The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are certain risk factors where the effect is not quantifiable and hence has not been disclosed in such risk factors. Note: The amount mentioned above may be subject to additional interest, rates or Penalties being levied by the concerned authorities for delay in making payment or otherwise. For further details, please refer chapter “Outstanding Litigation and Material Development” beginning from page no. 186 of this prospectus.

2. *Our inability to obtain, maintain or renew requisite statutory and regulatory permits and approvals for our business operations could materially and adversely affect our business, prospects, cash flows, results of operations and financial condition.*

Our company is engaged in plantation and manufacturing of CTC Tea. Our operations are subject to extensive government regulation and in respect of our existing operations we are required to obtain and maintain inter-alia various statutory and regulatory permits, certificates and approvals including approvals under the Food Safety and Standards Act, 2006 (the “FSSAI”), Certificate issued for Food Safety Management System (“ISO”) and the rules and regulations thereunder, Legal Metrology Act, 2006, environmental approvals, factory licenses and labour and tax related approvals.

Further, certain material consents, licenses, registrations, permissions and approvals that are required to be obtained by our Company for undertaking its business there are valid for prescribed period of time and have to be renewed in the normal course and our Company has either made an application to the relevant Central or State government authorities for renewal of such licenses, consents, registrations, permissions and approvals or is in the process of making such applications. There can be no assurance that the relevant authorities will issue such permits or approvals in time or at all. Failure or delay in obtaining or maintaining or renew the required permits or approvals within applicable time or at all may result in interruption of our operations. Further, the relevant authorities may initiate penal action against us, restrain our operations, impose fines/penalties or initiate legal proceedings for our inability to renew/obtain approvals in a timely manner or at all. Consequently, failure or delay to obtain such approvals could have a material adverse effect on our business, financial condition and profitability.

If there is any failure by us to comply with the applicable regulations or if the regulations governing our business are amended, we may incur increased costs, be subject to penalties, be required to alter our manufacturing and/or procurement operations or otherwise suffer disruption in our activities, any of which could adversely affect our business. The approvals required by us are subject to numerous conditions and we cannot assure you that these would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action, these registrations, approvals or licenses are liable to be cancelled or the plantation and manufacture or sale of our products may be restricted. In case any of these registrations, approvals or licenses are cancelled, or its use is restricted, then it could adversely affect our results of operations, future cash flows or growth prospects. Additionally, failure to obtain or renew relevant approvals, licenses etc., could also subject to our senior management or board of director to legal or regulatory action.

3. *Our operations are sensitive to weather conditions.*

Our revenue from sales of CTC Tea for the Fiscal 2022, Fiscal 2021 and Fiscal 2020 was ₹ 1,927.42 lakh, ₹ 2,305.64 lakh and ₹ 1,549.17 lakh comprising of 98.91%, 99.95% and 100.00% respectively of our revenue from operations. The revenue from sales of CTC tea has declined for the Fiscal 2022 due to less rainfall as compared for Fiscal 2021. Rainfall during the initial few dry months of the year, when the Cropping Season is about to start, is most essential which immensely helps the tea bushes to re-gain health and vigour after the shock it suffered because of different types of pruning operations during winter from November to January. In Fiscal 2021-22, Indong Tea Garden received less rainfall during the early months of January to April, compared to the corresponding fiscal period of 2020-21.

Our business activities could be materially and adversely affected by severe weather. Severe weather conditions such as lack of sufficient rainfall, rising temperature, etc. may cause damage to a full and/or portion of our plantation. Tea, being an agricultural commodity, is susceptible to the agro climatic risks, such as, drought, insufficient rainfall or occurrence of floods, landslides and as a result of which production of our products may reduce and this may adversely affect our sales and profitability. Therefore, the occurrence of any of these risks could significantly affect our results of operations.

4. *Our Company does not have any formal agreements with any of our customers for purchasing its products and is subject to uncertainties in demand which could decrease sales and negatively affect its operating results.*

We sell our majority of the products through Auctions regulated by Tea Board of India. Presently, from the list of the Auctioneers registered with Siliguri Auction Committee, we are selling our products through Parcon (India) Private Limited, Siliguri and J. Thomas & Company Private Limited, Siliguri. However, we have not entered into any formal agreement with them.

Further, apart from the auctioneers, a small portion of unsold inventories are sold to other customers outside the auction system. However, we have not entered into any formal agreement with them as well.

Though our Company has been dealing with some of our customers for several years, we do not have any formal/long-term agreements with our customers. As a result, our customers can terminate their relationships with us due to a change in vendor preference or any other reason upon relatively short/without notice, which could materially and adversely impact our business. Consequently, our revenue may be subject to variability because of fluctuations in demand for our products. Our Company's customers have no obligation to place order with us and may either cancel, reduce or delay orders. The orders placed by our Company's customers are dependent on factors such as quality of our teas, fluctuation in demand for our teas, customer's inventory management, amongst others.

Although, we have a strong emphasis on quality, timely delivery of our products, personal interaction by the top management with the customers, any change in the buying pattern of buyers can adversely affect the business of our Company. Further, in absence of such contracts there will always be uncertainty.

5. *Failure to manage our inventory could have an adverse effect on our net sales, profitability, cash flow and liquidity.*

Our operations are dependent on our ability to effectively manage our inventory and timely delivery to our customer. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements. If our management has misjudged expected customer demand it could adversely impact the results by causing either a shortage of produce or an accumulation of excess inventory. Further, if we fail to sell the inventory we manufacture, we may be required to write-down our inventory, which would have an adverse impact on our income and cash flows.

6. *We may be held liable for claims of or from customers on account of any defects in the products supplied to our customers including penalty for delay in implementation of purchase orders.*

We may be exposed to claims for defects in the tea supplied under certain customers' purchase orders. The quality control procedures may fail to test for all possible conditions of use or identify all defects in the quality and specifications of the tea. Any such defects could require us to undertake product recalls. These actions could require our Company to expend considerable resources in correcting these problems and could adversely affect demand for the tea. Any defect in our Company's products could also result in customer claims for damages. Further, we do not have any defect liability insurance on the products to mitigate the said risk. As a result, our Company may face and be liable for warranty claims for components by it. In defending such claims, our Company could incur substantial costs and receive adverse publicity which may adversely affect our financial conditions and results of operation.

7. *Under-utilisation of capacity may adversely affect our business, results of operations and financial condition.*

Use of production capacity is subject to several variables like weather conditions, cultivation of tea and production, power, water, proper working of machinery, orders on hand, etc. It cannot be assured that we shall be able to utilize our existing manufacturing facilities to their full capacity or up to an optimum capacity, and non-utilisation of the same may lead to loss of profits or can result in losses, and may adversely affect our business, results of operations and financial condition.

8. *The industry in which we operate, is labour intensive and our operations may be materially adversely affected by strikes, work stoppages or increased wage demands by our workmen/employees or any other kind of disputes with our employees.*

The industry in which we operate being labour intensive depends on labour force for carrying out its activity. We cannot assure you that we will not experience disruptions in work due to disputes or other problems with our work force, which may adversely affect our ability to continue our business operations. Any labour unrest directed against us, could directly or indirectly prevent or hinder our normal operating activities, and, if not resolved in a timely manner, could lead to disruptions in our operations. These actions are impossible for us to predict or control and any such event could adversely affect our business, results of operations and financial condition.

9. *Our Registered Office, Tea Estate, Factory and other premises from where we operate are not owned by us*

None of our business premises is owned by us. Our Registered office, is taken on Rent from one of our group entities i.e. Greenol Laboratories Private Limited for a period of 11 months commencing from February 01, 2022. Further, Tea Estate, Factory and other premises has been taken on lease for a period of 30 years commencing from June 13, 2000 pursuant to a Lease Deed dated March 24, 2008 executed between Governor of the State of West Bengal and the Company.

We cannot assure you that we will be able to continue the above arrangement on commercially acceptable / favourable terms in future. If we are required to vacate the current premises, we would be required to make alternative arrangements for new offices and other infrastructure, and we cannot assure that the new arrangements will be on commercially acceptable/favourable terms. If we are required to relocate our business operations during this period, we may suffer a disruption in our operations or have to pay higher charges, which could have an adverse effect on our business, prospects, results of operations and financial condition.

10. *If the Company is unable to adapt to technological changes, the Company's business could suffer.*

Our Company has implemented the latest technology for our Plant. Our Company's future success will depend in part on the company's ability to respond to technological advances and emerging industry standards and practices in a cost-effective and timely manner. The development and implementation of such technology entails technical and business risks. Our Company cannot assure that it will successfully implement new technologies effectively or adapt the systems to emerging industry standards. If our Company is unable, for technical, legal, financial or other reasons, to adapt in a timely manner to changing market conditions, customer requirements or technological changes, our Company's business, financial performance and the trading price could be adversely affected.

11. *We have incurred substantial indebtedness which exposes us to various risks which may have an adverse effect on our business and results of operations. We may also be unable to obtain future financing to fund our operations, expected capital expenditure and working capital requirements on favourable terms, or at all.*

As on the 31st March 2022, we have Rs. 1841.74 Lacs, of outstanding outside debt in our books of accounts. Our level of indebtedness has important consequences to us, such as:

- increasing our vulnerability to general adverse economic, industry and competitive conditions;
- limiting our flexibility in planning for, or reacting to, changes in our business and the industry;
- affecting our credit rating;
- limiting our ability to borrow more money both now and in the future; and
- increasing our interest expenditure and adversely affecting our profitability.

If any of these risks were to materialise, our business and results of operations may be adversely affected. Our business requires funding for capital expenditure and working capital requirements. The actual amount and timing of future capital expenditure may depend on several factors, among others, new opportunities, availability of land, regulatory approvals, regulatory changes, economic conditions, technological changes and market developments in our industry. Our sources of additional funding, if required, to meet our capital expenditure may include the incurrence of debt or the issue of equity or debt securities or a combination of both. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations. In case there is insufficient cash flow to meet our working capital requirement or we are unable to arrange the same from other sources or there is delay in disbursement of arranged funds, or there is any increase in interest rate on our borrowings, it may adversely affect our operations and profitability. These factors may result in an increased amount of short-term borrowings.

12. *The success of our business is largely dependent upon our senior management and key personnel and our ability to attract and retain them could adversely affect our businesses*

The success of our business is largely dependent upon our senior management. Our experienced senior management and Directors have had significant contribution to the growth of our business, and our future success is dependent on the continued services of our senior management team. Whereas, majority of our Promoters and our Managing Director are highly experienced and more than 70 years of age. The loss of service of our senior management could seriously impair the ability to continue to manage and expand the business efficiently. Further, the loss of any of our senior management may adversely affect the operations, finances and profitability of our Company.

13. *The Company was incorporated in the year 1990 and subsequently has been taken over by the present promoters of the Company in the year 2014. The Company as on the present date has not in its possession major and important documents related to the business affairs of the Company prior to such takeover.*

The Company was incorporated on 28/12/1990. Subsequently, the Company was taken over by the present Promoters of the Company on 12/09/2014. The Majority of documents related to the business events, shareholdings, management, returns, accounts & taxes related documents etc. of the company has not been handed over by the erstwhile management

to the present management, subsequent to such takeover. We can't assure you that back-ups for the relevant copies of relevant documents prior to the takeover will be available in a timely manner or at all in case of any requirement.

14. *Our business is dependent on developing and maintaining continuing relationships with our customers. The loss of any significant customer could have a material adverse effect on our business, financial condition and results of operations.*

Our business is dependent on developing and maintaining a continuing relationship with our key customers. In the event of a significant decline in the demand for our products by our key customers, our business, results of operations and financial condition may be materially and adversely affected. There can be no assurance that we will be able to maintain the historic levels of business from these customers or that we will be able to replace these customers in case we lose any of them.

15. *Our Company's insurance coverage to protect us against all material hazards which may result in disruptions of operations/monetary loss on account of stoppage of work may not be sufficient.*

Our Company has insured itself against some business or operational risks. But we cannot assure you that these would be sufficient to protect us against all material hazards which may result in disruptions of operations/monetary loss on account of stoppage of work. Any excess loss would have to be borne by us and our results of operations, cash flows and financial performance could be adversely affected.

16. *We do not have long term agreements with suppliers of material required to tea plantation and manufacturing of tea and an increase in the cost of or a shortfall in the availability of materials could have an adverse effect on our business, results of operations and financial condition.*

The price and availability of materials which we use for plantation and manufacturing of our products depend on several factors beyond our control, including overall economic conditions, production levels, market demand and competition for such material, production and transportation cost, duties and taxes and trade restrictions. We usually do not enter into long term supply contracts with any of the material supplier and typically place orders with them in advance for our anticipated requirements. The absence of long-term contracts at fixed prices exposes us to volatility in the prices of raw material that we require and we may be unable to pass these costs onto our customers. We also face a risk that one or more of our existing suppliers may discontinue their supplies to us, and any inability on our part to procure the material from alternate suppliers in a timely fashion, or on terms acceptable us, may adversely affect our operations and our financial performance.

17. *We require high working capital for our smooth day to day operations of business and any discontinuance or our inability to acquire adequate working capital timely and on favourable terms may have an adverse effect on our operations, profitability and growth prospects.*

Our business demands substantial funds towards working capital requirements. In case there are insufficient cash flows to meet our working capital requirement or we are unable to arrange the same from other sources or there are delays in disbursement of arranged funds, or we are unable to procure funds on favourable terms, it may result into our inability to finance our working capital needs on a timely basis which may have an adverse effect on our operations, profitability and growth prospects.

18. *The improper handling of our products, or spoilage of and damage to such products, or any real or perceived contamination/ inferiority in products, could subject us to regulatory action, damage our reputation and have an adverse effect on our business, results of operations and financial condition.*

Any shortcoming in the supply of our product due to negligence, human error or otherwise, may damage our products and result in non-compliance with applicable standards. Any allegation that our products are of inferior quality could damage our reputation, adversely affect our sales and result in legal proceedings being initiated against us, irrespective of whether such allegations have any factual basis.

19. *Our actual results could differ from the estimates and projections used to prepare our financial statements.*

The estimates and projections are based on and reflect our current expectations, assumptions and/ or projections as well as our perception of historical trends and current conditions, as well as other factors that we believe are appropriate and reasonable under the circumstances. There can be no assurance that our expectations, estimates, assumptions and/or projections, including with respect to the future earnings and performance will prove to be correct or that any of our expectations, estimates or projections will be achieved.

20. We have entered into certain related party transactions and may continue to do so.

We have entered into related party transactions with our Promoters, its group members/ entities, Directors and other associates. While we believe that all such transactions have been conducted on arm's length basis, however it is difficult to ascertain whether more favourable terms would have been achieved had such transactions been entered with unrelated parties. Furthermore, it is likely that we will continue to enter into related party transactions in the near future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation.

21. Noncompliance with and changes in, safety, health and environmental laws and other applicable regulations, may adversely affect our business, results of operations and financial condition.

We are subject to laws and government regulations, including in relation to safety, health and environmental protection. We cannot assure you that we will not be involved in future litigation or other proceedings, or be held liable in any litigation or proceedings including in relation to safety, health and environmental matters, the costs of which may be significant. Any accidents at our facilities may result in personal injury or loss of life resulting in the suspension of operations. The loss or shutdown of our operations over an extended period of time could have an adverse effect on our business and operations.

22. Our business and prospects may be adversely affected if we are unable to maintain and grow our brand image.

Our brand  and its reputation are among our most important assets and we believe our brands serve in attracting customers to our product in preference over those of our competitors. We also believe that continuing to develop awareness of our brand, through focused and consistent branding and marketing initiatives, among our consumers, is important for our ability to increase our sales volumes and our revenues, grow our existing market share and expand into new markets. Consequently, any adverse publicity involving us, or any of our products may impair our reputation, dilute the impact of our branding and marketing initiatives and adversely affect our business and our prospects.

23. Any reduction in sales of CTC Tea could have an adverse impact on our business, results of operation and financial condition.

Our revenue derives from only sales of CTC Tea. For the Fiscal 2022, Fiscal 2021 and Fiscal 2020, our revenue from sales of CTC Tea was ₹ 1,927.42 lakh, ₹ 2,305.64 lakh and ₹ 1,549.17 lakh comprising of 98.91%, 99.95% and 100.00% respectively of our revenue from operations. Consequently, any reduction in sales of CTC Tea due to reduction in demand, change in quality could have an adverse impact on our business, results of operations and financial condition.

24. The Promoters and Directors hold Equity Shares in our Company and are therefore interested in our Company's performance in addition to their remuneration and reimbursement of expenses.

Certain of our Directors (including our Promoters) are interested in our Company, in addition to regular remuneration or benefits and reimbursement of expenses, to the extent of their shareholding in our Company. We cannot assure you that our Promoters will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Promoters may take or block actions with respect to our business which may conflict with the best interests of our Company or that of minority shareholders.

25. We are dependent on a number of key personnel, including our senior management, and the loss of or our inability to attract or retain such persons could adversely affect our business, results of operations and financial condition.

Our performance depends largely on the efforts and abilities of our senior management and other key personnel. We believe that the inputs and experience of our senior management and key managerial personnel are valuable for the development of business and operations and the strategic directions taken by our Company. We cannot assure you that we will be able to retain these employees or find adequate replacements in a timely manner, or at all. We may require a long period of time to hire and train replacement personnel when qualified personnel terminate their employment with our Company. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting employees that our business requires. The loss of the services of such persons may have an adverse effect on our business and our results of operations. The continued operations and growth of our business is dependent upon our ability to attract and retain personnel who have the necessary and required experience and expertise.

Competition for qualified personnel with relevant industry expertise in India is intense. A loss of the services of our key personnel may adversely affect our business, results of operations and financial condition.

26. *Certain relevant copies of education qualification and experience certificates of our promoters/Directors are not traceable.*

Relevant copies of education qualification and experience certificates of some of our promoters/Directors are not traceable. We can't assure you that back-ups for the relevant copies of educational qualifications will be available in a timely manner or at all. We have relied on personal undertakings provided from them.

27. *Our Company has availed certain unsecured loans that are recallable by the lenders at any time.*

Our Company had availed certain unsecured loans from various Banks, Financial Institutions and individuals and may continue to do so in future that are recallable on demand by the lenders. In such cases, the lender is empowered to require repayment of the facility at any point in time during the tenor. In case the loan is recalled on demand by the lender and our Company is unable to repay the outstanding amounts under the facility at that point, it would constitute an event of default under the respective loan agreements. For further details, please refer chapter titled "**Financial Indebtedness**" beginning on page 176 of this Prospectus.

28. *Our funding requirements and the proposed deployment of the funds are based on management estimates and have not been independently appraised.*

Our funding requirements and the proposed deployment of the funds are based on management estimates and is subject to change in light of changes in external circumstances, costs, other financial condition or business strategies, and have not been appraised by an independent entity. In the absence of such independent appraisal, or the requirement for us to appoint a monitoring agency in terms of the SEBI Regulations, the deployment of the Issue Proceeds is at our discretion. We cannot assure you that we will be able to monitor and report the deployment of the funds in a manner similar to that of a monitoring agency. Further, we may have to revise our expenditure and funding requirements as a result of variations in costs, estimates, quotations or other external factors, which may not be within the control of our management. This may entail rescheduling, revising or cancelling planned expenditure and funding requirements at the discretion of our Board. Additionally, various risks and uncertainties, including those set out in this "Risk Factors" section, may limit or delay our Company's efforts to use the funds and to achieve profitable growth in our business.

29. *Our Promoters and Promoter Group will continue to retain control over our Company after completion of the Issue, which will allow them to influence the outcome of matters submitted for approval of our shareholders.*

Post completion of the Issue, our Promoters and Promoter Group will continue to hold approximately 64.03% of our post-Issue Equity Share capital. As a result, they will have the ability to significantly influence matters requiring share-holders approval, including the ability to appoint Directors to our Board and the right to approve significant actions at Board and at shareholders' meetings, including the issue of Equity Shares and dividend payments, business plans, mergers and acquisitions, any consolidation or joint venture arrangements, any amendment to our Memorandum of Association and Articles of Association, and any assignment or transfer of our interest in any of our licenses. We cannot assure you that our Promoters will not have conflicts of interest with other shareholders or with our Company. Any such conflict may adversely affect our ability to execute our business strategy or to operate our business.

30. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see "**Dividend Policy**" on page 142 of this prospectus.

31. *We have group companies and entities where our Promoters / Directors are actively involved Our Promoters and Directors are also actively involved in other group companies / entities.*

Our Promoters may devote substantial time and resources to develop and grow the business of other group companies / entities, though Directors and Promoters are involved in other group companies/ entities but the maximum time of Promoter and Directors is devoted in this Company hence there is no probability for lack of leadership. Though we cannot guarantee that our promoters will divide their time and energy between our group companies / entities and us. Though our key managerial personnel are well experienced to carry out the business activities, lack of involvement of our Promoters could have an adverse effect on our goodwill and financial performance.

32. *Increased competition in industries/sector in which the Company operates*

The market for our products is competitive on account of existence of both the organized and unorganized players. Competition occurs generally on the key attributes such as quality of products, distribution network, pricing and timely delivery. Some of our competitors have longer industry experience and greater financial, technical and other resources, which may enable them to adopt faster in changing market scenario and remain competitive. Moreover, the unorganized sector can offer their products at highly competitive prices which may not be matched by us and consequently affect our volume of sales and growth prospects. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition. We operate in a rapidly consolidating industry. The strength of combined companies could affect our competitive position in all of our business areas. Furthermore, if one of our competitors or their customers acquires any of our customers or suppliers, we may lose business from the customer or lose a supplier, which may adversely affect our business, results of operations and financial condition.

33. *The Company's inability to successfully diversify the product offerings may adversely affect its growth and negatively impact the profitability.*

We may attempt to diversify and expand our business operations by diversifying new products. For instance, we intend to undertake production of other varieties of tea i.e. Green Tea and other flavoured teas. We have limited experience and knowledge of carrying out such operations, and our foray into the same may be subject to high barriers to entry, including existing competition and market dynamics. Due to our limited experience, our entry into new business segments may not be successful, which could hamper our growth and damage our reputation. We will be subject to the risks generally associated with new product introductions and applications, including unproven know-how, unreliable technology, inexperienced staff, delays in product development and possible failure of products to operate properly. We may also encounter other additional anticipated risks and significant competition in such markets. We cannot assure you that we will be able to successfully develop our new product lines, and may not be able to successfully develop or introduce new products on a timely basis or at all, which may adversely affect our growth and impact negatively the profitability. We also cannot assure you that we will succeed in effectively implementing new technology in manufacturing new products or that we will recover our investments. Any failure in the development or implementation of our operations is likely to adversely affect our business, results of operations and cash flows.

34. *Our certain assets are offered as security in respect of loan availed from Banks and Financial Institutions by us*

We have provided certain assets as security in respect of loans / facilities availed by us from banks and financial institutions by creating a charge over the same. The total amount outstanding and payable by us as secured loans based on our Restated Financial Information was ₹ 688.86 lakh, as on March 31, 2022. In the event, we default in repayment of the loans / facilities availed by us and any interest thereof, our assets may be subject to forfeiture by lenders, which in turn could have significant adverse effect on our business, financial condition or results of operations. For further details of the secured loans availed by us, please see chapter titled "Financial Indebtedness" beginning on page 176 of this Prospectus.

35. *The Company's inability to retain and hire key employees or maintain good relations with its workforce.*

Our performance is substantially dependent on the performance of our senior management and key employees. Although some of the members of our senior management have been with us for a long period of time, there can be no assurance that any member of our senior management or other key employees will not leave us in the future. The loss of or inability to attract or retain, the services of any of these persons or several of these persons could have an adverse effect on our business. In particular, the expertise, experience and services of our Promoter and other members of our senior management team, including our Key Management Personnel helps us to execute our growth strategy and have been integral to our business. For further details, see —Our Management on page no. 115 of this Prospectus. If one or more of these Key Management Personnel are unwilling or unable to continue in their present positions, we may not be able to

replace them with persons of comparable skill and expertise promptly or at all, which could have a material adverse effect on our business, financial results and prospects. We may take a long time to hire and train replacement personnel when skilled personnel terminate their employment with our Company. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting skilled employees that our business requires. Moreover, we may be required to substantially increase the number of our senior management team in connection with any future growth plans, and we may face difficulties in doing so due to the competition and paucity in the industry for such personnel. Our failure to hire or retain qualified personnel could materially impair our ability to implement any plan for growth and expansion.

36. *Any future issuance of Equity Shares may dilute your shareholdings, and sale of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.*

Any future equity issuances by our Company may lead to the dilution of investors' shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

37. *The Issue Price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price and you may not be able to sell your Equity Shares at or above the Issue Price.*

The Issue price is based on numerous factors and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price are:

- Quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

38. *Managing employee benefit pressures in India may prevent us from sustaining our competitive advantage which could adversely affect our business prospects and future financial performance.*

Employee benefits represent a major expense for us and our ability to maintain or reduce such costs is critical for our business operations. We may be required to increase employee compensation levels to remain competitive and manage attrition, and consequently we may need to increase the prices of our products and services. An increase in wages/ salaries paid to our employees may result in a material adverse effect on our profits in the event that we are unable to pass on such increased expenditure to our users or customers without losing their business to our competitors. Likewise, if we are unable to sustain or increase the number of employees as necessary to meet growing demand, our business, financial condition and results of operations could be adversely affected.

39. *Employee misconduct, errors or fraud could expose us to business risks or losses that could adversely affect our business prospects, results of operations and financial condition.*

Employee misconduct, errors or frauds could expose us to business risks or losses, including regulatory sanctions, penalties and serious harm to our reputation. Such employee misconduct includes breach in security requirements, misappropriation of funds, hiding unauthorized activities, failure to observe our operational standards and processes, and improper use of confidential information. It is not always possible to detect or deter such misconduct, and the precautions we take to prevent and detect such misconduct may not be effective. In addition, losses caused on account of employee misconduct or misappropriation of petty cash expenses and advances may not be recoverable, which we may result in write-off of such amounts and thereby adversely affecting our results of operations. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions in which case, our reputation, business prospects, results of operations and financial condition could be adversely affected.

40. *The COVID-19 pandemic and resulting deterioration of general economic conditions has impacted our business and results of operations in the past and the extent to which it will impact our future business and results of operations will depend on future developments, which are difficult to predict.*

Since first being reported in December 2019, the outbreak of COVID-19 has spread globally. The World Health Organization declared the novel coronavirus disease (“COVID-19”) outbreak a Public Health Emergency of International Concern on January 30, 2020, and a pandemic on March 11, 2020. The rapid and diffused spread of COVID-19 and global health concerns relating to this pandemic have had a severe negative impact on, among other things, financial markets, liquidity, economic conditions and trade and could continue to do so or could worsen for an unknown period of time, that could in turn have a material adverse impact on our business, cash flows, results of operations and financial condition, including liquidity and growth. The extent to which the COVID-19 outbreak impacts our business, cash flows, results of operations and financial condition will depend on future developments, including on the duration and severity of the pandemic, the nature and scope of government actions to contain it, and the potential impact on global and national economic conditions, including inflation, interest rates, availability of capital markets, consumer spending rates, energy availability and costs (including fuel surcharges), which are highly uncertain and cannot be predicted. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and are likely to be severe.

In addition, while the Government of India in coordination with the state governments have started the bulk immunization process or vaccination drive since January 16, 2021, achieving a complete vaccination scale may take significant amount of time. There is also no assurance that the vaccines that are developed will be fully effective and/ or may not have side effects. On March 14, 2020, India declared COVID-19 as a ‘notified disaster’ and imposed a nationwide lockdown announced on March 24, 2020. Subsequently, progressive relaxations have been granted for movement of goods and people and cautious reopening of businesses and offices. Thus, our business was under lock down during the nationwide lock down due to the spread of COVID 19 Pandemic from March 25, 2020 to May 02, 2020. It was also shut down during the month of June 2020 due to widespread COVID – 19 pandemic. Subsequently, our business was operating subject to certain social distancing and additional safety measures, such as, regular temperature checks, regular sanitization, and compulsory use of masks and hand sanitization. While we have not been able to determine any material impact on our operations and results on account of COVID-19, in the previous Fiscal, our Company has witnessed a lower quantum of revenue compared to similar periods in previous years. In addition, throughout March and April 2021, due to an increase in the number of daily COVID-19 cases, several state governments in India re-imposed lockdowns, curfews and other restrictions to curb the spread of the virus. As a result of the detection of new strains and subsequent waves of COVID-19 infections in several states in India as well as throughout various parts of the world, we may be subject to further reinstatements of lockdown protocols or other restrictions, which may adversely affect our business operations. We continue to closely monitor the impact that COVID-19 may have on our business and results of operations.

EXTERNAL RISK FACTORS

1. *Failure to comply with environmental laws, rules and regulations may adversely affect our business operations.*

A failure on our part to adequately comply with applicable environmental laws, rules and regulations, could hamper or adversely impact the operations of our Company, and consequently, could adversely affect the Company and its cash flows and profitability.

2. *Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.*

Our business and industry is regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

3. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short-term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and is taxable at 10%, in excess of Rs. 1,00,000. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of

equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

4. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.*

Taxes and other levies imposed by the Central or State Governments in India that affect our industry include:

- custom duties on imports of raw materials and components;
- Goods and Service

These taxes and levies affect the cost and prices of our products and therefore demand for our product. An increase in any of these taxes or levies, or the imposition of new taxes or levies in the future, may have a material adverse effect on our business, profitability and financial condition.

5. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

6. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and industry in which we operate contained in the Prospectus.*

While facts and other statistics in the Prospectus relating to India, the Indian economy and the industry in which we operate has been based on various web site data and IBEF that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled "**Industry Overview**" beginning on page 67 of this Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

7. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

8. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate

from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

9. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.*

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

10. *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

11. *Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.*

India has experienced natural calamities such as earthquakes, tsunami, floods etc. in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

12. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks in India, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

INDIAN ECONOMY

INTRODUCTION

The Indian economy has fully recovered to the pre-pandemic real GDP level of 2019-20, according to the provisional estimates of GDP released on May 31, 2022. Real GDP growth in FY 2021-22 stands at 8.7%, which is 1.5% higher than the real GDP in FY 2019-20. These figures are associated with stronger growth momentum, indicating increased economic demand. The investment rate in the fourth quarter increased to its highest level in the previous nine quarters. Moreover, capacity utilisation in the manufacturing sector rose in the fourth quarter, as against the third quarter, implying a build-up in demand, which is consistent with the growth objectives of the Indian economy.

Future capital spending of the government in the Indian economy is expected to be supported by factors such as tax buoyancy, streamlined tax system, thorough assessment and rationalisation of the tariff structure and digitisation of tax filing. In the medium term, an increase in capital spending on infrastructure and asset-building projects is set to increase growth multipliers. Furthermore, revival in monsoon and Kharif sowing helped the agriculture sector gain momentum. As of July 11, 2022, the South-West monsoon has covered the entire country, resulting in 7% higher rainfall than the normal level.

India has emerged as the fastest-growing major economy in the world, and is expected to be one of the top three economic powers globally over the next 10-15 years, backed by its robust democracy and strong partnerships.

ROAD AHEAD

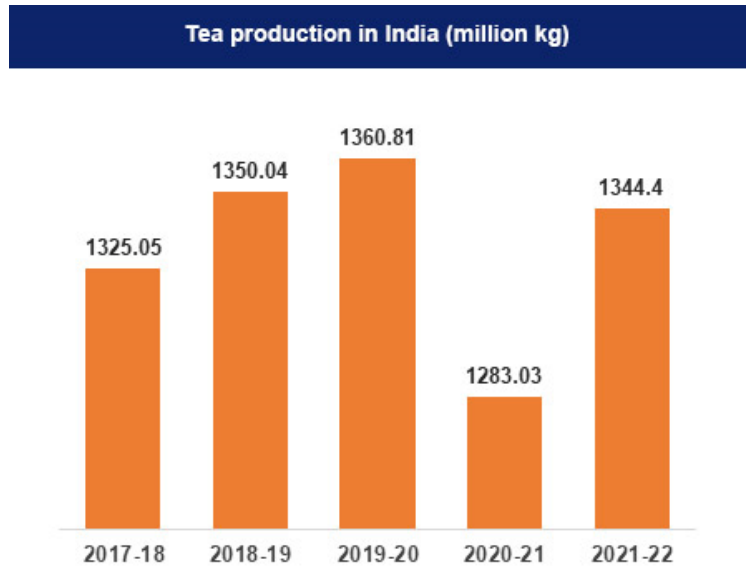

Despite continuing geopolitical concerns, rising interest rates in the US and India and high prices of crude oil and few other commodities, economic activity in India is holding up better than anticipated. Electricity consumption, manufacturing PMI, exports, power supply and other high-frequency indicators indicate that the pace of economic activity has fully recovered from the COVID-19 pandemic shock. Economic growth is anticipated to be fueled by the effective implementation of PLI schemes, development of renewable energy sources while diversifying import dependence on crude oil and bolstering of the banking sector. Recent government initiatives to boost revenue will aid in containing the rise in the current account deficit and ensure that any potential fiscal slippage is adequately contained. Overall, the first ten days of July and June were better than the first two months of FY 2022–23, which is a cause for comfort and even cautious optimism in these testing times. According to a Boston Consulting Group (BCG) analysis, India is expected to be the third-largest consumer economy as its consumption may quadruple to US\$ 4 trillion by 2025 due to changes in consumer behaviour and spending patterns. By 2040, India is anticipated to overtake the US to become the second-largest economy in terms of purchasing power parity (PPP), according to a report by PricewaterhouseCoopers.

TEA INDUSTRY OVERVIEW

INTRODUCTION

India is the second-largest producer of tea globally. Indian tea is one of the finest in the world due to strong geographical indications, heavy investment in tea processing units, continuous innovation, augmented product mix, and strategic market expansion. As of a 2018 survey, a total of 6.37 lakh hectares of area was cultivated in India for tea production. India is also among the world's top tea consuming countries, with 80% of the tea produced in the country consumed by the domestic population. India's total tea production for the calendar year 2020 was 1,257.52 million kg and for the financial year 2020-21 it was 1,283 million kg.

The northern part of India is the biggest producer at about 83% of the country's annual tea production in 2021-22 with the majority of the production coming from Assam followed by West Bengal. The Assam valley and Cachar are the two tea producing regions in Assam. In West Bengal, Dooars, Terai and Darjeeling are the three major tea producer regions. The southern part of India produces about 17% of the country's total production with the major producing states being Tamil Nadu, Kerala, and Karnataka.

GOVERNMENT INITIATIVES

To help the Indian exporters market teas of Indian origin in overseas markets on a sustained basis, the Tea Board of India started a scheme: Promotion for packaged Tea of Indian origin. The scheme provides assistance in promotional campaigns - up to 25% of the cost reimbursement, display in International Departmental Stores, product literature and website development, and inspection charges reimbursement of up to 25% of the charges.

The Tea Board also provides subsidies to the domestic exporters to participate in International Fairs and Exhibitions. The aim is to provide a platform to the exporters to showcase their products in international events for promotion and facilitate the generation of trade opportunities.

Tea Development and Promotion Scheme

This scheme was launched in November 2021 by the Tea Board of India for the period of 2021-26. The objective of this scheme is to enhance the productivity and quality of the production in India. There are seven important components to this scheme,

Indong Tea Company Limited incorporated in the year 1990, owns and operates a Tea Garden under Government lease and is engaged in Tea Plantation & Manufacturing of CTC Tea at Indong Tea Estate situated at Jalpaiguri District of West Bengal and is presently managed under the leadership of Sri Hariram Garg, one of the main promoters of our Company. The Indong Tea Estate is spread over an area of 740.38 Hectares which comprises of Tea Plantation, Tea Factory, Withering Trough House, Officer's Bungalows, Staff Quarters, Labour Quarters, Pump House, General Stores, Dairy Farm etc.

The original Promoter of our Company was Devvrat Gupta, Shyam Saran Gupta and Nagarmal Kanoria. The main business of the company is manufacturing of Tea. The Company is having one Tea Garden i.e. Indong Tea Estate which is producing high quality CTC tea in Dooar's region of Jalpaiguri District of West Bengal. In the year 2014, our Company was taken over by Asian Group promoted by Sri Hariram Garg. Under his Leadership, our company has achieved the economic viability by way of massive investments in all spheres while at the same time taking a keen interest in the welfare of the workers. He invested fresh capital and installed new machinery which resulted in high yield from the plantations produced.

Indong is a magnificent Tea Garden in Western Dooars perched in the foothills of Himalayan Range. Blessed with a bracing climate and a panoramic view of the mountains and meandering rivers, the garden was founded over a century ago by the British Planters under the famous Gillanders & Arbuthnot & Co. Even today, the garden retains many of the British legacies.

Our Company operates under the following verticals:

Our Product Portfolio:

CTC (Crush/Cut, Tear, Curl) Tea:

We Produce only CTC (Crush/Cut, Tear, Curl) Tea. This a method of processing black tea in which the leaves are passed through a series of cylindrical rollers with hundreds of sharp teeth that crush, tear, and curl the tea into small, hard pellets. This replaces the final stage of orthodox tea manufacture, in which the leaves are rolled into strips. Tea produced using this method is generally called CTC tea.

Tea and Tea Plantation:

Tea is the most consumed drink in the world. An often-surprising fact to tea novices is that all variety of teas come from the same plant. Tea is a sub-tropical, evergreen plant native to Asia but is now grown around the world. The tea plant grows best in loose, deep soil, at high altitudes, and in sub-tropical climates.

The tea plant, which grows naturally in the wild throughout much of Asia, is cultivated in a variety of settings from small family gardens to giant estates covering thousands of acres. The best tea is usually grown at higher elevations, and often, on steep slopes. The terrain requires these premium teas to be hand-plucked, and it takes around 2,000 tiny leaves to make just one pound of finished tea. Many of the teas produced for large scale commercial production are grown on flat, lowland areas to allow for machine harvesting. However, it should be noted that some of the finest, hand-plucked teas in the world come from flat fields and lower altitude.

Indong Tea Company Limited has one and only Tea Garden i.e. Indong Tea Estate comprising of 740.38 Hectares out of which 492.09 hectares are under Tea Plantation.

Teas which are processed in the traditional fashion are called Orthodox teas. Orthodox teas generally contain only the top two tender leaves and an unopened leaf bud, which are plucked carefully by hand and then processed using five basic steps, creating varieties of tea. Most Orthodox tea production these days involves a unique combination of age-old methods, such as bamboo trays, to allow the leaves to wither on, and modern, innovative machinery, like leaf rollers carefully calibrated to mimic motions originally done by hand. A true art form, the tea is handled by artisans with often generations of training from the moment of plucking to when the tea is finished. For some teas, one batch can take several days of work.

The other way of making tea is the unorthodox method, of which the most common type is CTC (crush-tear-curl). This much faster style of production was specifically created for black tea. These teas may or may not be plucked by hand. For commercial production, large machine harvesters are used to "mow" the top of the bushes to get the new leaves. CTC production uses a leaf shredder which macerates the leaves (crushing, tearing, and curling them, hence the name) into fine pieces. They are then rolled into little balls. The result looks quite a bit like Grape Nuts cereal, actually. These teas will brew very quickly and produce

and a bold, powerful cup of tea. Crush-tear-curl is usually used primarily in the tea bag industry, as well as in India to create Masala Chai blends (due to their strength and colour).

The three primary components of brewed tea (also called the "liquor") are:

- Essential Oils - these provide tea's delicious aromas and flavours.
- Polyphenols - these provide the "briskness" or astringency in the mouth and are the components that also carry most of the health benefits of tea.
- Caffeine - found naturally in coffee, chocolate, tea and Yerba Mate, caffeine provides tea's natural energy boost.

Tea Manufacturing Process:

Tea manufacture is the process of transformation of freshly plucked green tea leaves to black tea. The process itself is long, requires much care, attention, control and a scientific understanding of the complicated physical and chemical changes in the leaf as the manufacture progresses. There are several distinctive processes that take place in the manufacture of black teas.

Plucking:

The green leaf is harvested on a regular basis at intervals ranging from 5 days to 8 days from each field. The plucking of the soft two leaves and the bud is generally undertaken by well trained women, because of the agility of feminine hands. The manufacture begins from the time the leaf is plucked in the field, and to ensure it retains its freshness, the leaf is sent to the factories from the fields three to four times a day.

Withering:

No sooner it is received at the factory, the leaf is weighed and spread on troughs. Withering, is a process, where conditioned air is circulated between the leaves, initially to remove any surface moisture and thereafter to concentrate and chemically breakdown the tea juices. It takes 10 hours to 14 hours for the physical and chemical changes to take place, and bring the leaf to soft and rubbery condition suitable for the next stage of manufacture.

Rolling:

It is the process by which the leaf is twisted and the leaf cell walls ruptured to bring the juices to the surface of the leaf. The rolling machines have deep jacket, a pressure cap to apply pressure on the leaf, and the table itself has battens and a cone at the center to twist the leaf. There are also the more modern "Rotorvane" machines, which also give the same twisting and turning effect. This process takes about 20 to 30 minutes.

Thereafter to separate the twisted leaf from the untwisted, and to reduce the heat build up, the rolled leaf is passed over a roll breaker. This machine has meshes which separate rolled leaf. The unrolled is put back into the rollers for further rolling whilst the rolled leaf is fermented.

Fermentation:

Of the tea juices is an essential process in the manufacture of black tea. Fermentation is the oxidization of the enzymes in the juices, which bring out the flavour, strength and the colour of the liquors and infusions. Fermentations is generally carried out on glass or tiled tables.

As fermentation progresses there is a colour change of the leaf from greenish to coppery brown. The degree of fermentation is judged by the colour and aroma.

Drying:

The primary objective of drying is the extraction of moisture and the arresting of fermentation. The fermented leaf contains from 45% to 50% moisture. The leaf is passed through driers, which have circuits of trays with perforation, on which are conveyed the fermented leaf.

The drying process takes about 20 to 25 minutes and the initial temperature is about 120 Degrees F(50 Degrees C) and is finished off at a temperature of 200 Degrees F (93 Degrees C) to 220 degrees F (105 Degrees C) . The moisture content of the teas when drying is completed is approximately 2% to 3% and the coppery brown fermented tea particles become black.

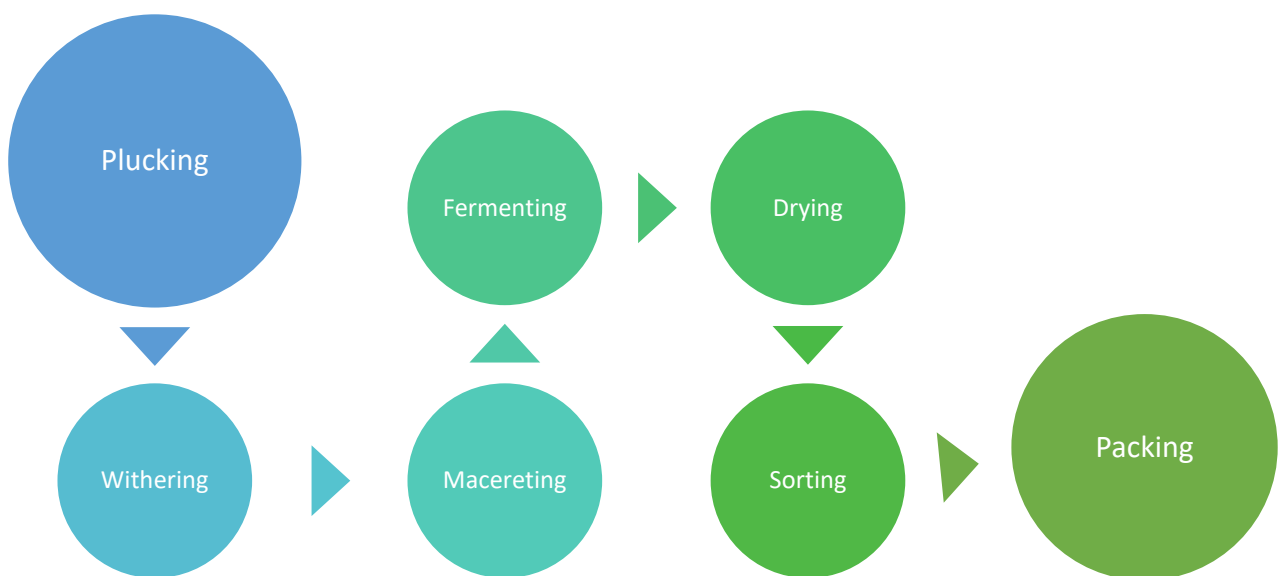

Grading:

The fired teas after cooling are graded / sifted according to size and shape, as the trade demands. The different grades of tea are identified nomenclature. On completion of the grading, teas are stored in airtight bins of boxes. The shifting is carried out on a series of grading and cleaning machines, which have several trays of different mesh sizes, to separate the tea particles to the various grades of tea and to remove the stalk and fibre.

Packing / Dispatching:

Teas are very hygroscopic and rapidly absorb moisture. When sufficient quantities of teas are collected, they are either packed in plywood tea chests of multi-walled aluminium craft paper lined pager sacks and despatched to the auctions or packed into tea packs of various forms for direct export/distribution.

Sales & Marketing:

Our teas are sold majorly around 98% in Auction. Our sales are divided into two parts:

- Sales through Auction
- Direct Sales to Private Buyers

Tea Auction is a means of disposing the teas produced by manufacturers to a wide range of buyers in a competitive manner for fair discovery of price. Public tea auctions have always played a key role as the main vehicle for primary marketing of tea in India. Public tea auctions handle only loose tea in bulk packages The primary stakeholders of the auction system are:

- **Auction organisers**-Responsible for organising and conducting the auction at their respective auction centres.
- **Sellers**- Sellers are the factories who manufacture tea from the green tea leaves. The teas of sellers are sold directly into the auctions at present.
- **Buyers**- Buyers are the purchasers of teas sold into the auction.
- **Brokers**- Brokers are 'auctioneers' of teas who sell tea on behalf of sellers at the auction centres. Brokers undertake various activities related to auction like, sampling & cataloguing of teas, fixation and modification of reserve price on behalf of sellers, pre and post-sale documentation, collection and depositing taxes on behalf of producers, etc.
- **Warehouses**- Warehouses are the places where teas to be sold in the auction are stored.

At present, auctions are being conducted across all the seven centres of the country on a Pan India basis i.e under a single rule of the Board known as "Pan India e- Auction Rule". For participating in auction process, all the stakeholders need to be registered with Tea Board. Apart from Tea Board registration, the sellers and brokers need to be registered with the auction centres where they would like to offer their teas. However, the buyers registered in one auction centre can participate in the bidding process of all the centres across the country.

An electronic auction system consists of three main activities i.e. Pre-auction, auction and Post auction activities.

Pre-Auction Activities:

- The sellers/manufacturers send their produce to warehouses for cataloguing their teas in the auction sale of the nearby auction centre.
- The brokers prepare and publish the auction catalogue within the stipulated time of a sale for a particular centre based on the arrival of teas marked for that centre.
- Brokers also collect samples from those teas for tasting and valuation purpose (base price and reserve price fixation).

Auction Activities

The teas so catalogued are auctioned on scheduled dates in respective auction centres for bidding by the buyers. Random auctioning of lots takes place on the auction day in different sessions. The lots are finally knocked down in the name of the highest bidder.

Post-Auction Activities:

After completion of auctions in a particular day, the successful bidders make full payments of the lots purchased based on the invoices raised on them by the sellers or brokers on behalf of the sellers and obtain the delivery order for taking physical delivery of the teas from the warehouses. The maximum time period available to a buyer for making payments is 13 days (Prompt Date). The amounts received by the sellers/brokers are then finally distributed to all beneficiaries (sellers, brokers, warehouses) in required proportion within next working day. The settlements of payments i.e. receipt and disbursement of auction proceeds takes place through a settlement bank designated for that centre.

INDUSTRY RELATED LAW:

Tea Act, 1953

The Tea industry in India is governed by the Tea Act, 1953. The Tea Act, 1953 was enacted to provide for the control by the Union of the Tea industry, including the control, in pursuance of the International Agreement in force, of the cultivation of tea in, and of the export of tea from, India and for that purpose to establish a Tea Board and levy a duty of excise on tea produced in India.

The Government has proposed to repeal the Tea Act of 1953 and replace them with new regulations.

The government has placed the new proposals in the public domain and sought suggestions and comments from the stakeholders on the proposed regulations. After more than 68 years, some of the existing provisions of the Tea Act, 1953 have become redundant by efflux of time for which it has been proposed to bring a new Act in place of the present Act under which Tea Board will act as a facilitator for the benefit of tea industry. The new legislation – to be called the Tea (Promotion and Development) Act, 2022 which proposes to delete those archaic provisions which have become irrelevant in today’s context and introduce new objectives/functions/powers of the Board so that the Board can act as a facilitator to optimise the development, promotion and research in tea industry and help in improving production, export, quality of Indian tea.

Under the new Act, the Tea Board will be renamed as the Tea Promotion and Development Board. Its remit is also being expanded to cover nine objectives.

The most significant change is that the new Board will be to encourage fair and remunerative prices for growers. The draft bill does not spell out this objective will be achieved. The new Board will also seek to promote sale and consumption of tea including through e-commerce platforms. Dealing in tea will not require a licence from the Board. Instead, the requirement will be registration, indicative of a lower burden of compliance. Some of the punitive sections of the Tea Act are also being replaced, notably section 16, which had empowered the Tea Board to take over any garden if the management was not up to the mark.

Plantation Labour Act, 1951

Plantations Labour Act, 1951 [PLA] which sought to provide for the welfare of labour and to regulate the conditions of workers in plantations. Under this law, the State Governments have been empowered to take all feasible steps to improve the lot of the plantation workers. The passing of PLA brought some improvements in the plantations sector. It also helped in creating conditions for organising the workers and the rise of trade unions.

The Government is planning to repeal the Plantation Labour Act (PLA), 1951 that makes it mandatory for planters to provide workers non-cash benefits such as housing and drinking water. The government has already tabled a new Bill in Parliament. The Bill under discussion has a clause saying "every employer of plantation shall be responsible to provide and maintain welfare facilities through his own resources relating to drinking water, housing, medical, education and toilet to the workers in the plantation or through schemes for such purpose sponsored by the Central or state government, municipality or panchayat for the locality in which the plantation is situated."

The Micro, Small and Medium Enterprises Development Act, 2006 ("MSME Act"):

MSME Act was enacted to provide for facilitating the promotion and development and enhancing the competitiveness of micro, small and medium enterprises. Any person who intends to establish (a) a micro or small enterprise, at its discretion; (b) a medium enterprise engaged in providing or rendering of services may, at its discretion; or (c) a medium enterprise engaged in manufacture or production of goods pertaining to any industry specified in the First Schedule to the Industries (Development and Regulation) Act, 1951 is required to file a memorandum before such authority as specified by the State Government or the Central Government. The form of the memorandum, the procedure of its filing and other matters incidental thereto shall be such as may be specified by the Central Government, based on the recommendations of the advisory committee. Accordingly, in exercise of this power under the MSME Act, the Ministry of Micro, Small and Medium Enterprises notification dated September 18, 2015 specified that every micro, small and medium enterprises is required to file a Udyog Adhaar Memorandum in the form and manner specified in the notification.

While it retains several provisions from the existing legal framework regarding retrenchment, lay-off, closure, industrial disputes, trade union recognition, etc., new requirements have been introduced to simplify as well as add more structure to the existing regulations.

The Code on Wages, 2019:

The new Code replaces the following four laws: (i) the Payment of Wages Act, 1936, (ii) the Minimum Wages Act, 1948, (iii) the Payment of Bonus Act, 1965, and (iv) the Equal Remuneration Act, 1976. OUR HISTORY AND CERTAIN CORPORATE MATTERS

History and Background

Our Company was originally incorporated as “*Indong Tea Company Private Limited*” on December 28, 1990 vide certificate of incorporation bearing no. 21-50506 under the provisions of Companies Act, 1956 issued by the Registrar of Companies, West Bengal. Subsequently, the company was converted into Public Limited Company vide a fresh certificate of incorporation issued by ROC-Kolkata, consequent upon conversion from Private Limited to Public Company dated January 14, 2022 in the name of “*Indong Tea Company Limited*”. The Corporate Identification Number of our Company changed to U01122WB1990PLC050506. For further details, please refer to section titled “*Our History and Certain Corporate Matters*” beginning on page no 111 of the Prospectus.

The original Promoters of our Company was Devvrat Gupta, Shyam Saran Gupta and Nagarmal Kanoria. The main business of the company is manufacturing of Tea. The Company has one Tea Garden i.e. Indong Tea Estate which is producing high quality CTC tea in Dooar’s region. In the year August 2014, our Company was taken over by Asian Group promoted by Sri Hariram Garg. Sri Hariram Garg, put his invigorating efforts to bring back the economic viability by way of massive investments in all spheres while at the same time taking a keen interest in the welfare of the workers. He invested fresh capital and installed new machinery which resulted in high yields of plantations produced.

Indong is a magnificent Tea Garden in Western Dooars perched in the foothills of a Himalayan Range. Blessed with a bracing climate and a panoramic view of the mountains and meandering rivers, the garden was founded over a century ago by the British Planters under the famous Gillanders & Arbuthnot & Co. Even today, the garden retains many of the British legacies.

The Present Owner Mr. Hariram Garg took over the reins in August, 2014 from Devvrat Gupta, Shyam Saran Gupta and Nagarmal Kanoria and from “Day-one” started putting his invigorating efforts to bring back the economic viability by way of massive investments in all spheres while at the same time taking a keen interest in the welfare of the workers. The garden has witnessed the following development activities in slightly over eight years’ time.

- Over 136.68 hectares of tea-growing area, which had become unproductive and was constantly failing to produce the desired crop level, was uprooted and replanted with high yielding and premium quality planting materials. In addition to this, 8.25 hectares of fallow, virgin land has been brought under extension planting. In other words, in less than 5 years’ time, almost 30% of the gardens total area of 483.84 Ha. has been refurbished.
- The irrigation facilities that previously existed in the estate were inadequate, and required drastic improvement. Mr. Hariram Garg successfully implemented a new project with two units, covering an area of almost 196 hectares to extend water supply to more tea areas. This move was highly essential in view of the rapid change in the climatic conditions and recurring droughts in recent years. This apart, extensive infilling in pruned sections are being undertaken every year for augmentation of Production in the quickest possible time. The result is already visible, with a substantial growth in production from 4,58,233 kg of tea production in 2014-15 to over 10,84,690 kg of tea being produced in FY 2020-21.
- The management wanted to reduce its dependence on external planting material and improve its crop quality in a self-dependent fashion. Hence, they put to motion a vermicompost project with a yearly production of over 500 MT. First introduced in 2016, this is the biggest non-commercial project in the entire Dooars Tea Region. The estate also raises a clonal Nursery of almost ten lakh plants every year to ensure using genuine planting materials across its processes.
- The acute manpower shortage poses a looming threat to the tea industry at large. To combat this challenge, the estate introduced Green Leaf Harvesting Machines and Pruning Machines. They found this switch satisfactory, and are gradually increasing the number of said machines.
- During the last couple of years, crores of rupees have been invested towards renovation of the factory building. There is an increased emphasis on modernising and automation of the operational processes to produce top quality tea. The business heads are also commissioning state-of-the-art tea processing machinery.
- The estate has also introduced a well-planned Dairy Farm that can house 80 bovines comfortably. “Deshi” Cows have been brought from Gir, Gujarat to produce A2 quality milk, urine and cow dung known for being replete with medicinal properties. The dairy farm is serving a dual pronged agenda, where, apart from expanding the garden’s product base, is also generating employment for the educated and eligible dependents of the permanent garden worker.
- The connectivity and road communication inside the garden has also witnessed significant improvement, with the completion of over 6 kms of cemented road almost three years ago.
- As part of its labour welfare programme, the management has also constructed a majestic Workers’ Club and a vocational training centre for the workers and their wards. The top management of Indong Tea Estate strongly believes that the core assets of the garden are its workforce and therefore, their welfare and needs should be put above everything else.
- The new management has also put HR policies into action. In order to motivate the workers to perform better, a competitive working environment is being simulated. Hence, ideas such as attendance-based and performance-based

remunerative initiatives are in order. The winners are recognised and rewarded during the Republic Day celebration every year.

- The company has also been permitted to utilise 15% of its total grant area subject to 150 acres for tourism and allied business activities. As per this policy, the company is allowed to encourage tea tourism through plantations, animal husbandry, resorts, wellness centres, educational and medical institutions, cultural/recreational & exhibition centres, horticulture, food processing units and a plethora of other such opportunities that fall within its purview. These proposed additional activities of the estate, when combined advantageously with the present activities of the company, will help enlarge the area of operations of the company.
- For the past several years, 'Indong Gold' Tea has been fetching the highest prices every year, breaking its own previous-year record.

COMPARISON OF THE FINANCIAL PERFORMANCE OF FISCAL 2022 WITH FISCAL 2021

Total Income: During the FY 2021-22 the revenue from operation and other income of the company has been decreased to ₹1992.97 Lacs as against ₹2313.00 Lacs in the FY 2020-21. This increase was mainly due to the following reasons:

A. Production out of Green Leaf harvested from Own Garden:

- i) *Like all other agricultural Crop, “Tea” is also dependent on the vagaries of weather. When the weather condition is conducive to leaf growth, the production increases while in situations with unkind weather, the production drops. In “Tea”, favourable weather primarily means Rainfall when it is needed most for even distribution. There is a popular saying in Dooars Tea Gardens – “More the Rain, More the Crop”. In 2021-22, total yearly rainfall was behind by 27.84” compared to 2020-21 (167.77” as against 195.61”)*

Rainfall during January to April, when the Cropping Season is about to start, is most essential which immensely helps the tea bushes to re-gain health and vigour after the shock it suffered because of different types of pruning operations during winter from November to January. In 2021-22, Indong Tea Garden received less rainfall during the early months of January to April, compared to the corresponding period of 2020-21.

- ii) *In order to maintain the quality of the popular brand “Indong Gold” in a very competitive market, the garden had to resort to much finer plucking of green leaf in 2021-22 as compared to 2020-21 leading to longer time for completing the process*

B. Production out of Bought Leaf:

Due to adverse impact in the tea quality experienced during the previous year, it was decided to procure out sourced leaf very selectively to protect quality and in doing so, the estate made only about 18% of tea out of Bought leaf in 2021-22 as compared to 2020-21 (i.e., 22366 kg. in 2021-22 as against 125542 kg.in 2020-21)

The above factors resulted in a drop in production in 2021-22 when compared to the previous year, i.e., 2020-21.

Total Expenses: The total expenditure excluding depreciation, Interest and tax amount, for the FY 2021-22 has been decreased to ₹375.34 Lacs as against ₹423.76 Lacs in the FY 2020-21. This decrease was mainly due to decrease in volume of operation during the FY as mentioned in revenue from operation above.

Cost of Materials Consumed and Changes in Inventories of Finished Goods: The Cost of Materials Consumed and Changes in Inventories of Finished Goods for the FY 2021-2022 has been increased to ₹40.98 Lacs as against ₹150.55 Lacs in the FY 2020-21. This decrease was mainly due to decrease in volume of operation during the FY as mentioned in revenue from operation above.

Employee Benefit Expenses: The Employee Benefit Expenses for the FY 2021-22 has been decreased to ₹1053.32 Lacs as against ₹1108.97 Lacs in the FY 2020-21. This decrease was mainly due to decrease in volume of operation during the FY as mentioned in revenue from operation above.

Total Income: During the FY 2020-21 the revenue from operation and other income of the company was increased to ₹2306.74 Lacs as against ₹1549.17 Lacs in the FY 2019-20. This change was mainly due to increase in sales in FY 2020-21.

Phased implementation of Unified Payments Interface (UPI)

SEBI has issued the various UPI Circulars in relation to streamlining the process of public issue of inter alia, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by Retail Individual Investors through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Investor had the option to submit the ASBA Form with any of the Designated Intermediary and use his/her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by Retail Individual Investors through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will

be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six Working Days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three Working Days.
