upon the success of our operations. Additionally, the inability to obtain sufficient financing could adversely affect our ability to complete expansion plans. Moreover, we cannot assure you that market conditions and other factors would permit us to obtain future financing on terms acceptable to us, or at all.

4. *We do not have certain documents evidencing certain information in the biographies of the Directors and the Key Managerial Personnel under the section “Our Management” of this Draft Prospectus.*

We do not have all the documents evidencing the biographies of our Directors and Key Managerial Personnel under the section “Our Management” on page 95 of this Draft Prospectus. The information included in the section are based on the details provided by the respective Directors and Key Managerial Personnel and are supported by a certificate and an affidavit executed by them certifying the authenticity of the information provided. We cannot assure you that all information relating to such Directors and Key Managerial Personnel included in the section “Our Management” are true and accurate.

5. *We face foreign exchange risks that could adversely affect our results of operations.*

We face foreign exchange rate risk to the extent that certain of our revenues are denominated in a currency other than the Indian Rupee. Fluctuations in exchange rate between the Indian Rupee and foreign currencies, can have a material impact on our results of operations, cash flows and financial condition. Fluctuations in the exchange rates may affect us to the extent of orders being given to the overseas suppliers. Our Company may enter into certain contracts to hedge exchange rate fluctuations which may or may not adequately cover the potential loss that may arise as a result of such foreign exchange transactions.

Moreover, these hedges do not cover all such exposures and are in any event subject to their own risks, including counterparty credit risk. Adverse moves in exchange rates that we have not adequately hedged may adversely impact our profitability and financial condition.

6. *The requirement of funds in relation to the objects of the Issue has not been appraised.*

We intend to use the proceeds of the Issue for the purposes described in the section titled “Objects of the Issue” on page 48. The objects of the Issue have not been appraised by any bank or financial institution. These are based on management estimates and current conditions and are subject to changes in external circumstances or costs, or in other financial condition, business or strategy. Based on the competitive nature of the industry, we may have to revise our management estimates from time to time and consequently our funding requirements may also change. The deployment of the funds towards the objects of the issue is entirely at the discretion of the Board of Directors/Management and is not subject to monitoring by external independent agency. However, the deployment of funds is subject to monitoring by our Audit Committee. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

7. *We are dependent on a number of key managerial personnel, including our senior management, and the loss of or our inability to attract or retain such persons with specialized technical know-how could adversely affect our business, results of operations, cash flows and financial condition.*

Our performance depends largely on the efforts and abilities of our senior management and other key managerial personnel, including our present officers who have specialized technical know-how. The inputs and experience of our senior management and key managerial personnel are valuable for the development of our business and operations strategy. We cannot assure you that we will be able to retain these employees or find adequate replacements in a timely manner, or at all. Our Company does not maintain any director’s and officer’s insurance policy or any key man insurance policy. The loss of the services of such persons could have an adverse effect on our business, results of operations, cash flows and financial condition.

8. ***If we are unable to service our debt obligations in a timely manner or to comply with the terms and conditions of our financing agreements, it may adversely affect our business, prospects, results of operations and financial condition.***

Our total debt obligations payable on account of Cash Credit for working capital availed by our Company from Karur Vysya Bank from DBS and Canara Bank as on September 30, 2018 is Rs. 41.50 Crores. The said loan has been fully secured, However, any failure to pay our dues in time or comply with any requirement or other condition under the agreement, may lead to a termination of our agreement, and may adversely affect our business, prospects, results of operations and financial condition. For further information on the indebtedness of our Company, please refer the Section titled “Financial Indebtedness” on page 135 of this Draft Prospectus.

9. ***We have in the past entered into related party transactions and may continue to do so in the future, which may potentially involve conflicts of interest with the equity shareholders.***

We have entered into related party transactions with our Promoters, Promoter Group and Directors. While we believe that all such transactions have been conducted on the arms-length basis, however it is difficult to ascertain whether more favorable terms would have been achieved had such transactions been entered with unrelated parties. Furthermore, it is likely that we may enter into related party transactions in the future. For details of these transactions, please refer to section titled "Related Party Transactions" at page 132 of this Draft Prospectus.

10. ***We have not made any dividend payments in the past and our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements, capital expenditures and restrictive covenants in our financing arrangements.***

In the past, we have not made dividend payments to the shareholders of our Company. The amount of our future dividend payments, if any, will depend upon various factors including our future earnings, financial condition, cash flows and requirement to fund operations and expansion of the business. There can be no assurance that we will be able to declare dividends. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors. For further details, please refer “Dividend Policy” on page 112 of this Draft Prospectus.

11. ***Our Company has made application for registration of trademark, which is under process of registration. We are unable to assure that the future viability or value of any of our intellectual property or that the steps taken by us to protect the proprietary rights of our Company will be adequate.***

We have made an application with ‘The Registrar of Trade Marks, Trade Marks Registry’ for registration of trademark and the registration for the said trademark in our name is important to retain our brand equity. If our application for registration is not accepted or if the oppositions filed against our trademark application if any, are successful, we may lose the statutory protection available to us under the Trade Marks Act, 1999 for such trademark. Further, we cannot assure that our pending application would be granted registration or will not be challenged or if granted registration, will not be invalidated or circumvented or will offer us any meaningful protection. We are unable to assure that the future viability or value of any of our intellectual property or that the steps taken by us to protect the proprietary rights of our Company will be adequate. For further details of our trademarks, please see “Government and Other Approvals” on page 151.

12. ***Our Promoters and certain of our Directors hold Equity Shares in our Company and are therefore interested in our performance in addition to their remuneration and reimbursement of expenses.***

Certain of our Directors including our Promoters are interested in our Company, in addition to regular remuneration or benefits and reimbursement of expenses, to the extent of their shareholding in our Company. We cannot assure you that our Promoters will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Promoters may take actions with respect to our business which may conflict with the best interests of our Company or that of minority shareholders. For details on the interest of our Promoters and Directors of our Company, other than reimbursement of expenses incurred or normal remuneration or benefits, see the sections titled “Our Management” and “Our Promoters and Promoter Group” on pages 95 and 106 respectively of this Draft Prospectus.

- 13. *Our Promoters play key role in our functioning and we heavily rely on their knowledge and experience in operating our business and therefore it is critical for our business that our Promoters remain associated with us.***

We benefit from our relationship with our Promoters and our success depends upon the continuing services of our Promoters who have been responsible for the growth of our business and are closely involved in the overall strategy, direction and management of our business. Our Promoters have been actively involved in the day to day operations and management since the incorporation of the Company. Accordingly, our performance is heavily dependent upon the services of our Promoters. If our Promoters are unable or unwilling to continue in their present position, we may not be able to replace them easily or at all.

- 14. *The Promoters and Promoter Group will continue to exercise control post completion of the Issue and will have considerable influence over the outcome of matters.***

Upon completion of this Issue, our Promoters and Promoter Group will continue to own a majority of our Equity Shares. As a result, our Promoters will have the ability to exercise significant influence over all matters requiring shareholders' approval. Our Promoters will also be in a position to influence any shareholder action or approval requiring a majority vote, except where they may be required by applicable law to abstain from voting. This control could also delay, defer or prevent a change in control of our Company, impede a merger, consolidation, takeover or other business combination involving our Company, or discourage a potential acquirer from obtaining control of our Company even if it is in the best interests of our Company. The interests of our Promoters could conflict with the interests of our other equity shareholders, and the Promoters could make decisions that materially and adversely affect your investment in the Equity Shares.

- 15. *Our insurance cover may be inadequate to fully protect us from all losses and may in turn adversely affect our financial condition.***

Our Company believes that its insurance coverage is adequate and consistent with industry standards. Our Company maintains an insurance policy to cover our assets, liabilities and risks that we face inherent to our business activities and operations. Our insurance policy, however, may not provide adequate coverage in certain circumstances and are subject to certain deductibles, exclusions and limits on coverage. We cannot assure you that the terms of our insurance policy will be adequate to cover all damage or loss suffered by us or that such coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. Further, there can be no assurance that any claim under the insurance policy maintained by us will be honored fully, in part or on time. To the extent that we suffer loss or damage that is not covered by insurance or which exceeds our insurance coverage, our results of operations or cash flow may be affected.

- 16. *We have high working capital requirements. If we experience insufficient cash flows to enable us to make required payments on our debt or fund working capital requirements, there may be an adverse effect on our results of operations.***

Our business requires a substantial amount of working capital for our business operations. We would require additional working capital facilities in the future to satisfy our working capital need which is proposed to be met through the IPO proceeds. In case of our inability to obtain the requisite additional working capital finance, our internal accruals/cash flows would be adversely affected to that extent, and consequently affect our operations, revenue and profitability.

- 17. *Our Company had negative cash flow in recent fiscals, details of which are given below. Sustained negative cash flow could adversely impact our business, financial condition and results of operations.***

The detailed break up of cash flows is summarized in below mentioned table and our Company has reported negative cash flow in certain financial years and which could affect our business and growth:

PARTICULARS	30-09-2018	31-03-2018	31-03-2017	31-03-2016	31-03-2015	31-03-2014

EXTERNAL RISK FACTORS:

1. *Exchange Rate Fluctuations may have impact on the performance of the Company.*

The Company is exposed to exchange rate fluctuations. Uncertainties in the global financial market may have an adverse impact on the exchange rate between Rupee vis-à-vis other currencies. The exchange rate between the Rupee and other currencies is variable and may continue to fluctuate in the future. Such fluctuations can have a serious impact on the cost structure of the Company.

2. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, change in regulatory framework, inflation, deflation, foreign exchange fluctuations, consumer credit availability, consumer debt levels, unemployment trends, terrorist threats and activities, worldwide military and domestic disturbances and conflicts, and other matters that influence consumer confidence, spending and tourism.

3. *The Government of India had recently implemented certain currency demonetization measures, which may affect the Indian economy and our business, results of operations, financial condition and prospects.*

On November 8, 2016, the RBI and the Ministry of Finance of the GoI withdrew the legal tender status of ₹500 and ₹1,000 currency notes pursuant to notification dated November 8, 2016. The short-term impact of these developments has been, among other things, a decrease in liquidity of cash in India. There is uncertainty on the medium- and long-term impact of this action. The medium- and long-term effects of demonetization on the Indian economy and our business are uncertain and we cannot accurately predict its effect on our business, results of operations, financial condition and prospects.

4. *Any changes in the regulatory framework could adversely affect our operations and growth prospects*

Our Company is subject to various regulations and policies. For details see Section titled, **Key Industry Regulations and Policies**, beginning on page no. 86 of this Draft Prospectus. Our business and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which could have a material adverse effect on our business, financial condition and results of operations.

5. *Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance*

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

6. *The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.*

Prior to this Issue, there has been no public market for our Equity Shares. The trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets and Finance industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnership, joint ventures, or capital commitments.

7. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price*

Our Issue price is based on Fixed Price. This price is based on numerous factors (For further information, please refer Section titled “*Basis for Issue Price*” beginning on page 52 of this Draft Prospectus) and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation. The following:

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts; Speculation in the press or investment community;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

8. *There are restrictions on daily/weekly/monthly movements in the price of the Equity Shares, which may adversely affect a shareholder’s ability to sell, or the price at which it can sell, Equity Shares at a particular point in time*

Once listed, we would be subject to circuit breakers imposed by all stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

9. *Civil unrest, acts of violence including terrorism or war involving India and other countries could materially and adversely affect the financial markets and our business.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India’s economy and our business. Terrorist attacks and other acts of violence may adversely affect the Indian stock markets, where our Equity Shares will trade, and the global equity markets generally.

10. *The proposed adoption of IFRS could result in our financial condition and results of operations appearing materially different than under Indian GAAP.*

Public companies in India, including us, may be required to prepare annual and interim financial statements under IFRS in accordance with the roadmap for the adoption of, and convergence with, IFRS announced by the Ministry of Corporate Affairs, GoI (MCA), through a press note dated January 22, 2010. The MCA through a press release dated February 25, 2011, announced that it will implement the converged accounting standards in a phased manner after various issues including tax-related issues are resolved. The MCA is expected to announce the date of implementation of the converged accounting standards at a later date. Our financial condition, results of operations, cash flows or changes in shareholders’ equity may appear materially different under IFRS than under Indian GAAP. This may have a material adverse effect on the amount of income recognized during that period and in the corresponding period in the comparative fiscal year/period. In addition, in our transition to IFRS reporting, we may encounter difficulties in the ongoing process of implementing and enhancing our management information systems. Moreover, our transition may be hampered by increasing competition and increased costs for the relatively small number of IFRS-experienced accounting personnel available as more Indian companies begin to prepare IFRS financial statements.

11. *Economic developments and volatility in securities markets in other countries may cause the price of the Equity Shares to decline.*

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investor's reactions to developments in one country may have adverse effects on the market price of securities of companies situated in other countries, including India. For instance, the recent financial crisis in the United States and European countries lead to a global financial and economic crisis that adversely affected the market prices in the securities markets around the world, including Indian securities markets. Negative economic developments, such as rising fiscal or trade deficits, or a default on

national debt, in other emerging market countries may affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general. The Indian stock exchanges have experienced temporary exchange closures, broker defaults, settlement delays and strikes by brokerage firm employees. In addition, the governing bodies of the Indian stock exchanges have, from time to time, imposed restrictions on trading in certain securities, limitations on price movements and margin requirements. Furthermore, from time to time, disputes have occurred between listed companies and stock exchanges and other regulatory bodies, which in some cases may have had a negative effect on market sentiment.

12. *The Companies Act, 2013, has effected significant changes to the existing Indian company law framework, which may subject us to higher compliance requirements and increase our compliance costs.*

A majority of the provisions and rules under the Companies Act, 2013, have recently been notified and have come into effect from the date of their respective notification, resulting in the corresponding provisions of the Companies Act, 1956, ceasing to have effect. The Companies Act, 2013, has brought into effect significant changes to the Indian company law framework, such as in the provisions related to issue of capital, disclosures in Draft Prospectus, corporate governance norms, audit matters, related party transactions, introduction of a provision allowing the initiation of class action suits in India against companies by shareholders or depositors, a restriction on investment by an Indian company through more than two layers of subsidiary investment companies (subject to certain permitted exceptions), prohibitions on loans to directors and insider trading and restrictions on directors and key managerial personnel from engaging in forward dealing. To ensure compliance with the requirements of the Companies Act, 2013, we may need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention.

13. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

14. *The nationalized goods and services tax (GST) regimes implemented by the Government of India have impact on our operations.*

The Government of India has from July 01, 2017, has implemented the Goods and Service Tax a comprehensive national goods and service tax (GST) regime that combines taxes and levies by the Central and State Governments into a unified rate structure.

15. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and trading industry contained in the Draft Prospectus.*

While facts and other statistics in the Draft Prospectus relating to India, the Indian economy has been based on various government publications and reports from government agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the Section titled “*Industry Overview*” beginning on page no 56 of the Draft Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

16. *Conditions in the Indian securities market may affect the price or liquidity of our Equity Shares.*

The Indian securities markets are smaller than securities markets in more developed economies and the regulation and monitoring of Indian securities markets and the activities of investors, brokers and other participants differ, in some cases significantly, from those in the more developed economies. Indian stock exchanges have in the past experienced substantial fluctuations in the prices of listed securities. Further, the

Indian stock exchanges have experienced volatility in the recent times. The Indian stock exchanges have also experienced problems that have affected the market price and liquidity of the securities of Indian companies, such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading and limited price movements. A closure of, or trading stoppage on the SME Platform of BSE could adversely affect the trading price of the Equity Shares.

17. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

18. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.*

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

19. *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

20. *Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.*

India has experienced natural calamities such as earthquakes, tsunami, floods etc. in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

SECTION VII: PARTICULARS OF THE ISSUE

OBJECTS OF THE ISSUE

The Issue includes a fresh Issue of 43,02,000 Equity Shares of our Company at an Issue Price of Rs.43/- per Equity Share.

Our Company proposes to utilize the funds which are being raised through this Issue towards the below mentioned objects and gain benefits of listing on SME Platform of BSE.

The Objects of the Issue are:

- A. To meet the working capital requirements of the company
- B. To meet the Issue Expenses
- C. General Corporate Purposes

Our Company believes that listing will enhance our Company's corporate image, brand name and create a public market for its Equity Shares in India. It will also make future financing easier and affordable in case of expansion or diversification of the business. Further, listing attracts interest of institutional investors as well as foreign institutional investors.

The main objects clause of our Memorandum enables our Company to undertake the activities for which funds are being raised in the Issue. The existing activities of our Company are within the objects clause of our Memorandum. The fund requirement and deployment are based on internal management estimates and has not been appraised by any bank or financial institution.

Requirement of Funds

Our funding requirement is dependent on a number of factors which may not be in the control of our management, changes in our financial condition and current commercial condition. Such factors may entail rescheduling and/or revising the planned expenditure and funding requirement and increasing or decreasing the expenditure for a particular purpose from the planned expenditure.

The following table summarizes the requirement of funds:

Sl. No.	Particulars	Amount (Rs. in Lakh)
1	Working Capital Requirement	1,564.86
2	Public issue expenses	135.00
3	General Corporate Purposes	150.00
	Total	1,849.86

We propose to meet the requirement of funds for the stated objects of the Issue from the IPO Proceeds. Hence, no amount is required to be raised through means other than the Issue Proceeds. Accordingly, the requirements under Regulation 230(1)(e) of the SEBI ICDR Regulations and Clause 9 (C) of Part A of Schedule VI of the SEBI ICDR Regulations (which requires firm arrangements of finance through verifiable means for 75% of the stated means of finance, excluding the Issue Proceeds and existing identifiable internal accruals) are not applicable.

The fund requirement and deployment are based on internal management estimates and have not been appraised by any bank or financial institution. These are based on current conditions and are subject to change in light of changes in external circumstances or costs, other financial conditions, business or strategy, as discussed further below.

In case of variations in the actual utilization of funds allocated for the purposes set forth above, increased fund requirements for a particular purpose may be financed by surplus funds, if any, available in respect of the other purposes for which funds are being raised in this Issue. If surplus funds are unavailable, the required financing will be through our internal accruals and/or debt.

We may have to revise our fund requirements and deployment as a result of changes in commercial and other external factors, which may not be within the control of our management. This may entail re-scheduling, revising or cancelling the fund requirements and increasing or decreasing the fund requirements for a particular purpose from its fund requirements mentioned below, at the discretion of our management. SECTION VIII: ABOUT THE COMPANY AND THE INDUSTRY

INDUSTRY OVERVIEW

OVERVIEW OF THE GLOBAL AND INDIAN ECONOMY

GLOBAL OUTLOOK

Banking on the resurgence of global majors and the continuing policy stimulus-driven growth in China, India and similar economies, the outlook for global GDP growth for 2018 is 3.7%. While the U.S. is expected to see a modest growth pick-up due to stronger business and consumer confidence, both Europe and Japan are forecast to have stronger and sustained momentum with diminished political uncertainty and growing private consumption respectively.

Exhibit 1: GDP Real Growth, Global, 2014-2021 (%)

Source: IMF

Digitization, improvement in the labour force and stronger productivity can help sustain the growth momentum and provide a favourable environment for businesses to thrive. Companies, however, need to stay focused on strengthening their growth through an apt combination of technology, innovation and skills.

Advanced economies:

- The growth forecast in the United States has been revised down from 2.3 percent to 2.1 percent in 2017 and from 2.5 percent to 2.1 percent in 2018. While the markdown in the 2017 forecast reflects in part the weak growth outturn in the first quarter of the year, the major factor behind the growth revision, especially for 2018, is the assumption that fiscal policy will be less expansionary than previously assumed, given the uncertainty about the timing and nature of U.S. fiscal policy changes. Market expectations of fiscal stimulus have also receded.
- The growth forecast has also been revised down for the United Kingdom for 2017 on weaker-than-expected activity in the first quarter.
- By contrast, growth projections for 2017 have been revised up for many euro area countries, including France, Germany, Italy, and Spain, where growth for the first quarter of 2017 was generally above expectations. This, together with positive growth revisions for the last quarter of 2016 and high-frequency indicators for the second quarter of 2017, indicate stronger momentum in domestic demand than previously anticipated.
- The growth forecast for 2017 was also revised up for Canada, where buoyant domestic demand boosted first-quarter growth to 3.7 percent and indicators suggest resilient second-quarter activity, and marginally for Japan, where private consumption, investment, and exports supported first-quarter growth.

(Source-<https://www.imf.org/en/Publications/WEO/Issues/2017/07/07/world-economic-outlook-update-july-2017>)

Emerging and developing economies: -

Emerging and developing economies are projected to see a sustained pickup in activity, with growth rising from 4.3 percent in 2016 to 4.6 percent in 2017 and 4.8 percent in 2018. These forecasts reflect upward revisions, relative to April, of 0.2 percentage point for 2016, and 0.1 percentage point for 2017. As in the most recent WEO forecast vintages, growth is primarily driven by commodity importers, but its pickup reflects to an important extent gradually improving

conditions in large commodity exporters that experienced recessions in 2015–16, in many cases caused or exacerbated by declining commodity prices.

- China's growth is expected to remain at 6.7 percent in 2017, the same level as in 2016, and to decline only modestly in 2018 to 6.4 percent. The forecast for 2017 was revised up by 0.1 percentage point, reflecting the stronger than expected outturn in the first quarter of the year underpinned by previous policy easing and supply-side reforms (including efforts to reduce excess capacity in the industrial sector). For 2018, the upward revision of 0.2 percentage point mainly reflects an expectation that the authorities will delay the needed fiscal adjustment (especially by maintaining high public investment) to meet their target of doubling 2010 real GDP by 2020. Delay comes at the cost of further large increases in debt, however, so downside risks around this baseline have also increased.
- Growth in India is forecast to pick up further in 2017 and 2018, in line with the April 2017 forecast. While activity slowed following the currency exchange initiative, growth for 2016—at 7.1 percent—was higher than anticipated due to strong government spending and data revisions that show stronger momentum in the first part of the year. With a pickup in global trade and strengthening domestic demand, growth in the ASEAN-5 economies is projected to remain robust at around 5 percent, with generally strong first quarter outturns leading to a slight upward revision for 2017 relative to the April WEO.
- In Emerging and Developing Europe, growth is projected to pick up in 2017, primarily driven by a higher growth forecast for Turkey, where exports recovered strongly in the last quarter of 2016 and the first quarter of 2017 following four quarters of moderate contraction, and external demand is projected to be stronger with improved prospects for euro area trading partners. The Russian economy is projected to recover gradually in 2017 and 2018, in line with the April forecast.
- After contracting in 2016, economic activity in Latin America is projected to recover gradually in 2017–18 as a few countries—including Argentina and Brazil—exit their recessions. In comparison to the April 2017 WEO, Brazil's growth forecast for 2017 is now higher in light of the strong first quarter, but ongoing weakness in domestic demand and an increase in political and policy uncertainty will be reflected in a more subdued pace of recovery, and hence in lower projected growth in 2018. Mexico's growth forecast for 2017 is revised up from 1.7 to 1.9 percent on the back of strong activity in the first quarter of the year, with an unchanged forecast for 2018. Revisions for the rest of the region are mostly to the downside, including a further deterioration of conditions in Venezuela.
- Growth in the Middle East, North Africa, Afghanistan, and Pakistan region is projected to slow considerably in 2017, reflecting primarily a slowdown in activity in oil exporters, before recovering in 2018. The 2017–18 forecasts is broadly unchanged relative to the April 2017 WEO, but the growth outcome in 2016 is estimated to have been considerably stronger in light of higher growth in Iran. The recent decline in oil prices, if sustained, could weigh further on the outlook for the region's oil exporters.
- In Sub-Saharan Africa, the outlook remains challenging. Growth is projected to rise in 2017 and 2018, but will barely return to positive territory in per capita terms this year for the region as a whole—and would remain negative for about a third of the countries in the region. The slight upward revision to 2017 growth relative to the April 2017 WEO forecast reflects a modest upgrading of growth prospects for South Africa, which is experiencing a bumper crop due to better rainfall and an increase in mining output prompted by a moderate rebound in commodity prices. However, the outlook for South Africa remains difficult, with elevated political uncertainty and weak consumer and business confidence, and the country's growth forecast was consequently marked down for 2018

(Source-<https://www.imf.org/en/Publications/WEO/Issues/2017/07/07/world-economic-outlook-update-july-2017>)

Among all large economies, India is likely to demonstrate a rapid and sustainable growth, at a CAGR of 9.46% from 2016 to 2021, driven by strong manufacturing-led industrial expansion and consumption demands from the private sector. According to Frost & Sullivan's analysis based on data from 2017 IMF WEO Update, the country's GDP is well positioned to cross USD 3,000 billion (INR 200 trillion) by 2020; in the event of accelerated manufacturing and investment, this figure could even potentially balloon to USD 3,600 billion (INR 240 trillion).

Policies:-

Policy choices will therefore be crucial in shaping the outlook and reducing risks:-

- Strengthening the momentum. With countries at present facing divergent cyclical conditions, differing stances of monetary and fiscal policy remain appropriate. In advanced economies where demand is still lacking and inflation too low, monetary and (where feasible) fiscal support should continue; elsewhere monetary policy should normalize gradually, in line with economic developments, and fiscal policy should focus on supporting reforms aimed at expanding the economy's supply potential. Countries in need of fiscal consolidation should do so with growth-friendly measures. Emerging market economies should continue to allow exchange rates to buffer shocks, wherever possible.
- Making growth resilient and balanced. Efforts to accelerate private sector balance sheet repair and ensure sustainability of public debt are critical foundations for a resilient recovery. So are efforts from surplus and deficit countries alike to reduce excess current account imbalances.
- Sustaining high and inclusive growth in the long term. This goal calls for well sequenced and tailored structural reforms to boost productivity and investment, measures to narrow gender labor force participation gaps, and active support for those hurt by shifts in technology or trade.
- Enhancing resilience in low-income countries. Among low-income developing countries, commodity exporters generally need sizable adjustment to correct macroeconomic imbalances, a challenge that would be exacerbated for fuel exporters by a persistent decline in oil prices. Policy priorities for diversified low income developing countries vary, given the diversity of country circumstances, but an overarching goal for these economies should be to enhance resilience against potential future shocks by strengthening fiscal positions and foreign reserves holdings while growth is strong.
- Working toward shared prosperity. A well-functioning multilateral framework for international economic relations is another key ingredient of strong, sustainable, balanced, and inclusive growth. Pursuit of zero-sum policies can only end by hurting all countries, as history shows. Because national policies inevitably interact and create spillovers across countries, the world economy works far better for all when policymakers engage in regular dialogue and work within agreed mechanisms to resolve disagreements. A rule-based and open world trading system is especially vital for global prosperity, but it must be supported by domestic policies to facilitate adjustment, not only to trade but to rapid technological change.
- Cooperating to ensure evenhandedness. At the same time, the international community should continue to adapt the multilateral system to the changing global economy. Active dialogue and cooperation will help to improve and modernize the rules, while addressing valid country concerns. This process will ensure continued mutual benefits and evenhandedness. Together with strong domestic policies, it will also help avoid a broad withdrawal from multilateralism, either through widespread protectionism or a competitive race to the bottom in financial and regulatory oversight, which would leave all countries worse off.

ALCOHOLIC DRINKS IN INDIA

EXECUTIVE SUMMARY

Market Impacted in 2017 by Demonetisation and A Ban on Roadside Alcoholic Drinks Sales Growth in the Indian alcoholic drinks industry slowed in 2017, primarily due to the effects of demonetisation and a ban on roadside sales of alcoholic drinks. Cash was previously the primary method of payment in India when purchasing alcoholic drinks and so sales were affected by the government's decision to discontinue INR500 and INR1,000 bank notes. Sales were further affected by a Supreme Court ruling imposing a ban on the sale of alcohol within 500 metres of national and state highways across the country. This resulted in many retail outlets and hotels closing down permanently, leading to disruption in the supply chain. The market was further affected by the Goods and Services Tax (GST). Even though alcoholic drinks remained outside the GST, manufacturers have to pay the tax when purchasing raw materials and packaging. Recovering this tax has particularly affected the working capital of smaller companies.

The market's slowdown was slightly offset by growth in the third and fourth quarters, which, however, was slower than in 2016 in volume terms. The market is nevertheless expected to recover over the forecast period as demonetisation is unlikely to have any long-term effect.

Premiumization Being Seen Across Alcoholic Drinks

Manufacturers launched premium products across the different categories in 2017 in order to attract consumers, who continued to demand high standards from their local bars and shops, with many shunning economy brands and trading up to more authentic flavours and imported drinks. This premiumisation trend continued to be supported by millennials who like to experience new things. UB Group introduced the premium imported beer brands Desperados, Sol, Edelweiss, Dos Equis and Affligem, while the South Korean brewer Hite also entered India during the second quarter of 2017. In spirits, Diageo introduced Captain Morgan Original Rum, while Bacardi-Martini launched Bacardi Black. Similarly, in whiskies, Sula introduced Eclipse, a premium single malt Scotch, while Diageo launched Jane Walker. Radico Khaitan, meanwhile, plans to introduce three white spirits and two brown spirits brands in India.

Premiumisation in the alcoholic drinks industry is expected to continue to be driven by rising consumer demand for more authentic flavours, new experiences and products which have fewer after-effects. Furthermore, manufacturers are also expected to expand their premium portfolios by introducing foreign brands or new brand extensions to India.

Diageo and Ub Group Continue To Lead Alcoholic Drinks

Diageo remained the clear leader in spirits in 2017 in GBO terms through its subsidiary United Spirits, with second-ranked Pernod Richard some way behind. Diageo has been focusing on increasing its presence in premium whiskies by introducing the Jane Walker brand. It has also licensed its economy brands, including Bagpiper whisky and Celebration rum, to local manufacturers so as to strengthen its distribution.

UB Group, meanwhile, remained the clear leader in beer. The company has introduced many international brands to India, including Desperados, Edelweiss, Sol, Affligem and Dos Equis, so as to cater for a growing consumer preference for premium beers. New entrants, including B9. Beverages and Simba, continued to expand their craft beer portfolios to address consumer demands, with the leading players thus facing increasing competition from micro-breweries.

Distribution Disrupted Due To the Roadside Ban and Gradual Emergence of the Online Channel

The distribution of alcoholic drinks in India was disrupted in 2017 by a ban on roadside sales. This led to the closures of all outlets selling alcohol within 500 metres of the highway. However, the ban was then revised and limited to 220 metres, while also not being applicable within city limits. Following the revision of the ban, the market started to pick up again and recover slightly. The effect is expected to last over the forecast period as a number of stores remain closed.

Internet retailing, meanwhile, is slowly emerging in India. Although currently limited to the cities of Delhi-NCR and Bengaluru, the channel is expected to grow further over the forecast period as consumers recognise the convenience it offers. Furthermore, as alcohol is generally considered a social taboo in India, consumers who buy it will appreciate the anonymity of the online channel. Companies such as Diageo and UB Group will seek to benefit from the emergence of internet retailing over the forecast period.

Slower But Still Solid Total Volume Growth Expected Over the Forecast Period

The alcoholic drinks market has been affected by new legislation in India. The ban on roadside sales, although having been relaxed, is expected to continue to disrupt distribution. In addition, many Indians are becoming more health-conscious and are reducing their alcohol consumption. Furthermore, the industry will be further affected by the GST. Although alcoholic drinks are currently not subject to this tax, the raw materials and packaging used in their manufacture are subject to GST, resulting in difficulties recovering the tax.

Over 2017-2022, the market as a whole is set to record slightly weaker total volume growth than that seen over the review period, although categories such as RTDs and wine are expected to achieve double-digit gains, with sales driven by the fact that consumers view these beverages as healthier than other types of alcoholic drinks.

MARKET BACKGROUND

Legislation

Legal purchasing age and legal drinking age

Sales of alcoholic drinks are controlled by state and union territory legislation in India, which results in different legal purchasing and drinking ages in different states. Some states have set 18 as the minimum legal purchasing and drinking age, including Sikkim, Mizoram and Himachal Pradesh, while most other states and union territories have set the age at 21. However, in some states, such as Meghalaya, Haryana and Punjab, it is 25. The legal drinking age is generally the same as the legal purchasing age.

- Although the minimum legal age for drinking in the on-trade in India is 25, this is not widely observed. Many college students are seen outside pubs in Bangalore and Gurgaon, among other cities, with the number of pubs and bars also growing rapidly in many areas. This is linked to long working hours in many industries, higher disposable incomes at a younger age and peer pressure.

Drink driving

- The blood alcohol content limit is fixed at 0.03%. For those drivers found to have a blood alcohol level above this, a first offence can result in a fine of INR2,000 or six months' imprisonment. A second offence within three years is subject to a fine of INR3,000 and up to two years in jail.

Advertising

- Advertisements for all alcoholic drinks have been banned in India since 2000. This means that brands launched and heavily promoted before then generally enjoy much better recall than more recent launches. This benefits a number of brands, such as UB Group's Kingfisherbeer.
- However, surrogate advertising continues in India, with sports tournaments, events and surrogate brands in mineral water being offered under alcoholic drinks brand names. For example, Foster's Soda was launched in 2010 by SABMiller, while the company also offers Haywards 5000 Soda. The Advertising Standards Council of India (ASCI) is a self-regulating body and can only take action against such surrogate advertisements if and when it receives complaints from the public.

Smoking ban

- Smoking has been banned in most enclosed public spaces in India since 2008, although designated areas for smoking are permitted in airports, on-trade outlets and some enclosed workplaces. There are, however, a number of cities which are aiming to become smoke-free, including Jaipur, Shimla and Chandigarh. Smoking bans have, however, had little impact on the consumption of alcoholic drinks. In on-trade outlets without smoking areas, consumers typically smoke outside the premises on the streets.

Opening hours

- Legal hours for the sale and consumption of alcoholic drinks in the on-trade and off-trade vary between states in India due to alcoholic drinks legislation being imposed at state level rather than national level. In West Bengal, sales of alcoholic drinks, for example, are permitted between 10.00-22.00hrs. In 2014, the Karnataka state government, in contrast, permitted on-trade outlets to serve alcoholic drinks until 21.00hrs every day from Monday to Thursday and 01.00hrs from Friday to Sunday.
- Most Indian states also observe days when sales of alcoholic drinks are not permitted, typically on Republic Day (26 January), Independence Day (15 August), religious festivals such as Ram Navami, Eid and Gandhi Jayanti (2 October), as well as voting days. Sales bans are, however, also imposed by some states on other days, such as Muharram in New Delhi.

On-trade establishments

The review period saw a number of bars and pubs closed down due to fire safety issues. In addition, many discos were temporarily closed until they had reviewed their fire safety policies.

TAXATION AND DUTY LEVIES

- GST was not implemented on alcohol in India in 2017, with the existing tax structure remaining in place.
- The taxation structure in India is state controlled and hence varies widely across the country. Taxation on alcoholic drinks is furthermore very complex in many states, with some for example taxing products differently according to price band. Like excise duty, VAT is also set by the state, with levels varying widely and some states opting for more complex VAT structures. The central government, meanwhile, issues licences for alcoholic drinks manufacturing facilities and also imposes a central import tax on alcoholic drinks in addition to state excise and sales taxes. This complex system encourages inter-state smuggling and contraband, while creating a heavy burden for alcoholic drinks players seeking a national presence in India.
- While alcoholic drinks taxation varies across India, it is generally high and was increased by state governments towards the end of the review period. A number of states have increased taxes in 2018, with Karnataka, for example, raising excise on spirits by 8%. Taxes are being increased in many states in order to boost revenues, with many, such as Maharashtra, being heavily reliant on alcoholic drinks excise as a source of income. Each state imposes:
 - A state excise duty on alcoholic drinks produced in the state
 - An import duty on alcoholic drinks imported from outside the state
 - An export duty on all alcoholic drinks manufactured in the state for consumption in other states

OPERATING ENVIRONMENT

Contraband/parallel Trade

- Illicit sales of alcoholic drinks are soaring in India. This is partly due to differences in excise duties and VAT across the country, with parallel trade and smuggling between states thus remaining significant. In addition, the illicit production of spirits is also rising, linked to growing demand as a result of tax increases and distribution restrictions for legal spirits in many states towards the end of the review period. In addition, poor police enforcement and a lack of duty stamp systems in some states are contributing to the problem. Many consumers also buy these products unwittingly due to a lack of awareness and also the adulteration of branded spirits with illicit spirits in some on-trade outlets.

Duty Free

- At the start of the review period only imported goods could be sold in duty-free shops at international airports in India. Indian-made goods were not tax-free and were thus expensive. However, the government amended this law in May 2013 to allow Indian-made goods to also be sold via duty-free shops within permissible allowance limits. Accordingly, some local spirits companies, such as Radico Khaitan and Mohan Meakin, offer their brands via duty-free outlets. Duty-free outlets, however, continue to focus mainly on offering premium global brands, with local spirits accounting for just a small share of their product range and sales. In April 2018, the government announced that duty-free shops at international airports are liable to GST.

Cross-border/private Imports

- Most cross-border or private imports occur across the land borders of India, mainly with neighbouring countries such as Bangladesh and Nepal. However, a widening product range and expanding distribution in India resulted in private import volumes falling sharply over the review period. Inter-state private imports are, however, strong in India due to taxation on alcoholic drinks varying from state to state. Cross-state border sales are thus significant, with consumers travelling to states where taxes are low in order to buy alcoholic drinks, such as from Goa to Karnataka.

KEY NEW PRODUCT LAUNCHES

- Manufacturers are introducing premium imported brands into India due to rising disposable incomes and a willingness on the part of consumers to try out new flavours. In the beer category, UB Group introduced a new range of imported beers in 2017, while the South Korean brewer Hite also entered the Indian market. Similarly, Sula entered the whiskies category by introducing the premium Eclipse brand, while Diageo launched Jane Walker, a variant of its premium Johnnie Walker brand. The rum category also witnessed the introduction of the premium Captain Morgan brand.
- RTDs/high-strength premixes and wine witnessed multiple new product launches as these types of alcoholic drinks are growing in popularity. Companies including Grover Zampa and Sula Vineyards introduced a wide range of wines targeted at different consumer groups.

Outlook

Apart from rising consumer demand for premium brands, manufacturers are also pushing higher-end products to drive value growth. This premiumisation trend is expected to intensify as more companies introduce new products in categories such as rum, vodka, whiskies and beer. Indeed, premium products are expected to drive sales over the forecast period.

BEER IN INDIA

HEADLINES

- In 2017 beer records total volume growth of 5% to reach sales of 3.1 billion litres
- Growth slows due to lingering effects of demonetisation and a ban on roadside sales of alcoholic drinks
- Imported premium lager registers the strongest total volume growth of 11%
- Average unit price rises by 2% in current terms
- UB Group remains the clear category leader with a 43% share of total volume sales
- Over the forecast period beer expected to post a total volume CAGR of 4% to exceed sales of 3.8 billion litres in 2022

PROSPECTS

Growing Preference for Smooth Tasting Beer

Indian consumers are increasingly opting for beer which has a smooth and light taste, finding it easy to drink when socialising with friends. Light tasting beers are also becoming popular among those drinking alcohol for the first time. Manufacturers are thus introducing new products to cater for this rising demand. For example, under its Bira brand, B9 Beverages introduced Bira White, Bira Light and Bira Pale Ale, which are all smooth and less bitter beers. UB Group, meanwhile, launched Edelweiss, an imported beer with a lighter taste. Craft beers from micro- breweries have also become popular as they are generally smooth and have a lighter taste.

Manufacturers Introduce Low-calorie Beers for Health-conscious Consumers

- Indians are becoming increasingly health-conscious, paying more attention to the nutritional value and calorie content of the foods and drinks they consume, with many being keen to try new alcoholic drinks which are seen as less harmful to health amidst the rising prevalence of conditions such as obesity, high blood pressure and diabetes. With many Indians consuming beer on a regular basis, healthier variants are proving very appealing.
- To target these increasingly health-conscious drinkers, B9 Beverages, for example, introduced Bira 91 Light, which contains less than 90 calories. Carlsberg has plans to introduce similar products, while various micro- breweries, including The Brew Master, have also introduced low-calorie beers. More such products are expected to be seen over the forecast period.

Imported Premium Lager the Best Performing Category

Indian consumers are increasingly opting for premium imported lagers thanks to rising disposable incomes and a desire to experience new flavours from different countries. This trend is primarily being seen in first-tier cities, driven by consumers who have returned home from abroad and are aware of certain brands. In addition, some have also started consuming imported drinks as a sign of their social status. Manufacturers have responded by launching more imported

premium lagers. UB Group has introduced five new brands to India, namely Desperados, Sol, Edelweiss, Dos Equis and Affligem, while Carlsberg has launched Tuborg Classic with Scotch Malts, a premium variant of its Tuborg lager. The South Korean brewer Hite also entered India in 2017.

Imported premium lager is set to remain the best performing beer category over the forecast period as these products are expected to increasingly penetrate second-tier cities.

COMPETITIVE LANDSCAPE

UB Group Remains the Clear Category Leader

UB Group remained the clear leader in beer in 2017. The company's position can be attributed to the strength of its Kingfisher brand as well as the improved distribution of Kingfisher Ultra, Kingfisher Ultra Max and Heineken. Kingfisher Strong remained the best-selling beer in 2017 thanks to its popularity among various consumer groups. Additionally, it benefits from widespread distribution, thus being highly accessible and recognisable to consumers. The company has also introduced imported beers so as to better compete with Carlsberg and Hite as many consumers are opting for such products. In addition, it advertises extensively during sporting events such as the IPL and UEFA Champions League.

B9 Beverages and Carlsberg the Best Performers in 2017

B9 Beverages is a craft brewer which registered a huge increase in sales in 2017, albeit from a very low base. Having initially manufactured abroad, the company successfully raised funds from various private equity firms to start local production and improve its distribution. It was the first manufacturer of locally bottled craft beer, which is available at very affordable prices. The growing young population, which is very willing to try out new products, is increasingly turning to the company's Bira brand, the range of which has been extended to include Bira White, Bira Strong, Bira Pale and Bira Light.

Carlsberg also witnessed a solid increase in volume sales in 2017, again from a low base. The company's sales are expected to continue to grow thanks to the launch of innovative products such as Tuborg Classic with Scotch Malts, aimed at those who appreciate the taste of whisky.

Rise of Craft Beer and Microbreweries Driven by Urbanisation

Demand for craft beer has been growing thanks to a consumer willingness to try out new products. This has resulted in the opening of many micro-breweries in first-tier cities. Within a short period of time the category has attracted a large customer base. The growth of micro-breweries is also being driven by rapid urbanisation and rising disposable incomes, but is also being supported by state governments, which have allowed them to open. Over 2013-2017, micro-brewery chains including Striker Pub & Breweries, Toit Pub & Breweries, District 6 Pub and Brewery, The White Owl Brewery and The BrewMaster opened outlets in various cities.

Craft beers are expected to grow further over the forecast period as urbanisation in the country continues and more states agree to the opening of micro-breweries. Furthermore, new companies such as Simba, White Rhino and Witlinger which currently operate regionally have plans to expand into new territories.

CATEGORY BACKGROUND

FRANCHISE BRANDS IMPORT & DISTRIBUTION:

- There are 4 main MNC's who are controlling the International Alcohol Brands Business in India. Most of the independent brand owners have always been hesitant to bring their brands into India due to major government barriers and their lack of trust on Indian partners.
- We have taken this advantage on the back of our extensive experience along with word of mouth from our existing partners in India and have scouted some of the well known Luxury Brands in Beers, Wines, Vodka, Tequila, Irish Whiskey from Australia, Russia, Mexico & Ireland Resp.

- Beers – Coopers & Reddot, Wines – Tomich, Vodka – Organika Unique and Life, Tequila – Aqua Riva - 100% Agave and Irish Whiskey – West Cork Blended Irish and Single Malt 10YO Irish and Gin.
- We have Exclusive Long Term Agreements with these brands for the Indian Subcontinent and there is an in principal agreement to enter into Sri Lanka, Nepal, Maldives in the next 4 years.
- Our Biggest strength is that we have our own Infrastructure and not using third party warehouses, licenses to build our own brands.
- Our In-house Liasoning Team with the government, Back End Accounts Team, Front End Sales Managers from reputed companies like Bacardi given a one-point solution to our partners abroad. All these are major confidence building measures initiated by us.
- All these brands have been launched in 8 States already and in Mumbai in the month of September 2018 on a good note.
- Continuity, Fresh Stocks, Fast Decisions by management is the advantage with us.
- We foresee Franchise brands to contribute 20% to our revenues in the next 2 years.
- We are in the final stages of launching Coopers Light (Less Calorie) and a Session Ale to give more choices to the consumer.
- We are in the process of listing these brands with the CSD (Army Canteens) and it could generate huge revenues for us.

National Environmental Policy, 2006

This Policy seeks to extend the coverage, and fill in gaps that still exist, in light of present knowledge and accumulated experience. This policy was prepared through an intensive process of consultation within the Government and inputs from experts. It does not displace, but builds on the earlier policies. This is a response to our national commitment to a clean environment, mandated in the Constitution in Articles 48 A and 51 A (g), strengthened by judicial interpretation of Article 21. The dominant theme of this policy is that while conservation of environmental resources is necessary to secure livelihoods and well-being of all, the most secure basis for conservation is to ensure that people dependent on particular resources obtain better livelihoods from the fact of conservation, than from degradation of the resource. Following are the objectives of the National Environmental Policy:
